Upon inquiry of Councilman Ellis, Urban Designer Alan Glines said that most of the property on the west side north of Five Points is dedicated to the greenway but about nine parcels could be developed in some fashion, hopefully to enhance the greenway.

Councilman Peterson noted that some gas lines are being installed on the east side of Broadway and wondered if that that been taken into account regarding what can be built on those lots. Mr. Pettibone said that a utility representative is on the Technical Review Committee and we are aware of that. He said the line might impact where the building would sit on the parcel and they might need a greater setback to accommodate the easements. Mr. Shuford agreed that if the gas lines are going in a right-of-way they have to get the appropriate encroachment agreement.

Councilman Peterson expressed concern of losing the existing housing stock on Broadway. He feared that the approximate nine houses on the east side of Broadway would be torn down to build commercial structures or commercial parking and that would intrude more into the residential areas.

Councilman Peterson also expressed concerned about shared parking outside the NCD. Mr. Shuford responded that residentially zoned areas may not be used to provide shared or remote parking spaces for this district, except that non-residential uses in residential districts may be used. For example, if there is a church nearby or some other non-residential use, the shared parking could occur, but it would not be allowed on general residential property.

After Mr. Pettibone said that the text of the wording amendment to establish the NCD was amended after it passed by the Planning & Zoning Commission, Councilman Mumpower asked if that would be an issue. It was the opinion of City Attorney Oast that there is no procedural issue, but it may be something Council would want to be aware of in their deliberations.

Mr. Shuford said that City staff recommends a zoning district that is continuous from downtown to UNC-Asheville. They feel it would be better for a lot of the different goals they were trying to achieve, e.g., transit supported density, neighborhood level services, encouraging a mixed of uses within buildings, encouraging mixed income residential, and more effectively using the infrastructure along that corridor. If Council wishes to separate the vote, or direct staff to look at a different zoning district, they would be happy to do that.

Upon inquiry of Councilman Ellis, Mr. Glines revised some of the standards of the NCD, particularly as they related to grocery stores and drive-throughs. He noted that drive-throughs would require a conditional use permit, which would have to come before City Council for approval.

The following individuals spoke in support of rezoning the entire area of Broadway for various reasons, some being, but are not limited to: strong link from UNC-Asheville to downtown; better front door for UNC-A to signify the important connection between our community and it's public university; foster expanded range of retail services easily accessible and walkable from UNC-Asheville; foster economic development for City; proposed development along Broadway will steer new growth in a part of town where people can walk or bike to jobs, services and school and which is served by public transportation; allow development at densities which can support viable public transportation; and, growth is taking place in the outlying areas in Buncombe County were people have to drive, so to reduce air pollution generated by cars is to redirect some of that growth into areas where people don't have to drive so much to meet daily needs:

Mr. Tom Byers, Executive Assistant to the Chancellor at UNC-Asheville
Mr. David Hill, Architect with Community Corridors, LLC
Mr. Brownie Newman, resident in Montford

The following individuals spoke in opposition of rezoning the entire area of Broadway for various reasons, some being, but are not limited to: difficult to make the area pedestrian friendly with the increased traffic volume; smart growth policies apply to more of a urban setting; south of Chestnut Street is commercial, but north of Chestnut Street is residential and should remain as residential; northern part of Broadway will never be pedestrian friendly due to the wide width of Broadway; more curb-cuts will be dangerous for pedestrians; there should be a buffer between the sidewalk and the traffic for pedestrians to feel safe; buildings in the NCD are not in scale with the residential area; commercial property does not carry as much tax burden as residential property; houses will be torn down for parking; drive-throughs are not pedestrian friendly; if the law regarding the protest petition is vague, it should be applied inclusively, not exclusively; Broadway will never be pedestrian friendly; proposed Health Adventure vision in area will affect the character of the Broadway development and not be affected by it; since you can't build over gas lines, the lots will have less buildable space on them; there are only a couple of buildable lots; homes will be torn down for commercial development; and, huge potential for 1/3 of mile north on Broadway with UNC-Asheville, Botanical Gardens, Health Adventure and the greenway:

Ms. Brandy Boggs, property owner on the south side of Broadway
Mr. Sammy Cox, resident on West Street
Mr. Peter Brezny, resident near the proposed rezoning
Ms. Mary Jo Brezny
Ms. Margaret Muller, resident in the area
Mr. Greg McCoy, resident on Chestnut Street
Ms. Veronika Gunter, resident on North Street
Ms. Amanda Rollins, resident on Monroe Place
Ms. Cynthia Long, resident on Magnolia
Mr. Mike Burton, resident on Mt. Clare
Mr. Bradley Taylor, resident near the proposed rezoning
Ms. Megan Gordon, property owner on Broadway
Ms. Betty Lawrence, attorney (presented portion of 8-27-96 City Council minutes)
Ms. Marilyn Hastings, resident on Stames Avenue

At 8:12 p.m., Mayor Worley closed the public hearing and announced a short recess.

At the request of Councilman Mumpower, Mr. Pettibone responded to questions related to building on small lots, buffer requirements, and side street parking,

Councilman Dunn asked what could be done if parking does become a problem on side streets. Mr. Glines said that the ordinance can be amended and staff can look at creative programs that other cities use.

Upon inquiry of Vice-Mayor Bellamy, Mr. Glines said that it's a goal for the community to have parks and greenways near residential areas to have eyes on the park and for their benefit as well.

Vice-Mayor Bellamy felt that the northern portion of Broadway, on the east side, has great potential for multi-family development but we need a higher density. She felt the best use of that land would be high density residential.

Mr. Shuford said that to rezone the northeast part of Broadway to RM-16 Residential Multi-Family High Density District (RM-16) is only marginally better than the existing RS-8. He explained that it is not a mixed-use district, it has none of the development incentives of the NCD, it has a suburban setback, and it has suburban parking requirements. He did not recommend RM-16 for that area. He suggested that since we don't have anything in our Code that would fit, Council could direct staff to create some sort of urban residential district with some of the site design characteristics that we tried to build in the NCD. He did caution Council that if there were an exclusively residential district near a university, you would see student housing being a potential component of that off-site. That has been a problem for some neighborhoods in North Carolina.

Vice-Mayor Bellamy stressed that we do need more affordable housing and a more variety of housing. We need higher density and more incentives for developments to put affordable units in their developments. She felt that you need residential development to use the commercial services that will be available.

Councilman Peterson felt that since commercial property is more valuable, it would push out the residential development. He felt residential will not be developed in a commercial area. Because the lots are so shallow between North Street and Hillside, that area might be appropriate for an RM-16 zone (with a variance), which would allow some townhouses to be built. There is already a fair amount of residential there now and in some ways we will lose that housing and will have no housing along that street at all.

Councilman Ellis explained why he felt that mixed development would be appropriate on the northeast side of Broadway.

Councilwoman Jones suggested that the Planning staff be directed to develop an urban residential district. In addition, she felt that the north section and the south section of Broadway should be voted on separately.

Councilman Peterson said that because there is some question about the validity of the protest petition, a lawsuit would stop all development for maybe three years. Since he didn't want Broadway sitting idle for another three years and if there was consensus to move forward on the south area of Five Points, he suggested Council vote on that portion. Then Council can either vote to rezone the northern section to NCB, decide to rezone it to RM-16, or we can send it back to Planning.

Councilman Mumpower felt to split the vote would be avoiding the complexity of a hard decision. He did have some hesitancy about rezoning the north end but feels that the entire corridor should be considered as a whole.

Councilman Dunn explained how he was familiar with this area and it has not changed much in many years. He felt that this rezoning will actually increase property values of adjoining properties, but it will take time.

Because Councilwoman Jones wanted to separate the rezonings into two areas, she moved to rezone to NCD from Five Points south to I-240. This motion was seconded by Vice-Mayor Bellamy.

There was some discussion about where to draw the boundary line on the southern portion, e.g., at Ocala Street/Woodrow Avenue area or at Magnolia Street.

City Attorney Oast said that if the protest petition is valid, it applies to the whole corridor and you can't rezone any part of it except by at least a 6-1 vote. As he understands Councilwoman Jones' motion is to, because there is some unanimity on the southern part, she is proposing to rezone that to put that out of the reach of a challenge based on the protest petition. He did feel that Council can separate these two and he doesn't think it would be subject to legal challenge for that reason.

At 9:30 p.m., Mayor Worley announced a short recess.

Councilwoman Jones moved to amend her motion to rezone to NCD the southern portion of Broadway from Magnolia Street south to I-240. This amended motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 196

Councilman Mumpower moved to rezone to NCD the rest of the proposed Broadway Corridor (northern portion of Broadway from Magnolia Street north). This motion was seconded by Councilman Dunn.

Mayor Worley said that he recalled the discussion back in 1986 in that it centered around the recognition that the then current zoning (some of which was commercial) was not suitable the

Broadway Corridor because it was developing and it needed to be developed in a mixed use or commercial/residential mixture. But, Council did not have the tools at the time to do it. Council recognized that and in late 1996 we were in the process of working on the UDO, which we adopted in the spring of 1997, and we knew that it would need staff study. We purposefully rezoned it residential temporarily at that point in time because we did not have the tools nor did staff devote the time to come up with the proper way to do it. Now we have the tools in place and staff had done their work. He also noted that since 1996 there has been no residential development along the Broadway Corridor, nor does he think it's likely to be any significant residential development if the property remained zoned residential. This rezoning is being innovative in the ways that we deal with development to encourage people to better utilize transportation methods, in particular alternative transportation methods. This type of concept fits right in where you increase the density relatively close to the central core of the city by encouraging more walkability and encouraging more dependency on public transportation.

The motion made by Councilman Mumpower and seconded by Councilman Dunn to rezone the rest of the Broadway Corridor to NCD carried on a 4-3 vote with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

City Attorney Oast said that because the ordinance requires an affirmative vote of 2/3 members of Council, a second reading would need to be held at Council's next meeting. Councilwoman Jones noted that she will not be at the next formal meeting on January 28, 2003, and asked if the second reading could be held at the January 21, 2003, worksession. The City Attorney advised that would be appropriate and it was the consensus to hold the second reading at the January 21, 2003, City Council worksession.

ORDINANCE BOOK NO. 20 – PAGE 199

B. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONINGS FOR A SPLIT ZONED 8.84 PARCEL LOCATED AT 1875 HENDERSONVILLE ROAD FROM OFFICE BUSINESS DISTRICT AND RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE (5.22 ACRE PORTION DIRECTLY BEHIND THE INGLES PLAZA) AND OFFICE BUSINESS DISTRICT/CONDITIONAL USE (3.62 ACRE PORTION TOWARDS THE REAR OF THE PARCEL), AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR THE EXPANSION OF A SHOPPING PLAZA

ORDINANCE NO. 2989 - ORDINANCE REZONING AN 8.84 PARCEL LOCATED ON 1875 HENDERSONVILLE ROAD FROM OFFICE BUSINESS DISTRICT AND RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE (5.22 ACRE PORTION DIRECTLY BEHIND THE INGLES PLAZA) AND OFFICE BUSINESS DISTRICT/CONDITIONAL USE (3.62 ACRE PORTION TOWARDS THE REAR OF THE PARCEL)

ORDINANCE NO. 2990 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR THE EXPANSION OF A SHOPPING PLAZA

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 10:00 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a request to rezone an 8.84 parcel located on 1875 Hendersonville Road from Office Business District and RM-6 Residential Multi-Family Low Density District to Highway Business District/Conditional Use (5.22 acre portion directly behind the Ingles Plaza) and Office Business District/Conditional Use (3.62 acre portion towards the rear of the parcel), and issuance of a conditional use permit to allow for the expansion of a shopping plaza and general buffer areas for the office/business portion of the proposed development

On November 1, 2002, John Spake of Spake Realty, agent for Ingles Markets submitted a request to rezone a split zoned parcel from Office Business (OB) and RM-6 Residential Multi-Family Low Density District to Highway Business (HB)/Conditional Use and Office Business (OB)/Conditional Use in the south area of the City.

The conditional use rezoning request is for a parcel known as 1875 Hendersonville Road (PIN No. 9655.09-15-0411) totaling 8.84 acres. The property is located directly behind the Ingles Plaza on Hendersonville Road (City Exhibit 3 – Location Map). The conditional use component of this application will be a site master plan that shows the expansion of the shopping center and some general buffer areas for the office/ business portion of the proposal. The parcel is split zoned at present and is divided nearly evenly between OB and RM-6. The 5.22 acre portion of property directly behind the existing Ingles Plaza acres is proposed to be rezoned to Highway Business District/Conditional Use. The remaining 3.62 acre portion towards the rear of the parcel is proposed to be rezoned Office Business District/ Conditional Use (City Exhibit 3 – Site Plan.

As proposed, the Highway Business portion of the parcel will be the location of the expansion of the Ingles store. Buffer areas and setbacks will be developed per landscape requirements. The areas of the existing parking will be brought up to current standards in the Unified Development Ordinance (UDO) for landscaping and pedestrian access. The exact uses in the Office Business portion of the lot are not determined at this time but will incorporate a landscape buffer adjacent to the rear property line in excess of UDO requirements per the request of the developer. Other landscape buffers for this portion of the proposal will follow the guidelines in the UDO. Access to the Office Business area of the lot will come from Hendersonville Road. The developer has worked with the neighborhood to establish buffer and site design conditions that will make the Office Business portion of the site better fit with surrounding residential development.

The back half of the site is currently undeveloped. Most of the trees at the front area of this portion of the site were logged in the past. There are existing trees at the rear section of the property.

The Highway Business District is established to provide a full range of large scale commercial activities along major thoroughfares. The RM-6 Residential Multi-Family Low Density District is established to provide low density single and multifamily projects that provide a transition between single family and multifamily districts. It is appropriate for areas where environmental constraints and infrastructure limit development potential. The Office Business District is established to reserve an area for the development of office uses and related support uses. This district will reserve areas for medium scale offices and a limited range of business uses and may serve as a transition area between commercial and residential areas. Residential density equals 12 units per acre.

The parcel lies just behind the Hendersonville Road commercial corridor. Access to the property is from Hendersonville Road. Other neighboring parcels in the vicinity fronting on Hendersonville Road are zoned Highway Business. Neighboring parcels to the south of the subject parcel are zoned Office Business. Parcels to the west and north are zoned a variety of residential categories: RM-6 Residential Multi-Family Low Density District, RS-4 Residential Single-Family Medium Density District, and RS-2 Residential Single-Family Low Density District. As stated before, the Highway Business portion of the lot will allow the expansion of the Ingles center on Hendersonville Road. The area of Office Business will provide a buffer between large scale commercial activities on Hendersonville Road and residential areas.

The Technical Review Committee (TRC) met on November 18, 2002, and recommended the conditional use rezoning approach as a way to ensure the compatibility of the proposal.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met provided certain impacts are mitigated through site design modifications and off site road improvements.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

If developed as proposed and conditioned, the development will create no public health or safety problems as determined by TRC review.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The development of the front area of the 5.22 acre portion of the parcel for use by the grocery store will require substantial soil and substrate removal. This excavation can be mitigated by the planting of buffer trees and shrubs according to landscape ordinance requirements. The rear portion of the parcel that will be used for the Office Business uses will not require extensive grading and will also maintain a developer-proposed undisturbed 50' rear landscape buffer from the residential uses. Side buffers setbacks will be up to 25 feet (as determined by requirements of the UDO) and will also be undisturbed save for future points of cross-access if any.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The property is located just off of the Hendersonville Road commercial thoroughfare. Access to the parcel will come from Hendersonville Road eliminating any possibility of residential cut-through access. In addition landscape buffering by commercial uses along residential uses will protect neighborhoods. If developed as proposed and conditioned, the project will not injure the value of adjoining or abutting property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The commercial expansion and the Office Business uses will be in keeping with development patterns found in the adjacent area. This also follows an existing pattern of development for Hendersonville Road and will be in harmony with the scale, coverage and character of the area.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

This proposed development is in keeping with patterns already established in this area and with the large scale mixed commercial uses as identified in the proposed Asheville 2025 Comprehensive Plan.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed development site is located along a major thoroughfare for the City of Asheville and has adequate infrastructure services.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed development at final completion will represent a net gain of approximately 15,000 square feet or retail space in the shopping plaza. This is because existing retail space will be replaced by the larger store. Traffic impacts will be reviewed at final site plan submittal but are not expected to create undue traffic congestion or create traffic hazards. As proposed, the use and access to the 8.84 acre parcel will come from Hendersonville Road and will effectively remove one curb cut from use on Hendersonville Road.

Two separate actions are required by the UDO for conditional use rezoning approval: (1) Council must vote to rezone of the parcel; and (2) Council must vote to approve the project master plan as a conditional use.

The Planning and Zoning Commission voted 5-0 at their December 19, 2002, meeting to recommend approval of the rezoning and conditional use permit with the following conditions. Staff also recommends approval with these conditions.

1. Traffic issues will be fully reviewed at the time of detail site plan submittal. The City Traffic Engineer may recommend a traffic study to include signal timing issues and lane configurations and other issues to be determined upon review.
2. The Office Business zoned area of the parcel should share a driveway with the Ingles shopping plaza to connect to the signalized intersection.
3. No additional driveways will be approved for the project.
4. The Highway Business zoned portion of the parcel will be required to be combined with the existing shopping plaza parcel.
5. The site areas included in the conditional use proposal shall bring the development into compliance with the UDO requirements for landscaping, parking and pedestrian access issues.
6. For the Office Business portion of the project, there shall be no grading or clearing in the landscape bufferyard (where required) in order to protect existing trees. In addition a

minimum of a 'C' buffer will be required adjacent to neighboring residential properties. Future cross-access between Office Business parcels may require driveway connections through the bufferyard. The Highway Business uses will incorporate a landscape bufferyard as required by the UDO.

7. In the Office Business portion of the project, air conditioning units will be located on the ground level; natural building materials will be used to construct any buildings (metal or vinyl siding are not approved materials); buildings will feature residential styled roof pitches; and evergreen plant materials (trees and/or shrubs) will be added to the buffer area adjacent to the residential areas.

Councilman Peterson questioned if the property owner agrees to the 50 foot buffer at the back of the parcel, why it wasn't included as a condition. He felt it was important to include that as a condition since it is the only part that is adjacent to existing residential. Mr. Glines said that it is included on the site plan. City Attorney Oast further noted that we incorporate the site plan into the conditional use permit instead of listing all the conditions on the plan.

Councilman Peterson felt this action was unusual to issue a conditional use permit on the back portion of the property when there is no plan for what will be on that portion of the parcel. Mr. Glines explained that when conditions are listed on the site plan then that is enough to be a conditional use, along with the uses that are allowed as part of the Office Business District. Planning & Development Director further explained in this case we have a developer suggested condition with regard to building height, building style, building materials and that has been communicated to the surrounding neighbors in a fashion that makes them feel comfortable. The neighbors will have a chance to see this when it goes to the Technical Review Committee for a Level II approval for anything that is built on that rear portion. He felt the impacts are covered by the conditions and the site design.

Mr. Glines responded to questions from Councilman Peterson about what would happen to the buffer areas if there a future cross access between the Office Business parcels.

Councilman Peterson was concerned that City Council is not standing firm when they say they want to protect residential districts because in this proposed rezoning Council is rezoning a residential district to office uses.

Mr. John Spake, with Spake Real Estate representing Ingles Markets, spoke in support of the conditional use permit.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 10:20 p.m.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2989 to rezone an 8.84 parcel located on 1875 Hendersonville Road from Office Business District and RM-6 Residential Multi-Family Low Density District to Highway Business District/Conditional Use (5.22 acre portion directly behind the Ingles Plaza) and Office Business District/Conditional Use (3.62 acre portion towards the rear of the parcel). This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 202

Vice-Mayor Bellamy moved to adopt Ordinance No. 2990 to issue the conditional use permit to property located on 1875 Hendersonville Road to allow for the expansion of a shopping plaza, subject to the following conditions with the understanding that the master plan will be incorporated into the permit: (1) Traffic issues will be fully reviewed at the time of detail site plan submittal. The City Traffic Engineer may recommend a traffic study to include signal timing issues and lane configurations and other issues to be determined upon review; (2) The Office Business zoned area of the parcel should share a driveway with the Ingles shopping plaza to connect to the signalized intersection; (3) No additional driveways will be approved for the project; (4) The Highway Business zoned portion of the parcel will be required to be combined with the existing shopping plaza parcel; (5) The site areas included in the conditional use proposal shall bring the development into compliance with the UDO requirements for landscaping, parking and pedestrian access issues; (6) For the Office Business portion of the project, there shall be no grading or clearing in the landscape bufferyard (where required) in order to protect existing trees. In addition a minimum of a 'C' buffer will be required adjacent to neighboring residential properties. Future cross-access between Office Business parcels may require driveway connections through the bufferyard. The Highway Business uses will incorporate a landscape bufferyard as required by the UDO; and (7) In the Office Business portion of the project, air conditioning units will be located on the ground level; natural building materials will be used to construct any buildings (metal or vinyl siding are not approved materials); buildings will feature residential styled roof pitches; and evergreen plant materials (trees and/or shrubs) will be added to the buffer area adjacent to the residential areas. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 204

When Vice-Mayor Bellamy advised Mr. Spake of the deplorable conditions of the Ingles Market on Tunnel Road near the Wal-Mart site, Mr. Spake said that Ingles is well aware of the problems with that store. He said if the existing Wal-Mart moves into their new Super Center on Swannanoa River Road, they hope to move Ingles into the Wal-Mart building.

IV. UNFINISHED BUSINESS:

Councilman Mumpower said that City staff made a strong effort to come up with a plan that worked for as many people as possible. The neighborhoods participated in good fashion and brought their issues to the table and got as much as they could. Then, however, the next step seems to be to come to City Council and get as much as you can, and then if that doesn't work take legal steps and get as much as you can. His concern is that that kind of process doesn't allow cooperative resolution and partnership to help us get to a good place together. It's get what you want using whatever means you can and if every time we start getting neighborhoods and staff and developers together, everyone reserves the right to tromp that process. He has concerns about that and would be interested to see how we might create some initiative around that to see if we can avoid that process in the future.

V. NEW BUSINESS:

A. RESOLUTION NO. 03-14 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Bellamy said that the terms of Kathryn Liss and Cynthia Janes, as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2002.

On December 17, 2002, City Council instructed the City Clerk to arrange the proper paperwork to appoint Dr. James Mullen to serve a three year term, term to expire December 31, 2005, or until his successor has been appointed.

Also on December 17, 2002, City Council instructed the City Clerk to arrange for interviews for Michael Burkhead, Jennifer Simpson-Oliver and Robert Glenn. Ms. Simpson-Oliver withdrew her name from consideration.

Mr. Burkhead received 7 votes and Mr. Glenn received 0 votes. Therefore, Dr. James Mullen and Mr. Michael Burkhead were appointed to each serve a three year term respectively, terms to expire December 31, 2005, or until their successor have been appointed.

City Council noted that they were very impressed with Mr. Glenn's interview and suggested he apply for another board or commission that he may be interested in.

RESOLUTION BOOK NO. 27 – PAGE 303

VI. OTHER BUSINESS:

Pledge of Allegiance

Councilman Dunn suggested that at the beginning of the meeting that we invite the veterans in the room to lead the meeting in the pledge of allegiance.

Claims

The following claims were received by the City of Asheville during the period of December 6-12, 2002: BellSouth (Water), Richard Smith (Streets), Brenda Graham (Water), Grove Park Inn (Transit Services) and Brett Joiner (Water).

The following claims were received by the City of Asheville during the period of December 13-19, 2002: Helmut Lindemann (Fire), Jim Henderson (Sanitation) and Patsy O'Donnell (Fire).

The following claims were received by the City of Asheville during the period of December 20, 2002 – January 2, 2003: BellSouth (Water), BellSouth (Water) and Don Frank (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The City has obtained a copy of a Complaint filed on December 11, 2002, which is described as follows: Timothy Burdine v. Asheville Transit Authority and Asheville City Coach Lines, Inc. The nature of the proceeding is a former employee of transit company is seeking damages under the Americans with Disabilities Act. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English spoke against installing red light cameras at intersections.

Mr. Peter Dawes hoped that the City and the County would work together to find a way to communicate better with the radio system. Mayor Worley stated that he will be meeting with the Chair of the County Commissioners and that is one item for discussion.

Mr. Veronika Gunter hoped that City Council will provide sidewalks to the side streets of neighborhoods that connect to Broadway and follow-through on other ideas discussed with regard to the Broadway Corridor, including mass transit, bike traffic and pedestrian traffic.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:43 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 21, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Amendment to 2003 City Council Meeting Schedule

Summary: Staff recommends to Council that they amend the City Council 2003 meeting schedule to delete the first worksession of each month and meet on the second, third and fourth Tuesday of the month, with the worksession being held on the third Tuesday.

For some time the City Manager and the Mayor have been discussing the possibility of altering the Council's worksession schedule. We currently meet every week of the month, and when a month has a fifth Tuesday, we have a community meeting. Staff proposes that Council delete the first worksession of each month and meet only the second, third and fourth weeks of each month, with the worksession being the third week. This would give us three meetings per month, and in months with five weeks, we would still have a community meeting. The worksession on the third week would function as it does currently, with that information being discussed at the formal Council meeting on the fourth week. Both the City Clerk and the City Attorney have reviewed the idea and do not find any problems. In fact, the City Clerk feels that it might work more smoothly in that public hearings where there are going to be large numbers of people and a long public hearing could be held on the second meeting of the month which may better facilitate space and time needs.

City staff recommends City Council amend their 2003 regular meeting schedule to delete the first worksession of each month.

Councilman Peterson was opposed with the deletion of the first worksession because he felt that City Council doesn't get enough informal briefings from staff as a whole Council. Cutting that in half is not the direction he would like to see Council go in. He felt it was worthwhile to continue having that first worksession because deleting it would tend to have Council less informed. He also preferred two short worksessions to one long worksession.

Councilman Ellis spoke in favor of deleting the one worksession in that Council has many obligations and freeing up one evening would allow them to attend a different meeting.

City Manager Westbrook said that the free Tuesday would allow Council to have an additional day to schedule a special item. In addition, after researching eight other cities in North Carolina, we find that most only have two meetings per month. City staff is always available to Council by phone or to set up a meeting.

Mayor Worley felt that deleting one worksession a month would allow staff to be more efficient with their time. It is incumbent upon Council to contact staff with questions if they need clarification. In addition he felt that deleting one worksession might help City Council to develop practices for better use of their time.

Councilwoman Jones suggested that the first worksession remain and that the development of that agenda be rotated amongst Council members.

Councilman Peterson suggested that the first worksession be devoted to having groups or boards come in to brief Council.

Councilman Mumpower felt the staff access is good, but was concerned about limiting discussions at a worksession with the entire Council. He felt that structure with the agenda is important and that's the Mayor's responsibility. He suggested this matter be remanded back to the Mayor and staff to take into consideration Council's comments.

It was the consensus of Council to not take this forward to the next formal meeting, but to ask for suggestions from Council for better or innovative ways of addressing this issue.

Contract for Chestnut Street Sidewalk Replacement

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Dee Williams and Company Inc., to install sidewalks located along Chestnut Street in Asheville, North Carolina.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along Chestnut Street between Broadway Avenue and Merrimon Avenue. In accordance with N.C. Gen. Stat. Sec. 143-131, informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Candler Concrete Works Inc	0	Yes	Yes	$137,388.00
Land O Sky Concrete				$195,000.00
Precision Contracting	100	Yes	Yes	$ 91,876.00
Dee Williams and Company Inc.	100	Yes	Yes	$ 80,949.59

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Dee Williams and Company Inc. to install sidewalks along Chestnut Street.

Utility Agreement with the N.C. Dept. of Transportation and Budget Amendment

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line on NC 191 from the Parkway to Sardis Road and consideration of a budget amendment to provide $1,320,266 in funding for this project.

The Water Resources Department operates a 6-inch water main along NC 191 (Brevard Road) from Sardis Road to the Blue Ridge Parkway under the policies of the Regional Water Authority, which is owned by the City of Asheville. According to the 1996 Master Plan, this line needs to be upgraded to a 24-inch line. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT and the City staff agreed to relocate the 6-inch water line and upgrade it to a 24-inch main to meet the requirements of the 1996 Master Plan. The NCDOT has estimated the construction cost of this relocation at $1,200,242. An additional 10% needs to be added to include contingency and inspections, so the total amount that needs to be budgeted is $1,320,266.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. The City will not have to pay for this until the project is completed, which is estimated at least 2 years. The City will make three equal annual principle installments. Funding will be included in the Fiscal Year 2004/05 budget.

City staff recommends City Council approve a resolution authorizing the Mayor to execute a Utility Agreement with NCDOT and a budget amendment to provide funding for the NC191 relocation project.

Upon inquiry of Vice-Mayor Bellamy, City Manager Westbrook explained betterment vs. non-betterment costs.

Budget Amendment to Water Bond Fund (Water 29 Fund) for N.C. Dept. of Transportation US 74 Phase I Relocation Project

Summary: The consideration of a budget amendment to reprogram funds to increase funding for N.C. Dept. of Transportation (NCDOT) US 74 Phase I relocation project.

There is currently $1,108,600 in 2001 Revenue Bonds budgeted in the 29 Fund (Water Bond Fund) for US 74 Phase I. The total cost of the project including construction, engineering, and inspections is $1,579,869, which results in a shortfall of $471,269.

There are several projects that are being funded with 2001 Revenue Bonds that came in under budget, so these excess funds will be reprogrammed as follows to provide adequate funding for US 74 Phase I: Bee Tree Crossing decreased $17,515, Biltmore Viaduct decreased $66,300, US 74 Phase II decreased $220,694, Master Plan Improvements decreased $22,929, and Bee Tree Spillway decreased $143,831. The total amount of funds to be reprogrammed is $471,269.

Staff recommends that City Council approve a budget amendment to reprogram funds to increase funding for NCDOT US 74 Phase I relocation project.

Federal Representation Services

Summary: The consideration of a resolution granting authority to issue a Request for Proposals soliciting federal representation services for the City of Asheville; and, approval of a budget amendment, in the amount of $30,000, to cover anticipated costs for associated fees for the remainder of Fiscal Year 2002-03.

A growing trend among local governments seeking increased federal funding to support major local projects is to position those projects within federal appropriations bills. The practice is referred to as "earmarking". Earmarking is growing in popularity because, as a funding source, it differs from grants in several important ways. First, the amount of money available through earmarks can, potentially, be significantly greater than that available through grants. Second, grants may have eligibility criteria that can limit access to the program, particularly by small urban areas like Asheville whose demographic and economic statistics reflect a relatively prosperous area. As example, City staff recently identified 14 state and federal grant programs for which Asheville did not qualify. Further, with both approaches may come the requirement of matching funds. The amount and source of matching funds can be less of an issue with earmarks with the additional benefit of the return being, potentially, much greater.

A third distinction between the two approaches is the process used for obtaining funds. Earmarks are obtained directly through the appropriations process whereas a grant is secured indirectly, via a competitive process, through a federal agency program or other federally funded source. While earmarking is, in some ways, a simpler approach than grants, in that it avoids lengthy forms and bureaucratic processes, it is also more complex. Securing funds for a specific multi-million dollar local project within a larger appropriations bill requires knowledge and familiarity with the "technical mechanics" of the federal appropriations process, the agencies and their personnel involved, diligent and persistent project tracking, and, most importantly, a relationship with Members of Congress and their staff.

Often, though not always, lobbyists are retained for this purpose – to work within the system to position communities to more readily succeed within the earmarking process and, to represent that and other interests of their client within the federal system. Those other interests could include technical assistance with grants as well as expertise with legislative and regulatory matters.

A recent local example of a project receiving earmarked federal funds (without a lobbyist involved) would be Congressman Charles Taylor's securing $4.3 million to help build a regional fiber optic network – an infrastructure project deemed critical for advancing the region's ability to retain and attract high technology businesses. A recent North Carolina example where a lobbyist has been successfully employed is in Brunswick County. There, a group of local governments called the Brunswick Beaches Consortium, using a Washington D.C. based lobbyist, in concert with their Congressman, secured $58 million for North Carolina beaches, the Wilmington Port, and Intracoastal Waterway projects through the House Appropriation Committee on Energy and Water.

Whether a lobbyist is used or not, the involvement of the district representative and staff in support of an appropriation are critical for success.

That said, entities interested in aggressively pursuing earmarking as part of a consistent long-term strategy typically do retain representation. Raleigh and Greenville are two examples of North Carolina municipalities that have recently contracted with a lobbying firm and are pursuing this strategy.

In the year 2000, the Office of Management and Budget reported nearly 6200 earmarked projects. For 2001, another group that tracks federal spending identified over 6300 projects for that budget year. The trend continues to grow among state and local governments seeking help for major public investments in infrastructure, community and economic development, housing, environmental and transportation related projects.

City staff recommends authorization for issuing the Request for Proposal for Federal Representation Services and a corresponding budget amendment to cover the estimated fees associated for the service for the remainder of Fiscal Year 2002-03.

Councilman Mumpower said that the concept makes sense, but felt that since City Council is now making efforts to open up communication with other resources, we should first explore those options, especially since we will be setting ourselves up to possibly funding the lobbyist for three years at an approximate $250,000 cost.

Councilman Dunn lead the discussion about communication with Congressman Taylor and it was his understanding that Congressman Taylor doesn't want the City to get a lobbyist. He wants us to submit to him a menu of projects from the City and County to see what he can do for us. Economic Development Director Mac Williams felt that a lobbyist would enhance the City's ability to communicate with Congressman Taylor on what we need and the best way to do it.

Since Congressman Taylor's staff is not available to scour the various sources and agencies for funding opportunities, the lobbyist can help us do that research. He agreed that good communication with Congressman Taylor is a key and vital component of the entire process. He felt that employing a lobbyist is to make our relationship with Congressman Taylor's office more effective.

Councilman Mumpower said it was his understanding that Congressman Taylor's office doesn't work strongly with a lobbyist but that the Congressman's staff would take a facilitator roll on Congressman Taylor's behalf.

Mayor Worley said that earmarking is important and that it's the prevalent way of obtaining federal money. We know what our needs are but what we don't know is where these needs fit in on the intricate federal budget process. He got no indication from Congressman Taylor that the City should not hire a lobbyist, but he was clear that he wants to be a direct conduct for us during the budget process. He felt that hiring a lobbyist would compliment the relationship with Congressman Taylor, not threaten it.

It was the consensus of Council to have this item as new business on the next formal meeting agenda.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda, if not otherwise instructed.

WNC HISTORICAL ASSOCIATION ACHIEVEMENT AWARD

Mr. Stephen Jones, President of the WNC Historical Association, spoke about the importance of the Asheville-Buncombe Historic Resources Commission and presented Ms. Martha Fullington, Chair of the Commission, an achievement award.

On behalf of City Council, Mayor Worley agreed that the Asheville-Buncombe Historic Resources Commission has done an outstanding job and this recognition proves that.

UPDATE ON THE FEASIBILITY STUDY OF TRAFFIC SIGNAL SYSTEM

City Engineer Cathy Ball said that this presentation is provided as an update on the feasibility study for the Traffic Signal System in the City of Asheville, which includes both City owned and maintained signals as well as N. C. Dept. of Transportation (NCDOT) signals and which study evaluates Intelligent Transportation Systems (ITS), which can reduce traffic congestion.

Asheville has benefited from coordinated traffic signal control for a little more than 30 years. Installed in the late 1960s, the first coordinated system was confined to the heart of the Central Business District (CBD). Connected by hardwire cable, the controllers' capabilities were very limited by current standards, but the system served the City well for nearly 20 years. Computerized traffic signal control was introduced to Asheville in 1988. Like its predecessor, the existing system is essentially a CBD system controlling the signals at 45 intersections. Additionally, the NCDOT operates three arterial signal systems within the Asheville city limits.

HNTB was retained by the NCDOT to conduct a Traffic Signal System Feasibility Study for the City of Asheville. The purpose of the study was to evaluate the existing computerized traffic signal systems being operated in Asheville both by the City and the NCDOT. The study was to also make recommendations concerning the eventual replacement of the City's system and the feasibility of consolidating all the various, smaller systems into one. Additionally the study evaluated the need for expansion of the traffic control system to include the entire urbanized area.

Staff will be requesting funds to pay for the City's portion of the upgrades in the Fiscal Year 2004 Capital Improvement Budget, which portion will be approximately 15-20% of $13 Million. The funds for the project will be requested over a three-year period.

Mr. Bo Winstead, with HNTB North Carolina who is under contract with the NCDOT to prepare the study, summarized the feasibility study into nine major tasks which: analyzed existing traffic conditions, inventoried and analyzed existing traffic signal equipment, defined traffic control system configuration needs, defined control system functional requirements, reviewed alternative candidate systems, defined communications needs for the candidate systems, reviewed communications alternatives, developed detailed cost estimates for the candidate systems and performed a Congestion Mitigation and Air Quality funding analysis, and developed an implementation plan. He then explained the development of the candidate system configurations, the candidate system evaluation, the design and construction cost estimates and outlined the anticipated benefits, which include reduced travel time and lower fuel consumption.

Mr. Winstead said a final report was prepared, which detailed the results of the Signal System Feasibility Study and which presented a recommended plan for proceeding with the detailed design and implementation of the system.

The candidate system recommended for implementation is System C, the Distributed Control System, with a capacity to control up to 500 intersections. It is anticipated that system design will require approximately 15 months. Following design, the NCDOT will advertise and award the contract for system implementation and provide construction administration with assistance from the City. The City's responsibility in the implementation phase will include participation in tests of all equipment and an active role in inspecting equipment installations. The City must play a key role in the coordination of the contractor's activities with utilities and with other City agencies.

The recommended system will use a combination of local intersection controllers with internal communications, a master computer system located at the traffic control center, and a communications network of fiber optic cable. The master computer will store all coordinated signal timing patterns, which will be downloaded to the local controllers for implementation. The master computer will instruct the local controllers as to which timing pattern should be implemented for each of the various control sections. Control sections will be easily configured by system operators to achieve optimum timing strategies totally independent of fiber optic cable routes and communications channel assignments. Timing plan changes will be implemented either on a time of day basis or on a traffic responsive basis to accommodate unpredictable variations in traffic flow. The master computer system will continuously monitor the operation of all intersections once each second and immediately report any detected malfunctions to system operators.

At some point prior to the completion of a new system, the City and NCDOT will need to reach an agreement on how the system and its signals will be maintained. It is recommended that the City assume total responsibility for all signals interconnected to the proposed system, including any outside the City limits.

Based on an ideal ratio of 35 traffic signals for each technician, the City would need approximately six technicians to maintain 220 signalized intersections. It is recommended that at least initially, these six technicians consist partially of permanent City staff and the remainder to be electrical contractor employees. Using contract employees will give the City the opportunity to better manage costs as maintenance needs fluctuate.

To help offset the City's added costs for maintaining some 220 traffic signals is the NCDOT's long-standing policy of reimbursing municipalities for costs associated with signal maintenance on state-system roadways. The reimbursement rates have recently been revised to more closely represent current costs and became effective October 1, 2002.

Timing plan development work is a crucial element of any traffic signal system; so crucial in fact, that the NCDOT requires regular timing plan refinements by all municipalities receiving funds for system maintenance. The City could have this work performed in-house by either the Operations Manager or one of the System Operator/Technicians, or choose to have the work performed by a private engineering firm.

Mr. Winstead and Ms. Ball answered various questions from Council, some being, but are not limited to: who will monitor the system, what will the cameras be used for, does the City have a dedicated maintenance schedule, are there any percentages available for reducing air pollution, what is the percentage of total cost for camera equipment, and is there a timeframe for installation.

Councilman Mumpower suggested that at the next update the numbers be translated into percentages on all figures.

Mr. Dan Baechtold, Metropolitan Planning Organization Coordinator, responded to various questions from Councilman Peterson about how this project fits in with the Transportation Improvement Plan.

Councilwoman Jones requested that the Capital Improvement Process be reviewed separately during the budget deliberations.

Mayor Worley said that no action is needed by City Council for this update.

ORDINANCE NO. 2988 – ORDINANCE TO REZONE PROPERTY ON THE BROADWAY CORRIDOR NORTH OF MAGNOLIA STREET TO NEIGHBORHOOD CORRIDOR DISTRICT

City Attorney Oast said that because this ordinance failed to pass by 2/3 of the City Council at it's first reading (which was held on January 14, 2003), a second reading is required.

Vice-Mayor Bellamy moved to waive the rules and proceed to take formal action at this meeting. This motion was seconded by Councilman Ellis and carried unanimously.

The second and final reading of Ordinance No. 2988 to rezone property on the Broadway Corridor north of Magnolia Street to Neighborhood Corridor District carried on a 4-3 vote with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 – PAGE 199

DOWNTOWN SOCIAL ISSUES TASK FORCE

Councilman Ellis, liaison to the Downtown Commission, said that at the January Downtown Commission meeting, they put together a list of proposed members of the Downtown Social Issues Taskforce as requested by City Council. The goal of this group will be to look at the issues, do any necessary research and develop a comprehensive plan to address the full range of social problems in downtown Asheville. The Commission's intent is to have representation from the full spectrum of affected parties.

He presented City Council with the following proposed members: K. Ray Bailey, A-B Technical College; Phyllis Fiscus, Asheville Area Chamber of Commerce; Jim Ellis, Asheville City Council, Holly Jones, Asheville City Council; Kim MacQueen, Asheville Downtown Association; Dwight Butner, Asheville Downtown Association (also Restaurateur); Appointee from Asheville First; Larry Thompson, Blue Ridge Mental Health; David Gantt, Buncombe County Commissioners; Mary Geitner; Downtown Business; Pat Whalen; Downtown Commission; Bill Byrne; Downtown Commission; Richard Fort, Downtown Commission; Mike McCreary; Downtown Resident, Jessica Brower, Downtown Resident; Patricia Kaufman, District Court Judge; Al Williams; Asst. District Attorney; Appointee from Eagle Market Streets Development Corp.; Pete Peery; First Presbyterian Church; Martha Are; Homeless Coalition/Hospitality House; Appointee from Malaprops; Breana Leslie, Mosaic Vortex; Rodney Swink, NC Office of Urban Development (to serve as a resource); Jim Van Hekke, Pavilion International Drug Treatment Center; Jim Mullen or Appointee from UNC-Asheville; Doug Orr or Appointee from Warren Wilson College; Vic Howard, Western Carolina Rescue Mission; and Mickey Mahaffey. With staff support from: Asheville Police Department, City Development Office and City of Asheville Legal Division.

Councilman Ellis said that Mr. Pat Whalen has volunteered to chair the first few meetings until the Task Force appoints a chair.

After discussion of additional members, it was the consensus of Council to send back to the Downtown Commission a strong recommendation to include an appointee from the affordable housing community, an appointee from Asheville-Buncombe Community Christian Ministry, two representatives from the homeless community (by asking Martha Are and Vic Howard), and a representative from the Council of Independent Business Owners.

Councilwoman Jones stressed that when Council changes a group that they understand that City Council has full authority to make other changes and recommendations to their final outcome.

Councilwoman Jones also recommended that the entire Task Force could be subdivided into sub-groups to work on different issues, like panhandling, or sleeping on public property.

Councilman Ellis said that the Task Force will be setting up their own guidelines and was sure that other individuals not on the Task Force would be called into service as different needs arise.

Councilman Ellis said that Commission intends for the Task Force to begin meeting, possibly in February, and that he would report back to Council on when an update report will be forthcoming from the Task Force.

BOARDS/COMMISSIONS

It was the consensus of City Council to have the Mayor write a letter to each of the four members whose terms on the Board of Adjustment expire on January 21, 2003, to ask if they would be willing to serve an additional 90 days until we have a clearer picture on how the proposed joint planning area will affect the Board of Adjustment and its makeup.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) appoint Angela Heitter, John E. Cram and Keith Hargrove to the Asheville-Buncombe Historic Resources Commission; and (2) reappoint Cathy Ball to the Metropolitan Sewerage District Board.

MISCELLANEOUS

Councilman Dunn said that the firefighters have asked to make a presentation at City Council's retreat on the firefighters supplemental pension. City Manager Westbrook said that it would be up to Council if they wanted it on the retreat agenda, but he would prefer to see the material first. After discussion, Councilman Dunn asked that the City Clerk review the minutes of the past year to find out the status of the firefighters' actuarial study because he recalled that the City Manager was instructed to have the study performed. City Manager Westbrook didn't recall being instructed to have the study performed and that it was his understanding that it would be brought up as part of the upcoming budget process and that the cost for the study was between $1,000 to $5,000. It was the consensus of Council to review the minutes for clarification. Also, it was the consensus of Council to instruct the firefighters to submit any information or presentation material to the City Manager first so he will be prepared to respond to Council's questions.

Councilwoman Jones said that she would be absent from the January 28, 2003, City Council formal meeting.

CLOSED SESSION

At 6:02 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Betty Donoho, County of Buncombe, Western North Carolina Air Pollution Control Agency, City of Asheville, and Buncombe County Schools. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Ellis and carried unanimously.

At 6:20 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT

Mayor Worley adjourned the meeting at 6:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 28, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Diana Hollis Jones

INVOCATION

Councilman Mumpower gave the invocation.

ADDITION TO THE AGENDA

Councilman Mumpower asked that the Housing Authority funding issue be added under "Other Business."

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 14, 2003, AND THE WORKSESSION HELD ON JANUARY 21, 2003

B. RESOLUTION NO. 03-15 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH DEE WILLIAMS AND COMPANY INC. FOR THE CHESTNUT STREET SIDEWALK REPLACEMENT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Dee Williams and Company Inc., to install sidewalks located along Chestnut Street in Asheville, North Carolina.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along Chestnut Street between Broadway Avenue and Merrimon Avenue. In accordance with N.C. Gen. Stat. Sec. 143-131, informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Candler Concrete Works Inc	0	Yes	Yes	$137,388.00
Land O Sky Concrete				$195,000.00
Precision Contracting	100	Yes	Yes	$ 91,876.00
Dee Williams and Company Inc.	100	Yes	Yes	$ 80,949.59

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Dee Williams and Company Inc. to install sidewalks along Chestnut Street.

RESOLUTION BOOK NO. 27 – PAGE 304

C. RESOLUTION NO. 03-16 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A UTILITY AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO RELOCATE A WATER LINE ON NC 191 FROM THE PARKWAY TO SARDIS ROAD

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line on NC 191 from the Parkway to Sardis Road and consideration of a budget amendment to provide $1,320,266 in funding for this project.

The Water Resources Department operates a 6-inch water main along NC 191 (Brevard Road) from Sardis Road to the Blue Ridge Parkway under the policies of the Regional Water Authority, which is owned by the City of Asheville. According to the 1996 Master Plan, this line needs to be upgraded to a 24-inch line. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT and the City staff agreed to relocate the 6-inch water line and upgrade it to a 24-inch main to meet the requirements of the 1996 Master Plan. The NCDOT has estimated the construction cost of this relocation at $1,200,242. An additional 10% needs to be added to include contingency and inspections, so the total amount that needs to be budgeted is $1,320,266.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. The City will not have to pay for this until the project is completed, which is estimated at least 2 years. The City will make three equal annual principle installments. Funding will be included in the Fiscal Year 2004/05 budget.

City staff recommends City Council approve a resolution authorizing the Mayor to execute a Utility Agreement with NCDOT and a budget amendment to provide funding for the NC191 relocation project.

RESOLUTION BOOK NO. 27 – PAGE 305

D. ORDINANCE NO. 2991 - BUDGET AMENDMENT AMENDING THE WATER MAJOR CAPITAL PROJECTS FUND (WATER 35 FUND) TO PROVIDE FUNDING FOR THE WATER LINE ON NC 191 FROM THE PARKWAY TO SARDIS ROAD

Summary: See Consent Agenda Item "D" above.

ORDINANCE BOOK NO. 20 – PAGE 209

E. ORDINANCE NO. 2992 - BUDGET AMENDMENT TO THE WATER BOND FUND (WATER 29 FUND) FOR N.C. DEPT. OF TRANSPORTATION US 74 PHASE I RELOCATION PROJECT

Summary: The consideration of a budget amendment to reprogram funds to increase funding for N.C. Dept. of Transportation (NCDOT) US 74 Phase I relocation project.

There is currently $1,108,600 in 2001 Revenue Bonds budgeted in the 29 Fund (Water Bond Fund) for US 74 Phase I. The total cost of the project including construction, engineering, and inspections is $1,579,869, which results in a shortfall of $471,269.

There are several projects that are being funded with 2001 Revenue Bonds that came in under budget, so these excess funds will be reprogrammed as follows to provide adequate funding for US 74 Phase I: Bee Tree Crossing decreased $17,515, Biltmore Viaduct decreased $66,300, US 74 Phase II decreased $220,694, Master Plan Improvements decreased $22,929, and Bee Tree Spillway decreased $143,831. The total amount of funds to be reprogrammed is $471,269.

Staff recommends that City Council approve a budget amendment to reprogram funds to increase funding for NCDOT US 74 Phase I relocation project.

ORDINANCE BOOK NO. 20 – PAGE 211

F. RESOLUTION NO. 03-17 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: The consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

The terms of Jody Kuhne and Fred Eggerton, as members on the Asheville-Buncombe Historic Commission, expired on July 1, 2002. In addition, Laurie Tollman has resigned her position, thus leaving an unexpired term until July 1, 2004.

On January 21 2003, it was the consensus of City Council (1) to appoint Angela Heitter and John E. Cram to each serve until July 1, 2005, or until their successors have been appointed; and (2) to appoint Keith Hargrove to serve the unexpired term until July 1, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 306

G. RESOLUTION NO. 03-18 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Summary: The consideration of appointing a member to the Metropolitan Sewerage District Board to serve a three year term.

The term of Cathy Ball, as a member on the Metropolitan Sewerage District Board, expired on January 19, 2003.

On January 21, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Cathy Ball to serve a thee year term, term to expire January 19, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 307

H. RESOLUTION NO. 03-19 - RESOLUTION SETTING A PUBLIC HEARING ON FEBRUARY 11, 2003, ON AMENDMENT TO CONTRACT FOR PURCHASE OF ROYAL PINES PROPERTY

Summary: The consideration of a resolution setting a public hearing on February 11, 2003, for proposed amendment to installment purchase contract for Royal Pines property.

Back in 1999, the City received an opportunity to acquire the Royal Pines Pool and Park properties from Jake Rusher, the man who had owned and operated the facility for many years.

Mr. Rusher wished for the property to be used as a park, and agreed to provide some financial incentives if the City would purchase the Royal Pines property subject to this restriction.

For legal reasons, it was necessary to involve a third party in this transaction, and the Trust for Public Land (herein "TPL"), a park land acquisition and conservation organization that the City had worked with extensively on other acquisitions, became that third party. Essentially, Mr. Rusher has conveyed the property to TPL, and TPL holds title to the property for the benefit of the City. The City is paying for the property pursuant to an installment contract, and the purchase will be complete in 2004, at which time the City will acquire title to the property. The total purchase price was $925,000. The City is responsible for maintenance, upkeep and taxes on the property while this contract is in operation.

Recently, the City has been presented with an opportunity, working through TPL, to acquire some property adjacent to the Royal Pines property that will provide for a better configuration of the park lands. In exchange for that acquisition, the City proposes to convey some of the Royal Pines property not needed for the park to the owner of an adjacent shopping center which needs the property for parking.

The appraised value of the Somerville Parcel is $93,500; the appraised value of the Park Outparcel is $127,000. The difference of $33,500 is proposed to be credited against the City's remaining obligation in its contract to purchase the Royal Pines Property, less one half the cost (estimated at $12,500) of repairing a collapsed storm drain on the Park Outparcel.

In sum, this transaction would give the City a better configuration for its park, enable the adjacent shopping center to expand its parking, and reduce the overall cost to the City.

Even though TPL holds title to the property, since the City will ultimately be the owner, we have suggested that we amend our installment contract with TPL to allow for this transaction, following 10 days notice and a public hearing as required by law for secured transactions involving land. This was the process followed when we entered into the contract in 1999.

The action needed from Council at this time is to establish the date for the public hearing, which we recommend for your February 11 meeting. Provided Council approves this transaction, we will amend our contract, and TPL will proceed with the closing, which must occur on or before February 28.

If Council wishes to set the date for the public hearing on this proposed amendment, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 27 – PAGE 308

I. RESOLUTION NO. 03-20 – RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE GOVERNOR'S CRIME COMMISSION FOR A MOBILE DATA TERMINALS GRANT TO IMPROVE FIRE OPERATIONS

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Crime Control and Public Safety for funds through Governor's Crime Commission to assist with the purchase and installation of Mobile Data Terminals for Asheville Fire Rescue.

Mobile Data Computers are a useful tool for public safety agencies for many reasons. In North Carolina, several public safety agencies use them to interface with the State's Criminal Justice Data Information Network. They will help Asheville Fire Rescue operate more efficiently by allowing them to write incident reports on the scene and by enabling them to download pre-emergency plans on their way to an emergency call. This will improve the safety of the fire personnel and will help reduce the property damage of structures involved.

Asheville Fire Rescue is requesting $120,000 in grants from the Governor's Crime Commission for twenty Mobile Data Terminals. The grant requires a $2,000 match per terminal, or $40,000 total. The match is available from the Fiscal Year 2003-2004 Operating Budget of Asheville Fire Rescue.

The Fire Rescue Department recommends the City to apply for and enter into an agreement for grant funds to assist with the purchase and installation of Mobile Data Computers.

RESOLUTION BOOK NO. 27 – 309

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO INITIALLY ZONING RECENTLY ANNEXED PROPERTY KNOWN AS THE ARDEN AREA RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT, COMMUNITY BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT, INDUSTRIAL DISTRICT, INSTITUTIONAL DISTRICT AND HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2993 - ORDINANCE ZONING THE RECENTLY ANNEXED PROPERTY KNOWN AS THE ARDEN AREA RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT, COMMUNITY BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT, INDUSTRIAL DISTRICT, INSTITUTIONAL DISTRICT AND HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:05 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance establishing the initial zoning of the area known as the Arden Annexation Area to RS-8 Residential Single-Family High Density District, Community Business II District, Institutional District, Highway Business District, Industrial District, and Commercial Industrial District. This public hearing was advertised on January 17 and 24, 2003.

The Arden Annexation Area, which consists of 128.3 acres and 114 properties, was annexed by the City on June 30, 2002. The area is one bounded by Royal Pine Drive to the north, Sweeten Creek Road to the east, Buck Shoals Road to the south, and Hendersonville Road to the west. The area is located south of existing zoned City limits.

Currently, there is Highway Business zoning to the north of the area along Hendersonville Road and within pockets of individual parcels further south along Hendersonville Road. RS 4, RM 8, and RM 16 constitute the remainder of the southern portion of the existing zoned City jurisdiction.

Land uses in the area include single-family residential in the northern part of the area, a variety of commercial uses along Hendersonville Road, a place of worship and commercial uses along the northern section of Sweeten Creek Road and a mix of industrial and commercial uses to the south along Sweeten Creek Road.

The Planning and Development Staff recommends approval of the proposed initial zoning for the area for a number of reasons. In the northern section of the annexation area the RS-8 District provides for the smaller lot single-family residential development, while Commercial Business II allows the smaller scale commercial uses located at the intersection of Royal Pine Drive and Sweeten Creek Road as well as the commercial properties that follow south down Sweeten Creek Road. Commercial Business II also provides a good fit for the smaller commercial properties along Hendersonville Road, especially for those long but shallow properties toward the south of the area that would benefit from the reduced front and rear setbacks that CB II allows compared to other commercial districts. Highway Business would allow the continuance and possible expansion of commercial businesses for two parcels near the intersection of Hendersonville Road and Sycamore Drive.

The Institutional District would allow the existing place of worship located on the 7.5-acre parcel on Sweeten Creek to continue and expand as needed while the proposed Commercial Industrial zoning on the parcel to the west and south would allow for the continuation and expansion of the variety of commercial and industrial uses presently located on it. Further south, Industrial zoning is proposed for six parcels, which either contain uses permitted in the Industrial District or are large parcels that are wholly or mostly vacant, providing promising tracts for future industrial development. The remaining parcels located at the southeastern section of the annexation area are proposed to be zoned Commercial Industrial, which would accommodate the current mix of commercial and industrial uses which include a gas station/convenience store, an office, mini-storage, and warehousing.

The Planning and Zoning Commission voted 5-0 to recommend approval of the proposed initial zoning for the Arden Annexation Area to RS-8 Residential Single-Family High Density District, Community Business II District, Institutional District, Highway Business District, Industrial District, and Commercial Industrial District. The Planning and Development staff also recommends the initial zoning.

Mr. Karl Koon spoke in support of the initial zoning to the Highway Business District.

Mayor Worley closed the public hearing at 5:12 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2993. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 214

B. PUBLIC HEARING RELATIVE TO INITIALLY ZONING RECENTLY ANNEXED PROPERTY KNOWN AS REYNOLDS MOUNTAIN AS RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT

ORDINANCE NO. 2994 - ORDINANCE ZONING THE RECENTLY ANNEXED PROPERTY KNOWN AS REYNOLDS MOUNTAIN AS RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:13 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance establishing the initial zoning of the unzoned portions of the area known as the Reynolds Mountain Annexation Area to RS-2 Residential Single-Family Low Density District. This public hearing was advertised on January 17 and 24, 2003.

The unzoned portions of the Reynolds Mountain Annexation Area, which consist of 10.75 acres and 27 lots or portions of lots, were annexed by the City on June 30, 2002. The areas are located directly north of existing zoned properties that comprise the Reynolds Mountain Subdivision.

The remainder of the Reynolds Mountain annexation area is zoned RS 2 and is currently being developed as a residential subdivision. Properties to the north are unzoned parcels that are under Buncombe County jurisdiction.

RS-2 reflects the existing zoning to the south that comprises the zoned portion of the Reynolds Mountain Subdivision and allows for the further development of the subdivision as planned. The existing RS-2 zoning boundary corresponds to previous property lines that existed prior to the subdivision of parcels for the Reynolds Mountain development. RS-2 zoning would fill in the unzoned portion of the development that was annexed to the City earlier this year.

The Planning and Zoning Commission voted 5-0 to recommend approval of the proposed initial zoning for unzoned portions of the Reynolds Mountain Annexation Area to RS-2 Residential Single-Family Low Density District. The Planning and Development staff also recommends establishing the initial zoning of RS-2 for the unzoned portions of the Reynolds Mountain Annexation Area.

When Councilman Dunn inquired about the ridge law, City Attorney Oast said that he would provide Council with a report regarding the Mountain Ridge Protection Act and how it applies to Asheville. Planning & Development Director explained the hillside development ordinance.

Mr. Fred English was disappointed in the development on Reynolds Mountain.

Mayor Worley closed the public hearing at 5:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2994. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 217

C. PUBLIC HEARING RELATIVE TO INITIALLY ZONING RECENTLY ANNEXED PROPERTY KNOWN AS THE BEST INNS ON TUNNEL ROAD AS HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2995 - ORDINANCE ZONING THE RECENTLY ANNEXED PROPERTY KNOWN AS THE BEST INNS ON TUNNEL ROAD AS HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:22 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance establishing the initial zoning of the area known as the Best Inns Annexation Area to Highway Business District. This public hearing was advertised on January 17 and 24, 2003.

The Best Inns Annexation Area, which consists of a 4.3-acre property, was annexed by the City on June 30, 2002. The area is located directly east and south of existing zoned properties at the intersection of Tunnel Road (US 70) and Porter Cove Road.

Surrounding zoning includes Highway Business zoning to the north across Tunnel Road/US 70 and River District to the west across Porter Cove Road. Unzoned properties in Buncombe County's jurisdiction are located to the east and south. The property is currently used as a lodging facility/motel.

The Planning and Development staff recommends Highway Business zoning for the annexation area because it allows for the continuation and possible expansion of the existing lodging facility and mirrors the existing zoning across US 70, which accommodates similar automobile-oriented commercial uses.

The Planning and Zoning Commission voted 5-0 to recommend approval of the proposed initial zoning for the Best Inns Annexation Area to Highway Business District. The Planning and Development staff also recommends establishing the initial zoning of Highway Business District for the Best Inns Annexation Area.

Mayor Worley closed the public hearing at 5:23 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2995. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 220

D. PUBLIC HEARING RELATIVE TO ANNEXING PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS THE PISGAH VIEW ROAD AREA

ORDINANCE NO. 2996 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE ANNEXATION OF PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS THE PISGAH VIEW ROAD AREA

Mayor Worley opened the public hearing at 5:23 p.m.

The consideration of an ordinance extending the corporate limits to include property located east of Pisgah View Road and identified as the Pisgah View Road Area. This public hearing was advertised on January 17, 2003.

The applicant, Lynda Rerych, has submitted an annexation petition for the Pisgah View Road Area, which is located on the eastern side of Pisgah View Road near the intersection of Pisgah View Road and Deaverview Road. This area is contiguous to the existing corporate limits, being bordered to the south by the city.

The area proposed for annexation consists of 8.624 acres and is currently mostly undeveloped except for a house located in the northwest corner of the area along Pisgah View Road. The area is a portion of 9.806-acre property that is owned by the applicant, 1.182 acres of which are already located within the corporate limits. This area is within the extraterritorial jurisdiction and currently zoned RM-8 Residential Multi-Family Medium Density District.

City services will begin on the effective date of the ordinance. The effective date of the ordinance will be May 28, 2003, per the applicant's request.

City staff recommends City Council adopt an ordinance annexing property located east of Pisgah View Road and identified as the Pisgah View Road Area.

Mayor Worley closed the public hearing at 5:25 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2996. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 222

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-21 - RESOLUTION GRANTING AUTHORITY TO ISSUE A REQUEST FOR PROPOSALS SOLICTIING FEDERAL REPRESENTATIVE SERVICES

ORDINANCE NO. 2997 - BUDGET AMENDMENT FOR FEDERAL REPRESENTATION SERVICES

Economic Development Director Mac Williams said that this is the consideration of a resolution granting authority to issue a Request for Proposals soliciting federal representation services for the City of Asheville; and, approval of a budget amendment, in the amount of $30,000, to cover anticipated costs for associated fees for the remainder of Fiscal Year 2002-03.

A growing trend among local governments seeking increased federal funding to support major local projects is to position those projects within federal appropriations bills. The practice is referred to as "earmarking". Earmarking is growing in popularity because, as a funding source, it differs from grants in several important ways. First, the amount of money available through earmarks can, potentially, be significantly greater than that available through grants. Second, grants may have eligibility criteria that can limit access to the program, particularly by small urban areas like Asheville whose demographic and economic statistics reflect a relatively prosperous area. As example, City staff recently identified 14 state and federal grant programs for which Asheville did not qualify. Further, with both approaches may come the requirement of matching funds. The amount and source of matching funds can be less of an issue with earmarks with the additional benefit of the return being, potentially, much greater.

A third distinction between the two approaches is the process used for obtaining funds. Earmarks are obtained directly through the appropriations process whereas a grant is secured indirectly, via a competitive process, through a federal agency program or other federally funded source. While earmarking is, in some ways, a simpler approach than grants, in that it avoids lengthy forms and bureaucratic processes, it is also more complex. Securing funds for a specific multi-million dollar local project within a larger appropriations bill requires knowledge and familiarity with the "technical mechanics" of the federal appropriations process, the agencies and their personnel involved, diligent and persistent project tracking, and, most importantly, a relationship with Members of Congress and their staff.

Often, though not always, lobbyists are retained for this purpose – to work within the system to position communities to more readily succeed within the earmarking process and, to represent that and other interests of their client within the federal system. Those other interests could include technical assistance with grants as well as expertise with legislative and regulatory matters.

A recent local example of a project receiving earmarked federal funds (without a lobbyist involved) would be Congressman Charles Taylor's securing $4.3 million to help build a regional fiber optic network – an infrastructure project deemed critical for advancing the region's ability to retain and attract high technology businesses. A recent North Carolina example where a lobbyist has been successfully employed is in Brunswick County. There, a group of local governments called the Brunswick Beaches Consortium, using a Washington D.C. based lobbyist, in concert with their Congressman, secured $58 million for North Carolina beaches, the Wilmington Port, and Intracoastal Waterway projects through the House Appropriation Committee on Energy and Water.

Whether a lobbyist is used or not, the involvement of the district representative and staff in support of an appropriation are critical for success.

That said, entities interested in aggressively pursuing earmarking as part of a consistent long-term strategy typically do retain representation. Raleigh and Greenville are two examples of North Carolina municipalities that have recently contracted with a lobbying firm and are pursuing this strategy.

In the year 2000, the Office of Management and Budget reported nearly 6200 earmarked projects. For 2001, another group that tracks federal spending identified over 6300 projects for that budget year. The trend continues to grow among state and local governments seeking help for major public investments in infrastructure, community and economic development, housing, environmental and transportation related projects.

City staff recommends authorization for issuing the Request for Proposal for Federal Representation Services and a corresponding budget amendment to cover the estimated fees associated for the service for the remainder of Fiscal Year 2002-03.

Councilman Ellis felt that a lobbyist is more in line of a research analyst which can provide us with information that we can go to our representatives with to make sure Asheville gets its share of the federal dollars available. He felt that even though there was no guaranteed potential return that we do guarantee ourselves a better chance at success.

Mayor Worley envisions not pure lobbyist efforts because we have a good and growing relationship with Congressman Taylor. He does not envision using any federal representation services to lobby our Congressman because Council will do that, and Council needs to have the information to say this is where something fits in the federal budget and this is our need that fits in that budget. He felt we can't ask Congressman Taylor's staff to do that heavy-duty research for us. The Congressman and his staff is very receptive for us to bring specific things to them and we can help them by finding those things that best fit the federal/national priority. He felt this investment will bring returns many times over.

Mr. Williams felt hiring a lobbyist will certainly not replace Council's personal contact with Congressman Taylor but will just better prepare Council for when they do meet with him. The lobbyist can also help us with the relationships of other congressmen and senators that have a part to play in getting something approved.

Upon inquiry of Councilman Peterson, Mr. Williams explained that trend that is moving away from straight grant programs to more earmarking. He said that Asheville is challenged to get access to typical grant funds. He felt that this strategy is more gaining in popularity is that the amount of money from a grant, relative to the need that the money is needed for, is small. Asheville has needs that require more significant funding more quickly. The earmarking fund of funds tend to address a higher level of needs.

Councilman Peterson asked if the lobbyist we hire can guide us on applying for grants too. Mr. Williams said we can ask them to provide that service as well. What they will do for us is what we ask them to do in the contract. The level of service that we have will be a direct result of what you want to include in the proposal and that would be what we ask them to price their service for.

Mr. Williams pointed out an instance in Napa Valley, California, where earmarking of funds for a flood control project resulted in $140 Million in private investment.

When Councilman Mumpower asked if there were any downsides to hiring a lobbyist, Mr. Williams said that we can obtain earmarking of funds without a lobbyist and while a lobbyist significantly increases our ability to be successful, a lobbyist cannot guarantee anything.

Upon inquiry of Councilman Mumpower, City Manager said the $30,000 for the remainder of this fiscal year will come from General Fund Contingency. Along those lines, Mr. Williams said that this is a three-year recommendation so we can establish a relationship with a lobbyist and for the lobbyist to understand our needs and begin to work our needs into the federal agenda for appropriate sources, and also to judge whether the approach is an effective approach and whether or not results are substantial enough to do it. Cost estimates for the coming year are between $60-100,000 but he stressed this will be a Council decision each year, not a three-year commitment.

Mr. Fred English felt that City Council did not need to hire a lobbyist, but just to communicate with Congressman Taylor.

Mr. Edwin Crisp, resident in Malvern Hills, spoke in opposition of the City hiring a lobbyist.

Ms. Lynda Rerych spoke in support of the City hiring a lobbyist in that there is money available and we need knowledgeable people to speak on our behalf. Congressman Taylor will also be advocating for us as well.

When Councilman Peterson asked if our funds would be used campaign contributions or passed onto the elected officials in some way, Mr. Williams responded that they would be for a contract that is written to provide specific services and specific deliverables. He couldn't image that that would be part of what we would expect our funding to be supporting.

When Vice-Mayor Bellamy asked about benchmarks, Mr. Williams said Council can set their own benchmarks. He said that in working in consultation with the lobbyist, it will be determined what our needs are, what the potentials are, what to expect and then to set a goal for achieving that.

Vice-Mayor Bellamy asked what a feasible timeframe would be to reassess this issue. Mr. Williams said that in most contracts there is a reporting process set up where the vendor is required to come in at intervals during the term of the contract and provide progress reports. Also, the way a contract is structured is that there are certain activities that they need to arrange with us and those kinds of things are all benchmarks that we can use to determine if the relationship is a good one and if they are being effective on our behalf.

Upon inquiry of Vice-Mayor Bellamy, Mr. Williams said there is no predetermined agreement with anyone to work with any specific firm or individual at this point. This action will allow a Request for Proposals to be sent out. Then we will receive responses and then select some firms or individuals for interviews and eventual hire. The timeframe for the federal appropriations process is already underway and time to be effective in this cycle is pressed.

Vice-Mayor Bellamy felt the City needed to hire someone who has experience, who has knowledge in our subject areas, who has experience with cities our size, and who has proven results.

Councilman Mumpower asked if we can contract with a firm to specifically address one need, which would result in a much lower cost factor. Mr. Williams said that is possible and it will be left up to Council to make that determination. Whether our agenda is a single issue or more, our Request for Proposals will be multi-faceted to gage what their broad capabilities are.

Councilman Ellis moved to adopt Resolution No. 03-21. This motion was seconded by Vice-Mayor Bellamy.

Councilman Peterson said that we do need to look at this also in a regional approach.

City Manager Westbrook said that one of the things staff hopes is to be able to talk with our representatives, both congressmen and a lobbyist, about what all our needs are and then let them help us select what may line up with federal priorities. One of the needs that we hope that lines up strong is economic development. He doesn't feel like we, as an area, receive what may other areas that have hired lobbyists, in term of economic development, have received. We have so many attributes in Asheville that would tend to lead that way. We are a hub city for the area, we have challenges in terrain, and we have a river that runs through the center of the City. We have many of the things that those types of programs are designed to boost economic development and take the negative and turn it around.

Councilman Peterson would like to see Council explore the option of putting street car lines back down Haywood Road going out to west Asheville and maybe other areas. Public transit, road improvements, technology and infrastructure are some of the areas that a great deal of federal funds have gone to and we aren't getting our share of that.

Councilman Dunn said that he could not support the motion at this time. He felt that Congressman Taylor is a "heavy-hitter" and he can do a lot for us. He felt we didn't need to hire someone to tell us what our needs are when we have two Economic Development Commissions, the Chamber of Commerce, the Land-of-Sky Regional Council, UNC-Asheville and Western Carolina, etc. He felt we needed to get those groups involved to help us develop a menu of items and take that list to Congressman Taylor first. Then he can review it and give us his advice. He felt strongly that that is the first thing Council should do before hiring a lobbyist. Then, after that, he may be willing to support hiring a lobbyist. But, he felt it was unrealistic for us to get millions of dollars from the federal government, especially when our economy is struggling. He said Buncombe County had a lobbyist but fired him because all they needed to do was meet with Congressman Taylor and he obtained several million dollars for them. He felt spending $300,000 was too much when we can't even pave streets in Haw Creek. He felt that if Council does allocate this money, then something else in the budget needs to be cut.

Councilman Mumpower felt this is a hazy issue. He does understanding timing is an issue. He likes the idea of supporting positive staff initiatives and he likes the idea of the City being pro-active. He understands that hiring an advocate for us can help us get grants and get earmarked funds. However, we are talking about $200-250,000. He felt this is a fairly distasteful system as it circumvents our existing system. That's why we have representatives and why we have tne system of government that we have. Just because this is the way the system works doesn't mean it's a good system. He said that he is struggling with the pragmatics of it and the principal aspect of it. He also felt Council was getting the "cart before the horse" in that we just recently opened the door for a closer relationship with Congressman Taylor and he has responded in good and encouraging fashion. We have not opened those doors with our two senators and those are the people we elected to represent us. He wished we had more time to stimulate those relationships before we add on another layer. We have a responsibility to be careful with people's money and he has a personal concern that we do everything we can to increase people's confidence in City government.

Vice-Mayor Bellamy felt the City should work on a dual track, which is continue to work with Congressman Taylor and hire a lobbyist. We may not like the way the system works, but earmarking is how the government is running their business now. Since grants are becoming scarce, we need to find creative ways to meet housing needs, etc.

When Councilman Dunn asked if we would be contacting Congressman Taylor, Mr. Williams said that as has been the case through this entire process, we are very sensitive to Congressman Taylor and his needs. We want to work with him in a way that he is comfortable with and happy with. It's very important that the lobbyist has a good relationship with Congressman Taylor and members of his staff.

Upon inquiry of Councilman Dunn, City Manager Westbrook said that City staff will send out the Request for Proposals; get the responses back; try to evaluate those on behalf of the Council; interview the firms, along with those on Council who want to be a part of it; and then make a recommendation to Council on who to award the contract to. We will be paying a sum of money to a firm for a specific service.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

The motion made by Councilman Ellis and seconded by Vice-Mayor Bellamy carried on a 4-2 vote, with Mayor Worley, Vice-Mayor Bellamy, Councilman Ellis and Councilman Peterson voting "yes" and Councilman Dunn and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 27 – PAGE 310

Councilman Ellis moved for the adoption of Ordinance No. 2997. This motion was seconded by Vice-Mayor Bellamy.

Upon inquiry of Councilman Dunn, Mr. Williams explained that the $30,000 is the contract amount usually paid in monthly installments.

The motion made by Councilman Ellis and seconded by Vice-Mayor Bellamy carried on a 4-2 vote, with Mayor Worley, Vice-Mayor Bellamy, Councilman Ellis and Councilman Peterson voting "yes" and Councilman Dunn and Councilman Mumpower voting "no."

VI. OTHER BUSINESS:

Housing Authority

At the request of Councilman Mumpower and by Council consensus, Mayor Worley said that he would write a letter to our representatives supporting a $3.3 million appropriation from the federal government to the Housing Authority. It was Vice-Mayor Bellamy understanding that the Housing Authority has been contacted to say that they will receive 90% of the requested amount.

City Employee Commendations

Councilman Ellis read a letter from Becky Anderson, Director of Handmade in America, commending the City's sidewalk crew that has been working on the sidewalks on Central Avenue. In addition, words of praise were given to police officers, street crews, waterline repair crews, firefighters, and sanitation workers.

Claims

The following claims were received by the City of Asheville during the period of January 3-16, 2003: Ruth Farmer (Streets), Hobart Whitman (Water), Jeremy Ballard (Water), Jordan Lance (Water), Catherine Taylor (Water), Michael C. Clymer (Water), Robert Jones (Water), Bernard Cumings (Water), Fidelity Risk Sol. (Water), Betty B. Williams (Water) and Robert Davis (Water).

The following claims were received by the City of Asheville during the period of January 17 – 23, 2003: William J. Brown (Water), James H. Finley (Water), Joyce Boone (Water), Laura Samal (Water) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

The City filed a Complaint on January 8, 2003, which is generally described as follows: City of Asheville v. Beers Construction Co. of Winston-Salem, Inc. The nature of the proceeding is money owed for damage to water line. This matter will be handled in-house.

The City was served with a Petition for Certiorari on January 14, 2003, which is generally described as follows: Texas Roadhouse Holdings, LLC, Paul M. Young v. City of Asheville. The nature of the proceeding is to reverse the ruling by the Board of Adjustment related to remote parking provisions under Section 7-11-1 (e) (2) of the UDO. This matter will be handled in-house.

The City filed the following lawsuit on January 15, 2003, which is generally described as follows: City of Asheville v. Bernard Coates and Katheryn Coats. The nature of the proceeding is violation of Section 7-18-2 of the UDO regarding mandatory injunction to cease operating a lumber/salvage yard as a nonconforming use; order of abatement; money owed for civil penalties; and lien on property. This matter will be handled in-house.

The City was served with a Petition for Certiorari on January 21, 2003, which is generally described as follows: CC&J Enterprises Inc. and James O. Efland, President v. City of Asheville and the Board of Adjustment. The nature of the proceeding is to review the decision of the Board of Adjustment.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Avram Friedman, Executive Director of The Canary Coalition, presented City Council with a packet of information and said that City Council voted unanimously on July 10, 2001, in support of the passage of the North Carolina's Clean Smokestacks Act, but the Clean Smokestacks Act is now in danger of being severely undermined. He asked City Council to adopt a resolution to intervene in favor of a Petition for Review, in the federal Court of Appeals, District of Columbia, against the recent decision by the EPA to revise the New Source Review provision of the Clean Air Act. Ten states and many municipalities have now joined this lawsuit and the deadline for joining the lawsuit is January 30, 2003. He said an independent Petition for Review can be filed as late as March 3, 2003. The addition of Asheville and hopefully the State of North Carolina, would enhance the chances of success against this damaging EPA decision. Vice-Mayor Bellamy felt that it was very important to continue the initiative and doesn't want to see Council's direction be lessened in any way. City Attorney Oast said that he would try to find out what the State of North Carolina is doing since it is a state law.

Mr. Fred English spoke against using red light cameras at intersections.

Mr. Christopher Fielden, representing Community Supported Development, shared with Council several observations regarding the old Sayles Bleacheries site where the proposed Riverbend Marketplace development is to be built. In summary, he felt the Unified Development Ordinance (UDO) has been violated. They requested an immediate halt to all work on all phases of the project until the appropriate City departments have evaluated the activity on this site and assured the public that all applicable articles of the UDO are being enforced. Mayor Worley briefly responded that after a site visit with the City Engineer, he was assured that the developer is in compliance with the conditional use permit issue.

Ms. Betty Lawrence, Asheville resident, congratulated Mayor Worley on being named to Governor Easley's new Transportation Demand Management Committee, which will look for ways to use transportation to improve air quality.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

310.

Friday – January 31, 2003
Saturday – February 1, 2003
City Council Annual Retreat Kellogg Center, Hendersonville, N.C.

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Friday, January 31, 2003

Update on Fiscal Year 2002-03 Goals and Objectives – On each of the Council's goals for 2002-03, City Manager Westbrook explained the actions that have been taken to date.

Budget/Financial Forecasts

Finance Director Bill Schaefer updated City Council on the available and minimum fund balance.

Budget Director Ben Durant updated City Council on the State budget. He then explained the major revenue categories, which consisted of property tax; sales tax; intergovernmental revenue; licenses and permits; charges for service; and investment earnings. He then reviewed the General Fund revenue projection summary. Budget issues for Council consideration include: health insurance expenses, two fire stations, property insurance, additional retirement benefits for firefighters, transportation signal feasibility improvements and 1% to 401k.

After City Council discussion, City Manager Westbrook was asked to give Council more information on the budget issues including cost estimates. He explained that the options would be the additional retirement benefits for firefighters and the 1% to the 401k. He explained that during the budget process he would be able to give Council the cost estimates.

Update on Comprehensive Plan

Planning & Development Director Scott Shuford updated City Council on the City Plan 2025. After reviewing the background, he then explained the demographic changes.

Land use and transportation issues include (1) Asheville has tripled in land area over the past 50 years; (2) Asheville's density (persons per square mile) has decreased by 50% over the past 50 years; and (3) we have moved from an urban development pattern to a suburban development pattern. The costs associated with a suburban development pattern are that it's expensive to serve, has environmental problems and encounters convenience costs. A house that costs $150,000 in Asheville can be purchased for $116,000 in Greensboro according to a Coldwell Banker study.

He explained how mass transit requires 8-16 units per acre for efficient service, how Asheville's development pattern forces reliance on the automobile, that NC DOT projects that 80% of the traffic on the new I-26 Connector will be local traffic, and that there is a huge pressure on arterials and interstates. Current development patterns are not sustainable and we need to seek opportunities to recover an urban development pattern.

Land use ideas include (1) incorporate "green building" concepts; (2) preserve open space, historic resources; (3) promote affordable housing; (4) more urban villages; (5) higher density/greater zoning flexibility; and (6) coordinate land planning with Buncombe County.

Transportation ideas include: (1) missed use development pattern; (2) transit; (3) synchronize traffic signals; (4) walkable and bikeable infrastructure; and (5) construct I-26 Connector consistent with community recommendations.

He then reviewed the economic trends in Asheville. Economic development ideas include (1) high tech workforce; (2) reserve industrial land; (3) better use of our educational institutions; (4) develop and improve standards for new economy: arts and crafts; low impact; (5) use quality of life to attract/retain business; (6) regional industrial development; (7) more innovation in "branding" – creating an image for Asheville; (8) create a "wired" community and affordable (high speed internet access) band with focusing on grass-roots e-business; and (9) support local businesses.

Air quality ideas include (1) high density, mixed use, walkable communities; (2) regional cooperation to reduce air pollution; (3) lobby for solutions to air quality problems; (4) develop, improve and enforce industry standards for air pollution; (5) promote mass transit; (6) City fleet use alternative fuels; and (7) green building techniques.

Water quality ideas include: (1) City to continue to work with RiverLink to develop/implement master plan; (2) regional cooperation to reduce water pollution; (3) develop, improve and enforce industry standards for water pollution; (4) improved stormwater management regulations; and (5) green building techniques.

Mr. Shuford then explained smart growth. Long range planning includes transformation of commercial corridors; transit-supported density; walkable and bikeable; tax equity; strong neighborhoods; parks, open space and conservation areas; compatible, high quality infill development; strong Center City; flexible development regulations; improved intergovernmental coordination; effective City services; regional economy; development in character with community; compact urban form; clean air and water; skill-based entrepreneurial economy; green building tools and incentives; effective public participation; affordable housing; preservation of historic and natural resources; and connected, efficient and attractive streets.

Throughout the presentation, City Council discussed the importance of a comprehensive plan and the need for neighborhood and commercial involvement.

Update on Metropolitan Planning Organization/Transportation Management Area Issues

Metropolitan Planning Organization (MPO) Coordinator Dan Baechtold updated City Council on the federal mandate to expand the Metropolitan Planning Organization for transportation.

The Transportation Advisory Committee plans to adopt an expanded MPO boundary at their regularly scheduled meeting in February. The new MPO will include all of the municipalities in Buncombe, Henderson and Haywood Counties, as well as portions of unincorporated areas in each county. This change is part of an established federal process to redefine urban areas and MPO boundaries. Every ten years the MPO boundary must be redefined based on the results of the U.S. census. At their meeting on January 16th, will determine a recommended boundary and enter into a one-month comment period. At the time of the writing of this staff report, the draft boundary has not been determined. However, copies of the draft boundary will be available by the time of the City Council retreat.

The new MPO will consist of 17 local governments. After the new boundary is adopted, MPO staff and the TAC will work on adoption of a new Memorandum of Understanding (MOU) to be signed by all of the local governments. The MOU will establish the membership and voting procedures for the committees that make up the MPO. The TAC hopes to have a new MOU adopted by August of 2003. One of the major issues to be worked out in the MOU is the issue of weighted voting. Many of the larger MPOs across the state use weighted voting to give a larger voice to the jurisdictions that have the highest population. Currently, there is no such weighting in the voting procedures. Our current system gives one vote per representative on the TAC. The City of Asheville has two representatives on the TAC for a total of two votes. Under a weighted voting scenario, the City of Asheville representatives would receive increased voting power based on the City's proportion of the total population of the MPO.

The MPO process is a partnership between local and state government to make decisions about transportation planning in urbanized areas and to meet planning requirements established by the federal government. The MPO is responsible for development of a long-range transportation plan. From that plan, the MPO determines a list of priority transportation needs, known as the Priority Needs List. The list is then submitted to the NCDOT for their consideration as they develop the State Transportation Improvement Program (TIP). The MPO also adopts a local TIP that must match exactly with the State version. This dual approval process essentially gives the MPO veto power over state TIP decisions. This process of determining priority needs and developing a draft TIP must now be coordinated among 17 member governments. It will be critical to come up with a process that is fair to all of the local governments involved in the new MPO.

As a related issue to the MPO expansion, our area now has a Rural Planning Organization (RPO) for transportation. On January 15th the State of North Carolina chartered a new RPO in our area that includes Buncombe, Haywood, Madison, and Transylvania Counties. Henderson County declined to join the RPO. In Buncombe and Haywood the RPO, will be responsible for transportation planning outside of the MPO area. The MPO will work closely with the RPO to coordinate transportation planning in our region.

The role of the Asheville City Council in this process will be to provide feedback to the committees developing the boundary and the Memorandum of Understanding. The Asheville City Council currently has two members on the Transportation Advisory Committee: Brian Peterson and Holly Jones. The Asheville City staff currently has five members on the Technical Coordinating Committee. These committees will adopt the draft boundary and will coordinate development of the MOU. The Asheville City Council will be asked to sign the new Memorandum of Understanding in the summer of 2003. The first drafts of the new MOU will be circulated in the spring of this year.

Red Light Cameras

Police Chief Will Annarino discussed the need to install red light cameras at intersections as well as strategies for building General Assembly support. He explained how the intersection photo enforcement works. He also explained Charlotte's Safelight Program.

Advantages of the program would be to significantly reduce the number of traffic intersection crashes and injuries; police resources can be deployed to other areas of concern since cameras monitor the assigned intersections 24 hours a day; and if private vendors are used, no initial investment by Asheville taxpayers will be required.

Concerns include that it's an invasion of privacy, need more police involvement, money-making scheme, and that it will not change driving habits.

Police Chief Annarino explained the costs of the program.

In summary, photo enforcement is not a supplemental tool for law enforcement agencies; has proven successful in over 7 states and the District of Columbia, and cities such as Charlotte;

19 cities in North Carolina have enabling legislation; does not tax the resources of criminal courts; provides additional revenue source for traffic calming initiatives; no start-up costs incurred by the City; proven track record in reducing the number of accidents at traffic intersections; and statewide legislation endorsed by the N.C. League of Municipalities and the NC Dept. of Transportation.

After a lengthy City Council discussion on the information presented, the following additional information was requested (1) a report on potential cut-through traffic; (2) information on why people run red lights; and (3) crash data at intersections.

Update on Civic Center

Mayor Worley reviewed with Council the background of the Civic Center Task Force. Early on in the process, it was decided by the Task Force to retain Hunter Interests, a consulting firm from Annapolis, Maryland. Over several years they produced several reports along with a final summary report. In summary, Hunter Interests concluded (1) strong recommendation that the arena function stay in downtown Asheville; (2) if arena and convention/conference components are phased, arena portion should be developed first; and (3) a new arena downtown is preferable to a renovated one but issue of funding is typically the key impediment. They added that, while there is a clear strong market for the Civic Center, it is not clear if sufficient support from the residents or hospitality industry to realize the necessary funding mechanisms.

After the Hunter Interests conclusions were made, the Tourism Development Authority commissioned The Highland Group of Atlanta, Georgia, to research potential demand for a convention/conference facility. They concluded: (1) Civic Center, as a multi-purpose facility, is obsolete; (2) adequate convention facilities presently exist; (3) Performing Arts should be downtown; and (4) incubate other potential users of Civic Center like crafts, heritage, and Asheville's culture.

The Task Force then began an extensive review of potential sites for an arena and out of 25-30 being considered, three possible sites were focused on: existing location, beside City Hall on the south side; and UNC-Asheville campus. Since the structural feasibility and limitations at the existing Civic Center were not known, the Task Force recommended, and City Council approved, the issuance of a Request for Proposals to determine whether the existing arena could be feasibly upgraded to a modern facility. Heery International was selected for this task.

Heery concluded: (1) original design of arena was more voluminous than normal and "state of the arts" improvements could be added; (2) arena was structurally sound and could support the substantial renovation; (3) the cost of renovating the Arena would be less than the cost of new construction; and (4) Thomas Wolfe Auditorium was not a good candidate for renovation and the performing arts function should be moved out of the Civic Center. Their recommendations were: (1) keep and extensively renovate the existing arena providing high quality seating for sporting events and greater revenue generating capabilities; (2) renovate the Thomas Wolfe Auditorium into a "Great Hall" for banquets, receptions, exhibition space and other multi-use functions; and (3) build a new Performing Arts Center.

In the fall of 2001, Heery was commissioned to develop a conceptual design, a program for renovating the arena, converting the Thomas Wolfe Auditorium and building a new performing arts center and a business plan. Their results were (1) comprehensive plan for Arena, Great Hall and Performing Arts Center encompassing a "campus" extending down to Lexington Avenue; (2) a total estimated cost of $115 million, the largest component of which was the Performing Arts Center. Construction costs were estimated as follows: Arena - $27.2 Million; Thomas Wolfe (conversion to Great Hall) - $7.6 Million; and Performing Arts Center - $34.7 million.

As in the Hunter interest study, Heery concluded that funding would be a major issue. They identified revenue sources to include a prepared food and beverage tax and, potentially, an occupancy tax. They further divided the overall project into five smaller, yet individually complete projects. The funding mechanism and project(s) timeline, however, was left to the decision of City Council.

In July of 2003, City Council decided to delay until this retreat in order to (1) allow Council members the opportunity to study the reports in detail; (2) allow continued investigation of alternatives, including alternative sites and funding; and (3) allow development of other community initiatives. We know that (1) the Civic Center continues to age. Recent cosmetic improvements are nice but do not solve the programming deficiencies of a 29 year old building; (2) we are concerned about the cost and ability to pay for it; (3) desirable alternative sites are not available; and (4) there is an apparently viable movement to develop a Performing Arts Center at another location.

Important consideration for a decision include: financially sound, feasible within the context of community goals and needs, timing as it relates to our ability to secure a funding source, supportable by an informed community, and part of an overall regional economic strategy.

Mayor Worley proposed and explained each of the following: (1) seek a funding source from the legislative; (2) move forward with the Arena at the present location; (3) support community efforts to develop a Performing Arts Center at alternative locations; (4) seek alternative development of the Civic Center "campus" tied to a regional strategy; and (5) retain flexibility to adjust depending on subsequent community developments.

We can go no further without a funding source which will provide for actual design and construction drawings; and establishment of a budget and our financial limitations. The legislature is in "long session" which is traditionally the best time for a local bill to provide a funding source. Waiting now means at least a 2-year additional delay. The best funding source is a prepared food and beverage tax.

He requested Council (1) authorize a request to the legislature to approve a prepared food and beverage tax for the Civic Center; (2) approve (subject to funding) the engagement of an architectural firm to begin actual design and construction drawings of the Arena at the present site; and (3) commit to working with the community to develop the additional components and the methods of financing.

At the request of Councilman Peterson, Mayor Worley said that he would provide him with a copy of the Hunter Interests report and the Highland Group report.

Councilman Mumpower suggested a complete package be prepared and presented to the County in hopes of working with them on the parking component of the Performing Arts Center.

Discussion surrounding asking the legislature for a 1-cent or 2-cent food and beverage tax and/or the possibility of an occupancy tax. Vice-Mayor Bellamy felt that some portion of the tax should go into affordable housing.

Mayor Worley said that the City will wait until they get a definite proposal regarding the Performing Arts Center. However, it was the consensus of Council to conceptually support infrastructure and a portion of the parking.

After further Council discussion, it was the consensus of Council to request 1-cent food and beverage tax, but to explore the option of requesting 2-cents. A request for some portion of that revenue going to affordable housing or possibly the parking deck will be researched.

Economic Development

Economic Development Director Mac Williams updated City Council on the City's efforts to produce economic development through job creation, educational opportunities and other initiatives.

He explained the objectives of moving forward on the following goals: build and enhance "quality of place"; City's role beyond regulatory process; continuous improvement of development process; new development tools for new strategies; foster small business/entrepreneur development; and marketing. One new development tool in particular was that he asked that "tax increment financing" be added to Council's legislative agenda.

He concluded by saying that economic development is a process. The vision is in the right place, we are doing the right things, and there is a need for commitment over time.

City Council discussed economic development in the City as a whole and the role of the City's Economic Development Division vs. the role of other agencies promoting economic development for Asheville.

Update on Infrastructure

There was a discussion of the current condition of streets, sidewalks, waterlines and other infrastructure.

Update on Water Authority

Councilman Ellis briefed Council on the progress of the current Water Agreement negotiations.

At 4:50 p.m., Mayor Worley announced the meeting would continue the following morning, February 1, 2003, at 8:00 a.m.

Saturday, February 1, 2003

Joint Planning Agency and Other Legislative Issues

Planning & Development Director Scott Shuford said that the agreement between the City and Buncombe County should be coming to Council in April of 2003.

City Attorney Bob Oast reviewed with Council a summary of legislation that would be of interest to cities from the 2002 Session.

After Council discussion, City Attorney Oast said that he would bring to Council the following items for the legislative agenda: (1) the red light cameras; (2) reducing the Housing Authority terms from 5 to 3 years; (3) non-better relocation costs; and (4) a food and beverage tax.

Public Service Answering Point Update

Police Chief Will Annarino explained in detail the advantages and disadvantages of the current 911 "ringdown" vs. the proposed 911 resolution of establishing the City of Asheville as the area's public service answering point for emergency communications within the City of Asheville.

Councilman Dunn felt that the City and County should have a combined communication system.

As a result of Council discussion, Councilman Peterson suggested transferring the two Buncombe County Emergency Medical Services (EMS) Units that are located in the City to the City of Asheville so that there will be hardly any hand-offs.

Councilman Mumpower was not convinced that the City has done everything it could to cement the relationship with Buncombe County. If the City and County can't reach an agreement on something as important as public safety, then how can we come together on other initiatives? He felt there were other options to pursue.

After further discussion, it was the consensus of City Council to invite EMS Director Jerry Vehaun and/or Buncombe County Manager Wanda Green to Council's March 4, 2003, worksession for a further discussion on this matter.

Council Goal Setting Process

Regarding the Civic Center and after City Council discussion, it was the consensus of Council to talk with the legislators about the potential uses of a food and beverage tax; to add the 1-cent food and beverage tax to the legislative agenda; to move forward on the Arena (depending on funding); and regarding the Performing Arts Center, to conceptually support infrastructure and a portion of the parking.

After each member of City Council stated their goals and their reasons why their goals were important, City Council tentatively agreed upon the following Fiscal Year 2003-04 Goals:

1) Ease Unified Development Ordinance process for residential and commercial
2) Invest in infrastructure (include businesses/property owner) in neighborhoods and business corridor – improve process
3) Clean water/clean air – support riverway as it relates to transportation to include oxidation of buses
4) Affordable housing stock – cost of building houses – reduce as much as possible
5) Fund social security for firefighters

City Manager Westbrook assured Council that even though a goal did not make the top five that they all would be worked on.

Adjournment

Mayor Worley adjourned the meeting at 12:00 Noon.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 4, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Reimbursement of Expenses related to the Battery Park Parking Deck

Summary: The consideration of a resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition and construction of a parking facility in the vicinity of Battery Park from the proceeds of financing.

City Council has previously directed staff to initiate action to obtain options to acquire land, retain real property and financial advisors, and contract for the design of a parking deck in the vicinity of Battery Park. City Council has also previously passed budget amendments authorizing expenditures for the project, with the supporting revenues to be provided from the proceeds of a Certificates of Participation (COPs) issue. The current project schedule calls for the COPs to be issued in the spring of 2003. However, some project expenses have already been incurred. U.S. Treasury regulations require that, if the City intends to reimburse itself from the proceeds of a tax exempt financing for certain project expenses, which were paid prior to the closing date of the financing, it must adopt a resolution evidencing that intent. The resolution of intent may cover expenses paid by the City during the period beginning sixty days prior to adoption of the resolution of intent and ending on the day of issue of the financing. The resolution indicates the City's intent to reimburse itself accordingly.

City staff recommends Council adopt the resolution.

Upon Vice-Mayor Bellamy, Finance Director Bill Schaefer said that he would provide City Council with more information on what the eligible expenses are for reimbursement from the financing.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

DOMESTIC VIOLENCE

Pursuant to a request from Councilwoman Jones, Police Chief Annarino said that N. C. General Statute sec. 50-B specifically directs law enforcement in North Carolina to "Protect the Victim" in any situation where domestic violence has occurred or is suspected.

Consistent with State Law, the Asheville Police Department responds to and investigates all domestic violence related offenses occurring within the corporate boundaries of the City of Asheville and maintains statistical data relating to such occurrences.

Police Department procedures in handling reported domestic violence cases are guided by written department policy and reinforced through yearly in-service training. The department maintains a "pro-arrest" policy and works closely with local referral agencies and the District Attorney's office to ensure the prosecution of offenders.

Police Chief Annarino then reviewed with Council reported domestic assaults, rape incident reports, and simple and aggravated assaults from 1998 to 2002.

Police Chief Annarino responded to various questions/comments from Council, some being but are not limited to: are sexual assaults being reported; is there any reasons why there has been an increase in sexual assaults; is there any correlation in violent crimes and the down-turn of the economy; where do most sexual assaults occur; and is there any reasons why 2000 crimes were high.

Upon inquiry of Vice-Mayor Bellamy, Police Chief Annarino said that he would provide City Council with additional information specifically regarding the downtown vs. citywide. He also noted that Helpmate is a very important agency that provides the Police Department with suggestions and ideas on an on-going basis and also with their overall review of their domestic violence policy.

Councilwoman Jones said that we need to help support the Asheville Police Department, who is working closely with Helpmate, in this most important issue. She noted that a lot of the harassment against women is not necessarily by panhandlers, but people in cars.

Vice-Mayor Bellamy said that the City needs to promote neighborhood block grants so neighbors get to know each other. She felt we needed to look at what can be done now to eliminate crime in the future, e.g., investing more in our children and in our schools. She felt that Council needed to be updated on this public safety issue, similar to the updates they receive on the Unified Development Ordinance.

Councilman Dunn explained that the City needs to hire more police officers to be able to provide the police presence.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which have been scheduled on February 25, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Adding Research & Technology Production as a Permitted Use in Certain Commercial Districts

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to add research and technology production as a permitted use in certain commercial districts.

This code amendment defines "research and technology production uses" and permits them in the Community Business II District, Institutional District, Highway Business District, Regional Business District, Central Business District, Commercial Industrial District and Industrial Districts. Once defined, the uses would be permitted in the River District as well. These uses are the "high tech" uses that form the backbone of our local economic development strategy.

This item was previously heard by the Planning and Zoning Commission and recommended for approval. At a City Council meeting, staff was asked to research environmental hazards concerns associated with the research and technology production uses and return the amendment for consideration. This research reveals that environmental concerns associated with the intended uses are effectively handled through existing environmental permitting procedures. There are extensive environmental permitting procedures that pertain to medical wastes and by-products from the types of uses proposed in this amendment; for some chemicals, this permitting involves "cradle-to-grave" tracking (i.e., from time of production to time of disposal).

On January 23, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast said that cloning is a use that might be allowed within this district, but Asheville's chances of us getting any kind of a cloning operation here is remote. He felt that there would be State laws that would apply to Asheville generally. Vice-Mayor Bellamy requested more information on any legal rights the Council would have if a cloning operation were to locate in Asheville.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on the February 25, 2003, formal City Council agenda.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 3:40 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 11, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY, 2003, AS "BLACK HISTORY MONTH"

Vice-Mayor Bellamy read the proclamation proclaiming February, 2003, as "Black History Month " in the City of Asheville. She presented the proclamation to Mr. John Hayes, President of the NAACP, who briefed City Council on some activities taking place during the month.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 28, 2003; THE CITY COUNCIL RETREAT HELD ON JANUARY 31-FEBRUARY 1, 2003; AND THE FEBRUARY 4, 2003, WORKSESSION

B. RESOLUTION NO. 03-22 - RESOLUTION DECLARING THE INTENT OF THE CITY OF ASHEVILLE TO REIMBURSE ITSELF FOR CAPITAL EXPENDITURES INCURRED IN CONNECTION WITH THE ACQUISITION AND CONSTRUCTION OF A PARKING FACILITY IN THE VICINITY OF BATTERY PARK FROM THE PROCEEDS OF FINANCING

Summary: The consideration of a resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition and construction of a parking facility in the vicinity of Battery Park from the proceeds of financing.

City Council has previously directed staff to initiate action to obtain options to acquire land, retain real property and financial advisors, and contract for the design of a parking deck in the vicinity of Battery Park. City Council has also previously passed budget amendments authorizing expenditures for the project, with the supporting revenues to be provided from the proceeds of a Certificates of Participation (COPs) issue. The current project schedule calls for the COPs to be issued in the spring of 2003. However, some project expenses have already been incurred. U.S. Treasury regulations require that, if the City intends to reimburse itself from the proceeds of a tax exempt financing for certain project expenses, which were paid prior to the closing date of the financing, it must adopt a resolution evidencing that intent. The resolution of intent may cover expenses paid by the City during the period beginning sixty days prior to adoption of the resolution of intent and ending on the day of issue of the financing. The resolution indicates the City's intent to reimburse itself accordingly.

City staff recommends Council adopt the resolution.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution on the Consent Agenda and it would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A PLANNED UNIT DEVELOPMENT OVERLAY DISTRICT DESIGNATION AND MASTER PLAN REVIEW FOR WILD CHERRY GARDEN TOWNHOMES LOCATED ON WILD CHERRY ROAD AND BEAVERDAM ROAD

ORDINANCE NO. 2998 - ORDINANCE TO CONSIDER A PLANNED UNIT DEVELOPMENT OVERLAY DISTRICT DESIGNATION FOR WILD CHERRY GARDEN TOWNHOMES LOCATED ON WILD CHERRY ROAD AND BEAVERDAM ROAD

Mayor Worley opened the public hearing at 5:10 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a Planned Unit Development (PUD) Overlay District to allow the construction of 76 attached townhome units on 20 acres at the northwest corner of the intersection of Beaverdam Road and Wild Cherry Road and Master Plan review for Wild Cherry Garden Townhomes. This public hearing was advertised on January 31 and February 7, 2003.

He said that a valid protest petition has been filed, thus requiring a ¾ vote of City Council to approve the ordinance.

The applicants, Bill Fleming and Elana Kann of Neighborhood Design Build, are proposing a project that consists of 76 attached townhome residential units and a central clubhouse/lodge facility at the intersection of Beaverdam Road and Wild Cherry Road. The project area consists of 20 acres (PIN Nos. 9740.08-77-6828, 9740.12-76-9578, 9740.08-77-6655, 9740.12-77-7246, 9740.12-76-9977, portion of 9740.12-76-9578, and 9740.11-77-2178) and would be accessed from Wild Cherry Road by a road located toward the northern end of the site.

The project site is located within the City limits at the intersection of Beaverdam Road and Wild Cherry Road. While the site and the properties immediately adjacent are zoned RS-4, there are two other zoning districts in the immediate area. There is an RS-8 district to the south across Beaverdam Road and a large RM-6 district to the west on both sides of Beaverdam Road that contains a number of attached condominium units.

The site is partly wooded, with its vegetation and tree cover mainly located to the southern portion of the site along the creek near the intersection of Beaverdam and Wild Cherry and along the site's eastern frontage along Wild Cherry Road.

The PUD District is intended to promote innovative design in development by providing for flexibility in site design. The PUD review process is a two-part procedure, which involves the rezoning of the property to the PUD District and approval of a master plan. The Planning and Zoning Commission has approved the master plan and no appeal has been received so the only issue under consideration by the City Council is the adoption of the PUD Overlay District.

The maximum density permitted in a PUD is 110% of the maximum residential density permitted in the underlying district and additional density may be permitted by the incorporating elements such as affordable units or preservation of open space into the plan. Seventy-six units are proposed for this project, which results in a density below what is permitted in the RS-4 District.

The site's access is from Wild Cherry Road and is located towards the north part of the site. Parking is provided for the dwelling units in off-street parking lots located toward the northern end of the site.

The UDO requires 500 square feet of open space for every residential unit proposed. This would result in a minimum of 0.87 acre for reservation as open space for the new residential units. The applicants are proposing 5.38 acres to be preserved as open space and are considering placing this open space in a conservation easement.

Buffering from adjacent properties is not required since the overall density of the project results in low density residential bordering other low-density residential development. The applicants, though, have proposed to buffer the site with a 15-foot "A" type buffer on property boundaries that have no vegetation and augment boundaries that have existing vegetation. A condition of the Planning and Zoning Commission's approval is the establishment of a type "D" buffer around the portion of the project where it borders properties to the north that have single-family homes on them. Landscaping is provided in and around the off-street parking areas.

The UDO requires that new developments provide one large maturing tree (over 35 feet in height at maturity) for every 40 linear feet of property abutting a street. The applicants are proposing using existing large trees or planting new ones on the development sides of Beaverdam and Wild Cherry Roads and along the entrance road from Wild Cherry Road.

The UDO requires sidewalk installation along the frontage of all streets. The applicant must provide these sidewalks or an alternative pedestrian walkway as approved by the Engineering Department.

The PUD District is intended to promote innovative design in development by providing for flexibility in site design that permits a mixture of housing types and the combination of housing with other uses such as neighborhood shopping centers and offices. This flexibility is intended to accomplish a number of purposes, which include:

1. Encourage better design and management of open space by creating more functional active and passive open space areas within a new development.
2. Retain natural features such as floodplains or steep slopes, and encourage developments that will be compatible with environmentally sensitive areas.
3. Facilitate more affordable housing by providing possibilities for savings in infrastructure, installation costs, and energy costs through clustering of dwellings.
4. Provide an effective use of the transit system within and adjacent to the development by effective organization of uses and the orientation of pedestrian and vehicular facilities.
5. Encourage pedestrian circulation within and adjacent to the PUD.

The project proposes that all the dwelling units are attached townhomes in groupings of four units. While a variety of housing types within the development are not proposed, the use of attached units results in a mixture of housing types within the neighboring area. In terms of a mix of uses within the development, the applicants have proposed using the lodge or a portion of it for certain limited commercial functions to serve the residents of the development. These uses would be food service, grocery shopping, transportation assistance, and/or home office support.

If the applicants wish to use the lodge facility for any higher intensity commercial uses, a revision to the Master Plan would be required.

The layout of the proposed PUD concentrates the dwelling units towards the northern part of the site and reserves the portions along Wild Cherry and to the south surrounding the creek as open space This results in a clustering of the units, which can provide infrastructure and cost savings, and the preservation of large amounts of open space in areas that retain the significant natural features of the site, including the stream and floodplain to the south and the mature stand of trees and vegetation along Wild Cherry. The concentration of large preservation areas also results in more functional passive open space for the development. Active open spaces for the development are provided along the western boundary of the site in the form of tennis courts and a shelter

Pedestrian circulation can be provided by the use of sidewalks and walking trails within the development. The applicants have discussed incorporating these into the development and have provided details for two of the main walkways, but would need to provide additional detail as to how all the pedestrian walkways will be laid out.

The Technical Review Committee reviewed the proposed PUD at its December 2, 2002, meeting and recommended approval with conditions. The PUD was then reviewed by the Planning and Zoning Commission, who voted 5-2 to recommend approval of the PUD designation and 5-1 to approve the Master Plan with conditions. Planning & Development staff recommend the approval of a PUD Overlay designation for the project.

The applicants have revised the master plan to satisfy the conditions of approval, including incorporating a portion of a planned City greenway into the project, adding a dedicated walkway between the development and a proposed bus shelter located along Beaverdam Road and providing additional information as to the commercial nature of the lodge facility and for possible conservation measures for the proposed open space.

When Ms. Elana Kann, applicant, asked if graphics could be used, City Attorney Oast said that there are certain development restrictions that apply within any planned unit development and the graphics would be an illustration of how those restrictions could be met on this site.

Ms. Kann said that their integrated approach to the Wild Cherry solar village development includes land and habitat preservation; a high level of energy and resource conservation; design that deliberately encourages a sense of community while protecting privacy; a pedestrian park and gardens around clustered dwellings, cars at the edge; an internal transportation system for the campus; extensive on-site services and shared facilities, primarily through the central lodge; central solar radiant heat and hot water with natural gas back-up; support for residents health and comfort; and professional property management She said that this development complies with all goals and guidelines established for a PUD. The underlying zoning will not change and we have asked for no density bonuses. She said the plan includes 6-8 acres of open space of the 20 total acres, which is 30-40% of the property. It includes conservation areas; an existing creek and existing woods; an easement for a City greenway; a public biking and walking path along the creek; active recreation areas, extensive gardens throughout the project; and trails and paths linking open spaces. We plan no development near the creek, in the woods along Wild Cherry Road or on steep slopes. She said with the clustering, we can achieve lower short term and long term costs. With a tighter infrastructure from clustering, we can install very high quality heat, water and communication systems for mid-range prices and for long-term savings in energy and maintenance. We will add a transit shelter on Beaverdam Road at an existing bus stop with bike rack and a trail and a sidewalk from the development to the transit shelter. We will offer small scale transit services as well for residents, e.g. a solar electric van for group trips into town, grocery shopping service, making car-pooling easy, and we will have a rental car available on site. The plan includes internal paths and trails with cars at the edge; Manual and electric carts for easy movement including carrying things; public biking and walking greenway along the creek, which would be in coordination with the Parks & Recreation Department. The PUD fits this site's location and unique characteristics. There is already a variety of development in the area. There are some pockets of higher density development, condo developments, and a townhouse development. The creek, the floodplain, the steep slopes and wooded areas on the site can best be preserved through the PUD flexibility. The City's infrastructure and other amenities are available to serve the development. This property is one mile from Ingles, from the Fresh Market, hardware stores, drug stores, etc. She explained how this development complies with goals of Asheville's smart growth definition and policies and the 2025 Comprehensive Plan. They have met with neighbors and have addressed many of their concerns. They realize it is painful for neighbors to see nearby open land developed. We have tried to listen well and see things from the neighbors' prospective. We held two community meetings in October with about 100 attendees, and we sent two follow-up letters to 150 households with update information and a postcard informing them of web-based survey. In addition, we met one-on-one with the closest neighbors to attempt to sort out property boundary issues. The neighbors had concerns about impact on the immediate neighbors. We voluntarily gave up any use of Old Road or Dickerson Road as an entry for residents or even for emergency vehicles, in order to protect those close neighbors privacy. We offered land transfers to the close neighbors for greater private space. We plan to install the "D" type buffer, the maximum, at our boundaries with the Talley and Niwinski properties. There have been concerns about traffic road safety and bike access. We moved our entry up the hill in response to neighborhood concerns about the Gibson Road intersection. We kept the entry about 100 feet from the Talley's house, plus we're providing quite a bit of buffering there. We have studied the issue of traffic generation. According to the National Traffic Study experts, 76 conventional attached dwellings would generate no more trips than 41 detached dwellings would on the site at peak hours. We think that the Wild Cherry development traffic will be significantly lower due to our traffic reduction features, like home offices; community transit services; grocery shopping service; on-site social and recreation facilities; pedestrian and bike trails and connections; and transit passes, if they are available at that time. The existing intersections and streets will be improved as required by the City Engineer to increase safety. We will improve the existing transit stop and provide pedestrian connection to it. We will offer a public greenway, which hopefully can extend further east and west within a few years. Multi-family housing was a concern to the neighbors. We will be building attached single-family houses. Density has also been a concern. The existing zoning for this property is RS-4 allowing site density of four dwellings per acre. The site density of this development is 3.8 dwellings per acre. The clustering of the dwellings does not increase the site density of the development. What the clustering does do is permit preservation of steep slopes, significant vegetation protection of the creek, and a large amount of usable open space. She said they are presenting a model for smart growth, which will have a relatively low impact on the City's roads and utilities, which will help to protect air quality, preserve significant open space and which offers a jump-start on the public greenway.

Upon inquiry of Vice-Mayor Bellamy, Ms. Kann said that they moved their original entrance, which was near Gibson Road, up the hill in response to some concerns that came up at neighborhood meetings.

When Vice-Mayor Bellamy asked about sidewalks, Ms. Kann said that they are adding a sidewalk to Wild Cherry Road crossing the bridge and all the way to the transit stop and then there will be a pathway for our residents to use to get to the road.

City Attorney Oast reminded Council that this PUD Overlay District, if it is approved by Council, will follow the property and the development may not necessarily be by these particular developers but whoever the developer is will be bound by whatever plan Council adopts.

The following individuals spoke in support of the proposed PUD Overlay District for various reasons, some being, but are not limited to: these applicants have demonstrated their concern for the environment, energy conservation and neighbors as seen by their sensitive development of the Westwood Co-Housing Community; this development is an example of increasing urban density, preserving the environment, green building, and better use of public transportation; air quality will be addressed; development meets many priorities established by the City; the PUD Overlay District is to encourage developers not to develop on steep slopes and to avoid sensitive areas and all PUD objectives are met with this development; didn't realize neighbors wanted sidewalks until this meeting; entrance into development was moved due to neighborhood concerns; the 17-foot wide Wild Cherry road is a good with for any kind of travel way in Asheville; preserves open space; less traffic than a traditional development; and encourages multi-modal transportation:

Ms. Paula Robbins, resident of Westwood Co-Housing Community
Ms. Laurie Huttunen, resident at Haw Creek Mews
Ms. Norma Ivy, Woodfin resident
Mr. Jake Gilmer, Asheville resident
Mr. Craig Justus, attorney representing 3 property owners who wish to sell their property to the developer
Mr. Boone Guyton, residential builder in Asheville
Mr. Chris Eller, Engineer for the project
Mr. Brownie Newman

The following individuals spoke in opposition to the proposed PUD Overlay District for various reasons, some being, but are not limited to: 76 units on 20 acres is too dense; not only will there be more traffic on Wild Cherry as a result of the 76 additional homes, but rumor has it that there is an additional development to connect on the back of this land, causing additional traffic on Wild Cherry; plan is poorly conceived and does not fit in with the neighborhood; needs of the neighborhoods haven't been responded to; cramming 76 units on a flat piece of land isn't saving open space; development is an insult to the single-family neighborhood; building elevations are too high for the area; traffic will triple on Wild Cherry Road; no sidewalks for the neighborhood; the entrance into the development was moved at the request of the TRC and not at the request of the neighborhood; since the development doesn't have a second entrance, it is not appropriate for the neighborhood; parking lot is directly in front of property owner; lights from development will overflow into the neighborhood; noise during construction and after construction will be overbearing; property values of adjoining homes will be decreased; all negative impacts from development will be borne by the neighborhood, not the development residents; the sidewalks in the development will not keep children safe who walk down on Wild Cherry Road to catch the school bus; and neighborhood wants single-family homes built on the property:

Mr. Ken Schmitz, area resident
Resident who lives at the end of Wild Cherry
Mr. Mark Sinsky, adjacent property owner
Ms. Julie Niwinski, adjacent property owner
Mr. Fred English, Haw Creek resident
Mr. Randy Talley, Wild Cherry Road resident
Ms. Francine Talley, Wild Cherry resident
Mr. Eric Niwinski, adjacent property owner
Mr. Jim McClure, Wild Cherry Road resident

Councilman Ellis suggested that instead of the children walking down Wild Cherry Road, perhaps for their safety they may wish to walk through the developer's property. Mr. Eller said that there are no sidewalks proposed on Wild Cherry Road due to the environmental impacts and topographic constraints what would force the buffer to sacrificed and more detrimental to the overall community.

Upon inquiry of Vice-Mayor Bellamy, Mr. Eller responded to questions related to buffering, number of parking spaces proposed on the development, and what the grade is from Wild Cherry Road to the proposed parking lot.

Mr. Eller explained, after Councilman Dunn asked, why they could not move the entrance about half-way up Wild Cherry Road. In addition, Mr. Eller explained the buffering on the property and the building elevations.

When Councilman Mumpower asked about lighting, it was noted that the lighting would be at low levels because there are houses that will be close to the parking lot in the development as well and they wouldn't want them disturbed by the light. In addition, Mr. Pettibone said that the City has a separate lighting ordinance to control that.

When Councilman Mumpower asked if there are any parking lot configuration possibilities, Mr. Eller said that with the way the terrain falls they were able to overcome that grade with tiering and stepping of the buildings. It would be difficult to move the parking lot because it would require a lot more visually obtrusive retaining walls to be built that would be looked upon by neighboring properties.

Mayor Worley closed the public hearing at 6:55 p.m.

Councilman Peterson asked to be excused from participation in this matter after just realizing his wife (who is an attorney) is involved in a case that would have a significant financial impact on the sale of this property. City Attorney Oast asked for a brief recess to discuss the possible conflict of interest with Councilman Peterson.

At 7:00 p.m., Mayor Worley announced a short break.

City Attorney Oast said that after talking with Councilman Peterson, it was his opinion that he does have a conflict of interest and a motion to excuse him from participating in this matter would be appropriate. Therefore, Vice-Mayor Bellamy moved to excuse Councilman Peterson from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

As a result of Councilman Peterson's absence, thus requiring a unanimous vote due to a valid protest petition, Ms. Kann said they would be willing to continue the matter for two weeks to review any unresolved issues with City staff. It was the consensus, however, for Council to proceed with the matter at this time.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower understood the intrusive nature of the development for the neighbors and they raised legitimate concerns. Unfortunately the system we have says the people that step-out and offer their voice to our policies are the people who chart the course of Asheville. And, the people who, before tonight, charted the course of Asheville by establishing policies that we, as elected representatives, are compelled to uphold. If we vote otherwise, we are acting on the basis of personal preferences, politics and pressures and that is not the way we are called to govern. Therefore, he was compelled, in spite of some of the legitimate arguments, to speak in support of the development.

Vice-Mayor Bellamy felt that the PUD process is a good tool if done correctly, that City Council can use in their development process. She didn't think that this development is unusual for the area, and in fact she felt this development is better than the Timbers. The developers have previously built a nice development in West Asheville and they have a good team of architects and engineers. She wished there was more consensus by the neighbors to support this in that when you care about your neighbors, crime rates decrease.

Mayor Worley spoke about how people tend to resist change, yet after that change occurs, most find that the change is good. This project meets the City's goals as we move toward smart growth. He felt this plan provides for a good, smart use of the terrain in the most unobtrusive way as possible.

Councilwoman Jones explained that in the next 20 years, Asheville will need 10,000 more homes and most want keep our families here and have a full community. This project will also begin to help with our air quality. She felt smart growth needed to be included in all neighborhoods.

Councilman Dunn was not convinced that the same number of single-family homes could be built on this property and he agreed that the neighbors did bring up some valid concerns. However, he did support the PUD on this property as it does provide for open space and additional housing. He didn't, however, like some of the designs in the plan, but that is not what City Council is voting on.

After speaking in favor of the project, Councilman Ellis moved to adopt Ordinance No. 2998 for a Planned Unit Development Overlay District for Wild Cherry Garden Townhomes located on Wild Cherry Road and Beaverdam Road. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 226

B. PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF PROPERTY LOCATED ON SHILOH ROAD ACROSS FROM KENT STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2999 - ORDINANCE TO REZONE A PORTION OF PROPERTY LOCATED ON SHILOH ROAD ACROSS FROM KENT STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 7:48 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone a portion of property located on Shiloh Road across from Kent Street from Neighborhood Business District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on January 31 and February 7, 2003.

The applicants, Charlie and Claudia Tucker, are requesting a rezoning from Neighborhood Business to RS-8 for a 0.61-acre portion of a lot located on Shiloh Road (PIN No. 9657.13-13-1430) in order to develop the entire property for residential uses. The purpose of the

RS-8 district is to establish a high density per acre for single-family dwellings in areas where public infrastructure is sufficient to support such development.

The property, which totals 1.24 acres and is currently vacant, is split-zoned with Neighborhood Business zoning occupying the southern portion of the site and RS-8 zoning to the north. The property is also a through lot, with frontage on both West Chapel Road and Shiloh Road. The property owners plan to subdivide the entire property into three single-family lots, two of which would be accessed by West Chapel Road with the third via Shiloh Road.

This property is located within the City limits in a part of the Shiloh neighborhood that is predominantly zoned RS-8. Land use is the area is primarily single-family detached homes or mobile homes. Properties to the north and west are zoned RS-8 while properties to the east and south across Shiloh Road are zoned Neighborhood Business.

The property owners wish to develop the property for residential use by subdividing the property into three single-family lots. Since the property is split zoned and the Neighborhood Business District does not allow single-family residential as a permitted use, the property owners would like to rezone the Neighborhood portion of the property to RS-8 in order to have the whole parcel zoned one district and build the single-family homes.

The property was split-zoned as a result of the citywide zoning change in 1997. The goal of this zoning was to establish a neighborhood business center in the area. The City has not received definite interest in the past 5 years for developing this property or other nearby Neighborhood Business zoned property for uses permitted in the Neighborhood Business District. In addition, if this property were rezoned, 3 properties totaling 1.37 acres would remain in the Neighborhood Business District. Because of these factors, coupled with the fact that the property owners have a firm development proposal for the property, staff feels that the proposed rezoning is reasonable and recommends approval.

The Planning and Zoning Commission voted 5-0 to recommend approval of the rezoning of a portion of the property located on Shiloh Road at Kent Street from Neighborhood Business to RS-8. Planning & Development staff recommend the rezoning as well.

Mr. Charlie Tucker spoke in support of the rezoning to RS-8.

Mayor Worley closed the public hearing at 7:50 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2999. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 228

C. **PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED AT 3796 SWEETEN CREEK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT**

ORDINANCE NO. 3000 - ORDINANCE TO REZONE PROPERTY LOCATED AT 3796 SWEETEN CREEK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 7:51 p.m.

Urban Designer Alan Glines said that this is the consideration of an ordinance to rezone property located at 3796 Sweeten Creek Road from RS-4 Residential Single-Family Medium Density District to Commercial Business II District. This public hearing was advertised on January 31 and February 7, 2003.

The request is for the rezoning of a .59 acre tract (PIN No. 9654-10-35-4931) in the south area of the City from RS-4 to CB II. The parcel is in the Royal Pines neighborhood and is a part of the City's Jake Rusher Park. The applicant is the Trust for Public Land. The existing playground and parking lot area are on separate parcels and are not a part of this rezoning proposal.

The parcel has access from Sweeten Creek Road and side street access from Peach Tree Street. The parcel is currently vacant but at one time had a small house in dilapidated condition. The rezoning request is part of a land trade proposal that the Trust for Public Land is coordinating. This parcel trade will provide a usable parcel for park use adjacent to Jake Rusher Park. The Parks and Recreation Department and the original land donor, Jake Rusher, are supportive of the rezoning request. The area surrounding this rezoning request were recently annexed and are undergoing initial zoning at this time. The parcels fronting on Sweeten Creek Road are proposed to be zoned CB II. Other residential parcels are proposed to be zoned RS-8.

The RS-4 Residential Single Family Medium Density District is reserved for areas for medium density single family uses and limited ancillary uses that support but still protect residential uses.

The Community Business II District is established to provide areas for medium to high density business and service uses serving several residential neighborhoods. The community business center may serve as a workplace for many residents in the surrounding neighborhoods. Projects may serve a significant pedestrian population but also provide for adequate vehicular access. The district should be located on minor and major thoroughfares, which serve several residential neighborhoods.

The Planning & Zoning Commission voted 5-0 to recommend approval of the rezoning of the property located at 3796 Sweeten Creek Road from RS-4 to Community Business II District. City staff recommends approval of the rezoning request as well.

Mayor Worley closed the public hearing at 7:54 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3000. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 330

D. PUBLIC HEARING ON AMENDMENT TO CONTRACT FOR PURCHASE OF ROYAL PINES PROPERTY

RESOLUTION NO. 03-23 - RESOLUTION AMENDING CONTRACT FOR PURCHASE OF ROYAL PINES PROPERTY

Mayor Worley opened the public hearing at 7:55 p.m.

City Attorney Oast said that this is the consideration of a resolution approving an exchange of real property for the Royal Pines Park and amendment to the installment purchase contract for Royal Pines to effectuate the exchange. This public hearing was advertised on January 31, 2003.

Back in 1999, the City received an opportunity to acquire the Royal Pines Pool and Park properties from Jake Rusher, the man who had owned and operated the facility for many years. Mr. Rusher wished for the property to be used as a park, and agreed to provide some financial incentives if the City would purchase the Royal Pines property subject to this restriction.

For legal reasons, it was necessary to involve a third party in this transaction, and the Trust for Public Land (herein "TPL"), a park land acquisition and conservation organization that the City had worked with extensively on other acquisitions, became that third party. Essentially, Mr. Rusher has conveyed the property to TPL, and TPL holds title to the property for the benefit of the City. The City is paying for the property pursuant to an installment contract, and the purchase will be complete in 2004, at which time the City will acquire title to the property. The total purchase price was $925,000. The City is responsible for maintenance, upkeep and taxes on the property while this contract is in operation.

Recently, the City has been presented with an opportunity, working through TPL, to acquire some property adjacent to the Royal Pines property that will provide for a better configuration of the park lands. In exchange for that acquisition, the City proposes to convey some of the Royal Pines property not needed for the park to the owner of an adjacent shopping center which needs the property for parking.

The appraised value of the Somerville Parcel is $93,500; the appraised value of the Park Outparcel is $127,000. The difference of $33,500 is proposed to be credited against the City's remaining obligation in its contract to purchase the Royal Pines Property, less one half the cost (estimated at $12,500) of repairing a collapsed storm drain on the Park Outparcel.

In summary, this transaction would give the City a better configuration for its park, enable the adjacent shopping center to expand its parking, and reduce the overall cost to the City.

Even though TPL holds title to the property, the City will be the ultimate owner, so we are treating this transaction as if the City were already the owner. Because this is an exchange of real property and an amendment to the installment purchase contract, a public hearing is required before the transaction can be approved. This was the process followed when we entered into the contract in 1999.

Provided Council approves this transaction, we will amend our contract, and TPL will proceed with the closing, which must occur on or before February 28.

If Council wishes to exchange the property and amend the contract as proposed herein, adoption of the resolution is recommended.

Mayor Worley closed the public hearing at 7:58 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 03-23. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 312

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. DISCUSSION OF CANDIDATES FOR ASHEVILLE SCHOOL BOARD

It was the consensus of City Council for the City Clerk to arrange interviews of the following candidates for vacancies on the Asheville School Board: Marsha Bate, Tom Knoebber, Ann L. Von Brock, Marianne Reinert, Thomas Hunnicutt and Dolly Jenkins-Mullen.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of January 24-30, 2003: Patricia Simmons (Civic Center), Courtney Davis (Fire), Charlie Tucker Jr. (Water), CP&L (Water) and Steven A. Daly II (Police).

The following claims were received by the City during the period of January 31 – February 6, 2003: The Timbers (Sanitation), Glenda Artie Thompson (Transit Services), Jerry Sherrill (Streets), Sophie Poore (Water), Pat Horrocks (Inspections) and Sagebrush Restaurant (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English suggested Council request our lobbyist to find funds to renovate the Civic Center and urged Council to participate in the March 1, 2003, Support our Soldiers activities.

Mr. Dennis Justice presented Council with some information on advertising display technology, soccer systems, shield systems and custom rail systems. He then explained his concerns on whether it is logistically possible to bring a hockey team to Asheville next season.

Upon inquiry of Councilman Dunn, Mayor Worley said that he would follow-up with Mr. Frank Worley at the Alcoholic Beverage Control Board about his letter to him regarding missing funds.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 18, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Application for National Pollutant Discharge Elimination System – Phase II Stormwater Permit

Summary: The consideration of a resolution authorizing the City Manager to sign the National Pollutant Discharge Elimination System (NPDES) Phase II Permit Application and any other paperwork necessary to comply with the Environmental Protection Agency (EPA) Federal Non-Funded Mandate.

In 1998, EPA adopted a rule called the NPDES Stormwater – Phase II rule. This rule applies to all municipalities with a population less than 100,000 that own or operate a Municipal Separate Storm Sewer System. The rule specifies that these units of government must develop a program for managing stormwater runoff, particularly pollutants associated with stormwater runoff. The application must be submitted to the State on or before March 2003.

The program must describe how the City will attempt to meet six minimum requirements: (1) Public Education/Outreach; (2) Public Participation/Involvement; (3) Illegal/Illicit Discharge Detection and Elimination; (4) Construction Site Runoff Control; (5) Post-Construction Runoff Control; and (6) Pollution Prevention/Good Housekeeping Measures.

In 2002, the City purchased a software program from the League of Municipalities as a guide to develop the permit. The permit will apply for a five-year period following the issuance of the permit from the State. The first year of the program will consist of developing plans and coordinating activities between various agencies. For example, the City of Asheville hopes to develop a Public Education/Outreach Program in conjunction with the other municipalities in the County.

One official deadline for the five-year program is that an ordinance controlling post-construction runoff must be adopted by City Council by March 10, 2005.

The cost of this program averages approximately $250,000 per year over the five-year period. At the 2002 City Council Retreat, Council approved City staff exploring the feasibility of developing a Stormwater Utility to fund the stormwater program. Staff is still in the process of evaluating this recommendation.

City staff requests that City Council authorize the City Manager to sign the National Pollutant Discharge Elimination System (NPDES) Phase II Permit Application and any other paperwork necessary to comply with the EPA Federal Non-Funded Mandate.

Upon inquiry of Vice-Mayor Bellamy, City Engineer Cathy Ball said she would try to incorporate the Water Resources Department's educational outreach program into this program.

Acceptance of New Street Name – East End Place

Summary: The consideration of a resolution accepting the new proposed street name "East End Place."

Asheville Area Habitat, owner of lots off of Martin Luther King Drive, has petitioned the City of Asheville to accept the street name " East End Place."
The new street will begin at Martin Luther King Drive and end at cul-de-sac on East End Place.

City staff recommends adoption of the resolution.

Agreement with WNC Soccer Association and Budget Amendment for Azalea Road Park

Summary: The consideration of a budget amendment, in the amount of $474,000, to continue the construction of Phase I of the Azalea Road Park project and consideration of a resolution authorizing the City Manager to enter into an agreement with the Western North Carolina Soccer Foundation for administering future funds collected for this project.

In 2001, City Council approved the Master Plan for the development of the Azalea Road Park. The development of the 155 acres will occur in a number of phases. The first phase includes the construction of two soccer fields, restroom/concession stand, picnic shelter, playground, parking and other infrastructure needs. The Department, in association with the WNC Soccer Association, has worked extremely hard in the past several months to secure funding for this project. First and foremost, a grant was secured from the Tourism Development Authority for funds totaling $400,000. This was the first grant awarded by this group for the development of the facilities that will increase the economic vitality of our community. In addition, we have secured $50,000 (which we will receive in $10,000 installments over five years) from Pepsi Cola Bottling Company through the generosity of John Teeter to go towards the development of the park. An additional $24,000 was secured from the sale of a small portion of the property. These funds will be used in conjunction with other funds already received to help meet our overall goal to complete Phase I.

In addition, an agreement with the WNC Soccer Foundation is required to outline the roles and responsibilities for both the WNC Soccer Foundation and the City of Asheville in securing future funds for this project.

The Parks and Recreation Department, in conjunction with the WNC Soccer Foundation, requests City Council approve the budget amendment to go towards the capital improvement budget for the Azalea Road Park construction and to authorize the agreement with the WNC Soccer Foundation for administering funds collected for this project.

Planning & Development Director Irby Brinson responded to various questions from Councilman Peterson and Councilman Dunn.

Contract Amendment with Carl Walker for Parking Garage in Battery Park Area

Summary: The consideration of a resolution authorizing the City Manager to amend the contract with Carl Walker, Inc. to include an additional $391,113 for the design/development drawings and the construction documents for the parking garage in the Battery Park area.

In 2000, the City of Asheville went through a formal process to select Carl Walker, Inc. to design the parking garage in the Battery Park area. The original contract was for a parking structure on the existing surface lot of the BellSouth lot. The original cost of the project was

$510,000. Since that time several changes have been make in the scope of the work. These changes include:

- The location of the site has moved, causing the design cost of the project to increase because of the geometry of the site;
- The Engineering fees of the Consultant have gone up annually since 2000;
- The Consultant was requested to complete design/development drawings for the private development component of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. This amendment brings the total cost of the project to $901,113.

Staff requests that City Council authorize the City Manager to amend the contract with Carl Walker, Inc. to include an additional $391,113 for the design of the parking garage in the Battery Park area.

Upon inquiry of Councilman Dunn, City Engineer Cathy Ball explained the reasons for the consultant fee increases.

Ms. Ball responded to several questions/comments from City Council.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON STATUS OF AIR QUALITY IN SOUTHEAST

Mr. Bob Camby, Director of the WNC Air Quality Agency, and Dr. Clay Ballantine, member on the WNC Regional Air Quality Agency, updated City Council on the status of air quality in the southeast.

Upon inquiry of Councilwoman Jones, City Attorney Oast said he has contacted the Attorney General's staff about joining the lawsuit to stop Environmental Protection Agency from weakening the Clean Air Act and he would report back to Council next week.

LIST OF EVENTS FOR CO-SPONSORSHIP STATUS WITH CITY FOR 2003-2004

Parks & Recreation Director Irby Brinson said that this is the consideration of a motion approving the list of events requesting co-sponsorship status with the City of Asheville.

The Parks and Recreation Department has developed criteria to determine the minimum requirements for an event to be considered for co-sponsorship. In 2002, the City co-sponsored 35 events and this year the City is requesting co-sponsorship for 41 events. The cost of City services is estimated at 90,000.

The following are the minimum criteria for co-sponsorships with the City of Asheville:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.

5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The list of groups all meet the minimum requirements for co-sponsorship and have requested through the Asheville Parks and Recreation Department that City Council grant them co-sponsorship status in 2003.

The Asheville Parks and Recreation Department recommends City Council accept the list for co-sponsored events in 2003.

Upon inquiry of Councilman Mumpower, Mr. Brinson said that the Fees & Charges Committee would be looking at some cost-sharing measures.

Mr. Brinson responded to questions from Councilman Dunn about the types of different events the City co-sponsors and the possibility of limiting co-sponsorship events in the future.

Councilman Mumpower suggested that the criteria might be tightened a little more in the future.

Councilman Ellis said the events help the economic vitality of our community.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

REPORT FROM THE CITY COUNCIL SUBCOMMITTEE ON CAMPAIGN FINANCE CHANGES

Mayor Worley announced that this matter would be postponed until the March 4, 2003, worksession.

BOARDS/COMMISSIONS

It was the consensus of City Council to have the City Clerk arrange for interviews for the following persons for a vacancy on the Recreation Board: Dr. Gregory Motley, Mr. Samuel Camp and Mr. Jim Lewis.

CLOSED SESSION

At 4:25 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); and (2) To prevent disclosure of information that is privileged or confidential pursuant to the laws of North Carolina or the United States, or not considered a public record within the meaning of Chapter 132 of the North Carolina General Statutes. The law that provides that the information to be considered is not a public record is N.C.G.S. 132-1.7. This motion was seconded by Councilman Dunn and carried unanimously.

At 5:00 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

SCHOOL BOARD INTERVIEWS

At 5:00 p.m., City Council interviewed Marsha Bate, Thomas Hunnicutt, Tom Knoebber, Marianne Reinert, and Ann Von Brock for two vacancies on the Asheville School Board. Ms. Dolly Jenkins-Mullen was unavailable to come in for this interview due to inclement weather. Therefore, it was the consensus of City Council to interview Ms. Jenkins-Mullen on February 25, 2003.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 25, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mr. Grady W. Beard, veteran from US Army, led City Council in the pledge of allegiance.

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PRESENTATION OF $400,000 GRANT

Buncombe County Tourism Development Authority Vice-Chair Herman Turk, representing the Buncombe County Tourism Development Authority, and WNC Soccer Foundation President Lloyd Sigman and Chair Becky Lewis, representing the WNC Soccer Foundation, presented the City of Asheville with a check in the amount of $400,000 from a grant from the Buncombe County Tourism Development Authority and the WNC Soccer Foundation for construction of the John B. Lewis Soccer Complex at Azalea Road Park.

B. PROCLAMATION PROCLAIMING SATURDAY, MARCH 1, 2003, AS "SUPPORT OUR SOLDIERS DAY"

Mayor Worley read the proclamation proclaiming Saturday, March 1, 2003, as "Support our Soldiers Day" in the City of Asheville. He said that he and Buncombe County Chairman Ramsey would be presented the joint City/County proclamation at a rally on Saturday.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 11, 2003, AND THE WORKSESSION HELD ON FEBRUARY 18, 2003

B. RESOLUTION NO. 03-24 - RESOLUTION AUTHORIZING THE APPLICATION FOR NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM – PHASE II STORMWATER PERMIT

Summary: The consideration of a resolution authorizing the City Manager to sign the National Pollutant Discharge Elimination System (NPDES) Phase II Permit Application and any other paperwork necessary to comply with the Environmental Protection Agency (EPA) Federal Non-Funded Mandate.

In 1998, EPA adopted a rule called the NPDES Stormwater – Phase II rule. This rule applies to all municipalities with a population less than 100,000 that own or operate a Municipal Separate Storm Sewer System. The rule specifies that these units of government must develop a program for managing stormwater runoff, particularly pollutants associated with stormwater runoff. The application must be submitted to the State on or before March 2003.

The program must describe how the City will attempt to meet six minimum requirements: (1) Public Education/Outreach; (2) Public Participation/Involvement; (3) Illegal/Illicit Discharge Detection and Elimination; (4) Construction Site Runoff Control; (5) Post-Construction Runoff Control; and (6) Pollution Prevention/Good Housekeeping Measures.

In 2002, the City purchased a software program from the League of Municipalities as a guide to develop the permit. The permit will apply for a five-year period following the issuance of the permit from the State. The first year of the program will consist of developing plans and coordinating activities between various agencies. For example, the City of Asheville hopes to develop a Public Education/Outreach Program in conjunction with the other municipalities in the County.

One official deadline for the five-year program is that an ordinance controlling post-construction runoff must be adopted by City Council by March 10, 2005.

The cost of this program averages approximately $250,000 per year over the five-year period. At the 2002 City Council Retreat, Council approved City staff exploring the feasibility of developing a Stormwater Utility to fund the stormwater program. Staff is still in the process of evaluating this recommendation.

City staff requests that City Council authorize the City Manager to sign the National Pollutant Discharge Elimination System (NPDES) Phase II Permit Application and any other paperwork necessary to comply with the EPA Federal Non-Funded Mandate.

RESOLUTION BOOK NO. 27 – PAGE 313

C. RESOLUTION NO. 03-25 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "EAST END PLACE" OFF MARTIN LUTHER KING DRIVE

Summary: The consideration of a resolution accepting the new proposed street name "East End Place."

Asheville Area Habitat, owner of lots off of Martin Luther King Drive, has petitioned the City of Asheville to accept the street name " East End Place."
The new street will begin at Martin Luther King Drive and end at cul-de-sac on East End Place.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 314

D. ORDINANCE NO. 3001 - BUDGET AMENDMENT TO CONTINUE THE CONSTRUCTION OF PHASE I OF THE AZALEA ROAD PARK PROJECT

Summary: The consideration of a budget amendment, in the amount of $474,000, to continue the construction of Phase I of the Azalea Road Park project and consideration of a resolution authorizing the City Manager to enter into an agreement with the Western North Carolina Soccer Foundation for administering future funds collected for this project.

In 2001, City Council approved the Master Plan for the development of the Azalea Road Park. The development of the 155 acres will occur in a number of phases. The first phase includes the construction of two soccer fields, restroom/concession stand, picnic shelter, playground, parking and other infrastructure needs. The Department, in association with the WNC Soccer Association, has worked extremely hard in the past several months to secure funding for this project. First and foremost, a grant was secured from the Tourism Development Authority for funds totaling $400,000. This was the first grant awarded by this group for the development of the facilities that will increase the economic vitality of our community. In addition, we have secured $50,000 (which we will receive in $10,000 installments over five years) from Pepsi Cola Bottling Company through the generosity of John Teeter to go towards the development of the park. An additional $24,000 was secured from the sale of a small portion of the property. These funds will be used in conjunction with other funds already received to help meet our overall goal to complete Phase I.

In addition, an agreement with the WNC Soccer Foundation is required to outline the roles and responsibilities for both the WNC Soccer Foundation and the City of Asheville in securing future funds for this project.

The Parks and Recreation Department, in conjunction with the WNC Soccer Foundation, requests City Council approve the budget amendment to go towards the capital improvement budget for the Azalea Road Park construction and to authorize the agreement with the WNC Soccer Foundation for administering funds collected for this project.

ORDINANCE BOOK NO. 20 – PAGE

E. RESOLUTION NO. 03-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE WNC SOCCER FOUNDATION FOR ADMINISTERING FUNDS COLLECTED FOR AZALEA ROAD PARK

Summary: See Consent Agenda Item "D" above.

RESOLUTION BOOK NO. 27 – PAGE 315

F. RESOLUTION NO. 03-27 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED CONTRACT WITH CARL WALKER FOR THE PARKING GARAGE IN THE BATTERY PARK AREA

Summary: The consideration of a resolution authorizing the City Manager to amend the contract with Carl Walker, Inc. to include an additional $391,113 for the design/development drawings and the construction documents for the parking garage in the Battery Park area.

In 2000, the City of Asheville went through a formal process to select Carl Walker, Inc. to design the parking garage in the Battery Park area. The original contract was for a parking structure on the existing surface lot of the BellSouth lot. The original cost of the project was $510,000. Since that time several changes have been make in the scope of the work. These changes include:

- The location of the site has moved, causing the design cost of the project to increase because of the geometry of the site;
- The Engineering fees of the Consultant have gone up annually since 2000;
- The Consultant was requested to complete design/development drawings for the private development component of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. This amendment brings the total cost of the project to $901,113.

Staff requests that City Council authorize the City Manager to amend the contract with Carl Walker, Inc. to include an additional $391,113 for the design of the parking garage in the Battery Park area.

RESOLUTION BOOK NO. 27 – PAGE 316

G. MOTION APPROVING THE LIST OF EVENTS FOR CO-SPONSORHIP WITH THE CITY OF ASHEVILLE

Summary: The consideration of a motion approving the list of events requesting co-sponsorship status with the City of Asheville.

The Parks and Recreation Department has developed criteria to determine the minimum requirements for an event to be considered for co-sponsorship. In 2002, the City co-sponsored 35 events and this year the City is requesting co-sponsorship for 41 events. The cost of City services is estimated at 90,000.

The following are the minimum criteria for co-sponsorships with the City of Asheville:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.
5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The list of groups all meet the minimum requirements for co-sponsorship and have requested through the Asheville Parks and Recreation Department that City Council grant them co-sponsorship status in 2003.

The Asheville Parks and Recreation Department recommends City Council accept the list for co-sponsored events in 2003.

H. RESOLUTION NO. 03-28 - RESOLUTION AUTHORIZING THE SALE OF PROPERTY OFF BLAKE MOUNTAIN CIRCLE TO RHETT GROTZINGER.

Summary: The consideration of a resolution authorizing the sale of property off Blake Mountain Circle to Rhett Grotzinger in the amount of $10,600.

On October 22, 2002, the City Council directed the City Clerk to advertise for upset bids on property off Blake Mountain Circle. The advertisement ran in the Asheville Citizen-Times on November 1, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. An upset bid was received by Bruce McTaggart in the amount of $3,935 and the bid was re-advertised on November 15, 2002. An upset bid was received by Rhett Grotzinger in the amount of $4,300 and the bid was re-advertised on November 29, 2002. An upset bid was received by Bruce McTaggart in the amount of $4,565 and the bid was re-advertised on December 13, 2002. An upset bid was received by Rhett Grotzinger in the amount of $8,000 and the bid was re-advertised on January 10, 2003. An upset bid was received by Bruce McTaggart in the amount of $10,000 and the bid was re-advertised on January 24, 2003. An upset bid was received by Rhett Grotzinger in the amount of $10,600 and the bid was re-advertised on February 7, 2003. No response was received. Therefore, the offer to purchase from Rhett Grotzinger in the amount of $10,600 was not upset and the sale to Rhett Grotzinger should be approved.

Approval of the resolution will authorize the sale of the property to Rhett Grotzinger for the amount of $10,600.

Community Development staff recommends adoption of the resolution authorizing the sale of property off Blake Mountain Circle to Rhett Grotzinger.

RESOLUTION BOOK NO. 27 – PAGE 317

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A MODIFICATION FROM THE SUBDIVISION STANDARDS ON PROPERTY LOCATED AT 139 THIRD STREET TO ALLOW THE SUBDIVISION OF EXISTING PROPERTY INTO TWO PARCELS WITHOUT PUBLIC STREET FRONTAGE

Mayor Worley opened the public hearing at 5:27 p.m.

Urban Planner Carter Pettibone said that this is consideration of a request for modification from the subdivision standards to allow the creation of two lots that do not abut a public street on property located at 139 Third Street. This public hearing was advertised on February 14 and 21, 2003.

The City has received a request from Samuel and Maureen Zitin to subdivide a parcel located at 139 Third Street into two lots (PIN No. 9658.17-11-6302). The parcel is 3.06-acres in size and zoned RS-8 Residential Single Family High Density District. It currently has two homes located on it, a mobile home and a single family detached dwelling. Third Street is a paved street maintained by the City up to the petitioner's property line. Public right-of-way for the street appears to end about 165' in front of the property. Since it is not possible to obtain the minimum frontage for the resulting lots as specified in the Subdivision Ordinance, a modification is required.

The petitioners wish to subdivide the lot in order for each home to have its own lot and no additional homes are proposed. Each resulting lot would also be able to meet the Unified Development Ordinance requirements of the RS-8 District for minimum lot size and setbacks.

Since one of the resulting lots would not have a direct connection to Third Street, access to it would need to be maintained through the creation of an access easement across the other lot. The establishment of this easement was a condition placed on the recommendations of staff, the Technical Review Committee (TRC) and the Planning and Zoning Commission.

The TRC and Planning and Zoning Commission each voted unanimously to recommend approval with the condition that an access easement be granted over one lot to serve the other.

The Planning and Development Staff also recommends approval of the subdivision modification with the condition.

Upon inquiry of Mayor Worley, Mr. Pettibone said that he would ask the Traffic Engineer investigate obtaining a public right-of-way for the remainder of the portion of the street that is currently being maintained.

Vice-Mayor Bellamy asked City staff look at a possible amendment to the Unified Development Ordinance so that a subdivision modifications such as this does not have to come before Council.

Mayor Worley closed the public hearing at 5:31 p.m.

Councilman Ellis moved to allow a modification from the subdivision standards on property located at 139 Third Street to allow the subdivision of existing property into two parcels without public street frontage with the condition that an access easement be granted over one lot to serve the other. This motion was seconded by Councilman Dunn and carried unanimously.

B. PUBLIC HEARING TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ADD RESEARCH AND TECHNOLOGY PRODUCTION AS A PERMITTED USE IN CERTAIN COMMERCIAL DISTRICTS

ORDINANCE NO. 3002 - ORDINANCE TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ADD RESEARCH AND TECHNOLOGY PRODUCTION AS A PERMITTED USE IN CERTAIN COMMERCIAL DISTRICTS

Mayor Worley opened the public hearing at 5:33 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to add research and technology production as a permitted use in certain commercial districts. This public hearing was advertised on February 14 and 21, 2003.

This code amendment defines "research and technology production uses" and permits them in the Community Business II District, Institutional District, Highway Business District, Regional Business District, Central Business District, Commercial Industrial District and Industrial Districts. Once defined, the uses would be permitted in the River District as well. These uses are the "high tech" uses that form the backbone of our local economic development strategy.

This item was previously heard by the Planning and Zoning Commission and recommended for approval. At a City Council meeting, staff was asked to research environmental hazards concerns associated with the research and technology production uses and return the amendment for consideration. This research reveals that environmental concerns associated with the intended uses are effectively handled through existing environmental permitting procedures. There are extensive environmental permitting procedures that pertain to medical wastes and by-products from the types of uses proposed in this amendment; for some chemicals, this permitting involves "cradle-to-grave" tracking (i.e., from time of production to time of disposal).

On January 23, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 5:35 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-29 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Bellamy said that the terms of Brian Weinkle and Roy Harris, as members of the Asheville School Board, expire on April 1, 2003.

On Tuesday, February 18, 2003, City Council interviewed the following candidates for vacancies on the Asheville School Board: Marsha Bate, Tom Knoebber, Ann L. Von Brock, Marianne Reinert and Thomas Hunnicutt. Since Dolly Jenkins-Mullen was unable to attend the interview on February 18, 2003, due to her being out-of-town during inclement weather City Council interviewed Ms. Jenkins-Mullen on February 25, 2003.

After each Council member spoke about the high qualifications of all the candidates, Marsha Bate received 3 votes, Tom Knoebber received 0 votes, Ann L. Von Brock received 6 votes, Marianne Reinert received 0 votes, Thomas Hunnicutt received 0 votes, and Dolly Jenkins-Mullen received 5 votes. Therefore, Ann L. Von Brock and Dolly Jenkins-Mullen were appointed as members to the Asheville School Board to begin serving a four year term respectively on April 1, 2003, until April 1, 2007, or until their successors have been appointed and qualified.

RESOLUTION BOOK NO. 27 – PAGE 318

B. RESOLUTION NO. 03-30 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Vice-Mayor Bellamy said that Tom McMahon has resigned as a member of the Recreation Board, thus leaving an unexpired term until June 30, 2003.

On February 18, 2003, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Mr. Jim Lewis, Mr. Samuel Camp and Dr. Gregory Motley. Dr. Motley was unable to come in for an interview due to his surgery schedule.

After Council spoke about the high qualifications of all candidates, Jim Lewis received 1 vote, Samuel Camp received 6 votes and Gregory Motley received 0 votes. Therefore, Samuel Camp is appointed to serve the unexpired term of Mr. McMahon, term to expire June 30, 2003, and then to serve a full three year term, term to expire June 30, 2006, or until their successor has been appointed

RESOLUTION BOOK NO. 27 – PAGE 319

C. RESOLUTION NO. 03-31 - RESOLUTION REGARDING THE INCORPORATION OF THE TOWN OF MILLS RIVER

Planning & Development Director Scott Shuford said that citizens in the Mills River area of Henderson County have petitioned the State Legislature to incorporate approximately 22 square miles of property containing about 6,890 residents centered on Highways 191 and 280 from south of the Asheville Regional Airport to the Transylvania County line. By contrast, the City of Asheville has an incorporated area of approximately 42 square miles and a population of about 70,000 residents. The approximate respective densities are 320 and 1667 persons per square mile.

The stated reasons for incorporation are quoted below from the Mills River incorporation web page:

- *To protect the historical, cultural and rural identity of the community.*
- *To have a stronger voice in decisions that are made concerning the community.*
- *To control our own destiny.*

The Town proposes a tax rate of 7.5 cents per $100 valuation, of which 6.5 cents will go toward continuation of rural fire district fire protection services. Four Town services will be provided:

- Fire protection through a contract with the rural fire district
- Police protection through a contract with the county sheriff department
- Garbage collection on a voluntary basis through a private hauler
- A street lighting program

Despite the stated intent to protect the "rural identity" of the community, Town zoning is to be handled by Henderson County under the County's "open use" zoning. There appears to be no active effort to establish a planning and zoning program to achieve the rural character goals since the County "open use" zoning allows virtually any land use to occur.

Under the proposed Charter of the Town of Mills River, one Town board will be created; this board will be charged with addressing agricultural issues. A five-member Town Council will be created and will operate under the council-manager form of government.

Under the NC Constitution, municipal incorporation requires an act of the legislature. Petitions for incorporation are filed with the Joint Legislative Commission on Municipal Incorporation. Upon receiving the petition, the Commission undertakes a "Phase 1" review, which is simply to determine the sufficiency of the petition, which must contain certain information. There follows a "Phase 2" review, which focuses on whether area meets the criteria for incorporation (density, degree of development; but a lower threshold than for annexation), and whether the services promised can actually be delivered.

During this process, the incorporating municipality must notify all other cities in the county or counties wherein it is located, and must notify any city of 50,000 or more that is within 5 miles ("proximity test"). In the case of Mills River, Asheville is within 5 miles and has been notified. Under the law, if a petition is insufficient (Phase 1), it may not be processed; if the criteria are not met (Phase 2), the Commission must make a "negative recommendation" to the General Assembly. Similarly, if there is a city that meets the proximity test that does not express its approval of the proposed incorporation (part of Phase 2), the Commission may not make a positive recommendation. In the event of a negative recommendation, the Commission may hold a public hearing and may, in certain circumstances, require a referendum (presumably of the affected area). Even if the Commission makes a negative recommendation, the legislature may still incorporate. However, if there is a city of 50,000 or more within 5 miles, incorporation requires a three-fifths vote of the General Assembly, whether or not that city approves of the proposed incorporation.

As Council has been advised, the Commission met last week for the Phase 1 review. The Commission is proceeding with Phase 2, but wishes to hear from Asheville on the question, and has given us two weeks to act.

The most obvious comment about this incorporation effort is that it seems counterintuitive to create an urban area (a "town") in order to maintain a rural land use character, especially when no specific land use controls are proposed to preserve that rural development pattern. The limited number of public services and extremely low tax rate (only 1 cent above the current tax rate) seems to argue that the incorporation is primarily a "defensive" one, initiated to stop possible annexation by Fletcher, Hendersonville, or Asheville rather than to create an urban area of enhanced public services.

However, the key issue of importance for the City of Asheville is that the incorporation and its proposed continued use of "open use" zoning will effectively prohibit the conversion of the prime flatland in the Mills River Valley to industrial uses. This land represents a regional resource that, under "open use" zoning, will most likely be developed with low density residential or small-scale commercial land uses. Strict, industrial-only zoning regulations are required to preserve this land for industrial use. Additionally, an incorporation that is created to maintain a rural character without including the zoning tools necessary to ensure that the desired character will be maintained will not be successful; instead, this area will most likely continue to be developed in a sprawl pattern that is counter to regional economic development goals.

We have had limited discussions with the Town of Fletcher regarding their concerns about this incorporation. Fletcher is amenable to the incorporation only if there is a "boundary agreement" worked out between Fletcher and Mills River. Such an agreement could address the above concerns of the City of Asheville by ensuring that critical land suitable for industrial development is reserved for that use. To our knowledge, no such agreement has been pursued by those seeking the incorporation of the Town of Mills River.

From a land use planning perspective, it would appear to make more sense for the incorporation to be concentrated in a much smaller area, generally centering on the Highway 191 and 280 intersection. This location exhibits a more "urban" development pattern than the remainder of the proposed area of incorporation; it is already known and accepted as the "town center" of Mills River. The incorporation of this area would allow the "town center" of Mills River to be established now and perhaps expanded at a later date, while also allowing a more comprehensive planning program to be developed that would address the concerns of Asheville and Fletcher about the scale of the proposed annexation and the ultimate land use pattern.

For the reasons noted, staff recommends adoption of the resolution.

Upon inquiry of Vice-Mayor Bellamy, Mayor Worley received a letter today from the Town of Fletcher Mayor William B. Moore that said they do not support the incorporation effort without an equitable boundary agreement with the Town of Fletcher. Mayor Moore said that they would not have representation at the meeting today because they have their pre-budget retreat.

Upon inquiry of Councilman Ellis, Mr. Shuford said that there are some small subdivisions, some small business and industrial parks, and some agricultural product uses being built off of 280. It is an area in transition, but even on the map, that Mills River representatives participated in the drawing of it, shows the expanded Metropolitan Planning Organization

346

boundaries do not include all of the area that is being proposed for incorporation, nor does it show this as an urban area in any stretch of the imagination. This is likely not a very high growth area, at least over the short term, but an area that is seeing some transition and change and that's probably why there is some interest in seeking incorporation – to have control over how that change might affect them. However, what has been proposed in terms of town services for this are not any sort of zoning or planning pattern that would better reflect that community character.

City Attorney Oast summarized state law by saying that if the City of Asheville takes no action on the resolution, the Joint Legislative Commission on Municipal Incorporation may not make a positive recommendation to the General Assembly. In other words, unless City Council adopts a resolution of approval, then the Commission may not make a positive recommendation.

Mr. Shuford said that staff's recommendation is one of approval, but just a smaller boundary.

When Vice-Mayor Bellamy asked if the Commission could work out the boundaries of what they are allowing to be incorporated, City Attorney Oast said the Commission has the authority to modify the petition.

Upon inquiry of Vice-Mayor Bellamy regarding the Town of Fletcher's boundary agreement request, City Attorney Oast said that they don't have any legal standing since they are not a city of 50,000 or more that is within 5 miles of the proposed incorporation.

Councilman Ellis would support a positive recommendation for Mills River to incorporate a smaller area. Then that would give them the opportunity, at some later time, to come back, just as all other cities do now, to expand.

Councilman Dunn said he'd like to let our neighbors make their own decisions. In response, Mr. Shuford said that it's with a lot of reluctance that we find ourselves in a position of having to make a recommendation to Council that is less than what Mills River did request as far as their incorporation. But we think we would be remiss in not pointing out the fact that we've got a regional resource, just as is the water of Mills River and the French Broad River is a regional resource in terms of the land, and that is an issue that Council needs to be aware of as you evaluate this request. City Attorney Oast also noted that at the initial review of the petition on this matter which came up before the Commission a couple of weeks ago, they affirmatively requested Asheville's input on this.

Councilman Peterson asked is staff sees any downside in not passing a resolution if there is not consensus on Council. Mr. Shuford said the downside would be to the people who are attempting to make this incorporation because it would send forth a negative recommendation from the Commission charged with making some recommendation on this. They may forward that as a technically negative recommendation and qualify it by saying that they didn't receive anything from the City of Asheville and that may have some affect on how the legislature votes. Mr. Shuford explained that staff's concern is fairly limited and it deals with the potential of that land to be developed eventually for industrial purposes and we think that is a regionally economic development issue, not a City of Asheville issue. Again, staff does not have a strong point of view on this, other than to point out to Council that they have a concern about the fact that the proposed zoning plan for the community, their land use development program, doesn't seem to adequately protect certain flatland for potential industrial development. Henderson County does have an industrial zoning district in its toolbox and certainly those are things that could be brought into play at some future point.

Ms. Elana Carland, representing the Mills River Incorporation, said that if they incorporate the smaller area, their density would not meet state requirements and it would place an undue tax burden on those businesses in that area Asheville's staff's main concern with the incorporation is the industrial areas. This committee has never said they would not support industry. We are starting a town and therefore we cannot initiate planning and zoning at the beginning, unless they want to do a poor job of it. We are contracting for two years with Henderson County for them to take care of the planning and zoning issues. In the third year of our budget, we have a town planner budgeted. That way we will have time to establish our town and then we can go on and do our planning. Seventy-five percent of this area is already regulated by government agencies. The only area that is not is that industrial area that we are all talking about. Our tax rate is very low – one cent. We feel that would be very attractive as a regional industrial attractant for industry because they will see the low tax rate. The Mills River residents have said they want minimal government and low taxes and that is why we are incorporating this huge area. We would like to start our town with historic town boundaries and we are encompassing most of our fire district. She read a quote from a former Henderson County Commissioner said that "incorporation of a large area reduces headaches associated with future annexation and it gives us the ability to plan for the whole community from the start." Most of the residents in this area have wanted in the incorporation area. We have met with the Town of Fletcher several times and have not worked out a boundary agreement with them. We don't see the need to enter into a boundary agreement with them. We did offer them some prime industrial land as a boundary agreement in their Charter and they refused it and said it was not enough. Our state representatives are all in support of this incorporation. She said they met with Asheville on April 22, 2002, and on July 2, 2002, and asked if there were any concerns and they received no answers.

Vice-Mayor Bellamy wanted to make sure that the Committee thought about if the town would be able to meet their budget needs with all the unfunded state mandates on small and large cities. Ms. Carland said they would work with minimum government at the start, again stating that they are capable of providing the services, e.g., by increasing the sheriff's patrol in that area.

When Vice-Mayor Bellamy questioned if it is going to be equitable to Henderson County residents (who are not being incorporated), Ms. Carland responded that there was unanimous support from the Henderson County Commissioners.

Upon inquiry of Councilman Dunn, Ms. Carland said she would like Asheville to pass a resolution in support of the incorporation of the current boundaries. They are not prepared to shrink their boundaries and see no reason to do that since Asheville has not made a strong enough argument to convince them to shrink the boundaries. She felt that industrially, they would be the most attractive for regionalism industry because they will have the lowest tax rate and they will be able to provide everything they need.

Mr. Daniel Breen spoke in support of the City supporting the Mills River community incorporation especially since industrial growth and farm land is so important.

Councilman Peterson asked if there would be a potential conflict with Asheville's agreement with Henderson County that if there are regional water lines, the Regional Water Authority would build and own those, but they would be in some other town. He said it's one proposition for water customers in Asheville to be paying for water lines in Henderson County and another proposition for water customers in Asheville to be paying for water lines in some other town. Mayor Worley responded that it was his understanding of the agreement that the incorporation would not affect the agreement. It would still be Henderson County making a request under the terms of the current agreement, even if the property were within an incorporated area. There is nothing in the agreement that restricts the ability to put in a regional water line to an unincorporated area, so he didn't think it would have any effect on that particular agreement. He noted that Asheville owns the water lines in the Town of Black Mountain. In addition, City Manager Westbrook said that most of the area of the proposed incorporation would be served by the City of Hendersonville, opposed to the Regional Water Authority.

Councilman Ellis said that he understands that the whole concept of towns and cities under state law is that incorporation is supposed to serve an urban area. From that standpoint, he felt that the 22 square miles is a rural area. They would not be creating a town to serve an urban area. Even though the Asheville doesn't want to be involved in this decision-making process with regard to the Mills River incorporation in another County, he would rather vote not to do anything and let the process proceed without Asheville's input, or he would support the incorporation of a smaller boundary because that would be creating a town to serve an urban area.

Councilman Dunn felt Asheville should give Mills River a chance to incorporate and felt Asheville's concerns were more about control. He supported the incorporation of the original boundaries.

Upon inquiry of Councilman Mumpower, Ms. Carland said that it would be very difficult for them to meet the density for incorporation if their boundaries were condensed and that they are unique in terms of a town because they are so spread out. She said that there are 7,000 people in the entire boundary area and most are not directly on the road. They do not want to stress the few businesses in the condensed area by making them support the whole town.

Councilman Mumpower said that prior to the meeting, what staff said made sense about supporting the incorporation of the condensed boundaries, but the Mills River community says that if they don't have the entire 22 square miles, they can't realistically develop a tax base to incorporate. If Asheville is going to try to help them, we need to help them in a way that gives them a realistic chance for success. Therefore, he would support a vote and let Asheville get out of the way and let the state wrestle with some of the more complex issues, such as boundaries and density.

Councilman Peterson said that this Council has seen that when certain undesirable development happens here in Asheville, the people who have a vote tend to turn out and be very opposed to it. He felt that the plan right now that the Mills River community is presenting doesn't include restrictive zoning but he thinks it will happen and it won't be good for the region. This is currently a mostly residential area and we know what happens when something tries to go into a residential area when the residents don't like it. He couldn't support any resolution. He doesn't want to draw their town's boundaries and we should let them settle that with the legislature.

Vice-Mayor Bellamy said that she would support the incorporation. She felt there will be some issues that they will have to deal with, whether it's providing city services for their residents, trying to balance their budget, or trying to meet all the state mandates, but if they feel they have researched all the information, she didn't think it's our position to interfere. Since they have committed to working towards regionalism for economic development reasons, she would support them.

Mayor Worley said that City Council is unanimous in wishing they didn't have to voice an opinion in this incorporation. He responded to Ms. Carland's statement about the prior meetings with Asheville staff, noting that at the time the meetings were held, they felt they were meeting to obtain information only. It was only within the last 30 days that Asheville realized they would have to make an opinion on the incorporation. He did have some concerns about the size of the original proposed area. We need to express our opinion with an honest, up-front answer and to him that's based on good urban planning principles. When you look at 22 square miles, and just for comparison Asheville is 34 square miles, and a population of 7,000, versus the population in Asheville of $70,000, it sets that contrast. So, we have to question the size of the area being consistent with good urban planning. That having been said, he would be willing to support a resolution that expresses Asheville's concerns, but supports the incorporation and then at least our concerns have been noted and the rest would be up to the Commission.

City Attorney Oast suggested the following amendment to the resolution Council has received: (1) The City of Asheville approves the effort of the Community of Mills River to obtain a greater degree of governance and control over its future through incorporation but expresses the following concerns: (a) That the size of the area proposed for incorporation will present practical difficulties in delivering urban services; and (b) That the proposed incorporation may limit the land available in the area for business development; and (2) The City Attorney is directed to transmit a certified copy of this resolution to the Commission.

Councilwoman Jones asked if the Joint Legislative Committee will see what the vote was by Council on the resolution. City Attorney Oast said that a 4-3 vote has the same weight as a unanimous vote. There is no requirement for any other kind of vote other than a majority on this resolution.

Vice-Mayor Bellamy moved to adopt Resolution No. 03-31, as suggested by the City Attorney. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Councilman Peterson voting "no".

RESOLUTION BOOK NO. 27 – PAGE 320

VI. OTHER BUSINESS:

Clean Smokestacks Act

Upon inquiry of Councilwoman Jones about the upcoming March 3, 2003, deadline of joining other states in a lawsuit against the Environmental Protection Agency (EPA), City Attorney Oast updated City Council on his research of Asheville joining in a lawsuit with other states against the EPA's decision to review the New Source Review provision of the Clean Air Act. He said that he spoke with members of the State Attorney General's staff and they had advised him that they don't think the proposed change will have an affect on the Clean Smokestacks Act. This is a very complex matter that requires extensive expertise in environmental law and we do not have that expertise in the City Attorney's Office. Based on his limited research, he recommended Asheville not get involved as a party in this matter because that would involve a considerable amount of time and he would have to ask Council to budget funds in order to hire an attorney because we do not have the expertise in-house. He did point out other ways that Asheville could get involved without that level of commitment and to add our voice to those others who are involved.

Claims

The following claims were received by the City of Asheville during the period of February 7-13, 2003: Glenda R. Sargent (Police), Lynnwood Jackson (Water), BellSouth (Water), Reid Thompson (Water) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Will Harlan, representing The Canary Coalition, encouraged City Council to adopt a resolution supporting and encouraging Attorney General Roy Cooper to join the lawsuit against the Environmental Protection Agency with the other ten states.

Mr. Daniel Breen, Asheville resident, urged City Council to appoint a committee to look at the pollution that will go into the French Broad River as a result of the Ecusta plant in Transylvania County shutting down their pollution controls. He said we need to make our voice heard to our state representatives.

Mr. Grant Millin, representing the WNC 911 Coalition for America, presented City Council with information and asked Council to educate and make policy on critical homeland security issues.

Mr. Fred English spoke about the many freedoms we now enjoy because of our veterans He urged City Council to not allow two rallys to occur on Saturday, March 1, 2003, since he felt one rally will only disrupt the other rally.

Mr. Bill Fishburne, retired Green Beret, asked that City Council relocate the second rally (Support Our Soldiers – Bring Them Home) on March 1, 2003, to Montford Park so as not to disrupt the Support Our Soldiers rally. He understood that the Parks & Recreation Department had to issue a permit, however, there is a possibility of confrontation and conflict and they wish to avoid that disruption. City Manager Westbrook said that the Police Department is aware of those concerns, will continue to monitor it, and they have the situation well under control. City Attorney Oast also pointed out that the City is limited in our ability to deny permits for simultaneous events.

Ms. Rebecca Campbell presented City Council with a set of materials regarding the requested repeal of Resolution No. 01-144 which gave "unconditional support to the Bush administration's so-called War on Terror." She asked Council to repeal or rewrite Resolution No. 01-144 to "not only preclude possible civil liberties litigation, but to reflect a more cautious support for a national administration that history will show to have been far more inimical to the welfare of the American people than any foreign terrorists."

Mr. Calvin Loyd Hensley, former employee of the City of Asheville, briefed Council on his termination from the City and requested information on the number of Masons the City of Asheville employs.

After discussion initiated by Councilwoman Jones, it was the consensus of City Council to have the City Attorney write a letter for the Mayor's signature to the Attorney General's Office to encouraging him to do whatever he can to protect the air in Western North Carolina.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:17 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 4, 2003 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Clerk to Advertise Offer to Purchase Property on Iris Drive

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a vacant lot at 125 Iris Drive.

A bid from Neighborhood Housing Services of Asheville (NHS), in the amount of $17,100, has been received for the purchase of a vacant lot at 125 Iris Drive. The bid is not less than the appraised value of $17,100.

The property is a single-family residential RS-8 zoned lot on Iris Drive comprising approximately 0.28 acre of land. The property has a rectangular shape and is fairly level elevated about 3' - 4' above street level. It has approximately 100 front feet on Iris Drive. There is no current or contemplated use for the property by the City. NHS plans to build a single -family residence on the site for sale.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer of purchase for upset bids.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

DOWNTOWN RESTROOMS REPORT

Parks & Recreation Director Irby Brinson said that the Parks and Recreation Department was asked by the City Manager to conduct a study on downtown restrooms within the City's business corridor.

Mr. Brinson said that the issues for public restrooms include: abuse of existing facilities; some facilities not designated for heavy public use and lack required maintenance; lack of awareness of some facilities open to the public; some facilities are not handicap accessible; limited availability between 5:30 p.m. and 8:00 a.m.; and provision of public restrooms for the residents and visitors who are not accommodated by private restroom facilities. Optimum qualities for public restrooms include: open to general public; visible; handicap accessible; strategically located; well-lighted; durable design; attractive; promoted as an asset; year-round usage; monitored and maintained; discourages vagrancy; and convenient hours of operation.

He said a survey of existing restrooms in public facilities revealed that there are 21 restrooms in the downtown area: City Hall; Buncombe County Courthouse; County Health

Department, YMCA, Thomas Wolfe Memorial; Municipal Building; YMI Cultural Center; Public Works Building; Pack Plaza; NC Cooperative Extension Service; Asheville Transit Authority; Asheville Public Library; Civic Center; Food Lion Skatepark; Grove Arcade; Western Carolina Rescue Mission; Chamber of Commerce; Salvation Army Shelter; Senior Opportunity Center; United Way, and Department of Social Services. There are 12 restrooms in public facilities that are open during daylight hours and have minimal restrictions. Those include: City Hall; Public Works Building; Municipal Building; Buncombe County Courthouse; YMI Cultural Center; Senior Opportunity Center; Food Lion Skatepark; Asheville Public Library; Grove Arcade; United Way; Civic Center; and Department of Social Services. Two restrooms in public facilities that are open at night include the Salvation Army Shelter and the Western Carolina Rescue Mission.

Mr. Brinson said that a number of case studies were reviewed to determine what other cities have done to address this issue, which included Black Mountain, N.C.; Roanoke, Virginia; Chattanooga, Tennessee; and Boulder, Colorado.

He shared with Council a number of options in trying to address the issue, along with advantages, disadvantages and cost estimates for these options.

Option No. 1 – Utilize and Promote Existing Restrooms in Public Facilities – Initial cost would be minimal. Estimate for annual maintenance - $35,000.

Option No. 2 – Standard Portable Restrooms – Initial cost would be $2,500 for five units. Estimate for annual maintenance - $10,500.

Option No. 3 – Deluxe Portable Restrooms – Initial cost would be $5,000 for five units. Estimate for annual maintenance - $10,500.

Option No. 4 – New Facilities in Downtown Storefront – Initial cost would be $175-200,000. Estimate for annual maintenance - $45,000.

Option No. 5 – Integrate into New/Existing Public Parking Deck – Initial Cost would be $80-150,000. Estimate for annual maintenance - $45,000.

In summary, Mr. Brinson said there are currently 21 restrooms located in downtown Asheville public facilities. Twelve of these restrooms are currently open during daylight hours and have minimal restrictions and two restrooms are open at night, but contain restrictions. Strong concerns exist regarding vandalism, cleanliness, accessibility and operating costs in these public facilities. All options do not form a solution because of existing social issues. These existing issues are larger than a "public restroom." All of the options presented will require additional resources to address security and maintenance.

Discussion surrounded a possible partnership with the Downtown Association; some kind of district to help fray costs; and fees to use restrooms.

Councilwoman Jones felt Council needed to make a decision and commit money to this issue. She felt we have a moral responsibility to provide more than what is existing now. She did not feel, however, that portable restrooms would be good for our community.

Councilwoman Jones did not see a problem in having the Downtown Social Issues Task Force review this information for their input and advice; however, it is City Council's responsibility.

Councilman Ellis, liaison to the Downtown Commission, agreed that it is Council's ultimate responsibility, but he felt it should be a shared responsibility with the downtown merchants. He did note that the merchants are aware of the issues and most are willing to work with the City. He felt it would be appropriate for City Council to ask the Downtown Social Issues Task Force to review this information, along with the other charges given to them by City Council, and report back to Council with a comprehensive recommendation

Vice-Mayor Bellamy was concerned that by the time the recommendation is received from the Task Force, Council will be in the middle or through the budget process and will have to wait another year to initiate any recommendations. City Manager Westbrook said that if the budget is complete by the time the recommendations come in, City Council can make an appropriation from either Contingency or Fund Balance.

It was the consensus of Council, after further discussion, to ask the Downtown Commission, the Downtown Association and the Downtown Social Issues Task Force to review this information on a fairly quick basis and to report back to Council their recommendations, which may include the best way to build partnerships and how to solicit contributions.

REPORT FROM THE CITY COUNCIL SUBCOMMITTEE ON CAMPAIGN FINANCE CHANGES

Councilman Peterson said that the City Council Subcommittee on Campaign Finance Changes met on February 27, 2002, and reviewed his following report: "Because this is such a controversial and legally difficult area, I suggest we try to follow established models. Council can look at what has worked before. There are several successful models to use as guides for what progresses to follow, organizational structures, and substantive reforms.

"Furthermore, Council should seriously consider the Recommendations from the Citizens Campaign Finance Reform Study Committee.

"First, Council can take a few, relatively simple steps to begin to address the problems. Second, Council can appoint a new Citizens Committee to develop a more comprehensive plan and the organizational structures necessary to carry out a comprehensive plan.

"One, Council could raise the filing fee to run for Council and Mayor from the current $5.00 filing fee to $90.00.

"In the last several city elections, there have been a great number of individuals who filed to run for Council. Unfortunately, many of the people who filed were not serious candidates and did not conduct serious campaign efforts. With only three council seats up each election cycle, the public had great difficulty learning about and distinguishing among the 15 to 20 candidates in the primary. The great number of candidates also made candidate forums very difficult and media coverage very limited.

"Two, Council could request that our local General Assembly delegation introduce a local bill that would allow Asheville to significantly lower the $4,000 maximum cap on campaign contributions.

"The Town of Chapel Hill had local legislation passed several years ago that allowed the Town Council to limit by Town ordinance the amount that individuals and local PACs could contribute to candidates for local office below the $4,000 State law limit that would otherwise apply. Chapel Hill Town Council then lowered the contribution limit for town elections to $200 per election.

"I suggest that Council request our local delegation introduce similar legislation that would authorize Asheville City Council to set by local ordinance a maximum contribution limit lower than the state limit. If this local bill were passed, he would suggest Councils set the limit at

$500 per election for all candidates for Council and Mayor. This cap would apply to both individual and PAC contributions.

"Since Asheville would merely be following Chapel Hill's existing local bill, the chance for General Assembly passage should be very strong.

"For further efforts to improve the local campaign process and possibly develop a campaign financing reform plan, he suggested we appoint a new Citizens Campaign Improvement Committee to develop further recommendations.

"As a guide, one successful model the Citizens Committee can look to follow would be the City's Public Access Channel Commission. The Public Access Commission first conducted a comprehensive study into what other local governments have done, legal restrictions, financial requirements, and technology. Then the Public Access Commission recommended that city government establish a separate non-profit entity to actually establish and run the Public Access Channel. The Citizens Committee could explore the possibility of establishing a not-for-profit organization in partnership with one or more local community organizations such as the League of Women Voters.

"Council can suggest that the Citizens Committee explore a number of different approaches to improve the local campaign process. He suggested that we ask the Citizens Committee to first study ways other than direct public contributions to candidates. He suggested Council ask the Citizens Committee to explore the following: (a) oetter coordination of candidate forums; (b) sponsor more issue-oriented forums; (c) better public exposure of candidate forums through better news coverage and the broadcast on television and radio of one or more candidates forums (including possibly purchasing television time on WLOS); (d) arrange the publication and distribution of one or more voter guides with information about the candidates and their position on important issues; (e) explore other options to help candidates better inform city voters and to lower the cost of campaigns; and (f) voluntary spending or contribution limits.

"If the Citizens Committee develops a solid not-for-profit Campaign Improvement Organization with workable options to improve voter participation, then this Campaign Improvement Organization could seek contributions and support from individuals, other organizations, businesses, non-profits, and foundations. The Organization may also seek financial support from city government.

"With regard to direct public financing for city elections, there are several models to look to for guidance. The Federal government, as part of public financing for the Presidential general election, established a Campaign Finance Fund that receives voluntary contributions through the check-off question on taxpayer's Federal Income Tax returns. North Carolina has a similar system to fund the major political parties through voluntary check-off on State Income Tax forms. The General Assembly has recently passed legislation to establish a public financing fund for State Appellate Court races.

"To implement such a system, Asheville would need to seek local legislation that expressly authorizes the City to (1) establish a local Campaign Finance Fund, (2) transfer public dollars to the Fund, and (3) contribute through the Fund to candidates for local office that agree to voluntary spending limits.

"Council could also consider other structural changes to the current format for city elections to lower the costs of running for Council and/or to improve voter information. Possible options could include: (a) establishing a District system for some Council seats. Clearly a person running for a District seat that includes only a portion of the City could run an effective campaign for much less than running city-wide. He suggested considering four District seats and two at-large seats with the Mayor at-large. Almost all of North Carolina's larger cities have District seats; b) return to partisan elections for Council seats and the Mayor; and (c) other options.

"Council may want to address the situation that occurred after the 2001 City election when a member of Council in mid-term was elected Mayor thus creating a vacancy on Council that had to be filled by appointment after the City election."

The following is the outcome from the Subcommittee's meeting:

(1) There was unanimous support by the Subcommittee to raise the filing fee to run for City Council and the Mayor, noting that there is a process in N. C. Gen. Stat. sec. 163-107.1 (d) by which a person may get his or her name on a ballot by petition signed by 10% of the registered voters, and avoid the filing fee.

(2) Regarding a request to our local General Assembly delegation to introduce a bill that would allow Asheville to significantly lower the $4,000 maximum cap on campaign contributions, the Subcommittee was split.

(3) With regard to the appointment of a Citizens Campaign Improvement Committee, there was unanimous support by the Subcommittee, however, they were uncertain how that Committee would be structured, but that it would be independent of City government with narrow guidelines.

(4) With regard to the Committee exploring the possibility of establishing a not-for-profit organization, the Subcommittee was not in support of this at this time, however, the Committee could look at that after looking at other items Council asks them to review.

(5) Regarding the establishment of a District system for some Council seats, the Subcommittee did express some interest.

(6) There was not a lot of interest by the Subcommittee about returning to partisan elections for Council seats and the Mayor.

(7) The Subcommittee did not make a recommendation regarding the situation in 2001 election when a member of Council in mid-term was elected Mayor, thus creating a vacancy on Council that had to be filled by appointment after the city election.

Councilman Mumpower said that there was consensus of the City Council Subcommittee on Campaign Finance Changes ("Subcommittee") on voluntary spending or contribution limits. Councilman Peterson agreed and felt that was an issue the Citizens Campaign Improvement Committee ("Committee") could look at.

Upon inquiry of Councilman Mumpower, Councilman Peterson felt the discussion by the Subcommittee on better coordination of candidate forums and encouraging the media to give better coverage of the candidate forums were also items he felt the Citizens Campaign Improvement Committee could look at.

Vice-Mayor Bellamy also noted that the Subcommittee talked about district elections and the possibility of enlarging the number of Council members. However, they felt that any change in the structure of City Council should be placed on the ballot for the voters to decide.

After discussion, Councilman Mumpower pointed out that if we did seek local legislation that would allow us to limit the amount for campaign contributions, then at least Council has the authority to change that at some later date, if they choose. He did point out that spending limits might restrict a candidate's ability to generate name recognition.

There was discussion regarding the district system. City Attorney Oast said that he would have to research this item if Council chose to go in this direction. He did note, however, that it appears that the districts must be drawn prior to undertaking the process for changing to the district form of government. In addition, the districts would have to be redrawn as annexations become effective.

Upon inquiry of Councilman Dunn, Councilman Peterson said that the Subcommittee did not review the possibility of lowering the Mayor's term from four years to two years.

Councilwoman Jones felt that Council must find ways to build public trust and if there are things that this Council can do as a body to build that trust and give them confidence, then we must try. She has heard comments from the public that they fear there is a relationship between financial contributions and actions by Council. In an effort to reduce that fear, she supported lowering the amount individuals and organizations contribute to candidates.

Discussion surrounded broken public trust vs. apathy in the voters.

After a brief discussion it was the consensus City Council to raise the filing fee to run for City Council from $5.00 to $75.00; and to raise the filing fee to run for Mayor from $5.00 to $100.00, noting that there is a process in N. C. Gen. Stat. sec. 163-107.1 (d) by which a person may get his or her name on a ballot by petition signed by 10% of the registered voters, and avoid the filing fee. City Attorney Oast said that he would prepare the proper paperwork for City Council action in order that it be effective in the next election process.

Councilman Ellis supported asking our local delegation for the authority to lower the maximum cap on campaign contributions; however, he wanted the maximum to be left up to City Council. After further discussion, it was the consensus of Council to add this item to the suggested legislative request items to be voted on later in the meeting.

After discussion about the establishment of a Citizens Campaign Improvement Committee, it was the consensus of Council to have the Subcommittee research this more thoroughly and suggest a specific charge for the committee, it's make-up, etc.

Regarding district seats, it was the consensus of Council to not pursue this matter. However, Councilwoman Jones felt the Committee should explore this issue, the possibility of returning to partisan elections, and the issue of a vacancy on Council when a Council member is elected Mayor in the middle of his/her term.

City Attorney Oast discussed with Council some options of filling a vacancy when a Council member is elected Mayor in the middle of his/her term. He said that he would research other options and report back to Council.

At 4:55 p.m., Mayor Worley announced a short break.

TOWING FROM PRIVATE PARKING LOTS

City Attorney Oast said that a non-consensual tow occurs when a towing company tows a vehicle without the permission of the vehicle's owner. The Asheville Police Department can initiate a non-consensual tow for a violation of state law or a city ordinance. City Code § 19-148. In addition, private property owners may contract with commercial towing companies to remove vehicles that park in private lots or spaces without authorization of the owner or lessee of the lot or space.

The City of Asheville has received numerous complaints centering on the failure to post private lots, excessive towing and storage fees for non-consensual tows from private parking lots, and the treatment that people receive when they retrieve their towed vehicles. At City Council's request, the City Attorney's Office has looked into the legality of regulating the rates that towing companies charge for performing a non-consensual tow from a private parking lot and/or space.

Most of these complaints emanate from downtown Asheville and Biltmore Village. Many of the complainants are tourists, who say that they will not return to Asheville, and will warn their friends not to go. The fact that some people take the time to write suggests that there are more people who have the same experience but do not write. Complaints have been made to the Chamber of Commerce and to the lot owners themselves. The practice is that tow companies will pull a car from a lot, and refuse to return it until paid, usually in cash, acting as if the tow gives them a lien on the car. From a strictly legal perspective, however, the obligation to pay for these non-consensual tows may actually be that of the lot owner, not the vehicle owner, since the contract is between the lot owner and the tow company, and the tow company may have no legal right to refuse to return the vehicle. This is not generally understood by most people, and at the hours and under the circumstances in which many of these tows occur, that is not the kind of point that they wish to debate. Ultimately, the person whose vehicle is towed might be liable to the lot owner for the expense of removal anyway, so it would just be deferring the payment. The issue for Council is whether the City wishes to get involved in what is essentially an issue between private citizens, and to intervene when someone incorrectly assumes that any parking lot is available for private use, even if it is after normal business hours. On the other hand, this activity is having an apparently disproportionate and harmful effect on tourism.

Our ability to regulate this practice is limited. Currently, the federal government has pre-empted most aspects of motor vehicle carrier regulation, with an exception that allows political subdivisions to regulate the price and other aspects of non-consensual tows as a matter of consumer protection. 49 U.S.C. § 14501(c). Even though the federal government gives states and political subdivisions the power to regulate the price of non-consensual tows, it appears that the General Assembly of North Carolina must specifically grant a city or county the power to regulate the rates charged by towing companies for non-consensual tows from private property. Currently, there is no statutory authority that gives a city or county the power to regulate the price of a non-consensual tow from private lot.

We have checked with other cities that regulate the rates charged by towing companies for performing non-consensual tows from private lots. In most of those instances, it is clear that there is explicit state authority to allow such regulation. For example, Atlanta currently has a broad scheme that regulates non-consensual towing from private lots, including setting the rates that a towing company may charge for the service. Georgia Code § 44-1-3(d) states that the governing authority may set the maximum reasonable costs of removal, relocation and storage for private trespass towing. Additionally, Florida Statute Title XL, Chapter 715, Section 715.07(b), states that local government shall not be precluded from enacting additional regulations including the right to regulate rates when vehicles are towed from private property. North Carolina does not have any enabling legislation like the Georgia and Florida statutes.

The only general statute in North Carolina that addresses the towing of a vehicle from a private lot or space is N. C. Gen. Stat. sec. 20-219.2. This statute, along with N. C. Gen. Stat. sec. 14-401.9, makes it a class three misdemeanor to park in a privately owned or leased parking space without the express permission of the owner or lessee, allows for the removal of the offending vehicle from the parking lot or space, and establishes a statutory lien on the towed vehicle in favor of the tow company. Before the owner can tow, however, the statute requires that the parking lot be marked by signs no smaller than 24 inches by 24 inches and prominently displayed at the entrance of the lot, and each parking space must be clearly marked by signs setting forth the name of each individual lessee or owner. However, the application of this general statute is limited to specific counties and cities in North Carolina, and currently Asheville and Buncombe County are not included.

Notwithstanding the lack of specific enabling legislation, some NC cities do regulate the price of non-consensual tows from private lots. In the case of Charlotte, there is a charter provision that allows this, and Charlotte is one of the cities that is listed in N. C. Gen. Stat. sec. 20-219.2. In the case of Wilmington, the cited authority was N. C. Gen. Stat. sec. 160A-194, which contains the general law that allows cities to regulate businesses "subject to the general law of the State." Wilmington, however, is also one of the cities that requires posting of private lots pursuant to N. C. Gen. Stat. sec. 20-219.2, and this may be the real source of their authority.

One way to address the problem in Asheville is to request that Asheville be added to the coverage of N. C. Gen. Stat. sec. 20-219.2; this would require action by the General Assembly. Another way to address it is to adopt an ordinance setting forth sign requirements for owners of private parking lots and/or spaces to post their lots and/or spaces, and requiring that said signs meet certain dimensional requirements and be posted in prominent places so as give adequate notice that the lot/space is private and vehicles will be towed away at the owner's expense. The difference between the two is that, under the State law, it is a crime to park in a properly posted private lot, and the vehicle owner is responsible for the costs of towing, while under the ordinance, the offense would lie in not posting the lot, and the lot owner would be responsible for whatever penalties are prescribed by Council. This second option was considered by Council in 1998, but no action was taken.

Other options include requiring the posting of a single, larger sign at the entrance to a private parking lot and not requiring the posting of each space, as was done in a 1983 act applicable to Forsyth County, or requiring the posting of a sign containing a pre-towing notice at the entrance to a private lot before towing may legally occur, as was done in a 2001 act applicable to Greenville (NC) and Chapel Hill, both college towns with significant parking problems.

If Council wishes to seek to be added to the coverage of the State law, then this item should be part of our legislative request. If Council wishes to adopt an ordinance, then we will draft one for your consideration.

At 5:20 p.m., Vice-Mayor Bellamy left the meeting unexcused. Therefore, any votes taken will be affirmative votes.

Councilman Peterson suggested Council adopt an ordinance setting forth sign requirements for owners of private parking lots and/or spaces to post their lots and/or spaces, and requiring that said signs meet certain dimensional requirements and be posted in prominent places so as to give adequate notice that the lot/space is private and vehicles will be towed away at the owner's expense. In addition, he felt we should also ask our legislators to add Asheville to the 2001 act applicable to Greenville, N.C., and Chapel Hill, N.C, which requires the posting of private parking lots before vehicles may be towed.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that he hasn't contacted the private lot owners regarding this issue at this time, however, when this issue was discussed by Council in 1998, there was an effort to contact the lot owners by organizations such as the Chamber of Commerce and the Council of Independent Business Owners.

Councilman Mumpower felt uncomfortable in wielding a heavy regulatory hand before obtaining suggestions from perhaps the private lot owners and the Downtown Commission.

Mayor Worley felt that the reality is that there are lots where tows are occurring and those owners aren't interested in making those lots available at night. He supported asking for legislation similar to Greenville and Chapel Hill.

Councilman Ellis said that the majority of parking lot owners already posted their lots, but there are a number of smaller private lots who do not want to participate.

It was the consensus of Council to (1) ask our legislators to add Asheville to the 2001 act applicable to Greenville, N.C., and Chapel Hill, N.C, which requires the posting of private parking lots before vehicles may be towed; and (2) begin the initiatives of asking the Downtown Commission for their suggestions with regard to this matter.

RESOLUTION NO. 03-32 - RESOLUTION APPROVING LEGISLATIVE REQUESTS FOR THE CITY OF ASHEVILLE FOR 2003

Councilman Mumpower moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

City Attorney Oast said that this is the consideration of a resolution directing the submission of certain legislative requests to the North Carolina General Assembly.

Council has discussed seeking special legislation as to several matters:

- Photographic enforcement of red light violations
- Reducing term of housing authority members from 5 years to 3 years
- A food and drink tax for the Civic Center and related items
- Regulating towing from private parking lots

Each of these items has been covered in detail in other memoranda, and at the retreat or previous work sessions. A brief summary of the proposed legislation follows:

1. Photo enforcement at red lights. This program was explained in detail by Chief Annarino at the retreat. As he noted, many cities in North Carolina are authorized to use a photo-enforcement system. There is a general statute, N.C.G.S. 160A-300.1, that provides this general authorization, and the legislative action required is simply adding Asheville's name to the list. This request was made by Council for the 2001 session, but our legislative delegation did not support it, and the bill was not introduced. There is a possibility that this law could become popular enough that it will become general law applicable to all municipalities in North Carolina. If that happens, special legislation will not be necessary.

2. Food and drink tax. This matter was also explained at the retreat in connection with Council's discussion of the Civic Center, and possible funding sources. A proposal to this effect was taken to our legislators in 2001, who indicated that the plans for renovating the Civic Center and the proposed uses of the revenue needed to be more fully developed before they could support it.

   At the retreat, Council was generally in favor of making this request again, but the timing of the request depends on how the plans for renovating the Civic Center proceed. There was also some discussion of whether the tax should be one or two percent, whether it should apply to all of Buncombe County or just to the City of Asheville, and whether the revenue might be available for other purposes, such as infrastructure improvements and affordable housing. As he indicated during the meeting, our research from 2001 indicated that a one percent tax was the norm across the State, but we will research this further. Also, in my experience, the purpose of such a special tax should be very carefully – and somewhat narrowly – identified.

A "special" tax is not generally considered an appropriate revenue-raising vehicle for general needs, and the more narrowly drawn the purpose is, the better chance it has of being approved. Food and drink taxes are typically used to support such travel and business-related activities as civic centers and convention centers. While the purpose of the special tax may be broadened by amendment to include additional objectives (i.e., changes from construction of a baseball park to repair and maintenance of the park), the additional objectives usually are related to the original purpose. It may be difficult to include, as one of the purposes of such a tax, either initially or by amendment, an objective that is not typically associated with it, or that bears no obvious relation to it. However, a special tax may be viewed as freeing up other revenues for general use that might otherwise have gone to support the special purpose now supported by the special tax.

3. Reducing term length for Housing Authority. Under the applicable General Statutes, the terms for appointed members of housing authorities across the State is 5 years. Several years ago, the City of Charlotte obtained legislation, applicable only to its housing authority, reducing the term to three years. Last year, on Vice Mayor Bellamy's initiative, Council requested that Asheville's Housing Authority be added to the Charlotte legislation with respect to this reduced term. A bill to this effect was introduced last year, but because there was some concern about this proposal expressed by the Housing Authority to our legislators, the bill could not be certified as "non-controversial," a requirement for consideration in the Short Session, and it was withdrawn at our request.

4. Non-consensual towing from private parking lots. As I advised Council at the retreat, we would bring this matter to Council's February 18 (now March 4) work session for discussion. As noted in previous memos to you, the City has little ability to regulate the prices charged for non-consensual tows from private parking lots. There is, however, a State law that will allow us to require the posting of private lots with signs as a condition to towing from them, but it is applicable only to the cities and counties named. One possible measure to address this issue is to have Asheville's name added to the list of localities wherein this law is effective. An act adopted in 2001, applicable to the cities of Greenville and Chapel Hill, requiring the posting of private parking lots before vehicles may be towed, is an option that may interest Council.

Three of these items involve adding the City of Asheville to existing legislation. The proposed legislation is accordingly simple, but cryptic.

The proposed legislation for a Prepared Food and Drink Tax would be a new law, but my draft is similar to such acts in other cities. My draft is based on similar legislation adopted for the City of Albemarle in 1991.

The Senate's deadline for submitting items to the bill drafting office in time to have them introduced this session is March 12; for the House that date is March 19. In general, however, the sooner we can get these items to our delegation, the better, and he prefers to submit in time to meet the earliest deadline. Also, several Council members have indicated that they wish to meet individually with our legislators to discuss our legislative requests and other matters. Though these meetings can occur at any time, it may be helpful to have the legislative package as approved by Council in hand when these meetings occur.

Accordingly, and since most of these items were discussed at the retreat, Council should act on these items at the March 4 work session. Council may decide to move forward with all of them, some of them, or none of them, make changes to the proposals, or add new ones (though this may require additional research). I will then transmit the approved package to our delegation in Raleigh.

Once Council decides on the legislation to request, adoption of a resolution approving the package and directing its transmittal to our local delegation is recommended.

Regarding the photo enforcement at red lights, it was the Mayor's understanding that our legislative delegation would not support this for Asheville. Councilman Mumpower felt that this issue has brought forth that there is a problem at red lights and asked the Police Chief to explore other options to address that problem.

Regarding the food and drink tax, Mayor Worley said that the restaurant association supported a one-half cent sales tax instead of a prepared food and drink tax. He suggested the proposal to the legislators be for a funding source for the Civic Center (which will likely come from a one-half cent sales tax or a prepared food and drink tax) and that way we can keep our options open.

Councilman Dunn felt the funding source should be a room tax and suggested some amendments to the draft act prepared by City Attorney Oast, who said there would be ample time to amend the Act.

Regarding the reduction for Housing Authority terms, Councilman Mumpower said that he had an opportunity to speak to four of the five members of the Housing Authority and they are opposed to reducing their terms. Councilman Peterson would support the action to reduce the terms.

Regarding non-consensual towing from private parking lots, Councilman Peterson spoke in support of adding Asheville's name to the Act which was adopted in 2001, applicable to the cities of Greenville and Chapel Hill, requiring the posting of private parking lots before vehicles may be towed.

Councilwoman Jones asked that we ask our local delegates to introduce a bill that would allow Asheville to significantly lower the $4,000 maximum cap on campaign contributions.

Mr. Dennis Justice, Fletcher resident, felt that Asheville needed a plan regarding the Civic Center and another engineer was needed to study the graphics. He felt that there was no way for hockey and basketball to co-exist in the Civic Center. He also felt that eventually the Civic Center Commission will need to become a Sports Authority.

After discussion, there was no motion for photo enforcement at red lights.

Councilwoman Jones moved to ask our legislators to enact a bill for a funding source for the Civic Center. This motion was seconded by Councilman Ellis and carried unanimously.

Councilman Peterson moved to ask our legislators to add the Asheville Housing Authority to the Charlotte legislation with respect to reducing their terms from five to three years. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Peterson moved to ask our legislators to add Asheville's name to the act adopted in 2001, applicable to the cities of Greenville and Chapel Hill, requiring the posting of private parking lots before vehicles may be towed. This motion was seconded by Councilman Ellis and carried unanimously.

Councilwoman Jones moved to ask our legislators to introduce a bill that would allow Asheville to lower the $4,000 maximum cap on campaign contributions. This motion was seconded by Councilman Peterson and carried on a 4-3 vote, with Mayor Worley, Councilman Dunn and Councilman Mumpower voting "no" and Councilman Ellis, Councilwoman Jones, Councilman Peterson and Vice-Mayor Bellamy (voting in the affirmative because she was not excused from the meeting) voting "yes."

When Mayor Worley asked Council to add their endorsement to the North Carolina League of Municipalities' legislative agenda and the North Carolina Metropolitan Coalition's agenda, it was the consensus of Council to vote on that at their next formal meeting.

RESOLUTION BOOK NO. 27 – PAGE 322

UPDATE ON EARLY ACTION COMPACT – AIR QUALITY

City Engineer Cathy Ball said that City staff is requesting that City Council review and approve the assignment of City of Asheville and Buncombe County residents to the Air Quality Early Action Compact (EAC) Stakeholders Group and that City staff be authorized to work with Buncombe County staff to substitute a stakeholder in the event the original stakeholder is unable to participate in the process.

In December 2002, City Council signed a resolution entering into an EAC to reduce air pollution in the region. Additionally, five counties along with several municipalities in the area signed resolutions indicating the intent to work toward proactive means to reduce air pollution. By signing this resolution, the City of Asheville agreed to work with the other government agencies to develop and implement measures to reduce air pollution in the region.

The EAC mandated that we develop a list of measures to be included in the plan to reduce air pollution by June 16, 2003. The Environmental Protection Agency (EPA) has recommended that all stakeholders be involved in the process of developing these measures and monitoring the implementation of the measures.

Over the past few weeks, the City representatives met with all of the County representatives in the Compact to develop a process for selecting the stakeholders and preparing a time frame to insure that the deadlines of the EAC are met. This group agreed that stakeholder groups would be appointed by individual counties and the City of Asheville. Each County will be responsible for developing their own plan; however, EPA must determine that each County's plan is supportive of the goal of reducing air pollution.

The City Manager met with County staff to develop the following schedule for completing the first Phase of the EAC. The schedule is as follows:

- March 2003 – Stakeholder Process Begins
- March 10, 2003 – City Staff Develop Preliminary List of Measures to Reduce Air Pollution
- April 2003 - First Draft of Measures to EPA for Review
- April 2003 - First Draft of the Semi-Annual Status Report
- April 2003 – Conduct Additional Meetings as Needed (Stakeholders and Staff)
- May 1, 2003 – Final Draft of Air Quality Measures Completed
- Mid-May 2003 – City's and County's Review Measures
- By June 16, 2003 – City Council Approve Final Measures to be Submitted to EPA

It was agreed that the City and County would jointly work together to develop the list of ten stakeholders for Buncombe County. City and County staff have developed the following list to be reviewed and approved by City Council:

Name	**Stakeholder Group**	**Representing**
Nancy Thompson	*Industry - Utilities*	*CP&L*
Karl Koon	*Industry - Petroleum*	
Bill Jackson	*Community - Forests*	*U.S. Forest Service*
Brownie Newman	*Environment - Policy*	*WNC Alliance*
Chuck Pickering	*Industry - Tourism*	*Biltmore Company*
Jan Davis	*Industry - Small Business*	*Jan Davis Tires*
Judy Calvert	*Industry / Community*	*Tyco / Chamber Trans Committee*
Hedy Fischer	*Community - Planning*	*Planning and Zoning Com /Real Estate*
Bette Jackson	*Community - Residential*	*League of Woman Voters/ Vision*
Grant Gouge	*Environment*	*Retired Air Weather Service*

City staff requests that City Council approve the above assignment of the City of Asheville and Buncombe County residents to the Air Quality Early Action Compact Stakeholders Group. Staff also requests the approval to work with Buncombe County staff to substitute a stakeholder in the event the original stakeholder is unable to participate in the process.

Upon inquiry of Councilman Mumpower, Ms. Ball said that the suggested stakeholders have not been asked if they would be willing to serve.

It was the consensus of City Council to approve the above assignment of the City of Asheville and Buncombe County residents to the Air Quality Early Action Compact Stakeholders Group and in the event an original stakeholder is unable to participate in the process that City staff advise City Council.

PARKS & RECREATION YOUTH PROGRAMS

Mr. Butch Kisiah, Superintendent of Recreation, and Mr. David Mitchell, Superintendent of Cultural Arts, outlined the Parks and Recreation Department's successful youth programs offered over the past year and explained their ideas for future programs.

The Parks and Recreation Department offers a variety of year-round wholesome recreation opportunities to the citizens of and visitors to the City of Asheville. This is evident through the success of a number of programs we produce. Our major focus, however, is providing opportunities for our youth that will serve as positive alternatives to a number of very difficult situations. The Department is committed to continue serving the youth of our community.

There was discussion about the need for multi-use fields and the percentage of the budget for park maintenance.

Upon inquiry of Councilman Dunn, Mr. Brinson stated that the City does work with Buncombe County when they can to share staff and equipment.

ECONOMIC DEVELOPMENT INCENTIVE GRANT

Economic Development Director Mac Williams said that this is the consideration of a motion setting a public hearing on March 25, 2003, for an economic development incentive grant to a company proposing an expansion of operations into the city limits and creation of new jobs.

Plasticard Locktech International (PLI) specializes in printing on plastic and is the largest producer of plastic hotel keycards in the nation. The company was founded in the area in 1988 and has grown steadily ever since. PLI is now located on Pond Road (outside the city limits) in a facility they own. The company is proposing to purchase and relocate operations into a building located in the Sweeten Creek Industrial Park (inside the city). The expansion would involve an investment of $2.275 million in building improvements and new equipment and creation of 16 new jobs with an average hourly wage of $12.23 plus benefits.

Comparing this project to the criteria established in the City of Asheville Economic Development Incentive Policy, Council has, preliminarily, determined to award a grant of $25,000 payable in equal installments of $5000 over 5 years commencing after all capital investment and new jobs are placed in service. A performance agreement setting these and other terms and conditions must be mutually accepted and executed by the company and City and approved, along with the grant, at a formal public hearing.

Staff recommends City Council set a public hearing on March 25, 2003, to consider acceptance and execution of the proposed Performance Agreement and offer the economic development incentive grant to Plasticard Locktech International under the terms and conditions in that Agreement.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:02 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 11, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Retired Command Sergeant Major William A. Cravener led City Council in the pledge of allegiance.

INVOCATION

Mayor Worley gave the invocation.

ADDITIONS TO THE AGENDA

At the request of Mayor Worley, it was the consensus of Council to add a resolution regarding the federal liaison services contract to the Agenda under Other Business.

I. PROCLAMATIONS:

A. PROCLAMATION CONGRATULATING THE UNC-A MEN'S BASKETBALL TEAM FOR WINNING THE BIG SOUTH CONFERENCE TOURNAMENT AND WISHING THEM WELL AS THEY PROCEED TO THE NCAA DIVISION ONE MEN'S BASKETBALL TOURNAMENT

Mayor Worley presented Head Coach Eddie Biedenbach and three team members a proclamation congratulating the UNC-A's Bulldog's Men's Basketball Team for winning the Big South Conference Tournament on Saturday, March 8, 2003, and wishing them well as they proceed to the NCAA Division One Men's Basketball Tournament. Mayor Worley was proud to announced that this is the first time in UNC-A history for the Bulldog's Men's Basketball Team to proceed to the NCAA Tournament.

II. CONSENT:

Mayor Worley announced that Consent Agenda Item D would not be considered at this meeting.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 25, 2003, AND THE WORKSESSION HELD ON MARCH 4, 2003

B. RESOLUTION NO. 03-33 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE FOR UPSET BIDS A VACANT LOT AT 25 IRIS DRIVE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a vacant lot at 125 Iris Drive.

A bid from Neighborhood Housing Services of Asheville (NHS), in the amount of $17,100, has been received for the purchase of a vacant lot at 125 Iris Drive. The bid is not less than the appraised value of $17,100.

The property is a single-family residential RS-8 zoned lot on Iris Drive comprising approximately 0.28 acre of land. The property has a rectangular shape and is fairly level elevated about 3' - 4' above street level. It has approximately 100 front feet on Iris Drive. There is no current or contemplated use for the property by the City. NHS plans to build a single -family residence on the site for sale.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer of purchase for upset bids.

RESOLUTION BOOK NO. 27 – PAGE 328

C. MOTION SETTING A PUBLIC HEARING ON MARCH 25, 2003, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR PLASTICARD LOCKTECH INTERNATIONAL

D. MOTION TO ADOPT THE NORTH CAROLINA METROPOLITAN COALITION'S LEGISLATIVE REGULATORY PRIORITIES FOR 2003-04 AND THE 2003 NORTH CAROLINA LEAGUE OF MUNICIPALITIES LEGISLATIVE GOALS AND PRIORITIES - This item was not considered at this meeting.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution on the Consent Agenda and it would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Peterson and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE REZONING FOR 3.88 ACRES LOCATED ON THIRD STREET AND BLALOCK STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE, AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE ASSOCIATED MASTER PLAN

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:13 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Ms. Shannon Tuch, Urban Planner, said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

Ms. Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of conditional use rezoning for 3.88 acres located on Third Street and Blalock Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use, and the issuance of a conditional use permit for the associated Master Plan.

On December 30, 2002, The Flynn Christian Home submitted a request to conditionally rezone an undeveloped parcel from its current RS-8 designation to RM-16, in the neighborhood of Oakley in the southeast area of the City (City Exhibit 3 – Location Map).

The conditional use rezoning request is for a parcel located between Third Street and Blalock Street (PIN No. 9658.17-20-0736) totaling 3.88 acres. The conditional use component of this application will be a site master plan showing the construction of five residential structures: two group homes, one duplex, one resident manager's home, and one four-unit transitional home, along with their associated drives and parking areas. All five structures will be single family in style and operation.

The project site is located within the City limits and is surrounded by single family homes all zoned RS-8 except along the northern property boundary where the single family homes north of the railroad are zoned RM-16. The primary access for the Flynn homes will be off of Third Street where four of the five homes are to be accessed through a 60' easement off of Third Street while the transitional home is to be accessed off of Blalock Street (City Exhibit 3 – Site Plan). The duplex, group homes, and transitional home will be two-story construction on block foundations with possible basement/storage space. The resident manager's home will be a single story cottage style home. All homes are to be of modular construction. The project will provide 10 parking spaces, bicycle parking, and a 20'wide Type "B" landscape buffer as required by the Unified Development Ordinance (UDO).

The majority of the site is a mixed deciduous forest with dense non-native undergrowth of vines and other invasive plant materials. The proposed site plan calls for the existing native vegetation to be preserved and maintained with additional plant material to be supplied as needed for the required landscape buffer. A small open area and unnamed perennial tributary to Sweeten Creek will also be preserved and maintained.

RM-16 Residential Multi-Family High Density District is established to permit a full range of high density multi-family housing types. It is intended that this district be located near employment centers, shopping centers, roads and other urban infrastructure capable of handling the demand generated by high density development.

The existing RS-8 Residential Single-Family High Density District is established to permit a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character.

The applicant is seeking the conditional use rezoning since RM-16 is the only residential zoning district that allows for the operation of a group home. The designation is not being sought for density purposes.

As part of the special requirements applied to Uses by Right Subject to Special Requirements, the project must meet several conditions for group homes as found in section 7-16-1(c)(31) of the UDO:

a. Private yard or garden space required; minimum size 500 square feet (minimum dimension 15 feet).
There is well over 500 square feet of open space available to the residents for a variety of gardening opportunities.

b. Client drop off at the rear or side of the main building.
Frontage for the property is located off of Blalock Street with all drop-off areas and parking to the rear of the buildings.

The Technical Review Committee (TRC) met on January 22, 2003, and again on February 3, 2003, at which time the TRC made a positive recommendation that the project be forwarded to the Planning and Zoning Commission.

The Planning and Zoning Commission reviewed this project at their February 5, 2003, meeting where the Commission unanimously (7-0) recommended approval of the project with the following conditions:

1. The applicant shall meet all TRC conditions.
2. The applicant shall provide 10 off-street parking spaces (the maximum allowed per the UDO) to reduce the potential for on street parking.
3. The applicant shall work with the Transit Authority on establishing a safe location for a bus stop and bench. The applicant shall provide the bench.
4. In the event that the operator of the facility changes, the conditional use rezoning shall be reconsidered.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The development is within standards of development practice set forth by the City of Asheville and other governmental units. In addition, the proposed development meets the definition of a group home as defined by the Unified Development Ordinance: "Group home means a residential home provided by an agency, organization or individual for persons who need sheltered living conditions for rehabilitation, but not including mentally ill persons who are dangerous to others

as defined in N.C. Gen. Stat. sec.122C-3(11)b (or its successor)." Residents of the home have gone through treatment, are not charged with any crime, and are not considered a threat to the public.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The 3.88 acre site's topography forms a ravine with side slope grades ranging from approximately 15-25%. The site has significant existing natural vegetation along with a small perennial unnamed tributary flowing north out of the site. The buildings have been sited to preserve existing vegetation and minimize grading. A vehicular connection between the Third Street buildings and the Blalock building has not been proposed in order to preserve the integrity of the natural slope and unnamed tributary. Preserving the existing vegetation around the periphery will serve to buffer neighboring properties.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
Historically, the Flynn Christian Home has not had an adverse impact on property values in their current location in the neighborhood of Montford where property values have increased dramatically in the last decade. The proposed residential structures are to be single family style structures intended to blend in with the surrounding properties and are not expected to injure property values of adjoining or abutting properties.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
The surrounding properties are made up of single family homes occupying between one quarter acre and larger lots. This development, which places five separate residential structures over 3.88 acres, appears to be in harmony scale, bulk, coverage, and density with the surrounding neighborhood. In addition, the homes are to be single family in style, varying somewhat in size and architectural form from one another, helping them to blend into the character of the existing neighborhood.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
This proposed development supports the smart growth policy of affordable in-fill housing in a variety of neighborhoods throughout the city. It is also supported by the City of Asheville's Consolidated Housing and Community Development Plan 2000-2005, which calls for the need to develop affordable housing for low income people with special needs, including recovering substance abusers.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
This proposed development is located near transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and near the route 12 bus line that serves Oakley. Preliminary review by other utility providers has not revealed any problems for serving the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

> ***The proposed development will not substantially increase the number of cars operating on Third Street or Blalock Street. Most residents of the Flynn Christian Home will be using alternative modes of transportation and off-street parking will be limited to 10 parking spaces for all five structures, an average of 2 cars per home. Third Street and Blalock Street are both somewhat narrow with limited sight distances, however, the City of Asheville's Traffic Engineer has examined the roads and does not expect the vehicular traffic from the proposed development to significantly impact traffic on either Third Street or Blalock Street and does not consider improvements to the roads to be a priority.***

The Planning and Zoning Commission and City staff recommend approval of the zoning change from RS-8 to RM-16 and approval of the associated conditional use permit as proposed by the applicant subject to the following conditions: (1) The applicant shall meet all TRC conditions; (2) The applicant shall provide 10 off-street parking spaces (the maximum allowed per the UDO) to reduce the potential for on street parking; (3) The applicant shall work with the Transit Authority on establishing a safe location for a bus stop and bench. The applicant shall provide the bench; and (4) In the event that the operator of the facility changes, the conditional use rezoning shall be reconsidered.

Upon inquiry of Councilman Mumpower, City Attorney Oast explained that an appropriate way to look at this is whether the RM-16 zoning classification would be appropriate in this area with conditions, without necessarily determining what those conditions are. Then, the second consideration on the conditional use permit would be to determine what conditions would be appropriate.

Mr. Harry Giezentanner, Chairman of the Board of the Flynn Christian Homes. He said the Flynn Home has been located in the Montford area for over 40 years. They have caused no problems, have been an asset to the community as they take pride in their facility and the service they offer to their residents. The Flynn Home is governed by a board of directors and had a full staff. Due to the cutback from governmental funds, they find that to support themselves they need a larger facility to accommodate more residents. Their present location prohibits them from any expansion. They need to be located in an area that has public transportation, job potential (residents are required to work), where they can get to the AA meetings, and close to churches. They like to be in a residential development and want a home-like atmosphere for their residents.

Mr. Gerald Green, resident on Cumberland Avenue who is also working with the Flynn Home, said that they tried to minimize the impact on the property through this development and minimize the development on the adjacent property owners (Applicant Exhibit 1 – Site Plan). The buildings are located on the edges of the property to minimize grading and disturbance of the existing landscaping. There is buffering proposed from the adjacent properties, using, to the extent possible, the existing vegetation supplemented by additional vegetation to meet the requirements of the landscaping ordinance. The buildings will be designed residentially and will blend in with the neighborhood. They will be preserving most of the vegetation on the site. There is an existing open space area. There will be a trail connecting the two portions of the site, however, Building E on the site plan is speculative at this time as funding is not available for that transitional three-quarter home. If all buildings are built, there will be a maximum of 31 persons living on this property – 16 people in one of the group homes, 8 people in the other group home, 1 resident manager, 1 assistant manager, 1 cook and 4 residents in the transitional three-quarter home. That is 31 people on over 3 acres of land, which is far less than the density permitted under the existing zoning. The majority of residents of Flynn Home do not drive and they are dependent upon mass transit, public transit, buses, taxis or friends for transportation. There is a bus stop at the intersection of Third Street and Fairview Road. The Flynn Home has committed to purchase a bench for that bus stop and will work the Transit Services Department to upgrade the bus stop. The driveway off Third Street will be the primary access and it will meet City standards. At the end of the parking area will be an area that will be designated no-parking to provide a turn-around for emergency vehicles, noting that there is approximately one delivery truck a week. Although the property in front is under contract by the Flynn Home is not part of this property, the intent of the Flynn Home is to develop that property with single-family homes and market them for sale. There is an easement for the driveway. The Flynn Home provides 24 hour, 7 days a week supervision for their residents. The goal of this development and the placement of the structures is such that it minimizes the grading and land-disturbing activity and basically leaves most of the property undisturbed. This development does provide affordable housing for those who may not otherwise be able to find housing in an environment of supervision and some structure.

Mr. Green then addressed the protest petition filed. Regarding the petition's first statement, he said the structures will be designed in a residential manner and will be in scale of the homes in the neighborhood. The 31 people who live there will not significantly increase the traffic as pointed out by the City's Traffic Engineer. They will be improving the bus stop at Third Street and Fairview Road, which is the primary means of transportation for the residents at Flynn Home. With regard to the petition's second statement, the Flynn Home does need to expand not only to meet their budget but to meet the needs of the people in the area who need this type of service. The Flynn Home currently provides housing for 16 people and they have a list of people that far exceeds that number. The number of units to be developed on this property under the conditional use rezoning is significantly less than could be developed under the current RS-8 zoning. This will actually be more in character with the lower density development than the existing RS-8 zoning would permit. Finally, with regard to the petition's third statement, the Flynn Home residents are not evil people. They are people who have made a wrong choice at one time and are now trying to recover from the impact of alcohol and substance abuse. These people do not harm other people. He has lived five houses down from the Flynn Home for 12 years and he has a 10 year old daughter who has grown up there. His neighbor has three children under the age of 9, there are many elderly women in the neighborhood, and there are single women in the neighborhood and the Flynn Home residents do not bother those people. Twelve years ago, the only reason the Flynn Home stood out was because it was better maintained than all but three homes in a two-block area. They have been a good neighbor for the 12 years he has lived there. Some Flynn Home residents have participated in the Reed Creek Greenway Clean-Up and they have been a good member of the neighborhood. He felt they would be a good member of the Oakley neighborhood too.

Upon inquiry of Councilman Peterson, Mr. Green said that the 16 bedroom building will be a two-story building with 8 shared bedrooms (Applicant Exhibit 2 – Front Elevations).

Councilman Ellis asked how many vehicles would be on the road if the property were developed with the existing RS-8 District. Mr. Green said that if 18 single-family homes were built with an average of 6 trips per day, that would total approximately 108 trips per day. Again, most of the Flynn Home residents will walk because many have lost their drivers license.

Upon inquiry of Councilman Ellis regarding disturbances, Mr. Green said that his home is five houses down from the Flynn Home but he didn't recall any instances where the Police Department had to be called.

Councilman Dunn was concerned that the RM-16 District might not be suitable for this development because it is not located near employment centers or shopping centers. Using City Exhibit 3 (Site Location Map), Ms. Tuch showed that the site is within walking distance to the Target, the new Wal-Mart, the Dreamland development, Best-Buy, Circuit City, Asheville Mall, etc., and is accessible by bike or other modes of transportation. In addition, Planning &

Development Director Scott Shuford said that Fairview Road, on the other end, terminates in an employment center with all of the activities east of the Biltmore Village area.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford said that in the Unified Development Ordinance (UDO), the RM-16 zoning classification is the only residential district that permits this use. So, instead of amending all of our residential classifications in the UDO to allow this type of use to occur, Planning staff felt that conditional use zoning would be a way to tailor the use at the specific site. He felt the Code amendment might be something staff needs to look at in the future, but this seemed to be the most direct way, which gives City Council a lot of control over how the site is designed and what goes into it. Had they requested a straight rezoning, City Council could not have considered what use might be put on the property.

Councilwoman Jones and Vice-Mayor Bellamy asked City staff to research other ways in order to not limit only one residential district being open to group homes.

Ms. Laurie Tollman, Executive Director of Flynn Home, explained that the mission of Flynn Homes (Applicant Exhibit 3) is to enable the homeless, recovering substance abuser to gain self-respect, become productive, enhance spiritual growth, and maintain recovery by providing a structured and supportive home-like environment. She said that although the Flynn Home is not affiliated with any religious organization, they require attendance of a minimum of four AA/NA meetings per week, including mandatory attendance at one in-house AA meeting. The 12-Step Recovery programs encourage spiritual growth, but do not require religious affiliation. Flynn Homes encourages, but does not require, church attendance and bible study. She explained that the admission requirements are strict and that most residents are referred by the Veterans Administration Medical Center or the Buncombe County Alcohol and Drug Abuse Treatment Center in Black Mountain. Information on criminal histories is complete as part of the admission. Flynn Home does not admit sex offenders, violent criminals, or those with severe mental illness. Some residents are admitted from correctional facilities if they have completed a drug and alcohol treatment program. She also noted that the Flynn Home does random drug and alcohol testing. She said the average length of stay for the year 2002 was four months with 48 unduplicated residents. Residents may stay up to two years. The average age of the residents is between 31-55. The Flynn Home requires residents to be employed within three weeks and pay a weekly client fee for room and board. Staff provides support services in terms of resume assistance and referral services to local employment agencies and educational institutions. Community service is highly encouraged by Flynn Home as part of recovery. Flynn Home supports continuing education as part of growth and development and to enhance employability. The Flynn Home provides 24-hour supervision in a highly structured environment. Curfews are as follows: Sunday-Thursday 10:30 p.m. and Friday-Saturday 11:30 p.m. Residents are required to complete daily chores and abide by the house curfew. Residents are also encouraged to work together toward goals and provide support and fellowship to each other.

Upon inquiry of Councilman Dunn, Ms. Tollman said that they could receive the entire criminal record of residents if they request it from the treatment facility.

Councilman Dunn asked what happens to the residents if they do not conform to the rules of the Flynn Home. Ms. Tollman said that they are asked to leave. She said that approximately two weeks ago a resident was kicked out because he got intoxicated and tried to get back in after curfew. The Flynn Home did call the police. She said that she has been with the Flynn Home over a year and this was the first time the police were called.

Councilman Ellis said that he worked at the Black Mountain Center, which is next door is the Alcohol and Drug Treatment Center, for eight years and never recalled a police incident. He pointed out that the Treatment Center is adjacent to Highland Farms Retirement Homes and felt that maybe some the concerns are not as great as people might anticipate based on past history.

Councilman Mumpower asked if there was any information on actual contacts that the police have had with the residents of Flynn Home for the past 3-5 years. Ms. Tollman they did a general search and there have been no contacts, with the except of when the Flynn Home had to call to make sure someone was off their property and out of the neighborhood. There have not been any calls on any of their residents that have disturbed any of the adjacent neighbors.

Councilman Peterson asked if there are legal limits on what Council could hear regarding concerns about the type of people living at the Flynn Home. City Attorney Oast said that under the Fair Housing Amendments Act of 1988, the law basically prohibits housing discrimination based on a person with a disability, and included within the definition of disability are recovering substance abusers. That would include much of the population in the Flynn Home. That definition did exclude from it persons with mental problems that would be dangerous to themselves or others. He suggested Council focus on the land use, not the type of resident. He also noted that there have been cases that have held it a violation existed when there is an undue amount of testimony about that.

Councilman Mumpower asked if Council could consider the behavior of the Flynn Home residents, e.g. safety. City Attorney Oast said that the reference to police visits to the facility is probably relevant to Council's consideration.

The following individuals spoke in favor of the conditional use zoning/permit for various reasons, some being, but are not limited to: people from all walks of life (doctors, lawyers, etc.) have gone through the Flynn Home and have become productive residents of the community; many properties were looked at and this property was the most suitable because of the space, bus stop, and a lot of jobs in the area; the site plan will have a low impact on the property and environment; if developed at the existing RS-8 zoning, that will be more damaging to the neighborhood; the Flynn Home has a great deal of control over the residents in the home, which is far more than the neighbors knowing who their neighbors might be; the Flynn Home in Montford is a good neighbor and they maintain an attractive, clean and quiet property; there is a bus stop directly in front of the Flynn Home in the Montford community and there has been no problems with the residents of the Flynn Home; children go trick or treating at the Flynn Home and stop there for fund-raisers and there have been no problems; there are a number of elderly residents in the Montford community and they have not been harmed by the Flynn Home residents; property values in the Montford neighborhood have risen; the Flynn Home does not have a criminal element in it; there is more danger walking to your car in the Asheville Mall parking lot; the Flynn Home needs to be in a residential area because the residents rely on public transportation or they walk; the Flynn Home is a good and solid community asset; and disparaging remarks about Flynn Home residents are uncalled for:

Ms. Betty Darr, former Chairman of the Board of the Flynn Christian Homes and former Board Member
Ms. Nancy McMullen, member of the Board of the Flynn Christian Homes
Mr. Scott Dedman, resident on Cumberland Avenue
Mr. John Michael Thompson, former resident of the Flynn Home
Mr. Steve Greer, former resident of Flynn Home
Mr. Mickey Mahaffey

The following individuals spoke in opposition of the conditional use zoning/permit for various reasons, some being, but are not limited to: the property was zoned RS-8 and changing it would be a breach of trust to the neighborhood; the intersection of Fairview Road and Third

Street is already a hazard as seen by accidents and to bring more cars into this area will make it worse; since children cannot pick up the school bus on Third Street because it can't turn around, how will the delivery trucks manage; any delivery vehicle that parks will be a safety hazard because an emergency vehicle won't be able to pass them; there are no sidewalks and no no-parking signs on Third Street; a home should be a safe and secure place, but there will be a lot of transient people moving in and out of the Flynn Home a year; in 2002, a Flynn Home resident said there were two instances where the Police were called; the children are not safe in playing outside if there are 30-40 strangers who the residents don't know but they do know they have a drug problem; the homes in the area are not close together so you can't watch your child; the rezoning will bring unwanted and unwarranted safety concerns to the neighborhood; the Flynn Home is imposing a burden on the neighborhood to provide the community atmosphere; the neighborhood has already bore the cost of the Flynn Home residents by their taxes supporting the programs for recovering alcoholics and substance abusers; at least one Flynn Home resident is not even from North Carolina; property should be developed for single-family homes as all surrounding homes are consistent with that zoning; sales for some homes have fell through because of the threat of the rezoning of this property; real estate in Montford community has risen over 5 times is due to regulations by the Asheville Historical Society and cannot be attributed to the Flynn Home since it has been in the area since 1962; the Flynn Home may decide to sell the property after the rezoning and then more uses could be built on the property which would be totally out of character with the neighborhood; most surrounding homes have at least two areas and the Flynn Home will have five buildings on over three areas which will be out of character with the neighborhood; this is not a smart growth decision for our community; it will be difficult for large vehicles to access the proposed driveway; Third Street is not wide enough for parks to park on the street and children to walk on it; the Flynn Home should be built in a better suitable location; Oakley has enough low-income people; there is a stream on the property which falls under the Isolated Stream laws; since people in AA are encouraged to have sponsors, there will be more people affiliated with the Flynn Home; no on-street parking on Third Street; the improvement to the bus stop by adding a bench does nothing but increase congestion between the chain-link fence and the street; the Flynn Home is not a home, but a facility with a parking area; since residents at the Flynn Home are transients, the neighborhood can't get to know and trust them; grading on the site will not be minimal; the Flynn Home will adversely affect the sale of homes in the area if prospective buyers know a group home is being built; the community did find another piece of property for the Flynn Home that is much more compatible and already zoned for this facility; according to state law, the Flynn Home must be a certain distance from railroads and this one borders right up to a railroad and it is also not located on a street; the Flynn Home residents would have to walk ¼ mile to cross the railroad track if they wanted to walk to the Asheville Mall area; there are a number of natural springs on the site, thus cutting down the number of houses that can be built on the site; existing businesses, financial community, and new upscale revitalization of Biltmore and Oakley should have been notified of the possible housing of released prisoners in their area; and the name Flynn Christian Homes is misleading:

Mr. Dale Rhew, resident on Third Street (Neighborhood Exhibit 1 – Petition containing approximately 298 signatures)
Mr. Max Wilson, resident on Fairview Road
Ms. Angela Rhew, resident on Third Street (Neighborhood Exhibits 2 and 3 – Two letters from people not present and pictures)
Mr. Charles Townsend Riley
Mr. Nathan Rhew, resident on Third Street
Mr. Jeffrey Black, resident on Third Street
Ms. Miriam Allen, resident on Third Street
Mr. Fred English, Haw Creek resident
Ms. Myra Vinzant, resident on Fairview Road
Mr. John Boll, property owner in the area (Neighborhood Exhibit 4 – Cross-section of the land drawing)

Ms. Teresa Conner-Howard, resident on Main Street (Neighborhood Exhibit 5 – Location map and drawing of another location for Flynn Home)
Ms. Kay Rollin, resident on Ridge Avenue

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 7:20 p.m.

At 7:20 p.m., Mayor Worley announced a short break.

Upon inquiry of Councilman Dunn about the grade of the driveway, Mr. Shuford said it is a steep site (City Exhibit 4) but what they have reviewed to date has only been the concept plan submitted by the applicant. If the plan cannot meet City standards, they wouldn't be able to build the project.

When Councilman Mumpower asked about the possible violation of the Isolated Stream laws, Mr. Shuford said that the developer would have to abide by those laws as well in developing the property.

Mayor Worley reiterated that if Council were to approve the conditional use rezoning and permit, the developer would have to comply with any other regulatory requirement. If they cannot meet those requirements, even though City Council might approve the project, they could not build it. Mr. Shuford agreed that City Council's approval would not override those underlying development regulations.

When Councilman Mumpower asked if the Planning staff had any information on police concerns or arrest records in the existing neighborhood, Mr. Shuford said that he did not have that information because he didn't think that would be a problem given the comments at the prior public hearing.

Upon Council's request, City Attorney Oast explained what City Council's role in this conditional use rezoning would be. He explained that an appropriate way to look at this is whether the RM-16 zoning classification would be appropriate in this area with conditions, without necessarily determining what those conditions are. Then, the second consideration on the conditional use permit would be to determine what conditions would be appropriate.

Councilman Ellis explained that it is Council's responsibility to make a decision on what they feel is good for the entire City and all the people who live in it. He understood the neighborhood's concerns, however, he personally did not feel that their safety is at risk nor did he feel their property values would be decreased. He explained why this is a very difficult decision for him. He then moved to rezone 3.88 acres located on Third Street and Blalock Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Single-Family High Density District/Conditional Use. This motion was seconded by Councilwoman Jones.

Councilman Dunn felt that to rezone this property RM-16 would not be appropriate since the City does have other areas in the City that can accommodate this development. In addition, he didn't think the RM-16 zoning classification is the right designation for this type of facility and that it doesn't fit with the City's smart growth principles.

Councilman Mumpower said that with the clarifications that the City Attorney has given to Council, he felt the arguments on safety concerns, character issues, injury to value are more persuasive than the arguments against those issues. As a psychologist, he has people who go through this program and he knows they do good things, but that is not the basis upon which he should decide.

Councilwoman Jones said that based on her interpretation of the technical land use requirements and the Fair Housing law, she would support the rezoning. She felt as City leaders in the public eye, they should try to dispel the myths regarding alcoholism and substance abuse. Alcoholism and substance abuse are horrendous diseases and most of us don't have to look far in our own family trees to find that struggle and it takes great courage to begin the recovery process and generalizations and stereotypes don't encourage people to take that first step of the 12-Steps. She lives two blocks from the Flynn Home in Montford and as a single woman with a small child, she will be sad to see them leave.

Vice-Mayor Bellamy pointed out that there is no other residential district in the UDO for this project. That is not the applicant's fault, but the City's fault. They could have petitioned Council for a straight rezoning to RM-16 and then Council would not have had the ability to place any conditions on the development. She has seen a map of the RM-16 districts throughout the City and unfortunately they are all built on.

Mayor Worley felt that the lower density on the site and appearance of the property would actually be in harmony with the existing neighborhood. He also felt that there was no expert testimony to support the statements that this development will lower property values. In fact, the reality is that over the years seldom do you see development lower values.

The motion made by Councilman Ellis and seconded by Councilwoman Jones failed on a 5-2 vote, with Mayor Worley, Vice-Mayor Bellamy, Councilman Ellis, Councilwoman Jones and Councilman Peterson voting "yes" and Councilman Dunn and Councilman Mumpower voting "no."

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 100 MORRIS STREET FOR THE NEW CONSTRUCTION OF A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3003 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT AT 100 MORRIS STREET FOR THE NEW CONSTRUCTION OF A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 8:10 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Ms. Shannon Tuch, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a conditional use permit for property located at 100 Morris Street for the construction of a duplex in an RS-8 Residential Single-Family High Density District.

On January 27, 2003, Mr. Danny Hayes submitted an application for a conditional use permit to allow the new construction of a duplex in a single family zoning district in west Asheville.

The subject property is located at 100 Morris Street (PIN No. 9638.17-01-2856). This property and the surrounding area is zoned RS-8, single family residential allowing up to 8 units per acre (City Exhibit 3 – Location Map). The applicant is proposing to subdivide an existing .42 acre lot in order to construct a 2100 square foot duplex next to the existing single family home (City Exhibit 3 – Site Plan).

As part of the conditional use permit requirements, the project must meet several conditions for duplexes found in section 7-16-2(d)(5) of the Unified Development Ordinance (UDO):

a. Duplexes must be located a minimum of 300 feet from all other multifamily uses (excluding dwellings with accessory apartments) on the same street in the single family district.
The property is located over 300 feet from other duplexes on the same street.

b. Minimum lot area shall be 125 percent of that required for a single family residential unit in the respective district.
The resulting lot for the duplex is .20 acres and is well above the lot size requirements.

c. Parking shall be located in the rear and screened with vegetation from adjacent single family uses.
All parking is located in the rear and existing vegetation will be supplemented with additional vegetation as required to screen the parking area from adjacent single family uses.

d. The structure shall have a single front entrance and other entrances as required.
The proposed duplex has a single front entrance with a secondary entrance at the rear.

e. Requirements of the N.C. State Building Code shall be met.
The proposed duplex will be new construction and will be built to meet building code requirements.

The Technical Review Committee (TRC) reviewed this project at their February 17, 2003, meeting and recommended that the project be forwarded to the City Council with a recommendation of approval with conditions. All TRC conditions have been met by the applicant in the revised site plan. Review by the Planning and Zoning Commission is not required for this use.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
   The proposed development is within standards of development practice set forth by the City of Asheville and other governmental agencies.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
   The proposed duplex will appear single family and will be compatible with the surrounding neighborhood. In addition, the existing topography of the site will provide favorable conditions for the construction of a lower level unit.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
   The duplex will have the appearance of a single family home and will blend in with the existing neighborhood fabric. Neighboring property values are not expected to be injured.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
   The average home on Morris Street is a modest cottage with a small footprint. The proposed duplex will have two stacked units, each being only 1050 square feet and will appear to be in scale, bulk, coverage, density and character with the surrounding homes.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
   This proposed development supports the smart growth policies of affordable in-fill housing and mix of housing types within a given neighborhood outlined in the Asheville City Plan 2025.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
   The proposed duplex is located within an existing neighborhood located off of Brevard Road. The property has adequate infrastructure in place.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.
   The proposed duplex will not generate traffic problems.

The TRC and City staff recommend approval of the conditional use permit to build a duplex in a single family zoned neighborhood in accordance with the plans submitted by the applicant.

Upon inquiry of Councilman Peterson about parking, Ms. Tuck said that the minimum number of required parking spaces is four and the maximum number is six. When the applicant asked Planning staff what would be better, she told him that because of the nature of the conditional use permit that he would be tied to whatever is shown on the plan. Therefore, he showed six parking spaces.

Councilman Peterson felt the people who live on the upper level would park on the street and he would rather see less parking in the back so that the entire back yard is not a parking lot.

Mr. Danny Hayes, applicant, was amenable to reducing the number of parking spaces to four. He spoke in support of allowing him to expand the basement apartment.

Ms. Lynn Jones, adjoining property owner, said that with the parking lot of the West Asheville Park and the proposed parking area in the rear of this duplex, the entire area will all be asphalt. She said that Morris Street is not a wide road and has already enough traffic on it now. Allowing this structure to go to a duplex will make a small street even busier.

Mr. Taylor, resident on Morris Place, said that after the lot was graded out he was told by Planning staff that there would not be any further construction until after the City Council public hearing. He felt he was mislead by the Planning staff. He would have liked to receive more information at the TRC meeting similar to the presentation at this meeting. He asked that the structure not be allowed to be built into a duplex; that the parking lot not be in the rear because it adjoins his and will decrease his property value; that a buffer type "B" be installed; and the property be landscaped. He asked Council to review (1) that no permit or construction be allowed prior to the City Council public hearing with no exceptions; (2) make an extra effort to update public records to find out who is actually adjacent land owners; (3) that the City check-list be enforced unselectively per each applicant; (4) that duplex, triplex and quadraplex be removed in the RS-8 zoning district from conditional use, or to at least the Level III special use; (5) RS-8 zoning lot size minimum requirement to be upgraded to 1,000 square feet; and (6) any property split in such a manner to prevent this kind of unharmonious reaction with the neighborhood.

Mr. Chad Anderson, adjoining property owner, said there is no shrubbery to separate the duplex from his house. The six parking spaces in the rear will decrease his property values because it will be in his backyard. With the children in the neighborhood and the narrow road, there is no more room to park on the street in front of the duplex.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 8:35 p.m.

There was discussion by Council about the buffer vegetation and/or privacy fence and how they could be used to shield the parking lot near Mr. Taylor's home and near Mr. Anderson's home.

Councilman Peterson supported a condition for a privacy fence to be installed below the wall by the driveway. He didn't envision it for the entire length of the property but just enough to block the area adjacent to the Anderson house. He would, however, leave that up to the Planning staff to determine where the fence would be appropriate. He also supported a condition that the parking spaces be limited to four spaces in the rear of the property.

Mr. Tuch responded to Councilman Dunn's question about why he could not move the rear parking lot onto the other adjoining piece of property, which is also owned by the applicant.

When Councilman Mumpower asked about additional vegetation to shield the parking lot, Ms. Tuch said that because two of the parking spaces will be taken out, there would be room for additional buffer. Councilman Mumpower suggested that the existing guidelines be used with regard to buffering to this piece of property. Ms. Tuch suggested the condition read that an "A" buffer as described in the UDO be provided between the parking area and adjacent single-family uses and any reductions, such as the combination with the privacy fence.

Vice-Mayor Bellamy moved to adopt Ordinance No. 3003, to issue the conditional use permit for property located at 100 Morris Street for the new construction of a duplex in an RS-8 Residential Single-Family High Density District. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Peterson asked if Vice-Mayor Bellamy and Councilwoman Jones would be willing to amend their motion to add the following conditions: (1) parking shall be reduced to the minimum required by the UDO to four spaces and screened by the equivalent of a Type "A" buffer in the rear of the property; and (2) that a privacy fence be erected at an appropriate location on the east side of the property in order to screen the driveway. Vice-Mayor Bellamy and Councilwoman Jones both accepted that their motion be amended to all the two conditions.

Upon inquiry of Councilman Mumpower, Mr. Anderson explained that his home is higher than the driveway in the back of the duplex and a fence would not help his situation.

Mayor Worley, Councilman Dunn and Councilman Ellis all agreed that the condition to require a privacy fence may be unnecessary since Mr. Anderson feels it won't solve the problem of screening the vehicles who park in the rear of the duplex.

At the request of Councilman Mumpower, Mayor Worley re-opened the public hearing at 8:55 p.m. only for the purpose of discussing a privacy fence on the east side of the property.

Upon inquiry of Councilman Mumpower, Mr. Hayes said that he would be amenable to installing a privacy fence on the east side of his property.

Mr. Anderson responded that he doesn't care about the installation of a privacy fence; he just does not want the property developed into a duplex.

Mayor Worley closed the public hearing at 8:57 p.m.

The amended motion made by Vice-Mayor Bellamy and seconded by Councilwoman Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE 236

C. **PUBLIC HEARING TO REZONE PROPERTIES LOCATED ON CLINGMAN AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT**

ORDINANCE NO. 3004 - ORDINANCE TO REZONE PROPERTIES LOCATED ON CLINGMAN AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

At the request of Vice-Mayor Bellamy, Councilwoman Jones moved to excuse Vice-Mayor Bellamy from the remainder of the meeting. This motion was seconded by Councilman Ellis and carried unanimously.

Mayor Worley opened the public hearing at 9:00 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone 12 lots located at the southwest corner of Clingman Avenue and Rector Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on February 28 and March 7, 2003.

On December 27, 2002, Mountain Housing Opportunities (MHO) submitted a request to rezone several parcels from RM-8 to RM-16 at the southwest corner of Clingman Avenue and Rector Street, including property with frontage on Jefferson Street.

The rezoning request is intended to help MHO implement the West End Clingman (WECAN) plan prepared for MHO by Correa-Valle-Valle. The plan calls for higher density infill development in this area. MHO has indicated an intention to bring the WECAN plan forward for official City adoption in the near future.

The zoning change is from one density of multifamily residential to another and thus does not constitute spot zoning. The density allowable under the proposed zoning will not overtax the existing street network as Clingman Avenue serves both as an arterial street and as a gateway link between downtown Asheville and "downtown" West Asheville. Other public services will be analyzed once plans for development are received.

The RM-8 Residential Multi-Family Medium Density District is intended to permit a full range of medium density multi-family housing types including single-family detached and attached to residences.

The RM-16 Residential Multi-Family Medium Density District is intended to permit a full range of high density multi-family high housing types along with limited institutional, public and commercial uses appropriate to high density residential areas. This district should be located near employment centers and along roads capable of handling the demand generated by such high density residential development.

The parcel site is currently a mixture of vacant and developed lots. The parcel has direct access to three roads (Clingman Avenue, Rector Street and Jefferson Street). With higher density development anticipated in the WECAN plan and being implemented north of the site by MHO's Merritt Park project, the parcel is in a likely location for higher density residential development. Plans for development on this parcel will follow development requirements of the Unified Development Ordinance.

On February 5, 2003, the Planning and Zoning Commission considered this rezoning request and unanimously recommended its approval. The Planning and Development staff also recommends approval of the request.

Mr. Mike Vance, Home Ownership Manager of MHO, spoke in support of the rezoning request and said that WECAN unanimously supports the rezoning.

Mayor Worley closed the public hearing at 9:05 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3004. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 241

Councilwoman Jones applauded the WECAN community for being a part of the solution.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. UPDATE ON CORPORATION FOR HEALTH PLAN ADMINISTRATION

Finance Director Bill Schaefer updated City Council on the corporation for health care administration. He reviewed the progress to date since December 2002 and where we are today. He then explained the formation of the Western Carolina Well Care, Inc. (WCWC), the first payer owned third party healthcare administrator/network in the region. WCWC is a public non-profit corporation formed effective January 1, 2003 whose mission is to serve as a third party administrator for self-funded group health claims and / or to provide access to regional providers for health care services. Formation of WCWC began by the City in December, 2002 in anticipation of the demise of Mountain Health Care in an effort to protect the City's employees and retirees and preserve access to the region's providers at discounted fees. Working in collaboration with Crescent Preferred Provider Organization (PPO) Inc., located in Canton, NC, WCWC is offering interested employers in the region the opportunity to access care through the WCWC network of providers. Using Crescent PPO as the core of its network WCWC has expanded the available panel of providers to include numerous physicians in the region who have not in the past, or may not now participate in other available networks. As of this date, WCWC has signed agreements through Crescent and direct with WCWC for fee schedules with 924 regional physicians, hospitals and healthcare providers. An additional 582 are currently under negotiation having already expressed an interest in participating in the network. Ownership of WCWC will reflect employer participation in the network. As new employers become members each will become voting members of WCWC. To date, PPO networks in the region have been largely commercially owned for-profit enterprises, or provider owned entities. WCWC is the first payer owned third party administrator / network in the region. Owner / participants in WCWC will have the option of keeping their own third party administration (TPA) and accessing only the WCWC panel of providers and fee schedule, or they may opt for the network availability and TPA services together.

Interested employers may contact John Miall at 259-5684 for information about the network. In addition, a community meeting will be held at 6:30 p.m. on Monday, March 17, 2003, at the Wolcott Public Works Building at 161 S. Charlotte Street, in Room A109 to allow community employers, agents, and providers to ask representatives of WCWC's board of directors, partners and advisors any questions they may have.

VI. OTHER BUSINESS:

UNIFIED DEVELOPMENT ORDINANCE

At the request of Councilwoman Jones, and by consensus of Council, the Planning staff was asked to identify real solutions to our homelessness problem, which two are housing and substance abuse rehabilitation, then to report back to Council with recommendations for specific

Unified Development Ordinance amendments in order to implement solutions that will be long-lasting and fundamental.

RESOLUTION NO. 03-34 - RESOLUTION AUTHORIZING THE CITY MANGER AND MAYOR TO NEGOTATE A CONTRACT FOR FEDERAL LIAISON SERVICES

Mayor Worley said that this is the consideration of a resolution authorizing the City Manager and Mayor to negotiate and execute a contract to provide federal liaison services on behalf of the City of Asheville.

On January 28, 2003, City Council adopted Resolution No. 03-21 authorizing the issuance of a Request for Proposals (RFP) to qualified firms for the provision of federal lobbying services on behalf of the City of Asheville. Subsequently, the RFP was issued resulting in four qualified responses. A sub-committee of Council, Mayor Worley, Councilman Ellis and Councilman Mumpower, selected two candidate firms for personal interview, and then, ultimately, Ball-Janik, LLC. Going forward, a contract must be in place, a City agenda determined, and various procedures undertaken by the contractor in order for the City agenda to be effectively positioned for the 2004 federal budget cycle. Therefore, the timeframe to complete these next steps must be compressed.

This resolution allows the City Manager and Mayor, in consultation with the City Attorney, to negotiate and execute the contract without further Council action.

Staff recommends Council approve the resolution to allow the City Manager and Mayor to negotiate and execute the contract with Ball-Janik, LLC.

Councilman Mumpower said that after interviewing the firm of Ball-Janik, LLC., he felt that they would have the potential to really do some good work for the City of Asheville.

When Councilman Dunn asked for an opportunity to review the contract, Mayor Worley said that once the contract is negotiated, it would be circulated to Council.

Councilman Peterson said that he wasn't aware that there was a Council subcommittee appointed to review the responses and make a recommendation. He would have liked more information on Ball-Janik, LLC, like who they are and why did we choose them, their price and what their scope of services will be. Mayor Worley responded that once we get the contract negotiated, then it will be circulated to Council with the details of the contract. Then, once the agreement is entered into, Ball-Janik will meet with the City fairly extensively to go over what our needs are, what our opportunities are, what our agenda is, what our preferences are, and then we as an entire Council would make those decisions for the firm to proceed.

City Manager Westbrook said that Mayor Worley is bringing this up now because we are facing a deadline at the federal level with their assistance in getting in some requests.

Councilman Peterson didn't want there to be a pattern of Council subcommittees doing the business that should be left up to the entire City Council.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-34. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 329

CLAIMS

The following claims were received by the City of Asheville during the period of February 14-27, 2003: Doug McKee (Streets), Andrea O'Gorman (Water), Cheryl Anderson (Sanitation), Maxine Jones (Parks & Recreation), Alfred Gilmore Jr. (Water) and Beaverdam Condos (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

LAWSUIT

The City was served with the following Petition for Certiorari on March 3, 2003, which is generally described as follows: Rom Youen, Elva L. Ponder and husband Bobby L. Ponder, and Ruth D. Adams and husband Roy L. Adams vs. Board of Adjustment. The nature of the proceeding is a Petition for Writ of Certiorari to review the decision of the Board of Adjustment. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Grant Millin, representing the Bill of Rights Defenders, presented City Council with information regarding his request that (1) City Council to amend Resolution No. 01-144, which condemned the terrorist attack and supported the President, because it doesn't represent him; and (2) that Asheville be designated a Bill of Rights Defense City.

Mr. Fred English, Haw Creek resident, felt City Council should not increase the filing fee to run for City Council from the existing $5.00, and to not raise the water rates. He presented City Council with a "Support Our Soldiers" hat.

Mr. Eric Lynch, Director of Education and Action, said that he supports young peoples right to participate in democracy and self-determination. Therefore, he asked City Council to commit to include discussion about the resolution the high school students will be presenting to Council later in the meeting in Council's next meeting.

Ms. Grace Williams, student at Asheville High School, said that many cities are passing anti-war resolutions and she asked that Asheville become one of them. She presented City Council with an anti-war resolution petition, which reads, "We, the citizens of Asheville, ask you to adopt a strong anti-war resolution. It has been shown by dozens of rallies that thousands in the community are against a preemptive war with Iraq. We want Senators Dole and Edwards and Congressman Taylor to know that Asheville disagrees with any action taken against Iraq." She asked that Council consider adoption of a resolution to be considered at a later date.

Ms. Susan Bloom spoke in support of the petition presented by Ms. Grace Williams and presented City Council with pictures of people from Iraq.

Mayor Worley said that regardless of what City Council decides to discuss or not to discuss, he commended Ms. Grace Williams and supports the students in their efforts to make their voices heard. He welcomed them to come to the Council meetings on this issue or any other issue that they would like to bring before the Council and Council certainly supports their right to express themselves in that way.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:47 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 18, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Budget Amendment to the Water 35 Fund to Provide Funding for an Emergency Response Plan

Summary: The consideration of a budget amendment to reprogram funds to provide additional funding for an Emergency Response Plan.

The Regional Water Authority and Brown and Caldwell entered into an agreement for a Vulnerability Assessment in September 2002, and it is being funded with a $115,000 Environmental Protection Agency (EPA) grant. The Assessment is complete and was presented to the City Council in February, but it is now required that the Authority develop an Emergency Response Plan that incorporates the results of the Vulnerability Assessment. An Emergency Response Plan will include plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack on the public water system. It shall also include actions, procedures, and identification of equipment, which can eliminate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water.

The cost of the plan is $45,000 with $16,000 being provided from the remaining EPA grant funds that were granted to the Authority in September of 2002 to conduct the Vulnerability Assessment and an Emergency Response Plan. An additional $29,000 is needed to complete funding for the Emergency Response Plan. Staff is recommending reprogramming $29,000 from the Master Plan Improvements to the Water Security Assessment (Vulnerability Assessment) to complete funding for the Emergency Response Plan.

Staff recommends that City Council approve a budget amendment to reprogram funds to provide additional funding for an Emergency Response Plan.

Declaration of Withdrawal of Henry Street

Summary: The consideration of a resolution finding that Henry Street is not part of an adopted street plan.

The Asheville Area Chamber of Commerce submitted to the City a Declaration of Withdrawal for Henry Street. The Chamber of Commerce owns all of the property, which abuts the alley. The property is needed for construction of the new Chamber of Commerce building and parking lot. The alley is not used as an ingress or egress nor has it ever been used as such. The Chamber's request for a resolution from Council finding that Henry Street is not part of the street plan adopted under G. S. 136-66.2, is supported by the legal research performed by the law firm of Van Winkle, Buck, Wall, Starnes & Davis, P.A., certifying that the following three criteria have been met.

N. C. Gen. Stat. sec. 136-96 permits the filing of a Declaration of Withdrawal of any street dedicated to public use and not utilized within 15 years from and after dedication.

In order to withdraw a street from public dedication, N. C. Gen. Stat. sec. 136-96 requires:(1) that the street must have been dedicated to public use; (2) the person desiring to withdraw, must be the original dedicator or someone claiming under the original dedicator; and (3) that the street not have been opened and used by the public for 15 years from and after the dedication. The statute goes on to state that upon request, the City shall adopt a resolution stating whether the street is or is not part of the street plan adopted under G. S. 136-66.2.

Public Works Department staff have consulted with all appropriate City departments and determined that the right of way designated as Henry Street as shown in Plat Book 8, Page 72 is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution finding that the right-of-way designated as Henry Street as shown in Plat Book 8, Page 72, is not part of an adopted street plan.

Renewal of Franchise Ordinance for Narrated Historic Tour Trolley

Summary: The consideration of renewal of an existing franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

For the last year, Asheville Historic Trolley Company (AHTC) has operated a narrated historic tour in Asheville using a 30 foot bus that looks like a trolley car. The venture has been successful to the extent that the AHTC would like to renew the franchise for a period of two years. There have been no complaints and several compliments received by the City over the course of the last year.

The tour will continue to follow an established route, and could occur up to four times per day.

The operator is required to meet with the city Traffic Engineer to review and get approval for the routes that the historic tour will run.

The vehicle is a 30 foot rubber tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day of the week. For charter operations the hours of operation are not limited to the above providing that Trolley Leasing meets all local state, and federal laws regarding the operation of a chartered vehicle. The franchise fee is one dollar per day of projected operation.

The ordinance is drawn to be as narrowly as possible, and does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council renew the franchise ordinance with Trolley Leasing, LLC, for a two-year period.

Grant for Fire Department Equipment

Summary: The consideration of a resolution to apply for and enter into an agreement with the Department of Homeland Security for funds to assist with the purchase of Self-Contained Breathing Apparatus and Portable Radios for Asheville Fire Rescue.

In recent years there has been improved technology in Self-Contained Breathing Apparatus (SCBA) and related equipment. Asheville Fire Rescue decided to switch to the improved technology SCBA manufactured by Scott. Each unit is $2,800 so it is cost prohibitive for the Department to replace all of the units at one time. At the same time, it is essential that all of the fire vehicles operate with the same SCBAs so that all fire personnel are trained on the same type of equipment. In addition, this grant provides an opportunity to update other types of equipment, such as VHF Portable Radios to enhance interoperability.

Asheville Fire Rescue is requesting $174,578 in grants from the Department of Homeland Security for 44 SCBAs and spare bottles, 130 SCBA masks and 24 Portable Radios. The grant requires a 30% local match, or $52,373.40, which will require an appropriation of $52,373.40 from the Contingency account. Upon notice of the grant award, a budget amendment will be brought to City Council for the full amount of the grant award, including the City's match.

The Fire Rescue Department recommends the City of Asheville apply for and enter into an agreement for grant funds to assist with the purchase of Self-Contained Breathing Apparatus and Portable Radios.

Clerk to Advertise Offer to Purchase Air Rights Adjacent to 21 Battery Park Avenue

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a portion of the air rights adjacent to 21 Battery Park Avenue comprising a total of 1,210.80 square feet.

A bid from 21 Battery Park, LLC, in the amount of $9,000.00, has been received for the purchase of a portion of the air rights adjacent to its property at 21 Battery Park. The bid is not less than the appraised value of $9,000.00.

The property is zoned Central Business District and fronts on Battery Park Avenue to the south with an alley at the east and north. The proposed purchase is made up of three air right parcels and the appraisal by Mickey Foster dated December 1, 2002, estimates a value for each parcel.

North side:	507.17 sq. ft.	$2,789
East side:	290.18 sq. ft.	$1,596
South side:	413.45 sq. ft.	$4,548
Total	1,210.80 sq. ft.	$8,933 rounded to $9,000

The appraisal takes into consideration that the air right parcels are not 100% of the air rights but limited in size to the space from 36' above ground level to 72' above ground level. Furthermore, the limited potential uses of the underlying land are considered.

There is no current or contemplated use for the air rights by the City. Staff recommends that the use of the air rights space be limited to roof overhang and/or open balconies. The sale of the air rights will enable 21 Battery Park, LLC, to proceed with construction of the proposed improvements at 21 Battery Park Avenue that include a multi-use building with six levels.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

GREENWAY COMMISSION ANNUAL REPORT

Ms. Linda Giltz, Chair of the Greenway Commission, reviewed with City Council the 2002 Greenway Commission's Annual Report. She said the first greenway was developed in 1988 and in 1997 the Greenways Task Force was established. In 1998 City Council approved the Master Plan. In 1999, the Greenway Commission was established and in 2000 the Parks and Greenways Foundation was established. The greenways are consistent with City Council's goals of smart growth initiatives, increasing the "quality of life" and amenities in new developments. Greenways have economic benefits: (1) they attract economic development and provide new business opportunities; (2) enhance tourism and increase revenue from tourism and recreation; and (3) create economic opportunity through riverfront revitalization. Air quality benefits include: (1) greenways are transportation corridors; and (2) walking, biking are non-polluting forms of transportation. Water quality benefits include: (1) preserve wetlands; (2) reduce flood damage; (3) improve water quality of local streams. Other environmental benefits include: (1) preserve open spaces; (2) provide habitats for plants and animals; and (3) natural resource corridors for wildlife. Community health and safety include: (1) increase sense of community and neighborhood awareness; (2) provide connections to schools, parks, work and shopping; and (3) enjoyable, safe places for walking, running, bicycling and skating.

The Greenway Commission's philosophy and role include: invite neighborhood ownership; work jointly with other organizations; name after waterways; use/recruit volunteers; building on city-owned property and easements; encourage developers to build greenways; increase public awareness through presentations; and help solicit donations of easements.

Ms. Giltz reviewed with Council the completed greenway projects. She said that 4.83 miles of greenways have been constructed at an average cost/mile = $100,000; average annual maintenance costs/mile = $7,000; City funding to date = $95,000; outside funding to date = $388,000; and total land value donated = $450,000. Current greenway projects include the French Broad River Park, the Reed Creek Greenway, the Clingman Forest, the Azalea Road Park, the River Bend development, and the creek along West Asheville Park.

Ms. Giltz asked City Council to keep greenways as a high priority; encourage developers to incorporate greenways into their plans; be advocates for greenways with other agencies (NC DOT, MSD, etc.); and continue to support the Master Plan and its upcoming revision.

On behalf of City Council, Mayor Worley thanked Ms. Giltz and the entire Commission for their hard work and dedication on the Greenway Commission.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on March 25, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Greater Front Setback Flexibility in a Variety of Non-Residential Zoning Districts

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to provide for more flexible front setbacks in pedestrian-oriented areas in a variety of nonresidential zoning districts.

This code amendment provides for reduced front setback requirements in a variety of nonresidential zoning districts if pedestrian oriented design features are utilized. A definition of pedestrian oriented design is included as part of this ordinance. In effect, the incentive of a reduced front setback is provided as an option for developers if certain design standards are met and there is no conflict between the reduced setback and any scheduled road widening.

Affected districts include: Neighborhood Business District, Office II District, Office/Business District, Community Business I District, Community Business II District, Resort District, Institutional District, Highway Business District, Regional Business District, River District, Commercial Industrial District, and Industrial District.

On March 5, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on the March 25, 2003, formal City Council agenda.

MINIMUM HOUSING CODE

Advocates for a Complaint-Only Inspection System

Ms. Bonnie Bailey, Housing Code Task Force member, passed out to Council the myths and realities regarding the Minimum Housing Code. She then reviewed with Council the history of the Minimum Housing Code and how their proposal became a compromise, which the majority of the Task Force members did agree on. She pointed out that people cause fires and the overwhelming majority of fires are not remotely related to the Housing Code. She explained how the Code is actually more defined or restrictive. She pointed out that our housing and rents, without substantial increases in personal income, have increased and the supply has only had a minimal increase. Other cities throughout the state and the country have progressive and aggressive programs to locate and address substandard housing. She explained how providers of affordable housing are impacted by fees, taxes, tax increases, re-evaluations and insurance costs. These costs are due and payable immediately and cannot be pro-rated over time. The mandatory inspection process is a cost where the City Council can make a positive difference and have a positive impact on affordable housing cost. Investors must feel they can have a fair return on their investment of money and their time or they will not take the risk. She then explained that the City should consider and adopt a complaint-based system with a mandatory component that is targeted and is focused on at risk properties, or irresponsible property owners whether the properties are single-family owner-occupied dwellings, single-family tenant occupied residents or multi-family residential structures.

Mr Steve Duncan, Housing Code Task Force member, briefly explained how their proposal outlines how to locate substandard housing by three methods (1) following N. C. General Statutes where 5 citizens may file a complaint; (2) complaints from citizens; and (3) a plan by the Building Inspection Department that fairly and systematically locates or identifies properties or areas of properties where substandard housing appears to exist. In addition, the proposal will include (1) a specifically designed Housing Complaint Inspection Form for City inspectors to follow; and (2) a Community Housing Inspection Board made up of representatives of homeowners, tenants and professionals from the real estate community.

Mr. Duncan said that the mandatory inspection and enforcement is applied when evidence is found that clearly warrants an inspection of any residential unit. He explained that should a warranted inspection show violations which substantially fail the Housing Complaint Inspection Form (25% or more of the identified areas of inspections or if the property was found to have any of the issues that may require immediate condemnation), the property owner shall be given up to 30 days to correct items that violate the safety checklist. The property will then be subject to a mandatory re-inspection program following the detailed City inspection guidelines and forms, until the owner corrects all violations and has successfully completed at least one additional mandatory inspection. He then explained when a property would be released from the mandatory inspection program.

Mr. Duncan then reviewed with Council the repeat offender program and the voluntary inspection incentive and recognition program.

Advocates for a Mandatory Inspection System

Mr. Jim Barrett, Housing Code Task Force member, reviewed the history of the Code, the case for regular code enforcement, the benefits of our Code, the affordability factor, the current Task Force's commonalities and differences and technical recommendations. They believe the code is best implemented by a fair and impartial schedule of inspections administered throughout the City. This position is in contrast to that of other members of the Task Force who believe the Code can be enforced through complaints and voluntary compliance. They disagree.

They feel a complaint-based system relies on the vigilance of tenants to complain about their landlords and risk retribution. Tenants have been known to move before they would complain for fear of losing their apartments. Furthermore, complaints can always be tainted by personal bias or a desire for retribution. The resolution of each complaint could become a cumbersome, and often adversarial process.

A system of inspections is designed to diffuse the interpersonal element in enforcement. Every housing structure is required to submit to a set calendar of inspections thereby avoiding the appearance that enforcement is singling out certain people for enforcement.

Complaints rely on what can be observed by a layperson. The most serious dangers affecting a house can only be seen by testing the electrical panel, examining the structure underneath the house, and going on the roof and inspecting the chimney flue.

Complaints react to a danger that is serious enough to be observed. A regular schedule of inspections are intended to be preemptive, to implement the elements of Code to catch deterioration before it causes more serious problems.

They endorse the present system of regular scheduled inspections, however, they believe improvements can be made by rewarding landlords who have proven themselves to be responsible and by eliminating redundancy.

In conclusion, they believe that a well-enforced housing code is a benefit to our whole community. Our regular inspections and enforcement: (1) focuses on health and safety; (2) utilizes the experience of unbiased professionals to identify hazards – not the layperson's suspicion of what a hazard might be; (3) preserves our housing stock and neighborhoods; (4) strengthens and increase our tax base. Cuts the City's firefighting and demolition costs. Protects renters and homebuyers from deceptive and dangerous practices and conditions; (5) is fair as it expects and enforces compliance across the board; and (6) requires the private sector to maintain housing, rather than shifting that burden to the taxpayers. Provides a means for property owners to insulate themselves from liability – if they comply with the minimum standards.

Building Safety professionals know that complaint driven codes don't work. They know that to reduce the enforcement power of the code will be to render it unenforceable. As one county inspector stated "with a complaint system you'll see the return of widespread substandard housing in the city and you will begin to look like the county again."

Fire data, while controversial to some, is something that this Council should not ignore. Supplemental materials from the National Fire Data Center point time and time again to the increased incidence of fire in homes due to substandard conditions and the impact that this has had on the whole community. Let us remain a leader. Let us err on the side of safety.

Our city's housing policies should both produce and maintain good affordable housing. Housing code enforcement and compliance is good business. Support code enforcement and provide the financial resources needed to Building Safety so that they can do their job.

Mr. James Davis, third party inspector for the City, felt that the complaint-based system is putting the tenants and neighbors as the front line for inspections. Either the house has to look so bad outside for a neighbor to complaint, or the tenant has to have the knowledge and courage to make the complaint. As an inspector, he does things that are not immediate apparent, e.g., he crawls underneath the house looking for erosion that might undermine the foundation. If some erosion is found, it can be addressed before a real problem occurs in that foundation. In addition, he runs the furnace to determine if it's malfunctioning, he looks down the chimney for blockages, which allow gases to back up into the house, and he takes off the electrical panel to see if wiring is done properly. The point is that they address a problem before it becomes serious.

Mr. Gene Bell, Housing Code Task Force member, said that people need to be assured that their investments are protected. If we don't have some way to ensure the houses are maintained, there are a number of residents who are struggling and who have a tendency to compromise their safety to meet their dream and we don't want them to be victimized.

City Staff Presentation

Director of Building Safety Terry Summey thanked and commended the Housing Code Citizen Task Force. He said that during the past nine-months, staff and a 21-member Housing Code Citizens Task Force have been meeting to discuss the Minimum Housing Code. The Task Force discussed various issues from technical standards to issues of enforcement. Enforcement was the focal point of disagreement. The Task Force was unable to arrive at a compromise on changes to the Housing Code. The City's Risk Manager, John Miall, facilitated the last four months of the Task Forces' meetings and arising out of that facilitation were the two separate Power Points City Council has just heard. Some of the issues and concerns discussed by the Task Force include but are not limited to:

- Enforcement of the Code (Mandatory, Complaint or Hybrid of both)
- Technical changes to the housing standards.

- Discussion about fees
- Increased penalties for those rental units not in compliance.

Councilman Peterson asked that City staff give Council a recommendation on what they feel would be the best system, which would not be based upon political considerations, but their experience and expertise. He felt that since this is such a complex issue, City Council might wish to review the inspection of rental dwellings and the inspection of owner-occupied dwellings at two separate worksessions.

Mr. Summey requested Council give City staff time to review both proposals and to come back to Council at a worksession with details, which would include a suggested recommendation as to the type of enforcement program and changes to the Code. As this is an educational process for Council, at the future worksession City Council will have a better understanding of the information presented today.

Vice-Mayor Bellamy asked Mr. Summey to provide some additional information: the differences between the City's Housing Code and Buncombe County's Housing Code; how did the voluntary compliance work prior to 1993; what are the condemnation requirements; what are our inspection fees; a copy of the existing complaint-driven form; and information on how often the complaint-driven from is used. In addition, Councilwoman Jones asked for a list of the technical changes that were generally agreed to by the entire Task Force.

It was the consensus of Council to review the information presented, have City staff report back to Council with some recommendations and then Council will be in a better position to ask questions and give their direction to staff and then set a public hearing.

N.C. DEPT. OF TRANSPORTATION AGREEMENT FOR PACK SQUARE RENAISSANCE PROJECT

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

The Pack Square Conservancy requested funds in the amount of $25,000 from the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

Since NCDOT can only provide these funds to municipalities, Pack Square Conservancy and NCDOT requested that we accept the money from the state and pass it through to the Conservancy. The City will enter into a contract with the Conservancy for the $25,000. This grant requires no match and will not cost the City any out-of-pocket costs.

The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

N.C. DEPT. OF TRANSPORTATION AGREEMENT FOR NEW HAW CREEK ROADWAY IMPROVEMENTS

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

In April 2001, City Council recommended that a task force be established to work on pedestrian safety issues within the Haw Creek Valley. The Task Force consists of City and NCDOT staff in addition to community residents. The group developed the first phase of the plan, which includes installing sidewalk from Arco Road north to Beverly Road on New Haw Creek Road and on Avon Road.

This agreement (which requires no match) will allow the City to accept money from NCDOT in the amount of $150,000 to go toward roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

While these funds cannot be used to install sidewalk on New Haw Creek Road, they will be used to install curb and gutter, resurface the street and install storm drainage pipes and structures needed to complete the sidewalk. This funding is from the NCDOT Small Urban Funds, which was limited at the time of our application to $150,000. (Currently the maximum amount of the grant is $250,000.) These funds are limited to improvements on State maintained roadways.

In Fiscal Year 2003-04 staff will request an additional $250,000 for funds to extend the project from Arco Road south to the main entrance to Haw Creek on New Haw Creek.

In February 2003, City staff was notified that the City was awarded a TEA 21 Enhancement Grant in the amount approximately $172,000 to install sidewalk on New Haw Creek Road and Avon Road. This $150,000 was used as a match for the project in addition to $40,000 from the City and $5,000 from the Haw Creek Community Association. The City's portion of the project is currently budgeted in the Capital Improvement Program.

City staff recommends City Council authorize the City Manager to sign a municipal agreement with NCDOT for roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

Ms. Ball responded to questions from Councilman Peterson regarding the TEA 21 Enhancement Grant.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

N.C. DEPT. OF TRANSPORTATION AGREEMENT FOR INSTALLATION OF PEDESTRIAN SIGNALS

Transit Services Director Bruce Black said that this is the consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) to install pedestrian signals at three locations.

This agreement will allow for the installation of pedestrian signals at the following locations: (1) US 25 (Hendersonville Road) and Wal-Mart/Deerfield; (2) US 70 (Tunnel Road) and Riceville Road; and (3) US 25 (Biltmore Avenue) and Victoria Road.

The NCDOT estimates the amount for this installation will be approximately $43,000, all of which is allocated for this project in the Transit Services Department budget though the vehicle registration funds.

City staff recommends City Council authorize the City Manager to sign a municipal agreement with NCDOT for the installation of pedestrian signals at three locations.

Vice-Mayor Bellamy suggested two additional intersections in the future: (1) Hilliard and Clingman Avenues; and (2) Montford Avenue near Hunter Banks.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

FORMALIZING PARKING APPEALS

Transit Services Director Bruce Black said that this is the consideration of an ordinance authorizing the City Manager to institute and appeals process for the adjudication of parking citations and late penalties.

The City of Asheville currently handles parking appeals on a case-by -case basis. Citizens who think they have justifiable reasons for a parking citation to be dismissed have either filled out a City of Asheville Parking Services Appeals form or made their request orally or in letterform. In an effort to provide that all citizens can avail themselves of this process and that it be clearly posted in the City Code of Ordinances for their reference, staff recommends City Council adopt an ordinance allowing the City Manager to establish an appeal process for persons receiving a civil penalty.

Staff requests that City Council approves the ordinance.

Vice-Mayor Bellamy asked staff review the policy to make sure that people realize the 15-day penalty includes Saturdays and Sundays.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

Councilman Mumpower asked for the Mayor to research a way that the Consent Agenda items be outlined for the public at the formal meeting to show the good things that the City is doing.

GRANT FOR POLICE DEPARTMENT TRAFFIC UNIT

Police Chief Will Annarino said that this is the consideration of a resolution to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit.

Aggressive driving is one of the top complaints received by Asheville Police Officers. The types of aggressive driving violations that are most problematic in the City of Asheville are speeding, red light/ stop sign, erratic lane changes, following too closely and driving while impaired. A dedicated traffic unit would be able to help reduce the incidences of aggressive driving through targeted enforcement, educational programs and focused traffic studies aimed at reducing the number of accidents on high incidence roads.

The Governor's Highway Safety Program offers a four-year grant with graduated match requirements in the personnel, equipment and additional costs categories. The Asheville Police Department is requesting $474,438 in grants from the Governor's Highway Safety Program to hire and train four officers and one supervisor, and to purchase five vehicles and computer equipment for the unit in the first year. The first year of the grant there is a 25% match on equipment and training, but there is no match for personnel. The match is $71,365.82 for the first year, which will require an appropriation of $71,365.82 from the Contingency account. Upon notification of grant award, a budget amendment will be brought to Council for the full amount of the grant award, including the City's local match. The second year request is for $202,109.72, with a local match of $51,921.43. The third year request is for $209,971.07 with a local match of $106,379.54. In the fourth year the City is required to cover 100% of the grant, which will be $218,146.87.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire and train a traffic unit with four officers and one supervisor to reduce the incidence of aggressive driving in the City of Asheville.

Councilman Dunn questioned if this was a good grant in the long-run since in the fourth year the City is required to cover 100% of the grant.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At the request of Vice-Mayor Bellamy, Chief Annarino updated Council on the riot at the Asheville Mall. Vice-Mayor Bellamy asked that the notification system be expanded to Council members should an emergency situation arise. Mayor Worley explained that there is a system in place and suggested that any Council member who has a concern regarding a situation to call the City Manager or Police Chief.

WATER TREATMENT PLANT TOURS

Interim Water Resources Director David Hanks said that this is the consideration of discontinuing the tours of the North Fork Water Treatment Facility and the Mills River Water Treatment Plant.

The Environmental Protection Agency (EPA) has mandated that all water systems serving more than 3,300 customers have a Vulnerability Assessment (VA) conducted effective January 1, 2003. The City of Asheville and the Regional Water Authority of Asheville, Buncombe and Henderson (RWA) applied for an EPA grant of $115,000.00 to have the VA done per the EPA requirements. The RWA water system was one of only three (3) water systems in North Carolina to apply for and receive the EPA grant, which was voluntary in 2002. The grant required that the VA be completed by March 31, 2003. The United States Congress has since passed a law requiring all water systems to have a VA conducted which is the EPA mandate effective January 1, 2003, with completion by July 1, 2004, depending on the size of the water system.

The RWA VA was conducted by the engineering firm, Brown and Caldwell (B&C), which is nationally recognized as experts in the field of these assessments. The project manager for B&C was given carte blanche control of the process with the understanding that in no way did employees of the Water Resources Department want to skew the results of the VA. The entire water system was looked at along with the water treatment plants. The VA lists findings and proposals, which the consultant recommends should be implemented. One such proposal is limiting access to the water treatment plants and watersheds to essential access only, including eliminating tours of the facilities. The concern from the consultants was not only possible terrorist attacks from extremists groups but the liability from groups and tours that could have someone

I. The Planning and Zoning Commission at its March 5, 2003, meeting voted 6-1 to recommend approval of the rezoning as well.

Mr. Gerald Green, representing the owner, felt the property is more suitable for an office component. The character of the area has been changing over the past few years and he urged Council to vote in favor of the rezoning.

Mayor Worley closed the public hearing at 5:48 p.m.

Upon inquiry of Councilman Peterson, Mr. Pettibone said that the buffer requirements would depend on what the owner will use the property for.

Councilman Peterson was concerned that since the Sweeten Creek Road Widening Project is on the N.C. Dept. of Transportation's (NC DOT) Transportation Improvement Plan, that more commercial property will be developed along that stretch of road and it will cost more for NC DOT to acquire the right-of-way, thus reducing the amount of money that can be used for other Asheville transportation projects. Planning & Development Director Scott Shuford replied that if we had an actual design for the road and knew what the taking would be, or what setbacks would be required, they would be in a position to measure set-back and development requirements off that design. However, the Sweeten Creek Road Widening Project is probably 7-8 years out and we don't have a projected right-of-way for it at this time. He did understand Councilman Peterson's concern that there might be a potential for a strip commercial pattern along Sweeten Creek Road but assured him that City staff doesn't feel that would be appropriate. However, given the location of this request, the lot is deep enough that if it is widened it probably will be able to continue to be used for small scale office or commercial use.

Councilwoman Jones was concerned that we were rezoning another piece of multi-family residential property and asked for a report on the amount of acreage contained in each of the different zoning classifications. Mr. Shuford said that we have been fortunate to develop and encourage some mixed-use districts, such as the Neighborhood Corridor District and the Urban Village District. He said that he would provide that information to Council as well.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3009. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE

D. PUBLIC HEARING TO CONSIDER AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE FLEXIBLE FRONT SETBACKS IN PEDESTRIAN-ORIENTED AREAS IN A VARIETY OF NON-RESIDENTIAL ZONING DISTRICTS

ORDINANCE NO. 3010 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE FLEXIBLE FRONT SETBACKS IN PEDESTRIAN-ORIENTED AREAS IN A VARIETY OF NON-RESIDENTIAL ZONING DISTRICTS

Mayor Worley opened the public hearing at 6:00 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide for more flexible front setbacks in pedestrian-oriented areas in a variety of nonresidential zoning districts. This public hearing was advertised on March 14 and 21, 2003.

This code amendment provides for reduced front setback requirements in a variety of nonresidential zoning districts if pedestrian oriented design features are utilized. A definition of pedestrian oriented design is included as part of this ordinance. In effect, the incentive of a reduced front setback is provided as an option for developers if certain design standards are met and there is no conflict between the reduced setback and any scheduled road widening.

Using an example of the proposed Red Lobster building, Mr. Shuford explained how this code amendment would apply.

Affected districts include: Neighborhood Business District, Office II District, Office/Business District, Community Business I District, Community Business II District, Resort District, Institutional District, Highway Business District, Regional Business District, River District, Commercial Industrial District, and Industrial District.

On March 5, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 6:08 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3010. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTIONS OF INTENT TO ANNEX THE DEAVERVIEW ROAD AREA, THE CROWELL ROAD AREA, THE SMOKY PARK HIGHWAY AREA, THE SAND HILL ROAD AREA AND THE HENDERSONVILLE ROAD AREA AND SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING CITY COUNCIL PUBLIC HEARINGS ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Mr. Carter Pettibone, Urban Planner, said that the State of North Carolina enables cities to grow by annexation of areas that meet certain statutory requirements. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in N C. Gen. Stat. sec. 143-318.11 (a) (4). This motion was seconded by Councilman Dunn and carried unanimously.

At 6:12 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

ADJOURNMENT

Mayor Worley adjourned the meeting at 6:12 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 25, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy (maternity leave)

PLEDGE OF ALLEGIANCE

Col. Ray Green led City Council in the pledge of allegiance.

INVOCATION

Councilman Peterson gave the invocation.

SPECIAL RECOGNITION

Councilwoman Jones introduced her new daughter Gabriella Elizabeth Jones.

I. PROCLAMATIONS:

A. RECOGNITION OF THE ASHEVILLE HIGH SCHOOL'S GIRL'S BASKETBALL TEAM WINNING THE STATE 3-A CHAMPIONSHIP

Mayor Worley read a Certificate of Recognition for the Asheville High School's Girl's Basketball Team winning the State 3-A Championship and how proud the City of Asheville is of the Team. He presented the Certificate to Head Coach Sonita Gibbs and team members.

B. PRESENTATION OF $25,000 GRANT

Asheville Parks and Greenways Foundation Chair Chuck Cloninger and Ms. Nancy Thompson, representing the Progress Energy Foundation, presented the City of Asheville with a check in the amount of $25,000 from a grant for the construction of the wetland/interpretive area at the French Broad River Park Phase IV.

On behalf of the City Council, Mayor Worley thanked Mr. Cloninger for his dedication to the Asheville parks and recreation program, and Ms. Thompson for Progress Energy Foundation's wonderful community partnership.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 11, 2003, AND THE WORKSESSION HELD ON MARCH 18, 2003

B. RESOLUTION NO. 03-35 - RESOLUTION AUTHORIZING THE SALE OF PROPERTY ON 125 IRIS DRIVE TO NEIGHBORHOOD HOUSING SERVICES OF ASHEVILLE

Summary: The consideration of a resolution authorizing the Mayor to convey 125 Iris Drive to Neighborhood Housing Services (NHS) for $17,100.

On March 11, 2003, the City Council directed the City Clerk to advertise for upset bids on 125 Iris Drive. The advertisement ran in the Asheville Citizen-Times on March 14, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from NHS in the amount of $17,100 was not upset and the sale to NHS should be approved.

Planning Department staff recommends adoption of the resolution authorizing the sale of 125 Iris Drive to Neighborhood Housing Services for $17,100.

RESOLUTION BOOK NO. 27 – PAGE 330

C. ORDINANCE NO. 3005 - BUDGET AMENDMENT AMENDING THE WATER FUND TO PROVIDE FUNDING FOR AN EMERGENCY RESPONSE PLAN

35

Summary: The consideration of a budget amendment to reprogram funds to provide additional funding for an Emergency Response Plan.

The Regional Water Authority and Brown and Caldwell entered into an agreement for a Vulnerability Assessment in September 2002, and it is being funded with a $115,000 Environmental Protection Agency (EPA) grant. The Assessment is complete and was presented to the City Council in February, but it is now required that the Authority develop an Emergency Response Plan that incorporates the results of the Vulnerability Assessment. An Emergency Response Plan will include plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack on the public water system. It shall also include actions, procedures, and identification of equipment, which can eliminate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water.

The cost of the plan is $45,000 with $16,000 being provided from the remaining EPA grant funds that were granted to the Authority in September of 2002 to conduct the Vulnerability Assessment and an Emergency Response Plan. An additional $29,000 is needed to complete funding for the Emergency Response Plan. Staff is recommending reprogramming $29,000 from the Master Plan Improvements to the Water Security Assessment (Vulnerability Assessment) to complete funding for the Emergency Response Plan.

Staff recommends that City Council approve a budget amendment to reprogram funds to provide additional funding for an Emergency Response Plan.

ORDINANCE BOOK NO. 20 – PAGE 243

D. RESOLUTION NO. 03-36 - RESOLUTION FINDING THE RIGHT-OF-WAY DESIGNATED AS HENRY STREET IS NOT PART OF AN ADOPTED STREET PLAN

Summary: The consideration of a resolution finding that Henry Street is not part of an adopted street plan.

The Asheville Area Chamber of Commerce submitted to the City a Declaration of Withdrawal for Henry Street. The Chamber of Commerce owns all of the property, which abuts the alley. The property is needed for construction of the new Chamber of Commerce building and parking lot. The alley is not used as an ingress or egress nor has it ever been used as such. The Chamber's request for a resolution from Council finding that Henry Street is not part of the street plan adopted under G. S. 136-66.2, is supported by the legal research performed by the law firm of Van Winkle, Buck, Wall, Starnes & Davis, P.A., certifying that the following three criteria have been met.

N. C. Gen. Stat. sec. 136-96 permits the filing of a Declaration of Withdrawal of any street dedicated to public use and not utilized within 15 years from and after dedication.

In order to withdraw a street from public dedication, N. C. Gen. Stat. sec. 136-96 requires:(1) that the street must have been dedicated to public use; (2) the person desiring to withdraw, must be the original dedicator or someone claiming under the original dedicator; and (3) that the street not have been opened and used by the public for 15 years from and after the dedication. The statute goes on to state that upon request, the City shall adopt a resolution stating whether the street is or is not part of the street plan adopted under G. S. 136-66.2.

Public Works Department staff have consulted with all appropriate City departments and determined that the right of way designated as Henry Street as shown in Plat Book 8, Page 72 is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution finding that the right-of-way designated as Henry Street as shown in Plat Book 8, Page 72, is not part of an adopted street plan.

RESOLUTION BOOK NO. 27 – PAGE 331

E. ORDINANCE NO. 3006 - ORDINANCE RENEWING A FRANCHISE ORDINANCE WITH TROLLEY LEASING LLC FOR A NARRATED HISTORIC TOUR TROLLEY ON THE STREETS IN THE CITY OF ASHEVILLE

Summary: The consideration of renewal of an existing franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

For the last year, Asheville Historic Trolley Company (AHTC) has operated a narrated historic tour in Asheville using a 30 foot bus that looks like a trolley car. The venture has been successful to the extent that the AHTC would like to renew the franchise for a period of two years. There have been no complaints and several compliments received by the City over the course of the last year.

The tour will continue to follow an established route, and could occur up to four times per day.

The operator is required to meet with the city Traffic Engineer to review and get approval for the routes that the historic tour will run.

The vehicle is a 30 foot rubber tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central

Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day of the week. For charter operations the hours of operation are not limited to the above providing that Trolley Leasing meets all local state, and federal laws regarding the operation of a chartered vehicle. The franchise fee is one dollar per day of projected operation.

The ordinance is drawn to be as narrowly as possible, and does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council renew the franchise ordinance with Trolley Leasing, LLC, for a two-year period.

ORDINANCE BOOK NO. 20 – PAGE 245

F. RESOLUTION NO. 03-37 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE DEPARTMENT OF HOMELAND SECURITY FOR FUNDS TO ASSIST WITH THE PURCHASE OF EQUIPMENT FOR THE ASHEVILLE FIRE DEPARTMENT

Summary: The consideration of a resolution to apply for and enter into an agreement with the Department of Homeland Security for funds to assist with the purchase of Self-Contained Breathing Apparatus and Portable Radios for Asheville Fire Rescue.

In recent years there has been improved technology in Self-Contained Breathing Apparatus (SCBA) and related equipment. Asheville Fire Rescue decided to switch to the improved technology SCBA manufactured by Scott. Each unit is $2,800 so it is cost prohibitive for the Department to replace all of the units at one time. At the same time, it is essential that all of the fire vehicles operate with the same SCBAs so that all fire personnel are trained on the same type of equipment. In addition, this grant provides an opportunity to update other types of equipment, such as VHF Portable Radios to enhance interoperability.

Asheville Fire Rescue is requesting $174,578 in grants from the Department of Homeland Security for 44 SCBAs and spare bottles, 130 SCBA masks and 24 Portable Radios. The grant requires a 30% local match, or $52,373.40, which will require an appropriation of $52,373.40 from the Contingency account. Upon notice of the grant award, a budget amendment will be brought to City Council for the full amount of the grant award, including the City's match.

The Fire Rescue Department recommends the City of Asheville apply for and enter into an agreement for grant funds to assist with the purchase of Self-Contained Breathing Apparatus and Portable Radios.

RESOLUTION BOOK NO. 27 – PAGE 332

G. RESOLUTION NO. 03-38 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE FOR UPSET BIDS FOR A PORTION OF THE AIR RIGHTS ADJACENT TO 21 BATTERY PARK AVENUE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a portion of the air rights adjacent to 21 Battery Park Avenue comprising a total of 1,210.80 square feet.

A bid from 21 Battery Park, LLC, in the amount of $9,000.00, has been received for the purchase of a portion of the air rights adjacent to its property at 21 Battery Park. The bid is not less than the appraised value of $9,000.00

The property is zoned Central Business District and fronts on Battery Park Avenue to the south with an alley at the east and north. The proposed purchase is made up of three air right parcels and the appraisal by Mickey Foster dated December 1, 2002, estimates a value for each parcel.

North side:	507.17 sq. ft.	$2,789
East side:	290.18 sq. ft.	$1,596
South side:	413.45 sq. ft.	$4,548
Total	1,210.80 sq. ft.	$8,933 rounded to $9,000

The appraisal takes into consideration that the air right parcels are not 100% of the air rights but limited in size to the space from 36' above ground level to 72' above ground level. Furthermore, the limited potential uses of the underlying land are considered.

There is no current or contemplated use for the air rights by the City. Staff recommends that the use of the air rights space be limited to roof overhang and/or open balconies. The sale of the air rights will enable 21 Battery Park, LLC, to proceed with construction of the proposed improvements at 21 Battery Park Avenue that include a multi-use building with six levels.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 333

H. RESOLUTION NO. 03-39 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR PACK SQUARE RENAISSANCE PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

The Pack Square Conservancy requested funds in the amount of $25,000 from the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

Since NCDOT can only provide these funds to municipalities, Pack Square Conservancy and NCDOT requested that we accept the money from the state and pass it through to the Conservancy. The City will enter into a contract with the Conservancy for the $25,000. This grant requires no match and will not cost the City any out-of-pocket costs.

The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

RESOLUTION BOOK NO. 27 – PAGE 334

I. RESOLUTION NO. 03-40 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR NEW HAW CREEK ROADWAY IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

In April 2001, City Council recommended that a task force be established to work on pedestrian safety issues within the Haw Creek Valley. The Task Force consists of City and NCDOT staff in addition to community residents. The group developed the first phase of the plan, which includes installing sidewalk from Arco Road north to Beverly Road on New Haw Creek Road and on Avon Road.

This agreement (which requires no match) will allow the City to accept money from NCDOT in the amount of $150,000 to go toward roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

While these funds cannot be used to install sidewalk on New Haw Creek Road, they will be used to install curb and gutter, resurface the street and install storm drainage pipes and structures needed to complete the sidewalk. This funding is from the NCDOT Small Urban Funds, which was limited at the time of our application to $150,000. (Currently the maximum amount of the grant is $250,000.) These funds are limited to improvements on State maintained roadways.

In Fiscal Year 2003-04 staff will request an additional $250,000 for funds to extend the project from Arco Road south to the main entrance to Haw Creek on New Haw Creek.

In February 2003, City staff was notified that the City was awarded a TEA 21 Enhancement Grant in the amount approximately $172,000 to install sidewalk on New Haw Creek Road and Avon Road. This $150,000 was used as a match for the project in addition to $40,000 from the City and $5,000 from the Haw Creek Community Association. The City's portion of the project is currently budgeted in the Capital Improvement Program.

City staff recommends City Council authorize the City Manager to sign a municipal agreement with NCDOT for roadway improvements to New Haw Creek Road from Arco Road north to Beverly Road.

RESOLUTION BOOK NO. 27 – PAGE 335

J. RESOLUTION NO. 03-41 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE INSTALLATION OF PEDESTRIAN SIGNALS

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) to install pedestrian signals at three locations.

This agreement will allow for the installation of pedestrian signals at the following locations: (1) US 25 (Hendersonville Road) and Wal-Mart/Deerfield; (2) US 70 (Tunnel Road) and Riceville Road; and (3) US 25 (Biltmore Avenue) and Victoria Road.

The NCDOT estimates the amount for this installation will be approximately $43,000, all of which is allocated for this project in the Transit Services Department budget.

City staff recommends City Council authorize the City Manager to sign a municipal agreement with NCDOT for the installation of pedestrian signals at three locations.

RESOLUTION BOOK NO. 27 – PAGE 336

K. ORDINANCE NO. 3007 - ORDINANCE AMENDING CHAPTER 19 OF THE CODE OF ORDINANCE TO ALLOW THE CITY MANAGER TO ESTABLISH AN APPEAL PROCESS FOR PERSONS RECEIVING A CIVIL PENALTY BY A CITY OF ASHEVILLE EMPLOYEE

Summary: The consideration of an ordinance authorizing the City Manager to institute and appeals process for the adjudication of parking citations and late penalties.

The City of Asheville currently handles parking appeals on a case-by -case basis. Citizens who think they have justifiable reasons for a parking citation to be dismissed have either filled out a City of Asheville Parking Services Appeals form or made their request orally or in letterform. In an effort to provide that all citizens can avail themselves of this process and that it be clearly posted in the City Code of Ordinances for their reference, staff recommends City Council adopt an ordinance allowing the City Manager to establish an appeal process for persons receiving a civil penalty.

Staff requests that City Council approves the ordinance.

ORDINANCE BOOK NO. 20 – PAGE 250

L. RESOLUTION NO. 03-42 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR A GRANT FOR A POLICE DEPARTMENT TRAFFIC UNIT

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit.

Aggressive driving is one of the top complaints received by Asheville Police Officers. The types of aggressive driving violations that are most problematic in the City of Asheville are speeding, red light/ stop sign, erratic lane changes, following too closely and driving while impaired. A dedicated traffic unit would be able to help reduce the incidences of aggressive driving through targeted enforcement, educational programs and focused traffic studies aimed at reducing the number of accidents on high incidence roads.

The Governor's Highway Safety Program offers a four-year grant with graduated match requirements in the personnel, equipment and additional costs categories. The Asheville Police Department is requesting $474,438 in grants from the Governor's Highway Safety Program to hire and train four officers and one supervisor, and to purchase five vehicles and computer equipment for the unit in the first year. The first year of the grant there is a 25% match on equipment and training, but there is no match for personnel. The match is $71,365.82 for the first year, which will require an appropriation of $71,365.82 from the Contingency account. Upon notification of grant award, a budget amendment will be brought to Council for the full amount of the grant award, including the City's local match. The second year request is for $202,109.72, with a local match of $51,921.43. The third year request is for $209,971.07 with a local match of $106,379.54. In the fourth year the City is required to cover 100% of the grant, which will be $218,146.87.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire and train a traffic unit with four officers and one supervisor to reduce the incidence of aggressive driving in the City of Asheville.

RESOLUTION BOOK NO. 27 – PAGE 337

M. MOTION SETTING A PUBLIC HEARING ON APRIL 8, 2003, TO CONSIDER THE ACTION PLAN FOR THE COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME PROGRAMS FOR 2003-04

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING REGARDING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT

RESOLUTION NO. 03-43 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO PLASTICARD LOCKTECH INTERNATIONAL

Mayor Worley opened the public hearing at 5:20 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution approving an economic development incentive grant to Plasticard Locktech International for an expansion of operations into the city limits and creation of new jobs. This public hearing was advertised on March 14, 2003.

Plasticard Locktech International (PLI) specializes in printing on plastic and is the largest producer of plastic hotel keycards in the nation. The company was founded in the area in 1988 and has grown steadily ever since. PLI is now located on Pond Road (outside the city limits) in a facility they own. The company is proposing to purchase and relocate operations into a building located in the Sweeten Creek Industrial Park (inside the city). The expansion would involve an investment of $2.275 million in building improvements and new equipment and creation of 16 new jobs with an average hourly wage of $12.23 plus benefits.

Comparing this project to the criteria established in the City of Asheville Economic Development Incentive Policy, Council has, preliminarily, determined to award a grant of $25,000 payable in equal installments of $5,000 over 5 years commencing after all capital investment and new jobs are placed in service. A performance agreement setting these and other terms and conditions must be mutually accepted and executed by the company and City and approved, along with the grant, at a formal public hearing.

Staff recommends City Council accept and execute the proposed Performance Agreement and offer the economic development incentive grant to Plasticard Locktech International under the terms and conditions in the Performance Agreement.

Mr. Mark Goldberg, representing PLI, spoke in support of the economic development incentive grant.

Upon inquiry of Councilman Peterson, Mr. Goldberg explained the many fringe benefits offered by PLI, which does include health care benefits.

Mayor Worley closed the public hearing at 5:25 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 03-43. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 338

B. PUBLIC HEARING TO REZONE A PORTION OF PROPERTY, TOTALING 17.58 ACRES, KNOWN AS BILTMORE PARK TOWN CENTER WEST, PHASE I, LOCATED ON THE WEST SIDE OF SCHENCK PARKWAY AND SCHENCK CRESCENT FROM CENTRAL BUSINESS DISTRICT TO URBAN VILLAGE DISTRICT, AND TO CONSIDER THE SITE MASTER PLAN APPROVAL

ORDINANCE NO. 3008 - ORDINANCE TO REZONE A PORTION OF PROPERTY, TOTALING 17.58 ACRES, KNOWN AS BILTMORE PARK TOWN CENTER WEST, PHASE I, LOCATED ON THE WEST SIDE OF SCHENCK PARKWAY AND SCHENCK CRESCENT FROM CENTRAL BUSINESS DISTRICT TO URBAN VILLAGE DISTRICT, AND TO CONSIDER THE SITE MASTER PLAN APPROVAL

Mayor Worley opened the public hearing at 5:26 p.m.

Urban Designer Alan Glines said that this is the consideration of an ordinance to rezone a portion of property, totaling 17.58 acres, known as Biltmore Park Town Center West, Phase I, located on the west side of Schenck Parkway and Schenck Crescent from Central Business District to Urban Village District, and to consider an amendment to the Master Plan for the Biltmore Park Town Center Urban Village. This public hearing was advertised on March 14 and 21, 2003.

On January 31, 2003, Biltmore Farms submitted a request to rezone a portion of property (PIN No. 9645-01-46-4610) from Central Business District to Urban Village District in the extraterritorial jurisdiction area in the southern part of the City. In conjunction with this, an amendment is required for the Biltmore Park Town Square Urban Village Master Plan.

The proposed urban village addition to the Town Center Master Plan totals 17.58 acres. This area will be used to develop 175 residential units (town homes, condominiums and apartments) and 238,000 square feet of commercial and office space. The development will be housed in roughly 12 new buildings arranged on new streets and blocks created in the urban village area. New streets will be built with cross streets and stub streets as needed for future expansion phases. Two parking garages are proposed as well as several surface lots and on street parking. Public spaces will be provided via the pedestrian sidewalk zones and adjacent open space areas. The Master Plan will also comply with all other Urban Village District guidelines.

The proposed development will be developed as a part of the previously approved totals for the Town Center project of 320 residential units, 350,000 gross square feet of commercial space, 200,000 square feet of office space and 150,000 other non-defined square feet of space.

Access to the Town Center project is by Schenck Parkway and the signalized intersection at Long Shoals Road. The project is expected to be constructed within a timeframe comparable to the N. C. Dept. of Transportation improvement project on Long Shoals Road.

The Town Center Master Plan area will include several acres of open space made up of park areas, greenway trails and connections to the wider Biltmore Park development.

The Urban Village zoning is established to create mixed-use higher density development that is economically vital and pedestrian oriented. Urban Village guidelines encourage vibrant streetscapes and a full range of retail and office uses as well as a variety of housing types throughout the development area.

The Planning and Zoning Commission met on March 5, 2003, and voted 6-0 to recommend approval of the rezoning request and amendments to the Master Plan. Staff also supports the rezoning request. The Technical Review Committee conditions will be met for this project.

City staff recommends City Council (1) consider the rezoning of a 17.58 parcel of land from Central Business District to Urban Village District and (2) consider amendment to the Biltmore Town Center Master Plan.

Upon inquiry of Councilman Dunn, Mr. Glines said that the N. C. Dept. of Transportation is currently acquiring the right-of-way on Long Shoals Road.

Upon inquiry of Councilman Ellis, Mr. Glines said that once the project is completed it will have an estimated tax value of approximately $50 Million.

Upon inquiry of Councilman Peterson, Mr. Shuford explained that they have an agreement with Biltmore Farms that as the phases are completed in Biltmore Park they will petition for voluntary annexation.

Mr. Walter Plaue was concerned about losing valuable residentially-zoned property to high priced housing, which is not doing anything to help our shortage of affordable housing in Asheville.

Mayor Worley closed the public hearing at 5:42 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3008, to rezone a portion of property, totaling 17.58 acres, known as Biltmore Park Town Center West, Phase I, located on the west side of Schenck Parkway and Schenck Crescent from Central Business District to Urban Village District. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 251

Councilwoman Jones moved to approve the amendment to the site master plan for Biltmore Park Town Center West, Phase I. This motion was seconded by Councilman Ellis and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED AT 3695 SWEETEN CREEK ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 3009 - ORDINANCE TO REZONE PROPERTY LOCATED AT 3695 SWEETEN CREEK ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 5:44 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone property located at the northwest corner of the intersection of Sweeten Creek Road and Royal Pines Drive from RM-8 Residential Multi-Family Medium Density District to Commercial Business I District. This public hearing was advertised on March 14 and 21, 2003.

The applicant, Roger Chipman, is requesting a rezoning from RM-8 to CB I for properties totaling 0.4-acre located at the intersection of Sweeten Creek Road and Royal Pines Drive (PIN Nos. 9654.10-36-2520 and 9654.10-36-1485) in order to develop the properties for uses permitted in the CB I District. The purpose of the CB I District is to provide for medium-density business and service uses serving several residential neighborhoods

The properties are located inside the City limits in an area that has a variety of uses and zoning. There is RM-8 zoning to the north and RS-4 to the west, both containing a mix of single and multi-family residences. To the south across Royal Pines Drive, the zoning is CB II and properties contain an office and a gas station/convenience store. Across Sweeten Creek Road the land use is single-family residential that is under Buncombe County's Limestone Township zoning.

There are two existing buildings on the site, both of which are currently residences and the site has frontage on both Sweeten Creek Road and Royal Pines Drive. Sweeten Creek Road is highly traveled north-south thoroughfare that provides direct access to a number of commercial uses as well as access to residential development s and individual residences. Properties located to the south across Royal Pines Drive are commercial in nature and use Royal Pines Drive for access.

The site is located at the intersection of a major north-south thoroughfare and an east-west connector street, Royal Pines Drive, which already provides access to a number of commercial uses across the street. The site can also provide the surrounding neighborhood small-scale commercial uses that the residents can walk to without having to cross busy streets.

CB I zoning also provides for a more appropriate transition from RS-4 and RM-8 to CB II than those residential districts directly abutting CB II. Any development of the property would also be required to meet the standards of the Unified Development Ordinance, including parking and buffering standards.

City staff feels CB I is an appropriate zoning category for the properties and recommends approval of the request to rezone 3695 Sweeten Creek Road from RM-8 to Community Business

I. The Planning and Zoning Commission at its March 5, 2003, meeting voted 6-1 to recommend approval of the rezoning as well.

Mr. Gerald Green, representing the owner, felt the property is more suitable for an office component. The character of the area has been changing over the past few years and he urged Council to vote in favor of the rezoning.

Mayor Worley closed the public hearing at 5:48 p.m.

Upon inquiry of Councilman Peterson, Mr. Pettibone said that the buffer requirements would depend on what the owner will use the property for.

Councilman Peterson was concerned that since the Sweeten Creek Road Widening Project is on the N.C. Dept. of Transportation's (NC DOT) Transportation Improvement Plan, that more commercial property will be developed along that stretch of road and it will cost more for NC DOT to acquire the right-of-way, thus reducing the amount of money that can be used for other Asheville transportation projects. Planning & Development Director Scott Shuford replied that if we had an actual design for the road and knew what the taking would be, or what setbacks would be required, they would be in a position to measure set-back and development requirements off that design. However, the Sweeten Creek Road Widening Project is probably 7-8 years out and we don't have a projected right-of-way for it at this time. He did understand Councilman Peterson's concern that there might be a potential for a strip commercial pattern along Sweeten Creek Road but assured him that City staff doesn't feel that would be appropriate. However, given the location of this request, the lot is deep enough that if it is widened it probably will be able to continue to be used for small scale office or commercial use.

Councilwoman Jones was concerned that we were rezoning another piece of multi-family residential property and asked for a report on the amount of acreage contained in each of the different zoning classifications. Mr. Shuford said that we have been fortunate to develop and encourage some mixed-use districts, such as the Neighborhood Corridor District and the Urban Village District. He said that he would provide that information to Council as well.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3009. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 253

D. PUBLIC HEARING TO CONSIDER AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE FLEXIBLE FONT SETBACKS IN PEDESTRIAN-ORIENTED AREAS IN A VARIETY OF NON-RESIDENTIAL ZONING DISTRICTS

ORDINANCE NO. 3010 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE FLEXIBLE FONT SETBACKS IN PEDESTRIAN-ORIENTED AREAS IN A VARIETY OF NON-RESIDENTIAL ZONING DISTRICTS

Mayor Worley opened the public hearing at 6:00 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide for more flexible front setbacks in pedestrian-oriented areas in a variety of nonresidential zoning districts. This public hearing was advertised on March 14 and 21, 2003.

This code amendment provides for reduced front setback requirements in a variety of nonresidential zoning districts if pedestrian oriented design features are utilized. A definition of pedestrian oriented design is included as part of this ordinance. In effect, the incentive of a reduced front setback is provided as an option for developers if certain design standards are met and there is no conflict between the reduced setback and any scheduled road widening.

Using an example of the proposed Red Lobster building, Mr. Shuford explained how this code amendment would apply.

Affected districts include: Neighborhood Business District, Office II District, Office/Business District, Community Business I District, Community Business II District, Resort District, Institutional District, Highway Business District, Regional Business District, River District, Commercial Industrial District, and Industrial District.

On March 5, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 6:08 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3010. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 255

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTIONS OF INTENT TO ANNEX THE DEAVERVIEW ROAD AREA, THE CROWELL ROAD AREA, THE SMOKY PARK HIGHWAY AREA, THE SAND HILL ROAD AREA AND THE HENDERSONVILLE ROAD AREA AND SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING CITY COUNCIL PUBLIC HEARINGS ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Mr. Carter Pettibone, Urban Planner, said that the State of North Carolina enables cities to grow by annexation of areas that meet certain statutory requirements. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population

The City of Asheville has initiated annexations for the past three years – six areas in 2001, five areas in 2002 and seven areas in 2003. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

It's now time for the City to consider the next phase of annexations for 2004. City staff has identified the following five areas with the potential for being annexed: (1) the Deaverview Road area; (2) the Crowell Road area; (3) the Smoky Park Highway area; (4) the Sand Hill Road Area; and (5) the Hendersonville Road area.

Mr. Pettibone said that under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. Those dates are as follows:

Adoption of Resolutions of Intent	March 25, 2003
Adoption of Plans of Services	April 8, 2003
Staff-Sponsored Public Informational Meeting	May 15, 2003
Public Hearings	May 27, 2003
Adoption of Annexation Ordinances	June 10, 2003
Effective Date of Annexations	June 30, 2004

Mr. Pettibone stated that the resolutions of intent state that (1) it is the intent of the City Council of the City of Asheville to consider annexation of the territory described in the resolution pursuant to Part 3 of Article 4A of Chapter 160A of the North Carolina General Statutes; (2) a public informational meeting on the question of annexing the above-described territory will be held in the Public Works Building located at 161 S. Charlotte Street, Asheville, N.C., at 5:30 p.m. on the 15th day of May, 2003, at which time a representative of the City of Asheville shall make an explanation of plans for extending services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given the opportunity to ask questions and receive answers regarding the proposed annexation; (3) a public hearing on the question of annexing the above-described territory will be held in the Council Chamber located on the 2nd Floor of the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m. on the 27th day of May, 2003, at which time a representative of the City of Asheville will make an explanation of plans for extending Services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given an opportunity to be heard; (4) a report of plans for extending services to the above-described territory shall be made available for public inspection at the office of the City Clerk at least thirty (30) days prior to the date of the public informational meeting; (5) the statement of financial impact contained in the report shall be delivered to the Buncombe County Board of Commissioners at least thirty (30) days prior to the date of the public informational meeting; (6) a legible map of the area to be annexed and a list of identified persons holding freehold interests in property in the area to be annexed shall be posted in the office of the City Clerk, Asheville City Building, 70 Court Plaza, Asheville, North Carolina, at least thirty (30) days prior to the date of the public informational meeting; (7) the effective date of annexation shall be at least one year, but no more than 400 days, from the date of passage of the annexation ordinance; and (8) notice of the public informational meeting and public hearing shall be given as required by law.

He explained that the following five areas were considered with a variety of factors: (1) location; (2) smaller size than we typically annex; (3) commercial/industrial properties; (4) areas that did not have a lot of residential properties; and (5) areas that were well served with water and sewer:

Deaverview Road – This includes two convenience stores and one single-family at the intersection of Deaverview Road and Pisgah View Road. This contains four lots totaling 1.14 acres. The estimated population is two. If the property is annexed, it would bring in $1,442.66 in annual property tax revenue.

Crowell Road – This includes a lodging facility and auto repair facility on Crowell Road near the intersection of Smoky Park Highway and I-240 interchange. This contains two lots totaling 1.9 acres. The estimated population is zero. If the property is annexed, it would bring in $13,010.44 in annual property tax revenue.

Smoky Park Highway – This brings in whole of split-jurisdictional commercial property into the City in the Enka area. This contains one lot totaling 0.3 acres. The estimated population is zero. If the property is annexed, it would bring in $656.14 in annual property tax revenue.

Sand Hill Road – This is a small shopping center south of the BASF plant in the Enka area. This contains four lots totaling 4.2 acres. The estimated population is zero. If the property is annexed, it would bring in $4,612.06 in annual property tax revenue.

Hendersonville Road – This is a large area, mainly commercial and industrial, with a few multi-family properties and one single-family in the Arden area. This contains 39 lots totaling 85.5 acres. The estimated population is 38. If the property is annexed, it would bring in $112,406.64 in annual property tax revenue. This will require a capital expenditure for water and sewer, which will be the addition of two fire hydrants.

City staff recommends City Council adopt the resolutions of intent to begin the annexation process.

Upon inquiry of Councilman Dunn, Mayor Worley said that City Council will make the determination on whether to annex all or some of these areas on June 10, 2003. Adoption of the resolutions of intent will direct City staff to start gathering specific information and start the process to involve the public.

When Councilman Dunn asked how many small businesses were affected by these annexations, Mr. Pettibone said that he would provide Council with that breakdown, and in fact, that information is part of the calculations that City staff does to determine the use of the property for qualification for annexation.

Councilman Mumpower asked if these property owners are aware of possible annexation. Mr. Pettibone said that property owners are notified 30 days prior to the public information meeting. He explained that after the resolutions of intent are adopted, the next step would be a more detailed analysis in the Plans for Services. If Council chooses to proceed, then the property owners are notified.

Upon inquiry of Councilman Peterson, Mr. Pettibone said that the State requires the City to calculate the population based on census data.

Councilman Mumpower suggested that City staff contact the largest manufacturing plant in the Hendersonville Road area (Day International) to see how many people they employ and see what their circumstances are since the City has a prior history of adding to manufacturers' difficulties with a heavier tax burden at inappropriate times.

Councilman Dunn asked for a report identifying every small business that these annexations will affect, the type of business and how many people they employ. If we double their taxes, they can move out of the Asheville area entirely.

Councilman Peterson said there is a question of fairness. Some of the businesses along Hendersonville Road are in the City, pay City taxes, and receive City services. But the businesses across the street or just up the street are enjoying City services without paying for them. We have to consider whether the businesses in the City are being put at a competitive disadvantage because the businesses that are right on the edge of the City are benefiting from those services and not paying for them.

Councilman Mumpower agreed that annexation is one of the least pleasant tasks for City Council to consider, but it is a fairness issue. He suggested staff meet with manufacturing plants early on in the process to provide them with information on our impact on them and to find out their current status. City Manager Westbrook responded that the City has done just that in a previous annexation. He said that City staff met with a group of businesses using one of their conference rooms as a central area to meet.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 03-44 - RESOLUTION OF INTENT TO ANNEX THE DEAVERVIEW ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Peterson moved for the adoption of Resolution No. 03-44. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 339

RESOLUTION NO. 03-45 - RESOLUTION OF INTENT TO ANNEX THE CROWELL ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Ellis moved for the adoption of Resolution No. 03-45. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 343

RESOLUTION NO. 03-46 - RESOLUTION OF INTENT TO ANNEX THE SMOKY PARK HIGHWAY AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Mumpower moved for the adoption of Resolution No. 0-46. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 347

RESOLUTION NO. 03-47 - RESOLUTION OF INTENT TO ANNEX THE SAND HILL ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Mumpower moved for the adoption of Resolution No. 03-47. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 351

RESOLUTION NO. 03-48 - RESOLUTION OF INTENT TO ANNEX THE HENDERSONVILLE ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 15, 2003, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MAY 27, 2003, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Peterson moved for the adoption of Resolution No. 03-48. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 355

At 6:30 p.m., Mayor Worley announced a short break.

B. RESOLUTION NO. 03-49 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A DOWNTOWN DEVELOPMENT AGREEMENT WITH THE GROVE PARK INN RESORT INC. FOR TWO REDEVELOPMENT SITES

City Attorney Oast said that this is the consideration of a resolution authorizing the Mayor to execute a downtown development agreement with the Grove Park Inn for two redevelopment sites.

The Grove Park Inn (GPI) has proposed developing two sites owned by the City generally as contemplated in the approved Pack Square Renaissance Plan. These sites are:

- Phase I – A mixed use (but primarily residential) project to be located at the corner of Market and College Streets consisting of a single tower development up to the same height as the Jackson Building.
- Phase II – A substantially larger mixed use project incorporating a parking garage, office, retail and residential uses to be generally located on the block bounded by Marjorie Street, Davidson Street, Eagle Street and Spruce Street. This building would not exceed the height of City Hall.

In summary, GPI is requesting an opportunity to perform due diligence on these sites in order to determine the feasibility of developing them as proposed. If development proves feasible, the GPI would then proceed with obtaining all necessary reviews and approvals in order to begin the construction process for each phase of development. The design of these projects will be coordinated with the Pack Square Conservancy and the Downtown Commission, as well as with the City of Asheville. Public hearings would be required prior to any conveyances of property.

He then went into more detail by saying that GPI is talking about acquiring City-owned property and the Phase II site is the major and most defining public area in the City. One factor in this issue is that in 2001 the City entered into an agreement with the Pack Square Conservancy who undertook to devise a redevelopment plan for the Pack Square area, which plan has been approved by City Council. Another factor was that the City needs to have continued high quality development in the downtown in order to continue the revitalization process which began in the late 1980's and early 1990's. We also saw this as an opportunity to make improvements in infrastructure in this area, like road alignment, road construction, and provisions for other public amenities consistent with the Pack Square Conservancy plans. There was also the issue of an interface with the South Pack Square area, which we think is the next area that will be developed in the downtown. In January of 2003, City staff met with the Pack Square Conservancy Board and representatives of the GPI presented the project. The Conservancy Board was generally supportive of it and we are continuing to move forward with that concept.

Using a map, he roughly outlined the Phase I and Phase II areas. He explained the proposal is to develop two sites near City-County Plaza with mixed use office/commercial/residential buildings of significant size. They are not far along enough in the process to determine what kind of mix of office/commercial/residential uses will be there. These properties are owned by the City and as far as he knows, there are no legal restrictions that would limit the City's ability to convey them to a private developer. The legal authority for doing a project of this nature is called the Downtown Development Agreement Act (N. C. Gen. Stat. sec. 160A-458.7).

GPI is seeking some indication of the City's interest in moving forward with the proposal. In a project this size, they are not far enough along to produce a lot of specific information, so City staff is seeking an approval of project in concept. GPI would like to have an expression of Council's willingness to consider selling property for development. City staff is requesting Council's direction in participating with public amenity/parking/infrastructure improvements in the area. We are not in a position to tell Council what those improvements are at this point, but there are some opportunities for staff to investigate further.

In summary, he said they are looking to Council for the direction to move forward to see if we can make this, or come up with a framework, to make this project work.

City Attorney Oast said the proposed agreement covers these basic points:

(1) Statement of intent to cooperate;

(2) Outline responsibilities in due diligence process by both the City in exploring opportunities for the public part of this project and the GPI. GPI will need to investigate things like financial feasibility, do some work on the site to determine whether the property can actually be built on, etc.;

(3) Recognize that there are other interests in the Pack Square/City-County Plaza area. Most obviously that includes the Pack Square Conservancy. We have met and discussed this with them and we think their input it important and any agreement should include a structure for involving that input. Other interests which will have a structure for input involve: the Public Art Board, the Downtown Commission, and the general public (which includes the development corporations in the South Pack Square area that are very interested in what happens in their area and how this project will interface with that);

(4) Identify key issues. Those key issues include things like building size and building design. The Pack Square Conservancy has design review responsibilities for Phase I and depending on the exact location for Phase II as

well. Even if Phase II is not within the Pack Square area, we think it would be appropriate to include the Conservancy in some of the design considerations for that site as well. Another key issue is the kinds of infrastructure improvements that might be needed to support a project of this nature, some realignment of City streets, some rerouting of electrical and water lines, etc. Another key issue is the inclusion of public amenities. Since we are doing a lot of work in the Pack Square area and since the Conservancy has already produced a design for this, this will provide a vehicle to perhaps construct some of those public amenities. Another key issue includes parking. There may be other issues we can identify, but we need the opportunity that this agreement will present, in order to do that;

(5) Outline tentative "critical path". Those are the things that need to happen in the sequence they need to happen in. The first step in a project of this nature is to enter into a Downtown Development Agreement and then enter into options to convey the property. We can't do that without a public hearing. Another critical path item is to structure the public participation process and the timing of when that would occur, including the public hearings required for the conveyance of the property. We need to outline a list for getting the design work on this project completed and coordinating whatever is done on the private side with what needs to be done on the public side. Another critical path would also include some sequence of construction. We are interested in making sure the construction interferes as little as possible with traditional public uses of the area, like the Bele Chere Festival, First Night, and other traditional public festivals;

(6) Outline responsibilities in development process. Primarily the GPI would be responsible for design, building and construction of its projects. The City would be responsible for promptly processing approval and promptly performing inspections, etc.; and

(7) Establish conditions precedent to performance on both sides. We think it's important to have design approval so we know what the building will look like before we decide to do the project. Secondly, that we have satisfactory information that the financing to do the project is in place before we move ahead with it. And, thirdly, we want to make sure appropriate indemnities and insurance are in place.

City Attorney Oast said the reason we are asking for Council's go-ahead at this point is that the GPI needs time/opportunity to explore the financial feasibility, do title work, site investigations. The City needs time to obtain appraisals, explore opportunities for public improvements/amenities and we need to develop structure for involving public in a meaningful way, including the Pack Square Conservancy, Downtown Commission, Public Art Board and the general public.

He emphasized to Council that Council's approval at this meeting is a limited commitment. It does not obligate the City to sell property or approve the project. The proposed agreement does not obligate the GPI to buy property or build the project. What it does is authorizes the City to work together with the GPI to see if we can come up with a feasible project that will be in the best interest of the citizens of Asheville, including all of the people with interests in this very public area, to make this a better place and to continue the revitalization of downtown.

When City Attorney Oast said that the agreement is not in final form and is still being worked on to include in more detail the provisions outlined above, Councilman Peterson was concerned that Council is being asked to authorize the agreement when he just received the draft copy of the 15-page document via email today. He felt it was premature in requesting approval because (1) there wasn't adequate time for Council to review the agreement; and (2) the agreement will change. City Attorney Oast responded that the Pack Square Conservancy has a very important interest in this area and we have always understood that. The primary change to the draft before Council will be to recognize that in an explicit way. The terms are pretty much what has been outlined earlier.

Mr. W. Louis Bissette, Jr., attorney representing the GPI, felt this proposed project is an incredible opportunity for the City, its taxpayers and the Pack Square Conservancy to help them achieve its goals. The two projects have to work together. If the GPI project goes forward, we certainly want the Pack Square Conservancy project to succeed and will assist them in every way that we can. This step is the first step in a process that could greatly enhance our downtown and particularly this end of downtown. The GPI, like the City, is not committing to do anything. We need an indication from the City that, along certain general guidelines, the City is interested in pursuing this project with us. We have to go now and spend a substantial amount of money in doing our due diligence, not only on the property itself, but also the feasibility of the projects that the GPI is looking at. The GPI is very optimistic that they will be feasible and that they can proceed. That is what we are asking for in this agreement. The agreement before Council is the culmination of what he and the City Attorney have been working on for some time and we think it generally outlines the process. It does not commit either party to move forward. But, it does give the GPI and its investors the knowledge that the City and the Pack Square Conservancy are in this with us. He felt the agreement is pretty much as the two parties have negotiated and there are some changes, which they have talked to the Pack Square Conservancy's attorney Jones Byrd about that we are willing to go along with. If the development agreement is approved, all three attorneys will get together and iron out the final version. There will not be any substantive changes. The changes will merely formally add the Pack Square Conservancy's rights and obligations into this contract. He hoped Council would approve the development agreement because they are looking forward to working with the City, the Pack Square Conservancy and other interested groups, to make this project a reality.

Councilman Mumpower felt these are exciting changes for downtown Asheville; however, he was concerned about the size of the Phase II footprint compared to the City Hall Building. Some buildings that have been built around the City Hall have had a less than positive impact on the site, vision, etc. He questioned that if we allow them that large a parameter, are we creating a potential problem for ourselves. Planning & Development Director Scott Shuford responded. He said he didn't think we would be creating a problem because City Council will have final approval of the design. All that the scale aspects included in this agreement are intended to do is to set some general parameters and understanding so that we don't get into a situation where they may come back with something that would certainly be far out-of-scale or for that matter perhaps too small for feasibility. There is a desire on the Phase II site to have a fairly substantial structure because that is a large piece of property for a downtown to have opportunity for development. In addition, certainly in Phase I and almost certainly in Phase II, there is going to be design review and approval by the Pack Square Conservancy, in accordance with their guidelines. There will be a substantial amount of public input and technical and other review before a final building design would be approved. If some reason there is a need to make some adjustments, he was sure the agreement could be modified, but the idea is to create a basic parameter.

Upon inquiry of Councilman Peterson, Mr. Bissette explained to Council the exact locations of Phase I and Phase II.

When Councilman Dunn asked whose decision it was to limit the height of the Phase II building, Mr. Bissette said the Planning staff felt that a too tall building would be detrimental to the overall aesthetic look of the City and we agreed with those height restrictions.

Mr. Jones Byrd, attorney representing Pack Square Conservancy, said that he has seen the agreement in rough draft form. The Conservancy has certain rights and certain obligations that they want to fulfill. They have been in the process of raising money, putting together design guidelines and making the project in the Pack Square Renaissance area a reality. Some of the design issues raised are part of a design review process that is contained in the Conservancy Agreement that the City and the County have with the Conservancy. When you look at this agreement, we believe there are several things that need to be changed just to make sure that the procedure going forward is compatible with the obligations and the rights of the Conservancy. He said that he has talked to Mr. Bissette and City Attorney Oast and they are going to make sure that changes occur to make sure that everything is subject to the Conservancy agreement. This is a wonderful opportunity for the City and the Conservancy wants to make sure that it's done right.

Councilman Ellis asked Mr. Byrd if he felt comfortable at this point that if Council authorizes this to go forward that the Conservancy and the goals of the Conservancy can be protected. Mr. Byrd said he didn't have a concern about that. From the conversations he has had with Mr. Bissette and City Attorney Oast, these are probably some changes that with a little more time would have been make anyway, or there may be some simple ways to make everything in this proposed draft agreement subject to the terms of the one the City is already a party to with the Conservancy and Buncombe County. He felt everyone would work very hard to make that work.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved to authorize the Mayor to execute a downtown development agreement with the Grove Park Inn for two redevelopment sites, with the understanding that the City Attorney, Mr. Bissette and Mr. Byrd will meet to iron out any details of the agreement and that the major considerations as embellished by the City Attorney above, be included in the agreement. This motion was seconded by Councilman Dunn.

Mr. Christopher Fielden said that the areas are the heart of our City and public land. He felt this is taking the public's land and selling it to a corporation, with the corporation benefiting. He felt the recently enacted solicitation ordinance in the downtown area has done nothing to benefit the low income people, only the tourists and wealthy. He said we have a lack of affordable housing, lack of shelters, and lack of youth centers, so he suggested Council take this land and use it for the people's benefit, since it's the people's land. He questioned if there would be affordable housing in this project. He heard that they will be developing a structure for meaningful public input, but questioned who is the public that is referring to and what does meaningful mean. He felt City Council should enrich the life of Asheville and not tourist industry.

Mr. Water Plaue agreed with Councilman Peterson in that City Council should take time to read and understand the agreement prior to giving the Mayor authority to sign it.

Ms. Hazel Fobes was concerned that the GPI didn't bring anything to the meeting to show the design of the buildings. She stressed that Council needs to understand what they are voting on first. She pointed out that there isn't always a need to put a building on a piece of land that has grass on it.

City Attorney Oast responded to several questions/comments from Councilman Peterson, some being, but are not limited to: explain the options and what that does and does not commit the City to; does the City receive money to sell options and if so, how is that money applied and what happens if the agreement is terminated by either party; is the City making a commitment to pay for a public parking facility for a private commercial development; what does "unreasonably withheld" mean with regard to building design approval; if Council felt the building was not compatible or aesthetically not compatible with downtown, would that be reasonable; does the GPI agree to pay for those improvements that reflect reasonable project impacts on public infrastructure; and what happens if either side terminates the agreement.

The motion made by Councilman Ellis and seconded by Councilman Dunn carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 359

C. RESOLUTION NO. 03-50 - RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE TO (1) CANCEL THE APRIL 1, 2003, WORKSESSION; AND (2) ADD A COMMUNITY MEETING ON APRIL 29, 2003, AT 7:00 P.M., AT THE WEST ASHEVILLE COMMUNITY CENTER LOCATED AT 970 HAYWOOD ROAD, ASHEVILLE N.C.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-50. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 360

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 28 – March 13, 2003: Mario Garcia Sr. (Police), Mary Ellen Eley (Streets) and Steve Bosma (Police).

The following claims were received by the City during the period of March 14-20, 2003: Jose Molina Lopez (Water), Charter Communication (Water), Susan Turner (Water), Barbara Field (Water) and Don Martell (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Gary Semlak

Mr. Gary Semlak, Vice-Chair of the Water Efficiency Task Force, understands the reason for stopping the tours at the water treatment facilities is for national security and thanked City Council for directing staff to find another suitable location for this very important water education program. He hoped that when this matter is revisited in October that a determination is made that the North Fork Reservoir is a feasible tour site again and hoped that that new site will not preclude tours ever happening again at North Fork. He rebutted some of the comments made at the March 18, 2003, worksession which cast a negative tone over the tours.

Comments by Hazel Fobes

Ms. Hazel Fobes spoke about the procedure used at the March 18, 2003, worksession in which City Council gave direction to City staff to temporarily cease tours at the North Fork

422

Reservoir and the Mills River Water Treatment Plant. She felt the process was not proper in that no public comment was solicited. The Water Efficiency Task Force supports the Water Education Programs. She said that when the matter comes back up before Council in October, they would be given a fair and concise report about the effects of discontinuing these important water quality education tools.

Councilman Mumpower said that it was City Council's consensus to err on the side of safety with temporarily ceasing the tours, not against educating students.

Councilwoman Jones said that City Council does need to follow our democratic process. She did think City Council should have taken a vote on temporarily ceasing the tours at a formal session. She felt it's up to City Council to work harder to hear voices that we may disagree with and we must be open to our citizens for having a safe place to say that.

Comments by Christopher Fielden

Mr. Christopher Fielden explained how he witnessed several incidents of police brutality within the past week. He felt that it was important that the City acknowledge that police brutality happens. He said that in his opinion, the crowd was not violent.

Councilman Mumpower suggested Mr. Fielden email some of the Council members with his concerns and maybe they can pursue them together. He said that he met with some officers and the City Manager in a follow-up on some of the concerns that have been voiced similar to Mr. Fielden. He was encouraged by what he heard from the officers and he encouraged people to take a measured look at some of the things that happened that day. He didn't believe anyone in a leadership position on our police force or on City Council would support police brutality but there were laws broken that day that placed our officers in a difficult position.

Closed Session

At 8:25 p.m., Councilwoman Jones moved to go into closed session to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session The statutory authority is contained in N. C. Gen. Stat. sec. 143-318.11 (a) (4). This motion was seconded by Councilman Ellis and carried unanimously.

At 8:57 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:57 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

intentional
blank

Tuesday – April 8, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy (maternity leave)

PLEDGE OF ALLEGIANCE

Retired Air Force veteran Dr. Joe Wayne Burton led City Council in the pledge of allegiance.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING THE MONTH OF APRIL 2003, AS "CHILD ABUSE PREVENTION MONTH"

Councilwoman Jones read the proclamation proclaiming April, 2003, as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING THE MONTH OF APRIL 2003, AS "FAIR HOUSING MONTH"

Mayor Worley read the proclamation proclaiming April, 2003, as "Fair Housing Month" in the City of Asheville. He presented the proclamation to Mr. Bob Smith, Executive Director of the Asheville-Buncombe Community Relations Council, and Ms. Brown, Asheville-Buncombe Community Relations Council Board member, who briefed City Council on some activities taking place during the month.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 25, 2003

B. RESOLUTION NO. 03-51- RESOLUTION AUTHORIZING THE SALE OF A PORTION OF THE AIR RIGHTS ADJACENT TO 21 BATTERY PARK AVENUE TO 21 BATTERY PARK, LLC

Summary: The consideration of a resolution authorizing the Mayor to convey air rights adjacent to 21 Battery Park Avenue to 21 Battery Park, LLC, in the amount of $9,000.

On March 25, 2003, the City Council of the City of Asheville directed the City Clerk to advertise for upset bids regarding an offer to purchase air rights to City owned property adjacent to 21 Battery Park Avenue (PIN Nos. 9648.18-30-1581 and 9648.18-30-1416) for the sum of $9,000. The notice ran in the Asheville

Citizen-Times on March 28, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No upset bids were received in response to said advertisement.

Approval of the resolution will authorize the sale of the property to 21 Battery Park, LLC, for the amount of $9,000.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey air rights adjacent to 21 Battery Park Avenue to 21 Battery Park, LLC, in the amount of $9,000.

RESOLUTION BOOK NO. 27 – PAGE 361

C. RESOLUTION NO. 03-52 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON KILDARE PLACE IN THE MT. CARMEL COMMUNITY FROM JIM NORRIS

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Kildare Place in the Mount Carmel community.

A bid has been received from Melvin James Norris in the amount of $26,500 for the purchase of property on Kildare Place in the Mount Carmel community.

The land on Kildare Place is an irregular shaped, un-zoned, residential lot comprising 0.91 acre±. It is level at street grade and slopes down from front to rear. The property was acquired from the now defunct Carolina Water Service, Inc. The property was determined to be surplus and has been available for sale since that time. The current appraisal on the subject parcel by Joseph Moore is $26,000.

Mr. Norris owns the property adjacent to the subject property where he resides.

Approval of the resolution will initiate the sale of the property through the upset bid process as approved by N. C. Gen. Stat. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer to purchase property on Kildare Place.

RESOLUTION BOOK NO. 27 – PAGE 362

D. RESOLUTION NO. 03-53- RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE A VACANT LOT AT THE CORNER OF LUFTY AND DRAKE STREETS FROM NEIGHBORHOOD HOUSING SERVICES

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Lufty Street in the West Asheville community.

A bid has been received from Neighborhood Housing Services of Asheville (NHS) in the amount of $9,500 for the purchase of land on Lufty Street in the West Asheville community.

The property on Lufty Street is a rectangular shaped residential zoned lot comprising 0.17 acre±. It is level at street grade and slopes down from front to rear. The property was acquired in 1929. It has been declared surplus and has been available for sale since that time. The bid from NHS in the amount of $9,500 is not less than the appraised value of $9,500. NHS proposes to construct an affordable house on the property for sale. The proposed construction is consistent with the policy of encouraging infill development.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer to purchase property on Lufty Street.

RESOLUTION BOOK NO. 27 – PAGE 363

E. RESOLUTION NO. 03-54 - RESOLUTION ACCEPTING THE NEW STREET NAME "OZARK SPRING LANE" LOCATED OFF BELL ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Ozark Spring Lane."

Riverwood Real Estate Development Company, owner of lots off of Bell Road, has petitioned the City of Asheville to accept the street name " Ozark Spring Lane." The new street will begin at Bell Road and end at cul-de-sac on Ozark Spring Lane.

City staff recommends adoption of the resolution accepting the new street name "Ozark Spring Lane."

RESOLUTION BOOK NO. 27 – PAGE 364

F. RESOLUTION NO. 03-55 - RESOLUTION FINDING THE UNOPENED ALLEY OFF GAY STREET IS NOT PART OF AN ADOPTED STREET PLAN

Summary: The consideration of a resolution finding that an unopened alley off Gay Street is not part of an adopted street plan.

Timothy Walsh submitted to the City a Declaration of Withdrawal for unopened alley off Gay Street. The purpose of the request is to make the property more useful. The alley is not used as an ingress or egress nor has it ever been used as such. Mr. Walsh's request for a resolution from Council finding that the unopened alley off Gay Street is not part of the street plan adopted under G. S. 136-66.2 is supported by the legal research performed by the law firm of McGuire, Wood & Bissette, P.A., certifying that the three criteria set forth below have been met.

N. C. Gen. Stat. sec. 136-96 permits the filing of a Declaration of Withdrawal of any street dedicated to public use and not utilized within 15 years from and after dedication.

In order to withdraw a street from public dedication, N. C. Gen. Stat. sec. 136-96 requires:(1) that the street must have been dedicated to public use; (2) the person desiring to withdraw, must be the original dedicator or someone claiming under the original dedicator; and (3) that the street not have been opened and used by the public for 15 years from and after the dedication. The statute goes on to state that upon request, the City shall adopt a resolution stating whether the street is or is not part of the street plan adopted under G. S. 136-66.2.

Public Works Department staff has consulted with all appropriate City departments and determined that the unopened alley off Gay Street as set forth is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution finding that the unopened alley off Gay Street as shown in Plat Book 2, Page 105, is not part of an adopted street plan.

RESOLUTION BOOK NO. 27 – PAGE 365

G. **RESOLUTION NO. 03-56 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT EARTH DAY 2003**

RESOLUTION NO. 03-62 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT 2003 BREWGRASS FESTIVAL

RESOLUTION NO. 03-63 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT 2003 BELE CHERE FESTIVAL

RESOLUTION NO. 03-64 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT 4TH OF JULY CELEBRATION AND FIREWORKS

RESOLUTION NO. 03-65 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT ASHEVILLE DOWNTOWN ASSOCIATION'S 2003 EVENTS

RESOLUTION NO. 03-66 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT 2003 GOOMBAY! FESTIVAL

RESOLUTION NO. 03-67 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT 2003 GREEK FESTIVAL

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: Earth Day 2003, Pink Ribbon Celebration, Hardlox Café Jewish Food Festival, Sisters on Stage, Sunset Stampede, Asheville Area Arts Council's Walk into History, Annual Brewgrass Festival, Bele Chere 2003, Asheville's 4th of July Celebration, Asheville Downtown Association events, Asheville Goombay Festival, and Asheville Greek Festival.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

Earth Day 2003, scheduled for April 19, 2003, is a celebration committed to raising awareness of the environment and what every person can do to help maintain and improve our world.

The Pink Ribbon Celebration, scheduled for May 27, 2003, is an event to raise funds for the American Cancer Society in conjunction with the Grape Escape wine bar.

The Hardlox Café Jewish Food Festival is a celebration of Jewish cuisine and heritage and is scheduled for October 19, 2003.

Sisters on Stage is an event to raise funds for Helpmate, an organization committed to assisting battered women. This year's event is scheduled on May 3, 2003.

The Sunset Stampede is a run and event that will raise funds for Big Brothers/Big Sisters. The event is scheduled on May 3, 2003.

The Asheville Area Arts Council's Walk into History is an event designed to showcase the Urban Trail and to bring Asheville's history alive with characters and performances at many of the stations. This year's event is scheduled for October 25-26, 2003.

For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. This year's event is scheduled for September 13, 2003.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the Downtown area. This year the request is being made for July 24-26, 2003. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area.

For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.* The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 22-24, 2003. The 2003 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 26-28, 2003. The 2003 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Resolution No. 03-66 - **RESOLUTION BOOK NO. 27 – PAGE 389**
Resolution No. 03-67 - **RESOLUTION BOOK NO. 27 – PAGE 391**

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING ON THE ACTION PLAN FOR THE COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME PROGRAMS FOR 2003-04

Mayor Worley opened the public hearing at 5:16 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a public hearing on the City's Consolidated Action Plan for 2003/04, allocating federal Community Development Block Grant (CDBG) and HOME funds.

The City expects to have available $1,764,368 in CDBG funds and $1,505,345 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2003. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 21 CDBG-assisted and 15-HOME assisted projects.

If approved, the funding will assist in adding or preserving 244 affordable housing units in the City and 114 units in the rest of the Consortium area. CDBG funds will also help provide 250 Asheville residents with employment or business training and as many as 3,000 residents with other needed services. CDBG will also continue to support revitalization of the WECAN and South Pack Square neighborhoods.

Notice of the public hearing and a summary of the draft plan was published on March 24, 2003. A 30-day public comment period is required by federal regulations. The final plan must be submitted to Dept. of Housing and Urban Development by May 15, 2003.

Ms. Caplan then summarized the funding and then briefly reviewed with Council the details of the proposed projects.

City staff recommends City Council hold the public hearing on April 8, 2003. Adoption of the resolution authorizing submission the City's Consolidated Action Plan for 2003/04 will be brought before Council at it's April 22, 2003, formal meeting.

Mayor Worley closed the public hearing at 5:23 p.m.

Mayor Worley said that City Council will vote on this issue at it's April 22, 2003, City Council meeting.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-68 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONSTRUCTION DOCUMENTS WITH WOOLPERT, LLC, FOR FURTHER DEVELOPMENT OF AZALEA ROAD PARK

Mr. Jim Orr, Superintendent of Parks & Public Facilities, said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Woolpert LLP to prepare construction documents for Azalea Road Park.

The City of Asheville Parks and Recreation Department is continuing the development of Azalea Road Park. In June of 2000, the City of Asheville selected Woolpert LLP from a Request for Proposal (RFP) process to develop a feasibility study, provide a master plan and prepare construction documents for Azalea Road Park. At the present time, the first two components of the RFP process have been completed. The final portion, construction documentation, is needed in order to continue the development of the park. The construction documents would be for the parking lots, restroom/concession building, two soccer fields, playground area, greenway trails and a No Impact Analysis (required since a portion of the park will be built in the flood plain). The construction document portion of the contract with Woolpert will cost $152,249.

City staff recommends that City Council authorize the City Manager to enter a contract with Woolpert LLP to prepare the construction documents for further development of Azalea Road Park.

When Councilman Peterson asked if these construction documents were part of some planning for a new bridge or anything connected to the part of the property for an inert dump, Mr. Orr said no, that this is only a park plan.

Upon inquiry of Councilman Peterson about bridges crossing the Swannanoa River, Mr. Orr said that in the master plan there are two pedestrian bridges and one vehicular bridge with a pedestrian crosswalk.

Upon inquiry of Councilman Dunn, Mr. Orr said that the cost of this portion of the contract comes from the Tourism Development Authority grant, the Lewis family grant, the Parks and Recreation Trust Fund and Pepsi-Cola. He further explained that as much work that can be done in-house is, however, due to the large scope of the project it would take a considerable amount of man-hours. Also, two major components of the $153,000 contract would be for the No Impact Analysis that City staff is not capable of performing and there is no structural engineer on staff to handle development of the building design. In addition, there are so many environmental issues that are tied to the development of the soccer fields that it becomes too large of a project to do in-house.

Mr. Paul VanHeden asked what Pepsi-Cola is getting out of their donation. Mr. Orr said that their donation is for name recognition for developing the soccer complex. Mayor Worley said that Pepsi-Cola has traditionally been a supporter of many community events and youth facilities throughout this community. In fact, Councilwoman Jones said that Pepsi-Cola donated $1,000 to the Asheville High School's Girls Basketball Team in order to purchase their rings.

Upon inquiry of Councilman Dunn, Mr. Orr said that we hope to have the building, playground and parking lot finished in the fall of 2004.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 03-68. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 393

B. RESOLUTION NO. 03-69 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT REGARDING ENTERING INTO A LEASE WITH SUPER SOD FOR APPROXIMATELY 47 ACRES OF CITY-OWNED PROPERTY LOCATED ACROSS FROM THE MILLS RIVER WATER TREATMENT PLANT

Field Services Coordinator Ed Vess said that this is the consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed Lease with Super Sod, a division of Patten Seed Company, for approximately 47 acres of land on Mills River.

The land on Mills River is a portion of the property acquired by the City of Asheville for the Mills River Water Treatment Plant. It is located across the river from the treatment plant northwest of the confluence of the Mills and French Broad Rivers. It is not currently in use by the City and can be used for agricultural purposes without interfering with the operation of the Water Treatment Plant provided appropriate requirements and controls are incorporated into the lease for protection of the environment.

Super Sod has offered to enter into a three-year lease with option to renew for two additional three-year terms at a rent of $6,000 per year. Staff recommends that a CPI annual adjustment be included in the lease. The proposed lease would require a 50' buffer along Mills River. Super Sod would utilize the tillable land, about 42-43 acres for growing sod and mow the non-wooded portions of the buffer area to maintain weed control. The proposed lease may be terminated by either party upon six months written notice. In the case of default, the Lessor may terminate the lease if the default is not cured after ten days notice.

Approval of the resolution will authorize the City Clerk to publish a Notice of Intent to enter into the Lease.

Water Resources Department and Planning Department staff recommend adoption of the resolution directing the City Clerk to publish a Notice of Intent regarding a proposed Lease with Super Sod, a division of Patten Seed Company, for approximately 47 acres of land on Mills River.

City Manager Westbrook said that the $6,000 revenue would go to the Asheville-Buncombe Regional Water Authority.

Upon inquiry of Councilwoman Jones, Mr. Vess said that the employees at the water treatment plant take a water sample everyday and if there is anything not acceptable in the water, we would know about it very soon.

Upon inquiry of Councilman Peterson, Mr. Vess explained why the City is leasing the property opposed to selling it.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 03-69. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 394

C. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING FIVE AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) THE DEAVERVIEW ROAD AREA; (2) THE CROWELL ROAD AREA; (3) THE SMOKY PARK HIGHWAY AREA; (4) THE SAND HILL ROAD AREA; AND (5) THE HENDERSONVILLE ROAD AREA

Urban Planner Carter Pettibone said that the Annexation Services Plan is being submitted for Council's approval for the following areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area.

City Council approval of this document is the second step in the annexation process that began on March 25, 2003, when Council adopted the resolutions of intent to annex these five areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	April 8, 2003
Public information meeting	May 15, 2003
Public hearings	May 27, 2003
Adoption of annexation ordinances	June 10, 2003
Effective date of annexations	June 30, 2004

The N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

He then reviewed with Council the specifics of how each area qualifies for annexation.

Mr. Pettibone then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will require expansion of the Police Department. Extending service into the proposed annexation areas will require operational adjustment in two primary areas (1) configuration of patrol districts covering the proposed annexation areas so as to provide for effective manpower deployment and a balanced response time to calls for service; and (2) filling vacancies in sworn personnel positions to accommodate the anticipated increase in demand for police services. He explained how each area would be served by an expansion of a particular district. Based on the projected population increase at the time of annexation, it will be necessary to add two police officers to maintain the current ratio of one officer to 423 residents. The plan of services calls for the addition of these two officers, at the annual cost of $70,000 plus associated capital costs, on or before January 1, 2005.

Fire protection: The additional land area, street mileage, dwelling units, businesses and improvements will require the hiring of one additional Deputy Fire Marshal at an annual cost of $37,000 plus associated capital costs for equipment on or before January 1, 2005. The N.C. Gen. Statutes require the City to offer existing fire service entities contract opportunities, which allow for the continued service of annexed areas by existing rural fire departments. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the suburban/rural fire department may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending fire protection; therefore, the City has developed a plan that incorporates alternative solutions to extending fire protection to annexed areas.

Solid waste collection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Sanitation Division. New customers would receive the automated collection service. Compensation would be offered to private solid waste hauler to offset economic loss as required by the statutes. Therefore, there will be costs to the City associated with the purchase of new rollout containers and potential "economic loss" payments to affected contractors.

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Street Maintenance Division. Existing personnel and equipment are planned to serve the proposed additions to the City maintenance system; therefore, no specific personnel and equipment additions will be made. Streets are resurfaced on a scheduled rotation established by classification, construction type, use, condition and inspections. The following are private and state maintained streets planned for inclusion for maintenance on the scheduled rotation for the Hendersonville Road area: 0.29 mile of Buck Shoals Road and 0.38 mile of Walden Drive.

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed five annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following four areas require no water line improvements: Deaverview Road area, Crowell Road area, Smoky Park Highway area and Sand Hill Road area. In the Hendersonville Road area, potable water and fire protection service are available to all parcels in this annexation area on substantially the same way as other parts of the City, however, in an effort to further enhance fire protection coverage, two fire hydrants are proposed to be installed within this annexation area. This water system improvement is planned for completion by June 30, 2006.

Sewer collection: No sanitary sewer system improvements are required or proposed or planned for any of the five proposed areas.

Administrative and other municipal services: The City provides a full range of services. Basically key professional and department directors specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and reaction and various other municipal activities and functions. The City is active in minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $128,364; Total state utility tax revenue - $14,234; Total local option sales tax - $49,400; Total Powell Bill allocation - $2,082; and Total fees, permits, licenses and charges for services - $1,683. Total revenue - $195,763.

Annual recurring expenditures: Police (two additional officers) - $70,000; Fire (rural fire department contracts expected to be in place for at least 5 years and the hiring of one Deputy Fire Marshall) - $55,775; Solid waste - $133; and Street lighting - $2,160. Total recurring expenditures - $128,068.

Annual capital expenditures: Police - $75,000 (vehicles and associated capital equipment for the additional two police officers); Fire - $30,000 (vehicles and associated capital equipment for the additional Deputy Fire Marshall position); Water lines - $3,500; Rollout containers - $160; Street lighting - $2,820. Total one-time annual capital expenditure - $11,480.

Mr. Pettibone explained the impact on insurance rates to property owners and commercial properties.

Mr. Pettibone then reviewed with Council the following amendments to the Plan:

(1) Revision to page 35 under "Impact on Insurance Rates." The volunteer fire departments should read: West Buncombe VFD – 9/6; Enka VFD – 9/5; and Skyland VFD – 4.

(2) Revise the Deaverview Road Annexation Area "Present and Proposed Boundaries Map" and the "Generalized Land Use Map" to be consistent with the boundary line map attached to the Resolution of Intent.

(3) Replace all Water & Sanitary Sewer Systems Maps with ones that have been stamped and approved by a licensed engineer. He pointed out that even though the Water & Sewer Sanitary Systems Maps in the Plan before Council are not stamped, they have been reviewed by a licensed engineer.

  (a) Revision to the Deaverview Road "Water & Sanitary Sewer Systems Map" boundary line change to be consistent with map attached to Resolution of Intent.
  (b) Revision to the Sand Hill Road "Water & Sanitary Sewer Systems Maps" because it did not show a subdivision that occurred since the date of the Resolution of Intent (March 25, 2003).

Mr. Pettibone asked City Council to adopt the resolutions approving the report of plans for the five annexation areas, as amended.

Mr. Pettibone responded to various questions/comments from Council, some being, but are not limited to: explain how homeowners and commercial properties might save on their insurance rates; can the City guarantee the Insurance Service Office (ISO) rating of 3 in the future; what is the criteria for how the ISO rating is determined;

Upon inquiry of Councilman Dunn, Police Chief Annarino explained the police ratio per resident and how Asheville determines that ratio vs. how other large cities determine that ratio. He said that he would provide Council with additional information regarding sworn and non-sworn positions and how we compare to other cities. He did note that if Asheville were to convert the non-sworn officers (who do clerical and technical work) back to sworn positions, our ratio would be significantly higher than other cities in North Carolina.

Councilman Dunn said that there is a perception that we don't have enough police officers to handle the "little" stuff. Police Chief Annarino responded that it is a balancing act but a lot of it is perception and there will always be issues.

Councilman Ellis pointed out that there are savings to residents being annexed, e.g. garbage collection and insurance rates. In addition, the resident may be entitled to deductions on their income tax if they fall within a certain tax bracket. Also, once annexed, the residents have the opportunity to vote in City Council elections and determine who will be their elected representatives.

Councilman Peterson said that a lot of the proposed annexation areas are commercial and asked what kind of police services would be provided for those businesses. Police Chief said that in addition to the basic law enforcement services, we would work with them on crime prevention, environmental design review, community watches and we can offer safety security seminars for their employees. In addition, we have an expert on staff that can be called in for a comprehensive security analysis of their business.

When Councilman Dunn questioned if we can provide garbage collection to all the properties being annexed, Mr. Pettibone replied yes.

Mr. Fred English, Haw Creek resident, spoke against annexation in that the City needs to give current City residents service before trying to add more residents.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 03-70 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE DEAVERVIEW ROAD AREA

Councilman Peterson moved for the adoption of Resolution No. 03-70, as amended. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 395

RESOLUTION NO. 03-71 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE CROWELL ROAD AREA

Councilman Ellis moved for the adoption of Resolution No. 03-71, as amended. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 396

RESOLUTION NO. 03-72 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE SMOKY PARK HIGHWAY AREA

Councilwoman Jones moved for the adoption of Resolution No. 03-72, as amended. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 397

RESOLUTION NO. 03-73 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE SAND HILL ROAD AREA

Councilwoman Jones moved for the adoption of Resolution No. 03-73, as amended. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 398

RESOLUTION NO. 03-74 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HENDERSONVILLE ROAD AREA

Councilman Peterson moved for the adoption of Resolution No. 03-74, as amended. This motion was seconded by Councilman Ellis and carried on a 6-1 vote with Councilman Dunn voting "no".

RESOLUTION BOOK NO. 27 – PAGE 399

VI. OTHER BUSINESS:

Reopening of Park at Vance Monument

Councilman Peterson asked for an update about the possibility of re-opening the park at Vance Monument soon. He asked how far City staff was along in bringing the Council some changes to address safety concerns in some of our urban parks, like people being back a certain distance, or limiting the number of people in the park.

City Attorney Oast said that details have not been developed to any significant degree yet. But, to the extent we are able to implement changes that don't require City Council action, staff will let Council know and then move ahead with that action.

Claims

The following claims were received by the City of Asheville during the period of March 21-27, 2003: Janice Molnar (Water), Tom Steward (Water), Annie Mae Martin (Streets), Budweiser of Asheville (Civic Center), Arlene Wilson (Water), Lawrence Grillo (Parks & Recreation), Johan Par Forsberg (Water) and Henry Peters (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

The City received a Complaint for Declaratory Judgment on March 8, 2003, from Carol Ann Winter and Albert Ganzenhuber. The nature of the proceeding is to declare Ordinance No. 2988, the rezoning ordinance in the Broadway Corridor North of Magnolia Street, as invalid. This matter will be handed by outside counsel.

The City received a lawsuit on April 3, 2003, from Peggy Griffin. The nature of the proceeding is a complaint for medical expenses resulting from a motor vehicle accident with City employee Melanie Elizabeth Robbins, who was driving a City vehicle. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fisher Caudle, west Asheville resident, voiced concern over the deplorable neighborhood conditions due to the lack of management of the Housing Authority and of the Pisgah View Apartments. This has been an on-going issue for three years. Property owners' rights around the Apartments are being discriminated against and their property values severely hurt by the continued allowance of blatant on the street drug dealings. Trash on the street by these dealers and their visitors is outrageous. Pisgah View Apartments are over 60 years old and far exceed the government mandate for sale and redevelopment. It should be bulldozed and rebuilt for single-family affordable homes not controlled by the Housing Authority. With the enhancement of the new French Broad River Park, the time to redevelop this property is now. If the goal of rebuilding single-family homes on that property cannot be achieved, at the very minimum, he asked Council to consider calling for the resignation of the current Executive

Director of the Housing Authority and the Pisgah View General Manager, who cannot seem to fulfill their management duties. The amount of public housing in Asheville and it's inherit abuses is a disgrace to the taxpayers and providing housing is simply not a function of government. This warrants immediate action to circumvent the very real possibility of a class action lawsuit for neighborhood discrimination and property rights violations. He asked Council to act swiftly and accordingly to clean up their neighborhood.

Mr. Kevin Nuttall, representing the Lighthouse Group, read a prepared statement of concerns regarding police tolerance, Constitutional freedoms, historical records, action by City Council to sell off our history and public parks, and the recent closing of Vance Monument to the public.

Mr. Fred English, Haw Creek resident, supported the Police Department's closing off Vance Monument.

Mr. Paul VanHeden, west Asheville resident, urged City Council to open up the park at the Vance Monument.

Mr. Don Yelton presented City Council with a book entitled "Heartstone, Celebrating the Emergent Ecologic Century" by the Environmental Leadership Center of Warren Wilson College. He suggested Council read the article entitled "Social Justice Meets Environmental Ethics" by Peter Marin. He urged City Council to take the lead in changing its meeting day and time so as not to conflict with the Buncombe County meetings.

Closed Session

At 6:53 p.m. Councilman Mumpower moved to go into closed session to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in N. C. Gen. Stat. sec. 143-318.11 (a) (4). This motion was seconded by Councilman Ellis and carried unanimously.

At 7:11 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:11 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 15, 2003 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Vice-Mayor Terry M. Bellamy (maternity leave)

CONSENT:

Budget Amendment for Senior Opportunity Center

Summary: The consideration of a budget amendment, in the amount of $10,174, from the Land-of-Sky Regional Council, Area Agency on Aging, to make improvements to the Senior Opportunity Center entrance.

The State of North Carolina provides senior center general-purpose funds through the Land-of-Sky Regional Council, Area Agency on Aging. This year, the City has received $10,174, which will be used to improve the entrance of the Senior Opportunity Center. This project will include the construction of a drop-off driveway, landscaping and a small outdoor picnic/sitting area. The City is responsible for a matching amount of $1,130, which will be covered through in-kind project management and labor.

City staff recommends City Council approve the budget amendment to make improvements to the Senior Opportunity Center.

Naming of Greenways

Summary: The consideration of a resolution naming existing greenways within the Asheville area.

Over the past several years, the Parks and Recreation Department and the Asheville Greenway Commission have been working on the construction of a number of greenways based upon the Greenway Master Plan. The Commission is recommending naming greenways after bodies of water located near the trail sites. The reason for this is to link one of the benefits of greenways to water quality issues. Greenways provide excellent buffers for purification of water systems. The Parks and Recreation Department and the Asheville Greenway Commission recommend City Council approval of the following names for existing greenways:

Glenn's Creek Greenway (Weaver Boulevard)
Reed Creek Greenway (Broadway)
French Broad River Greenway (French Broad River Park)
John P. Gregg Greenway (French Broad River Park IV)

City staff recommends City Council name the existing greenways in the Asheville area as recommended by the Parks and Recreation Department and the Asheville Greenway Commission.

Parking Deck Property Purchase

Summary: The consideration of approval to proceed with acquisition of two properties for Battery Park Parking Facility.

Since 2000, the City has been working to assemble the real estate necessary to proceed with the construction of the public parking facility in the Battery Park area. Council has approved the project and conceptual plans for the project, and there has been significant public review and consideration of them. The budget for the project has been approved.

The options for two of the properties expire this month. These properties have been under contract since 2000, but we have delayed closing on them for reasons related to financing, and because of the status of negotiations for other properties needed for the project. As originally proposed, the City anticipated getting all of the required properties under contract and closing on them at about the same time, and coordinating the closings with the public introduction of the project. As things have developed, however, the project has been public for some time, and the closings are occurring over time. We believe that negotiations for the land are such that we can recommend closing on the two properties under contract at this time.

The basic terms are as follows:

Property A (Harris estate, owner) Acquisition Price - $650,000
(reduced by $175,000 in option payments credited against purchase price)

Property B (Revell estate, owner) Acquisition Price - $867,000
(option payments of $30,000 credited against purchase price)

The City will acquire a fee simple interest in both properties. The City has already acquired the leasehold interest in the building on Property A, formerly occupied by the Flying Frog restaurant. The parking lot operated onto these properties will continue in operation until construction starts, anticipated to be in September.

Since budgetary authority for these property acquisitions already exists, no separate resolution is necessary. If Council approves moving ahead with the purchase in accordance with these terms, a motion to that effect is requested.

Finance Director Bill Schaefer responded to various questions from Councilman Peterson regarding the financial aspect of the parking deck.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

ASHEVILLE CITY PLAN 2025

Planning & Development Director Scott Shuford said that this is the consideration of a resolution adopting the Asheville City Plan 2025 as the official comprehensive plan for the City of Asheville.

This culminates a two year planning and public participation process that has been overseen in great detail by a 60 member committee (the City Plan Advisory Committee – CPAC) and has involved nine public forums, one major community meeting, and innumerable CPAC meetings, focus group meetings and public presentations. The effort to involve the public in developing this plan has been unprecedented in the City's history and has included surveys, television presentations and announcements, outreach to specific groups (particularly groups that might typically be underrepresented at standard public forums, including minority groups and business organizations), media coverage, newspaper editorials, and other inventive methods of capturing public input. The reward for this effort has been over 1,000 specific comments from the public that have been carefully evaluated by CPAC and included in the plan.

The Asheville City Plan 2025 will serve as guide for development approvals, rezonings, code amendments, infrastructure improvements, legislative action requests, and other City efforts. However, the plan is not an end into itself – it is a guide for specific actions, with the individual consideration and implementation of these actions being the method by which the plan will be put into effect.

The Asheville City Plan 2025 replaces the Asheville City Plan 2010, adopted in 1987.

The Planning and Zoning Commission recommended approval of Asheville City Plan 2025 as the official comprehensive plan for the City on March 27, 2003, by a unanimous vote (5-0), subject to the amendments. City staff also recommends approval of the plan as proposed for amendment.

After reviewing the background, Mr. Shuford explained the demographic changes.

Land use and transportation issues include (1) Asheville has tripled in land area over the past 50 years; (2) Asheville's density (persons per square mile) has decreased by 50% over the past 50 years; and (3) we have moved from an urban development pattern to a suburban development pattern. The costs associated with a suburban development pattern are that it's expensive to serve, has environmental problems and encounters convenience costs. A house that costs $150,000 in Asheville can be purchased for $116,000 in Greensboro according to a Coldwell Banker study.

He explained how mass transit requires 8-16 units per acre for efficient service, how Asheville's development pattern forces reliance on the automobile, that NC DOT projects that 80% of the traffic on the new I-26 Connector will be local traffic, and that there is a huge pressure on arterials and interstates. Current development patterns are not sustainable and we need to seek opportunities to recover an urban development pattern.

Land use ideas include (1) incorporate "green building" concepts; (2) preserve open space, historic resources; (3) promote affordable housing; (4) more urban villages; (5) higher density/greater zoning flexibility; and (6) coordinate land planning with Buncombe County.

Transportation ideas include: (1) missed use development pattern; (2) transit; (3) synchronize traffic signals; (4) walkable and bikeable infrastructure; and (5) construct I-26 Connector consistent with community recommendations.

He then reviewed the economic trends in Asheville. Economic development ideas include (1) high tech workforce; (2) reserve industrial land; (3) better use of our educational institutions; (4) develop and improve standards for new economy: arts and crafts; low impact; (5) use quality of life to attract/retain business; (6) regional industrial development; (7) more innovation in "branding" – creating an image for Asheville; (8) create a "wired" community and affordable (high speed internet access) bandwidth focusing on grass-roots e-business; and (9) support local businesses.

Air quality ideas include (1) high density, mixed use, walkable communities; (2) regional cooperation to reduce air pollution; (3) lobby for solutions to air quality problems; (4) develop, improve and enforce industry standards for air pollution; (5) promote mass transit; (6) City fleet use alternative fuels; and (7) green building techniques.

Water quality ideas include: (1) City to continue to work with RiverLink to develop/implement master plan; (2) regional cooperation to reduce water pollution; (3) develop, improve and enforce industry standards for water pollution; (4) improved stormwater management regulations; and (5) green building techniques.

Mr. Shuford then explained smart growth. Long range planning includes transformation of commercial corridors; transit-supported density; walkable and bikeable; tax equity; strong neighborhoods; parks, open space and conservation areas; compatible, high quality infill development; strong Center City; flexible development regulations; improved intergovernmental coordination; effective City services; regional economy; development in character with community; compact urban form; clean air and water; skill-based entrepreneurial economy; green building tools and incentives; effective public participation; affordable housing; preservation of historic and natural resources; and connected, efficient and attractive streets.

Upon inquiry of Councilman Dunn, Mayor Worley said that the 2025 Plan is a guide that can be amended, noting that the implementation of that guide is up to City Council.

Councilwoman Jones stressed the need for a public campaign once the Plan is adopted, to make sure that the community is moving in the same direction.

There was a brief discussion of how the 300-page Plan may be condensed.

It was the consensus of Council to hold the public hearing on April 22, 2003. After hearing comments from the public, City Council will then give further direction to staff of changes, concerns and comments regarding the adoption of the 2025 Plan.

Councilman Mumpower agreed with moving forward with a public hearing, with the understanding that he has some real serious concerns about content and strategic direction of the plan in its current form.

UDO AMENDMENT REVIEW

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on April 22, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Conditional Use Permit Required for Drive-Through Facilities in the Central Business District

Urban Designer Alan Glines said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to require a conditional use permit for drive-through facilities in the Central Business District.

This code amendment would establish a requirement for the issuance of a conditional use permit for drive-through facilities in the Central Business District. Wachovia Bank recently received approval for a drive-through facility on Coxe Avenue from the Asheville Downtown Commission. In approving this facility, the Commission noted that drive-through uses contribute to the "suburbanization" of downtown and, while necessary on occasion, needed heightened review and public input. The Commission asked staff to promptly prepare a code amendment to make drive-through facilities a conditional use in the Central Business District.

On March 14, 2003, the Asheville Downtown Commission recommended approval of the proposed amendment by a vote of 8-1. At the Planning & Zoning Commission meeting held on April 2, 2003, the Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

After Council discussion on drive-throughs in the Central Business District, Councilman Mumpower suggested Mr. Glines be prepared to respond to questions similar to: within the past three years, how many buildings have built drive-throughs in the Central Business District; what are the pros and cons associated with drive-throughs in the Central Business District; and is air quality an issue with drive-throughs.

Councilwoman Jones suggested a longer-term research project of pointing out the economics of a business with a drive-through vs. a business without a drive-through.

After hearing comments from Council, Planning & Development Director Scott Shuford said that he would look to amend the ordinance to give a little more flexibility in the application of the regulations.

Permit Bed & Breakfast Inns to Utilize Accessory Structures for a Limited Number of Guest Rooms

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to permit Bed & Breakfast Inns to utilize accessory structures for a limited number of guest rooms.

This code amendment would permit bed and breakfast inns to utilize accessory structures for a limited number of guest rooms. The current code requirements do not permit carriage houses or other outbuildings to be used for guest accommodations for bed and breakfast inns. Since heritage tourism is an increasing and very positive component of our tourism industry, this amendment has both practical and economic development implications.

On April 2, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Establishment of a new Urban Residential District

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to establish a new high density, infill zoning classification called Urban Residential District.

Frequently in community meetings and planning forums and most recently, the forums for the City Plan 2025 comprehensive plan process, citizens have identified the need for:

- access to appropriately scaled mixed use neighborhood services located close to home
- improved pedestrian facilities, projects that relate to the street and attractive streetscapes
- more affordable housing throughout the community and a greater variety of housing choices
- broader transportation options

One of the most pressing problems facing the City of Asheville is the need for affordable housing. The Urban Residential District (URD) has been developed to increase opportunities for the development of affordable housing and a mix of other housing types by allowing for an increase in density, scale, and use in areas of the city where infrastructure can accommodate higher density, infill development. It is intended that the URD be located on significant transit corridors and/or in areas planned for high growth.

Providing residential units is the primary goal of the URD, however, it is recognized that there is significant need for basic commercial retail, office use, and other activities that support residential uses in proximity to high density residential areas. The URD recognizes this and incorporates other non-residential uses on a limited basis. The proposed URD is an opportunity to incorporate the City Council adopted Smart Growth and sustainable development goals that have been identified by the community during the last decade.

The URD will encourage pedestrian activity by creating safe and inviting streetscapes with comfortable walking amenities. Traffic flow will be improved by limiting curb-cuts and requiring cross access between parcels. The URD will also make public transit a viable option by increasing density (i.e., the number of potential riders) in neighborhoods that are or can be served by the bus system.

Some of the long term benefits from developing any corridor in this pattern will be to build a livable community, strengthen the area's tax base, reduce driving trips on roadways, support mass transit, improve air quality and reduce sprawl.

The URD is not being developed with a particular corridor or area of the City in which it is to be applied. However, staff has been in preliminary contact with Mountain Housing Opportunities and the West End Clingman Avenue Neighborhood regarding the possible application of this new zoning designation in certain areas of this neighborhood.

At the Planning and Zoning Commission meeting on April 2, 2003, the Commission approved the creation of the Urban Residential District by a vote of 7-0. Staff also supports the adoption of this district.

When Councilman Dunn asked if the Coalition of Asheville Neighborhoods (CAN) has reviewed this amendment, Planning & Development Director Scott Shuford said that this amendment has been circulated but they have not had any response from CAN. Mr. Shuford that that staff is prepared at anytime to talk to any group or individual who might have questions regarding this amendment.

Councilman Peterson suggested a couple of amendments to the proposed ordinance regarding balconies and some flexibility in the uses permitted over the ground floor.

At the request of Councilman Dunn, Mr. Shuford said that he would provide Council with the regulations regarding grand opening signs.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these public hearings on the April 22, 2003, formal City Council agenda.

BOARDS/COMMISSIONS

It was the consensus of City Council to have the City Clerk arrange for interviews for vacancies on the Board of Adjustment.

It was the consensus of City Council to ask the Board/Commission Committee to discuss the possible reduction in membership of the Civic Center Commission. In addition, it was the consensus of City Council to re-advertise for the two vacancies on that Commission.

It was the consensus of City Council to have the City Clerk re-advertise the vacancy on the Regional Water Authority.

CLOSED SESSION

At 4:32 p.m., Councilman Mumpower moved to go into closed session to establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate – G. S. 143-318. 11 (a) (5). This motion was seconded by Councilman Dunn and carried unanimously.

At 5:15 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:15 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 22, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy (maternity leave)

PLEDGE OF ALLEGIANCE

Retired Air Force veteran Ira Taylor led City Council in the pledge of allegiance.

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING KIM FROHMAN AS THE RECIPIENT OF THE BILL FULP AWARD AND PARKS AND RECREATION VOLUNTEER OF THE YEAR 2003

Mayor Worley read the proclamation proclaiming Kim Frohman as the recipient of the Bill Fulp Award and Parks & Recreation Volunteer of the Year 2003. He presented the proclamation to Mr. Frank Fishburne, Chair of the Recreation Committee, on behalf of Ms. Frohman.

B. PROCLAMATION PROCLAIMING MAY 2003 AS "MOTORCYCLE AWARENESS MONTH" IN THE CITY OF ASHEVILLE

Councilman Mumpower read the proclamation proclaiming May 2003, as "Motorcycle Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Eldon Moore who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING THE WEEK OF APRIL 27-MAY 3, 2003, AS "MUNICIPAL CLERKS WEEK"

Mayor Worley read the proclamation proclaiming April 27-May 3, 2003, as "Municipal Clerks Week " in the City of Asheville. He presented the proclamation to City Clerk Maggie Burleson who thanked City Council for their support.

II. CONSENT:

Councilman Mumpower asked that Consent Agenda Item "G" be removed from the Consent Agenda for separate discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 8, 2003, AND THE WORKSESSION HELD ON APRIL 15, 2003

B. RESOLUTION NO. 03-75 - RESOLUTION AUTHORIZING THE SALE OF PROPERTY ON KILDARE PLACE TO MELVIN JAMES NORRIS

Summary: The consideration of a resolution authorizing the Mayor to convey property on Kildare Place in the Mt. Carmel community to Melvin James Norris in the amount of $26,500.

On April 8, 2003, the City Council directed the City Clerk to advertise for upset bids on Kildare Place. The advertisement ran in the Asheville Citizen-Times on April 11, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Melvin James Norris in the amount of $26,500 was not upset and the sale to Melvin James Norris should be approved.

Approval of the resolution will authorize the sale of the property to Melvin James Norris for the amount of $26,500.

City staff recommends adoption of the resolution authorizing the Mayor to convey property on Kildare Place to Melvin James Norris in the amount of $26,500.

RESOLUTION BOOK NO. 27 – PAGE 400

C. RESOLUTION NO. 03-76 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO A LEASE WITH SUPER SOD FOR APPROXIMATELY 47 ACRES OF CITY-OWNED PROPERTY LOCATED ACROSS FROM THE MILLS RIVER WATER TREATMENT FACILITY

Summary: The consideration of a resolution approving a lease with Super Sod, a division of Patten Seed Company, for approximately 47 acres of land on Mills River.

On April 8, 2003, the City Council authorized publication of a notice of intent to lease 47 acres of land on Mills River to Super Sod. A notice of intent was duly published in the Asheville Citizen-Times on April 11, 2003.

Super Sod has offered to enter into a three-year lease with option to renew for two additional three-year terms at a rent of $6,000 per year. Staff recommends that a CPI annual adjustment be included in the lease. The proposed lease would require a 50' buffer along Mills River. Super Sod would utilize the tillable land, about 42-43 acres for growing sod, and mow the non-wooded portions of the buffer area to maintain weed control. The proposed lease may be terminated by either party upon six months written notice. In the case of default, the Lessor may terminate the lease if the default is not cured after ten days notice.

Approval of the resolution will authorize the Mayor to execute the lease with Super Sod for the approximately 47 acres of land at Mills River.

Planning Department staff and the Water Resources Department staff recommend adoption of the resolution authorizing a lease with Super Sod for approximately 47 acres of land on the Mills River.

RESOLUTION BOOK NO. 27 – PAGE 401

D. RESOLUTION NO. 03-77 - RESOLUTION AUTHORIZING SUBMISSION OF THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR 2003-04 TO THE U.S. DEPT OF HOUSING AND URBAN DEVELOPMENT

Summary: This is the consideration of a resolution authorizing submission of the City's Consolidated Annual Action Plan for 2003/04 to the US Dept. of Housing and Urban Development.

The City expects to have available $1,764,368 in CDBG funds and $1,505,345 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2003. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 21 CDBG-assisted and 15-HOME assisted projects.

If approved, the funding will assist in adding or preserving 244 affordable housing units in the City and 114 units in the rest of the Consortium area. CDBG funds will also help provide 250 Asheville residents with employment or business training and as many as 3,000 residents with other needed services. CDBG will also continue to support revitalization of the WECAN and South Pack Square neighborhoods.

Notice of the public hearing and a summary of the draft plan were published on March 24, 2003. A 30-day public comment period is required by federal regulations. A public hearing was held on April 8, 2003, and no comments were made. The final plan must be submitted to Dept. of Housing and Urban Development by May 15, 2003.

RESOLUTION BOOK NO. 27 – PAGE 402

E. ORDINANCE NO. 3011 - BUDGET AMENDMENT FOR THE SENIOR OPPORTUNITY CENTER

Summary: The consideration of a budget amendment, in the amount of $10,174, from the Land-of-Sky Regional Council, Area Agency on Aging, to make improvements to the Senior Opportunity Center entrance.

The State of North Carolina provides senior center general-purpose funds through the Land-of-Sky Regional Council, Area Agency on Aging. This year, the City has received $10,174, which will be used to improve the entrance of the Senior Opportunity Center. This project will include the construction of a drop-off driveway, landscaping and a small outdoor picnic/sitting area. The City is responsible for a matching amount of $1,130, which will be covered through in-kind project management and labor.

City staff recommends City Council approve the budget amendment to make improvements to the Senior Opportunity Center.

ORDINANCE BOOK NO. 20 - PAGE 257

F. RESOLUTION NO. 03-78 - RESOLUTION NAMEING EXISTING GREENWAYS WITHIN THE CITY OF ASHEVILLE

Summary: The consideration of a resolution naming existing greenways within the Asheville area.

Over the past several years, the Parks and Recreation Department and the Asheville Greenway Commission have been working on the construction of a number of greenways based upon the Greenway Master Plan. The Commission is recommending naming greenways after bodies of water located near the trail sites. The reason for this is to link one of the benefits of greenways to water quality issues. Greenways provide excellent buffers for purification of water systems. The Parks and Recreation Department and the Asheville Greenway Commission recommend City Council approval of the following names for existing greenways:

Glenn's Creek Greenway (Weaver Boulevard)
Reed Creek Greenway (Broadway)
French Broad River Greenway (French Broad River Park)
John P. Gregg Greenway (French Broad River Park IV)

City staff recommends City Council name the existing greenways in the Asheville area as recommended by the Parks and Recreation Department and the Asheville Greenway Commission.

RESOLUTION BOOK NO. 27 – PAGE 403

G. **MOTION AUTHORIZING CITY STAFF TO PROCEED WITH THE ACQUISITION OF TWO PROPERTIES FOR THE BATTERY PARK PARKING FACILITY** – This item was removed from the Consent Agenda for separate discussion.

H. **RESOLUTION NO. 03-79 – RESOLUTION AUTHORIZING AN INSTALLMENT PURCHASE CONTRACT BETWEEN RBC CENTURA BANK AND THE CITY OF ASHEVILLE TO FINANCE THE PURCHASE OF TWO REFUSE TRUCKS AND 9,200 ROLL CARTS**

Summary: The consideration of a resolution authorizing the installment financing of the purchase of two refuse trucks and 9,200 associated roll carts.

The City of Asheville Capital Improvement Plan 2002/03 to 2007/09 includes authorization in Fiscal Year 2002/03 for the installment purchase of two automated side-loader refuse trucks and associated roll carts

The Finance Department sought proposals from eleven firms to finance the purchase of the above listed equipment. Proposals were received from eight firms, the best of which was submitted by RBC Centura Bank, - - 2.07% for four years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and RBC Centura Bank for the purchase the two refuse trucks and 9,200 roll carts and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution authorizing the installment financing.

RESOLUTION BOOK NO. 27 – PAGE 404

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA

MOTION AUTHORIZING CITY STAFF TO PROCEED WITH THE ACQUISITION OF TWO PROPERTIES FOR THE BATTERY PARK PARKING FACILITY

Summary: The consideration of approval to proceed with acquisition of two properties for Battery Park Parking Facility

Since 2000, the City has been working to assemble the real estate necessary to proceed with the construction of the public parking facility in the Battery Park area. Council has approved the project and conceptual plans for the project, and there has been significant public review and consideration of them. The budget for the project has been approved.

The options for two of the properties expire this month. These properties have been under contract since 2000, but we have delayed closing on them for reasons related to financing, and because of the status of negotiations for other properties needed for the project. As originally proposed, the City anticipated getting all of the required properties under contract and closing on them at about the same time, and coordinating the closings with the public introduction of the project. As things have developed, however, the project has been public for some time, and the closings are occurring over time. We believe that negotiations for the land are such that we can recommend closing on the two properties under contract at this time.

The basic terms are as follows:

Property A (Harris estate, owner)	Acquisition Price - $650,000
(reduced by $175,000 in option payments credited against purchase price)	
Property B (Revell estate, owner)	Acquisition Price - $867,000
(option payments of $30,000 credited against purchase price)	

The City will acquire a fee simple interest in both properties. The City has already acquired the leasehold interest in the building on Property A, formerly occupied by the Flying Frog restaurant. The parking lot operated onto these properties will continue in operation until construction starts, anticipated to be in September.

Since budgetary authority for these property acquisitions already exists, no separate resolution is necessary. If Council approves moving ahead with the purchase in accordance with these terms, a motion to that effect is requested.

Councilman Mumpower moved to authorize City staff to proceed with the acquisition of two properties for the Battery Park Parking Facility. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 8 ELKMONT DRIVE FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT TO UTILIZE THE EXISTING BUILDING AND TO LIMIT THE PERMITTED USES OF THE PROPERTY

ORDINANCE NO. 3012 - ORDINANCE REZONING PROPERTY LOCATED AT 8 ELKMONT DRIVE FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3013 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO UTILIZE THE EXISTING BUILDING AND TO LIMIT THE PERMITTED USES OF THE PROPERTY

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:17 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Carter Pettibone, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a request to rezone property located at 8 Elkmont Drive from RS-4 Residential Single-Family Medium Density District to Community Business I District/Conditional Use and a request to issue a conditional use permit to utilize the existing building and to limit the permitted uses of the property.

On January 1, 2003, the applicant, Marshall James, submitted an application to rezone the property located at 8 Elkmont Drive (PIN No. 9730.12-86-0069), in which he proposed rezoning the entire property to CB I. The Planning and Zoning Commission, at its March 5, 2003, meeting, voted to continue the public hearing on the matter in order for the applicant to amend his application to a conditional use rezoning that specified the possible proposed uses for the property. At its following meeting, the Commission voted to recommend approval of the conditional use rezoning request.

The property, which totals 0.22 acre, is located in the City limits in close proximity to Merrimon Avenue (City Exhibit 3 – Location Maps). The existing land uses and zoning in the area include single-family residences to the north zoned RS-4 and commercial uses to the east, south, and west zoned CB I. The site is located behind a lot that has frontage on Merrimon Avenue, which is a major thoroughfare with sufficient capacity to handle uses allowed in the CB I District.

The property is split-zoned with the majority of it zoned CB I and the remainder zoned RS-4 (City Exhibit 3 – Site Plan). The location of the split in zoning on the property also results in the building on the property being split zoned as well. At the time of the city-wide zoning change in 1997, the dividing line between CB I and RS-4 was drawn essentially as a straight line corresponding to one or two properties deep along Merrimon Avenue. The odd shape of the lot and the fact that the dividing line went through the existing structure did not seem to be taken into account at that time. This division line also existed with the zoning categories in existence prior to 1997 where the majority of the lot was zoned Commercial Highway (CH) and the remainder residential (R-1).

Originally, the applicant had applied for a standard rezoning for the RS 4 portion of the property. Due to concerns raised by a neighbor and the Planning and Zoning Commission, the applicant has amended his application to that of a conditional use rezoning for the entire property.

The following conditions are proposed by the applicant:

- The existing building on the property would remain and use of it would be limited to certain uses permitted in the CB I District as listed below.
- Commercial driveway access will be provided at the southern end of the site nearest to Merrimon Avenue in the location of the current driveway.
- Buffers will be provided as required by the Unified Development Ordinance (UDO) depending on actual use of the property.
- Ground-mounted signage will be limited to the standards of the most restrictive type for commercial uses (NB standards - 8' in height) and shall not be internally lit.

The permitted uses would be limited to the following:

- Residential uses
- Adult day care home
- Child day care home
- Family care home
- Barber and beauty shops
- Clinics
- Florists
- Home occupations
- Instructional services
- Offices
- Studios, gallery, and workshop for artists, craftspeople, designers, photographers

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2(c) of the UDO. City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

Any redevelopment of the property would need to receive technical approval from the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering, and other City Departments as part of a Level I site plan review. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

Any redevelopment project must comply with all City standards in regards to maximum clearing and grading, erosion control, and maximum slope. Very little clearing or grading is expected since the existing building would be retained and minimal off-street parking would be required due to the building's square footage.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

Most of the site is currently zoned CB I and with the proposed conditions the existing building would remain as giving the appearance and scale of a residential structure. The property would also need to be buffered from adjoining residential properties. The driveway access to the property behind it that is partially located on the site would also remain. As the appearance and intensity of the property will not change significantly, little to no harm is anticipated to the value of the adjoining properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

The applicant has proposed that the existing residential structure on the property be converted to a commercial use. As a result, the building would continue to fit into the neighborhood as it currently does now. Parking would be located away from the residential neighborhood on the southern portion of the site nearest to Merrimon Avenue and be screened as required by the UDO.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

Any proposed development would be required to comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

Any redevelopment of the property would need to receive technical approval from applicable City Departments, which include representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works. Due to its relatively small scale, redevelopment of the property is not expected to generate additional requirements in these areas.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

It is anticipated most of the traffic to the site would be from Merrimon Avenue, which is a major thoroughfare with sufficient capacity to handle uses allowed in the CB I District. The site's access will be from the southern portion of the site closest to Merrimon Avenue to minimize the traffic impacts to the surrounding residential neighborhood. A vast majority of the traffic flow to the site will not enter into the neighborhood, as customers would be turning into the property first.

In addition, the driveway to the commercial property across Elkmont Drive at the corner of Elkmont and Merrimon Avenue is almost directly across the street from this site's driveway.

Rezoning the entire lot to Community Business I District/Conditional Use would allow the property owner the opportunity to adaptively reuse the existing building for limited small-scale commercial uses as proposed by the conditional use permit. This would be opposed to removing the existing building to construct a new building that may not be in scale with the neighboring residential properties to the north and that could be used for any use permitted in the CB I District. Any development of the property would also be required to adhere to the proposed conditions and meet all applicable standards of the UDO.

In consideration of the above, the adjoining zoning and land uses in the area to the south and west of the site, and the site's proximity to the Merrimon Avenue thoroughfare, the proposed request appears to be consistent with the intent and purpose of the UDO. The Planning Staff recommends approval of the conditional rezoning request as proposed for 8 Elkmont Drive. The Planning and Zoning Commission, by a vote of 6-0, also recommends approval.

Mr. Gerald Green, representing the applicant, spoke in support of this conditional use zoning and permit explaining why he felt it was good for the neighborhood and the City as a whole.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:32 p.m.

Councilman Peterson felt that this would not conflict with Council's policy of minimizing commercial intrusion into residential areas. He felt that the property to the west and east is residential so the impact of this conditional use rezoning is fairly minimal.

Councilman Mumpower moved to adopt Ordinance No. 3012 to rezone property located at 8 Elkmont Drive from RS-4 Residential Single-Family Medium Density District to Community Business I District/Conditional Use. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 259

Councilman Ellis moved to adopt Ordinance No. 3013, to issue a conditional use permit to utilize the existing building and to limit the permitted uses of the property, subject to the following conditions: (1) The existing building on the property would remain and use of it would be limited to certain uses permitted in the CB I District as listed above by Mr. Pettibone; (2) Commercial driveway access will be provided at the southern end of the site nearest to Merrimon Avenue in the location of the current driveway; (3) Buffers will be provided as required by the UDO depending on actual use of the property; and (4) Ground-mounted signage will be limited to the standards of the most restrictive type for commercial uses (NB standards - 8' in height) and shall not be internally lit. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 261

B. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT THE CORNER OF NEW LEICESTER HIGHWAY AND ELIADA HOME ROAD (GOOCHES ROAD) FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT AND HIGHWAY BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE,

AND ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED CVS PHARMACY AND DRIVE-THROUGH

ORDINANCE NO. 3014 - ORDINANCE REZONING PROPERTY LOCATED AT THE CORNER OF NEW LEICESTER HIGHWAY AND ELIADA HOME ROAD (GOOCHES ROAD) FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT AND HIGHWAY BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3015 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A PROPOSED CVS PHARMACY AND DRIVE-THROUGH

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:36 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning and Development Director Scott Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Shuford said that this is the consideration of a request to rezone property located at the corner of New Leicester Highway and Eliada Home Road (Gooches Road) from RS-6 Residential Single-Family Low Density District and Highway Business District to Community Business II District/Conditional Use and a request to issue a conditional use permit for a proposed CVS pharmacy and drive-through.

On March 3, 2003, the representatives of CVS submitted a request to conditionally use rezone 5 lots totaling 1.55 acres to construct a 10,880 square foot drugstore with a drive-through (City Exhibit 3 – Location Map). The requested zoning change includes: one parcel that is split zoned Highway Business and RM-6 fronting Leicester Highway, two parcels zoned RM-6 fronting Eliada Home Road and a portion of two parcels fronting Old County Home Road (City Exhibit 3 – Landscape Plan). The applicant is requesting a rezoning of these parcels to a Community Business II zoning designation that would allow the proposed use.

The project site is currently located within the City's extraterritorial jurisdiction area and is scheduled to be annexed by the City of Asheville in June of 2003.

The Community Business II zoning allows medium- to high-density business and service uses serving several residential neighborhoods. A wide range of neighborhood services is allowed in this district. Community Business II districts should be sensitive to a significant pedestrian population while providing safe and adequate vehicular access. In this district, buildings may be up to 45,000 square feet and may be one or several stories tall. Drive-through facilities are allowed in this district. Parking is to be placed at the side or rear of the structure.

Parcels to the south and east of the site are Commercial and zoned Highway Business and Community Business II. The parcel to the north of the site is also commercial, but is not located within the City's jurisdiction. Parcels to the west of the site consist of single-family homes and are zoned RM-6.

The requested zoning to Community Business II is compatible with the goals of the 2010 Plan, which indicates this area as a developing commercial node surrounded by medium-density residential development. The 2025 Plan coincides with the uses of the 2010 Plan with an emphasis on pedestrian related amenities. The proposed zoning is also consistent with the established zoning south of the site towards Patton Avenue, also zoned Community Business II.

The conditional use master plan calls for a 10,880 square foot building, a double-drive through and 53 parking spaces. Access to the site will be from New Leicester Highway and Eliada Home Road (Gooches Road). A 12- foot travel lane is shown parallel to New Leicester Highway looping around to the front of the building. A 25-foot type "C" landscape buffer is required along the south and west sides of the proposed development adjacent to residential uses. A reduced buffer, to consist of a privacy fence and evergreen plantings, will be installed along the entire western and southern property boundaries.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (sec. 7-16-2 (c)). Staff's preliminary review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The City of Asheville Technical Review Committee reviewed the proposed use and found no health or safety concerns, other than the loop drive. The project is required to meet the technical standards set forth in the UDO, the Asheville Standards and Specifications Manual and the NC Building Code.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

Most properties along New Leicester Highway in this vicinity are commercial uses. The properties located on Old County Home Road will not be rezoned in order to protect the single-family fabric of the area. The development will be buffered from the adjacent residential developments. In addition to the buffer the developer is required to provide, existing topography and landscaping will provide a natural screening to the neighborhood.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Most properties along New Leicester Highway are commercial uses. The properties located on Old County Home Road will not be rezoned in order to protect the single-family fabric of the area. The development will be buffered from the adjacent residential developments. In addition to the buffer the developer is required to provide, existing topography and landscaping will provide a natural screening to the neighborhood.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The proposed use is immediately adjacent to commercial uses of similar scale and it will be buffered from residential uses by landscaping, fencing and topography.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The requested zoning to Community Business II is compatible with the goals of the 2010 Plan, which indicates this area as a developing commercial node surrounded by medium-density residential development. The 2025 Plan coincides with the uses of the 2010 Plan with an emphasis on pedestrian related amenities. The proposed zoning is also consistent with the established zoning south of the site towards Patton Avenue, also zoned Commercial Business II. The proposed project also incorporates Smart Growth goals by providing needed services in the vicinity of area residents. This proposal also uses new zoning tools in order to promote compatible lands uses through the conditional use process.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The proposed development site is located along a major thoroughfare, which has adequate infrastructure services. In addition, the project received technical approval from the Technical Review Committee, which includes representatives of the Water Resources Department, Metropolitan Sewerage District, Engineering, the Fire Department, and Public Works.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The site is served by a traffic signal at the intersection of New Leicester Highway and Eliada Home Road. Comments received from Engineering staff at the Technical Review Committee meeting did not foresee any undue traffic congestion or hazards being created from this development. A Traffic Impact Analysis was prepared and reviewed by the City Engineering Department following the Technical Review Committee. No additional traffic concerns were identified.

On March 17, 2003, the proposed project was reviewed by the Technical Review Committee who recommended the project move forward to the Planning and Zoning Commission with conditions. Prior to the Planning and Zoning Commission meeting the developers addressed the conditions with staff and resubmitted revised plans.

Using elevation drawings (City Exhibit 4), Mr. Shuford explained that the building has been designed to replicate the design for the Merrimon Avenue CVS Pharmacy.

The Planning and Zoning Commission met on April 2, 2003, to review the proposed project. The Commission expressed concern about stormwater management issues and requested that staff work with the applicant to identify an alternative method for addressing this issue in order to minimize the potential for future retrofit expenses on the part of the property owner and to provide reasonable stormwater management at the time of project completion.

On April 2, 2003, the Planning and Zoning Commission voted 5-2 (members voting against desired the applicant to meet all current City stormwater management requirements) and recommended approval of the conditional use proposal and site plan with the following conditions. Staff also recommends approval with conditions, along with the stormwater issue resolution currently under discussion between the applicant and staff. Mr. Shuford said that staff has contacted the developer to discuss stormwater issues raised at the Planning and Zoning Commission meeting. Based on these discussions, the developer has agreed to make every effort to meet the City's stormwater regulations.

1. All Technical Review Committee conditions be met.
2. The entire loop drive shall be built with real brick pavers or stamped colored asphalt with an 22' aesthetically enhanced speed table at the proposed pedestrian crossing near the corner of the building and a sidewalk connection to the public sidewalk using this crossing. Associated signage for the crossing is to be approved by the Engineering Department.
3. The applicant shall meet City of Asheville stormwater management standards or provide equivalent protection as determined by the City Engineer.

With regard to Condition No. 3 above regarding stormwater, Mr. Shuford explained that the real concern of the City Engineer is the velocity of the stormwater leaving the site and City of Asheville standards require that stormwater must meet a pre-development velocity rate. He said that he has just met with the applicant and they have agreed on the following amended Condition No. 3: "The applicant shall design and install stormwater management systems to not exceed pre-development velocity conditions for run-off leaving the project site."

Councilman Peterson asked if there are any other stormwater management standards or requirements that the developer will not be meeting when the annexation takes effect on July 1, 2003. Mr. Shuford said that our City Engineer was concerned about one issue and that was the velocity of the stormwater leaving the site. It was his understand that with the revised Condition No. 3, the concern of the City Engineer has been addressed.

Mr. Shuford responded to Councilwoman Jones when she asked if the City was relaxing some of our stormwater regulations for this project. He said that the applicant wanted a more specific condition other than "equivalent protection as determined by the City Engineer." There was an indication last week that there was not a lot of difference between what the applicant was going to put into the site (to meet the County standards since the project is located in the extraterritorial jurisdiction area) and our stormwater standards or its equivalent, as determined by the City Engineer. Again, he said it was his understanding that this revised Condition No. 3 will meet the City Engineer's concern.

Mr. Shuford responded to Councilman Peterson's question regarding a retention pond vs. underground storage.

Councilman Dunn asked what makes the loop drive dangerous. Mr. Shuford said that part of the project involves the installation of sidewalks along New Leicester Highway to make the property more pedestrian accessible. Placing the loop drive right up against the building with potential cross-points for pedestrians creates an automatic pedestrian/vehicle conflict point. To resolve that, what was decided upon was to put a paver-type of treatment to serve as an indication to any motorist using that loop drive to slow down -- that they are in an area that is different.

Councilman Dunn asked why a Traffic Impact Analysis (TIA) was required for one building on a road the size of New Leicester Highway. Mr. Shuford explained that a TIA is required on any development that generates a certain number of trips in the peak hour and this project generated that volume.

Upon inquiry of Councilwoman Jones, Mr. Shuford said that it might be worthwhile to specify a condition limiting the second loop drive to drop-off box only.

Mr. Craig Justus, attorney representing the developer CVS Pharmacy, explained how they have been working with the City since the inception of this project in January of 2003. They asked at the beginning what the stormwater requirements would be and the City said none, since the project is located outside the City limits. Then shortly before the Planning & Zoning Commission meeting, concerns were raised about future potential Environmental Protection Agency rules, so they addressed the stormwater issue. He noted that the City's stormwater manual is for proposed developments within the City limit and not for developments in the extraterritorial jurisdiction properties. He said that it would cost approximately $80,000 to put in a stormwater system that complies with the City's stormwater requirements. After discussions with City staff, the revised language in Condition No. 3 is now agreeable to the developer. Another concern was raised by staff at the Planning & Zoning Commission meeting with regard to the loop drive safety issue. After discussion, they agreed to Condition No. 2 adding the brick pavers or stamped color asphalt (Applicant Exhibit 1) at the proposed pedestrian crossing. This will be an additional cost of $10,000 but they didn't mind that addition because it will add value to the project. He then explained how they wish to be good neighbors and how he felt this is a good project at this location.

Councilman Dunn questioned CVS's engineer and architect on how much extra money they had to spend to satisfy the City's requests in order to approve of the project, in particular the building façade and the stamped colored asphalt. He felt that sometimes it's more of a "if you don't do this, we won't allow that" and he didn't like that confrontation feeling.

Councilman Peterson explained that the reality is that in two and one-half months this property will not only be in the City, but the properties around it will be in the City as well. He felt City Council has a responsibility to provide protection to the soon-to-be City residents and now allow something to be built that is going to suddenly damage the surrounding property owners. In response, the applicant's architect showed (Applicant Exhibit 2) where the storm pipes would be located and how they will comply with Condition No. 3 as amended.

Councilman Ellis wondered if the developer has considered a pervious parking lot. Mr. Justus responded that they looked at doing some pervious paving near the dumpster area, but their history with pervious paving is that it is very distinctively different than impervious and in terms of aesthetics, they are not pleased with it. But, he said he would look at the pervious parking lot in south Asheville Councilman Ellis mentioned and re-consider it.

Councilman Mumpower asked if the applicant felt that there were one set of rules in the beginning and then the rules changed. Mr. Justus said that in the ebb in flow of negotiation of a conditional use permit, there are things that may come into play that you hadn't taken into account. In this instance there was that ebb in flow and a constant changing environment, which they are trying to react to. He said if they weren't satisfied with the conditions, the project would not move forward. But, he said that at this point in time they are satisfied.

Upon inquiry of Councilman Peterson, City Attorney Oast said that this area was part of the involuntary annexation process, which began back in 2002 and will be effective June 30, 2003.

Upon inquiry of Councilman Mumpower, Mr. Jeremy Schumacher, project architect, explained why the exterior windows would have little or no impact on the internal floor space.

When Mr. Schumacher said that this building design could be a template that CVS Pharmacy could use in other communities, Councilwoman Jones pointed out that the investment that CVS is putting into Asheville now could also benefit CVS in the future in terms of having that template to show another customers.

When Councilman Dunn asked about the timeline for the project, Mr. Justus replied that they started with their preliminary application meeting in January and felt the timeline was reasonable, again noting they were satisfied.

Mr. Fred English, Haw Creek resident, felt that CVS is trying to be a good neighbor and the City should not require them to adhere to the City's stormwater regulations since they are not in the City yet.

Mr. Alan Ditmore, Leicester resident, felt that birth control providers should be exempt from all zoning regulations.

Mr. Paul Van Haden felt the City should be enforcing more of the aesthetics of the building.

Ms. Evon Peterson, former resident on Old County Home Road, thanked City Council for looking ahead to the future of stormwater in this area.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:44 p.m.

Councilwoman Jones asked that a condition be added that the second lane will always be for drop-off purposes.

Councilman Mumpower moved to adopt Ordinance No. 3014 to rezone property located at the corner of New Leicester Highway and Eliada Home Road (Gooches Road) from RS-6 Residential Single-Family Low Density District and Highway Business District to Community Business II District/Conditional Use. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 267

Councilman Mumpower moved to adopt Ordinance No. 3015, to issue a conditional use permit for a proposed CVS pharmacy and drive-through, subject to the following conditions: (1) All Technical Review Committee conditions be met; (2) The entire loop drive shall be built with real brick pavers or stamped colored asphalt with an 22' aesthetically enhanced speed table at the proposed pedestrian crossing near the corner of the building and a sidewalk connection to the public sidewalk using this crossing. Associated signage for the crossing is to be approved by the Engineering Department; (3) The applicant shall design and install stormwater management systems to not exceed pre-development velocity conditions for run-off leaving the project site; and (4) The outside drive-through lane shall be for drop-off purposes only. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 269

At 6:50 p.m., Mayor Worley announced a short recess.

C. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR CITY OWNED PROPERTY LOCATED AT RICHMOND HILL FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED ARMORY AND A PARKS AND RECREATION APPROVED RECREATIONAL FACILITY

ORDINANCE NO. 3016 - ORDINANCE REZONING PROPERTY LOCATED AT RICHMOND HILL FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3017 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A PROPOSED ARMORY AND A PARKS AND RECREATION APPROVED RECREATIONAL FACILITY

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 7:12 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Ms. Shannon Tuch, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at Richmond Hill from RS-2 Residential Single-Family Low Density District to Institutional

District/Conditional Use and a request to issue a conditional use permit for an associated Master Plan.

On February 28, 2003, the City of Asheville Parks and Recreation Department submitted a request to conditionally rezone the Richmond Hill Park property, in the Richmond Hill neighborhood in north Asheville, from its current RS-2 classification to Institutional/Conditional Use.

The conditional use rezoning request is for a large undeveloped parcel located between Richmond Hill Road and Riverview Church Road (PIN No. 9637.06-28-5877) totaling 183.07 acres (City Exhibit 3 – Location Map). The conditional use component of this application will be a site Master Plan showing the construction of 1 Armory multi-purpose building, 1 Armory maintenance and storage building, and 1 public gymnasium along with 5 parks and recreation designed ball fields with associated drives, parking areas, and pedestrian connections (City Exhibit 3 – Site Plan).

The project site is located within the City Limits and is surrounded primarily by vacant lots, agricultural land, and low density single family homes zoned RS-2, RM-6, and RM-8 all of which are located in the City's extraterritorial jurisdiction (ETJ). The primary access into the park is proposed through an extension off of Richmond Hill Drive with 2 secondary access points being proposed off of Riverview Church Road and at the current existing entrance off of Richmond Hill Road. It is the intent of the Master Plan to route the majority of the park traffic through the primary entrance to alleviate some of the traffic related issues around the existing entrance.

The majority of the site is a mixed evergreen/deciduous forest with active hiking/biking trails and an 18-hole disc golf course. The proposed site plan attempts to preserve as much of the existing healthy vegetation as is possible by locating the Armory and ball fields in areas where ground disturbance can be kept to a practicable minimum while relocating the existing disc golf course to another area of the park that can support this activity. In addition, future greenway connections, BMX facility, playground and other park amenities are delineated along with a wildlife preservation area to remain unaffected by the park development.

The project will provide a total of 300 parking spaces, bicycle parking, and a 30'wide Type "D" Landscape Buffer as required by the Unified Development Ordinance (UDO).

The RS-2 Residential Single-Family Low Density District is established to permit low density single-family dwellings and other compatible uses in recognition of environmental constraints and the need to preserve important resources while promoting a suitable environment for single-family living.

The Institutional District is established to reserve land for the development of major educational facilities, major medical facilities and other complementary uses such as, but not limited to, public services. Development standards for uses in this district are established to minimize conflict with adjacent land uses.

The Institutional classification is being sought after to allow for the construction and operation of a U.S. National Guard Armory division in need of relocation from their current diminishing site on Shelburne Road. The proposed plan will accommodate the division's 175 reservists who will be using the facility 1 weekend a month for (classroom) training and organizing. The approximate 12 acres (and buildings) dedicated to the Armory site will revert back to the City in the event that the Armory vacates the site. Due to the forced relocation, funding for the complete cooperative Armory/Park project will be 100% federally funded.

As part of the special requirements applied to Uses by Right Subject to Special Requirements, the project must meet a single condition for Government Buildings as found in section 7-16-1(c)(31) of the UDO:

b. **Shall not contain protective function, jails/detention facilities, or related facilities.**
There will be no protective function, jails/detention facilities, or related facilities in this development.

The Technical Review Committee (TRC) met on March 17, 2003, at which time the TRC made a positive recommendation that the project be forwarded to the Planning and Zoning Commission.

The Planning and Zoning Commission reviewed this project at their April 2, 2003, meeting where the Commission unanimously (7-0) recommended approval of the project with the following conditions:

1. Address all TRC conditions.
2. Disturbance of on-site vegetation shall be limited to areas shown on the site plan to the maximum extent practicable.
3. Site lighting, especially the ball field lights, shall be installed pursuant to a lighting plan that minimizes light trespass onto adjoining properties and utilizes the best available lighting practices and technology.
4. Games at the ball fields will not be scheduled during weekends of Armory use.
5. Continue to explore options to mitigate potential traffic hazards.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (Section 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The development is within standards of development practice set forth by the City of Asheville and other governmental units. In addition, the proposed building plans will be approved by N. C. Dept. of Insurance as City of Asheville property. Additional studies related to traffic and environmental issues are also being investigated.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The183 acre site's topography ranges in slope and vegetation. The development of largest impact is being sited to control land disturbing activity in an effort to preserve as much of the existing vegetation and slope as is practicable, including the areas around the periphery of the park which will serve to buffer the neighboring properties. Lower impact uses are being relocated to the more environmentally sensitive areas of the park with a large portion being preserved as a wildlife preservation area. In addition, Best Management Practices are being applied to control stormwater runoff and promote biofiltration in an effort to minimize impact on the existing tributaries on site and in the surrounding areas.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   There are a great number of studies demonstrating that close proximity to parks increase property values. In addition, a significant vegetative buffer is being preserved to help buffer the higher use areas from adjacent residential properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The proposed plan shows the construction of 3 buildings over 183 acres, well below the density requirements for the current zoning designation. In addition, the buildings will be buffered substantially by vegetation, distance, and topography to have a minimal influence on adjacent properties. Lastly, an active recreation area and passive park are highly complementary to the character of the neighborhood.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed plan supports the Asheville City Plan 2025 through the cooperative efforts between the City of Asheville and a not-for-profit partner to develop facilities and deliver services to the community. In addition, the Best Management Practices (BMP) outlined by the application of pervious parking materials and bioretention/bioswale as proposed on the site Master Plan also address the goals outlined in the Comprehensive 2025 plan. Similarly, the plan also supports the Asheville City Plan 2010 by improving the City's recreational system through the construction or acquisition of new facilities at appropriate locations, including North Asheville. Lastly, the proposed site plan satisfies the smart growth goals of the City through identifying and preserving open space and natural areas through the application of the conditional use rezoning tool.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   This project is located in an established neighborhood with sufficient infrastructure to support the uses. In addition, a greenway system is being investigated in order to create an alternative transportation link to the park. Preliminary review has not revealed any significant problems in respect to utilities and the City's traffic engineer is examining options to improve emergency vehicle access.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard. The proposed Master Plan shows the creation of a new primary access point into the park routing traffic away from the existing problematic entrance at the end of Richmond Hill Road. The City's Parks and Recreation and Engineering Departments are studying the situation in an attempt to alleviate any current and/or future traffic issues along Richmond Hill Drive and are exploring options that may include:

   1) Providing a sidewalk along the primary vehicular access route as it passes through any residential areas (this includes Richmond Hill Drive from Pearson Bridge Road to the park).
   2) Providing traffic calming on the same segment. This would include some sort of intersection improvement at Richmond Hill Drive and Pearson Bridge Road, such as a neighborhood traffic circle or other calming element for both streets. It would also

include traffic calming elements spaced every 300-500 feet up Richmond Hill Drive, such as speed humps and islands.

The Planning and Zoning Commission and City staff recommend approval of the zoning change from RS-2 Residential Single-Family Low Density District to Institutional District/ Conditional Use and approval of the associated conditional use permit as proposed by the applicant, subject to the following conditions:

1. Address all TRC conditions
2. Disturbance of on-site vegetation shall be limited to areas shown on the site plan to the maximum extent practicable.
3. Site lighting, especially the ball field lights, shall be installed pursuant to a lighting plan that minimizes light trespass onto adjoining properties and utilizes the best available lighting practices and technology.
4. Games at the ball fields will not be scheduled during weekends of Armory use.
5. Continue to explore options to mitigate potential traffic hazards.

Upon inquiry of Councilman Dunn, Superintendent of Parks Jim Orr said that approximately 30-40 acres will be set aside for two good quality disc courses. The current disc course is very well used and is praised as being a better course throughout the country. He explained that the 20 acres consists mostly of the area in between fairways to keep the natural setting. Approximately 600-700 people use the course in a two-month period of time if the weather is good. They do not pay a fee to play, but they have a membership with their own organization. The use was identified back in August of 2000 as a viable sporting activity and the disc golf group did the sweat equity and the City provided them with space and helped them with certain parts of some events. The disc golf group basically designed and built the golf course themselves and since the City will be disturbing the course and because it is so popular, that if it's relocated, the Parks & Recreation Dept. felt the disc golf group should design the relocated course and the City build it. The additional disc golf course requested by the disc golf group was proposed mainly due to the popularity and because the topography in this particular location in Western North Carolina lends itself to be a type and style of a golf course that normally you would not see elsewhere. The request was made and the City is looking into it.

Mr. Anthony Butzek, the City's Traffic Engineer, responded to various questions from Councilman Peterson regarding sidewalks and traffic calming on Richmond Hill Drive. He said that since these improvements are not for the park itself it was not possible at this time have those improvements paid by federal funds. Therefore, the recommendations in No. 7 will be a high priority for the City should the residents support those.

Upon inquiry of Councilman Ellis, Mr. Orr said that this is just like any other park that they have been given direction on to complete. They will go to as many outside funding sources to get parts of other structures completed. In addition, they are also looking at a community-built playground that will be in the park.

Councilman Mumpower felt comfortable in replacing the existing disc golf course but was concerned with the building of another one since that sport has a narrow utility in terms of our collectively community. Mr. Orr responded that development costs are very minimal. The costs incurred would be to purchase the basket locations and that particular apparatus for approximately $300-400. In the past on the existing course, the disc golf group has gotten donations for the individual holes to offset that expense. He did not have any cost breakdown of the City maintenance on the course, but it would be very minimal and only anticipates a crew going in and perhaps cutting down dead trees and doing some debris removal. This is not exclusive utilization for disc golfers, but can also be used by bird-watchers, hikers, bikers or joggers. The existing course brings tourists to Asheville.

Upon inquiry of Councilman Peterson, Mr. Orr said that there has been a need for additional ball fields in north Asheville for over 20 years and the fields will be regulation little league fields.

Mr. Alan Ditmore, Leicester resident, opposed the building of the new Armory. He felt that dense residential use is the best use for this property.

Ms. Hazel Fobes hoped that this new park would include exercise areas.

Ms. Virginia Jordan was concerned that with all the recreation uses proposed, the children participating will be exposed to an Army complex.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 7:52 p.m.

Councilman Mumpower asked if, after the disc golf courses are built, this would be a permanent dedication of use of that acreage. Mr. Orr said we do have flexibility if the interest goes away.. We have an arrangement with the WNC Disc Golf Association as a co-sponsored activity and until we see any type of evidence that that activity diminishes greatly, we would continue the agreement.

For Council's information, City Attorney Oast said that it's his understanding that if this is approved, the current Armory on Shelburne Road will be closed.

Col. Bill Johnson, Facilities Manager for the North Carolina Army National Guard, gave a brief background on why the Amory is requesting this conditional use rezoning and permit. In summary, a re-organization study of the units in the National Guard was performed. As a result of that study, a new unit would be coming to Asheville and they needed additional parking spaces and needed to expand on about 12-15 acres. The existing site had 12 acres, however, the N.C. Dept. of Transportation took approximately 3 acres for the interstate, leaving them with 9 acres. Looking at the state geographically, they determined Asheville was a good site to bring the new unit because they assist in different emergency situations, such as flooding (that our Military Police Units help out) and blizzards (where our vehicles are used). The facility that we currently have will revert back to the City and there will only be one readiness facility in Asheville. He said that this is a Military Police unit and basically they assist combat forces to help circulate refugees, etc. Their normal training is conducted at Fort Jackson, S.C., with the exception of paper-work training. The only training that will be conducted at this Asheville facility on a drill weekend will be a paper-work type of an exercise.

Councilman Mumpower said that the existing Amory has probably had different units stationed in it and questioned that even though the Military Police Unit is there now, what is the possibility that it may change in the future. Col. Johnson said that the planning cycle is now out to 2009 with no proposed changes. The next extension will be to 2014. He didn't foresee any changes in that particular unit in the future. He did point out that there was a Military Police unit located here years ago. That reverted to a Quarter Master Battalion Headquarters and now has reverted back to Military Police.

When Councilman Mumpower asked if he was correct in stating that the facility could not be used to incarcerate people, Col. Johnson said he didn't perceive that. Ms. Tuch pointed out that a condition in the Uses by Right Subject to Special Conditions states that the development "shall not contain protective function, jails/detention facilities, or related facilities." Col. Johnson said that he was not aware of any potential for any jail-type facility.

Upon inquiry of Councilman Peterson about the types of vehicles driving to and from the facility, Col. Johnson said Monday-Friday seven or eight staff will be driving their personal vehicles. On a drill weekend, the largest vehicle will be a 5-ton truck or humvees.

When Councilman Peterson asked if the public might use any space in the facility, Col. Johnson (City Exhibit 4 – Conceptual Diagram) said that if an agreement is worked out as a joint use of this facility, the public will be able to use the gymnasium, classrooms, restrooms and parking spaces at no cost. The only time the facility is used heavily is on the drill weekend, which is normally one weekend a month.

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that this property is not suitable for residential development due to the topography and problems with water and sewer.

Mayor Worley spoke in support of this excellent partnership between the National Guard and the City.

Councilman Peterson moved to adopt Ordinance No. 3016 to rezone property located at Richmond Hill from RS-2 Residential Single-Family Low Density District to Institutional District/Conditional Use. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 275

Councilman Peterson hoped the City will look as soon as practical at traffic calming and sidewalks on Richmond Hill Drive as recommended by the City's Traffic Engineer in Condition No. 7.

Councilman Ellis moved to adopt Ordinance No. 3017, to issue a conditional use permit for a proposed Armory and a Parks and Recreation approved recreational facility, subject to the following conditions: (1) All Technical Review Committee conditions be met; (2) Disturbance of on-site vegetation shall be limited to areas shown on the site plan to the maximum extent practicable; (3) Site lighting, especially the ball field lights, shall be installed pursuant to a lighting plan that minimizes light trespass onto adjoining properties and utilizes the best available lighting practices and technology; (4) Games at the ball fields will not be scheduled during weekends of Armory use; and (5) Continue to explore options to mitigate potential traffic hazards. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 277

D. PUBLIC HEARING TO CONSIDER ADOPTION OF THE ASHEVILLE CITY PLAN 2025

Mayor Worley said that, as discussed at the April 15, 2003, worksession, City Council will not consider adoption of the plan at this meeting. The public hearing will be held to listen to public comments. After the public hearing, Council will need time to study the plan carefully, taking into consideration the comments. Then, at a future date undetermined, City Council will consider adoption of the plan.

Mayor Worley opened the public hearing at 8:13 p.m.

Planning & Development Director Scott Shuford said that this is consideration of a resolution adopting the Asheville City Plan 2025 as the official comprehensive plan for the City of Asheville. This public hearing was advertised on April 11 and April 18, 2003.

This culminates a two year planning and public participation process that has been overseen in great detail by a 60 member committee (the City Plan Advisory Committee – CPAC) and has involved nine public forums, one major community meeting, and innumerable CPAC meetings, focus group meetings and public presentations. The effort to involve the public in developing this plan has been unprecedented in the City's history and has included surveys, television presentations and announcements, outreach to specific groups (particularly groups that might typically be underrepresented at standard public forums, including minority groups and business organizations), media coverage, newspaper editorials, and other inventive methods of capturing public input. The reward for this effort has been over 1,000 specific comments from the public that have been carefully evaluated by CPAC and included in the plan.

The Asheville City Plan 2025 will serve as guide for development approvals, rezonings, code amendments, infrastructure improvements, legislative action requests, and other City efforts. However, the plan is not an end into itself – it is a guide for specific actions, with the individual consideration and implementation of these actions being the method by which the plan will be put into effect.

The Asheville City Plan 2025 replaces the Asheville City Plan 2010, adopted in 1987.

The Planning and Zoning Commission recommended approval of Asheville City Plan 2025 as the official comprehensive plan for the City on March 27, 2003, by a unanimous vote (5-0), subject to the amendments. City staff also recommends approval of the plan as proposed for amendment.

After reviewing the background, Mr. Shuford explained the demographic changes.

Land use and transportation issues include (1) Asheville has tripled in land area over the past 50 years; (2) Asheville's density (persons per square mile) has decreased by 50% over the past 50 years; and (3) we have moved from an urban development pattern to a suburban development pattern. The costs associated with a suburban development pattern are that it's expensive to serve, has environmental problems and encounters convenience costs. A house that costs $150,000 in Asheville can be purchased for $116,000 in Greensboro according to a Coldwell Banker study.

He explained how mass transit requires 8-16 units per acre for efficient service, how Asheville's development pattern forces reliance on the automobile, that NC DOT projects that 80% of the traffic on the new I-26 Connector will be local traffic, and that there is a huge pressure on arterials and interstates. Current development patterns are not sustainable and we need to seek opportunities to recover an urban development pattern.

Land use ideas include (1) incorporate "green building" concepts; (2) preserve open space, historic resources; (3) promote affordable housing; (4) more urban villages; (5) higher density/greater zoning flexibility; and (6) coordinate land planning with Buncombe County.

Transportation ideas include: (1) missed use development pattern; (2) transit; (3) synchronize traffic signals; (4) walkable and bikeable infrastructure; and (5) construct I-26 Connector consistent with community recommendations.

He then reviewed the economic trends in Asheville. Economic development ideas include (1) high tech workforce; (2) reserve industrial land; (3) better use of our educational institutions; (4) develop and improve standards for new economy: arts and crafts; low impact; (5) use quality of life to attract/retain business; (6) regional industrial development; (7) more innovation in "branding" – creating an image for Asheville; (8) create a "wired" community and affordable (high speed internet access) bandwidth focusing on grass-roots e-business; and (9) support local businesses.

Air quality ideas include (1) high density, mixed use, walkable communities; (2) regional cooperation to reduce air pollution; (3) lobby for solutions to air quality problems; (4) develop, improve and enforce industry standards for air pollution; (5) promote mass transit; (6) City fleet use alternative fuels; and (7) green building techniques.

Water quality ideas include: (1) City to continue to work with RiverLink to develop/implement master plan; (2) regional cooperation to reduce water pollution; (3) develop, improve and enforce industry standards for water pollution; (4) improved stormwater management regulations; and (5) green building techniques.

Mr. Shuford then explained smart growth. Long range planning includes transformation of commercial corridors; transit-supported density; walkable and bikeable; tax equity; strong neighborhoods; parks, open space and conservation areas; compatible, high quality infill development; strong Center City; flexible development regulations; improved intergovernmental coordination; effective City services; regional economy; development in character with community; compact urban form; clean air and water; skill-based entrepreneurial economy; green building tools and incentives; effective public participation; affordable housing; preservation of historic and natural resources; and connected, efficient and attractive streets.

Mr. Paul Godfrey, facilitator to the 2025 process, explained that City Council appointed 61 people and gave them a charge that they took seriously. The charge was to gather public input and use that public input in the development of a plan for the future of Asheville. They took the task to heart. The entire process was truly citizen-driven.

Mr. Alan Ditmore said the plan's goals are economic growth and quality of life. He disagrees with those goals noting that his goals are equality and sustainability.

Mr. Paul Van Haden suggested making sure there is adequate open space in the 2025 plan and suggested bringing back the trolley system.

Mr. Pat Whalen, member of CPAC, spoke about the 2-year process. He reiterated that they held nine public forums, one major community meeting, and innumerable CPAC meetings, focus group meetings and public presentations. They tried very hard to give each resident in our community numerous opportunities for comment on the plan. The plan is not perfect, but it does represent thousands and thousands of hours of citizens' efforts and is a fair representation of the voices of the citizens of Asheville. The increased density the plan offers our City is our best chance to build and maintain a fiscally sound local government and to control our taxes.

Mr. Keith Thomson, member of CPAC, spoke in support of the 2025 Plan and reiterated the real effort that was made to include all comments. He pointed out that this plan is an on-going process.

Ms. Hazel Fobes, member of CPAC, said the Committee members accepted Council's challenge and everyone learned to listen to each other. She said they focused on the goals and pointed out how all four goals are interrelated. Even though the plan is not perfect, she said they are proud of what they accomplished and could present to Council.

470

Mr. Mike Lewis, member of CPAC, commented on some of the concerns he has heard surrounding the 2025 Plan. He stressed that the Committee put as great an effort forth as they could to solicit public participation and felt that the Plan is community represented. Even though the plan is long, a lot of citizen input was incorporated and planning is complicated and is a tedious process. While he was sure that a lot of improvements could be made to the Plan, he hoped City Council would look at each improvement very carefully. Even though we need to look ahead to the future, realistically little will survive until 2025. But, that is the nature of plans that are applied to dynamic situations. If we as citizens accept Asheville's current economic as a standard by which to measure our community success, then we are in bad shape. That opinion reflects a lack of faith in the community and if we express that sort of hopefulness no one will bring a new business to this community and Asheville will become an economic wasteland. The 2025 Plan reflects a certain level of optimism that we can resolve our problems and that together we can generate a vibrant economy in Asheville. He urged Council to adopt the Plan fundamentally unchanged.

Ms. Barber Melton, member of CPAC, briefed Council on the hard work and many hours that the Committee devoted to bringing this Plan before Council. She supported the Plan and hoped Council would do the same.

Councilman Mumpower said that there are some members of Council that do have concerns. We are called on to vote on this document for a reason. We're part of the system of checks and balances and we have a responsibility to do that in a careful manner. It's not easy to speak against the good efforts of 61 to 600 people, but in fairness, some of us do have some concerns and we will try hard to address those concerns and try to craft a document that carefully addresses our future. It is a serous document, not only a guideline. Whatever plan we craft is going to be utilized as a guide and resource for a long time in the future, and he wants to make sure it can be used as a serious resource. Hopefully we can address concerns in a constructive fashion.

Councilwoman Jones was very encouraged to hear the speakers say how important the community building aspect of the development of the plan was.

Councilman Peterson said that Council has heard the comments at this hearing and noted that most of Council will be reviewing the entire document. If people have further concerns or views or support, he encouraged them to contact Council members. The public input isn't closed yet because City Council will be having a lot of discussion.

Councilman Dunn congratulated the CPAC for the hard work, but he has serious questions about the Plan. For an example, there is nothing in this plan about government and taxes. He suggested we name the 2025 Plan the City Vision 2025. Sometimes plans change and he doesn't want to see future leaders saddled with a document they wish they didn't have.

At 9:12 p.m., Mayor Worley closed the public hearing.

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REQUIRE A CONDITIONAL USE PERMIT FOR DRIVE-THROUGH FACILITIES IN THE CENTRAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 9:12 p.m.

Urban Designer Alan Glines said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to require a conditional use permit for drive-through facilities in the Central Business District. This public hearing was advertised on April 11 and 18, 2003.

This code amendment would establish a requirement for the issuance of a conditional use permit for drive-through facilities in the Central Business District. Wachovia Bank recently received approval for a drive-through facility on Coxe Avenue from the Asheville Downtown Commission. In approving this facility, the Commission noted that drive-through uses contribute to the "suburbanization" of downtown and, while necessary on occasion, needed heightened review and public input. The Commission asked staff to promptly prepare a code amendment to make drive-through facilities a conditional use in the Central Business District.

On March 14, 2003, the Asheville Downtown Commission recommended approval of the proposed amendment by a vote of 8-1. At the Planning & Zoning Commission meeting held on April 2, 2003, the Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Based on Council's comments from the April 15, 2003, worksession, Mr. Glines proposed the following two revisions under the design standards and operational standards:

a. Design standards. Drive-through facilities should typically be accessory to a principal use of the property on which they are located. In general, it is anticipated that drive-through facilities will be located in, under, or behind a principal structure that conforms to any applicable setback, height or design requirements. Drive-through facilities should be separated by a minimum linear distance of 500 feet along any street.

b. Operational standards: No more than one driveway per street frontage should generally be provided for drive-through facilities; driveways should be no wider than two travel lanes (24 feet) and should be limited to secondary streets wherever possible. Special care shall be taken to address vehicle-pedestrian conflict points in the location and design of the facility; pursuant to this, driveways for drive-through facilities shall not be located closer than 100 feet from any street intersection.

Mr. Glines responded to various questions raised at the April 15, 2003, worksession, some being, but are not limited to: within the past three years, how many buildings have built drive-throughs in the Central Business District; what are the pros and cons associated with drive-throughs in the Central Business District; and is air quality an issue with drive-throughs.

Mr. Glines responded to various questions/comments from Councilman Peterson, some being, but are not limited to: how would someone get approval to put in a drive-through; what is the definition of "accessory" and "principal use"; clarification of where a drive-through facility can be located on a principal structure; do all new buildings downtown have to be built with zero setbacks; how would this affect someone who has a large building and parking lot who wants to put an ATM at the edge of the parking lot; is an ATM a drive-through facility; and for buildings that have a drive-through facility and an ATM, like the First Union Bank downtown, will they be prohibited by the 500 feet restriction.

Councilman Peterson disagreed with the no more than one driveway per street frontage requirement because having a place where people come in on one side and go out the other has greater safety for pedestrians. He felt that allowing two driveways is safer than only allowing one.

Mayor Worley closed the public hearing at 9:40 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower explained why he felt this amendment would only be setting up another layer of control that doesn't serve a solid purpose.

Councilman Ellis, liaison to the Downtown Commission, spoke in support of the amendment and said that the Downtown Commission is trying to make the downtown pedestrian friendly. The more drive-throughs you have will attract people from a larger area into the urban area, where we don't need more cars. He feels this ordinance amendment addresses the problem very well. Since this will be a conditional use permit, future Council can have the option of making that determination and placing conditions if they warrant them. He said that City Council appointed the Downtown Commission and we should listen to them since they have studied this matter in great detail.

Councilman Dunn felt businesses should be able to use their property anyway they want. He doesn't think this amendment will make it safer for pedestrians. He felt this amendment does not serve the City as a whole.

Councilman Peterson felt this matter should be sent back to staff for improvements brought out at this public hearing.

Councilman Ellis moved to table this amendment and remand it back to City staff for further study. This motion was seconded by Councilwoman Jones and carried unanimously.

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PERMIT BED AND BREAKFAST INNS TO UTILIZE ACCESSORY STRUCTURES FOR A LIMITED NUMBER OF GUEST ROOMS

ORDINANCE NO. 3018 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCE TO PERMIT BED AND BREAKFAST INNS TO UTILIZE ACCESSORY STRUCTURES FOR A LIMITED NUMBER OF GUEST ROOMS

Mayor Worley opened the public hearing at 9:52 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to permit Bed & Breakfast Inns to utilize accessory structures for a limited number of guest rooms. This public hearing was advertised on April 11 and 18, 2003.

This code amendment would permit bed and breakfast inns to utilize accessory structures for a limited number of guest rooms. The current code requirements do not permit carriage houses or other outbuildings to be used for guest accommodations for bed and breakfast inns. Since heritage tourism is an increasing and very positive component of our tourism industry, this amendment has both practical and economic development implications.

On April 2, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 9:54 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3018. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 284

At 9:55 p.m., Mayor Worley announced a short break.

G. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A NEW URBAN RESIDENTIAL DISTRICT

Mayor Worley opened the public hearing at 10:05 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to establish a new high density, infill zoning classification called Urban Residential District. This public hearing was advertised on April 11 and 18, 2003.

Frequently in community meetings and planning forums and most recently, the forums for the City Plan 2025 comprehensive plan process, citizens have identified the need for:

- access to appropriately scaled mixed use neighborhood services located close to home
- improved pedestrian facilities, projects that relate to the street and attractive streetscapes
- more affordable housing throughout the community and a greater variety of housing choices
- broader transportation options

One of the most pressing problems facing the City of Asheville is the need for affordable housing. The Urban Residential District (URD) has been developed to increase opportunities for the development of affordable housing and a mix of other housing types by allowing for an increase in density, scale, and use in areas of the city where infrastructure can accommodate higher density, infill development. It is intended that the URD be located on significant transit corridors and/or in areas planned for high growth.

Providing residential units is the primary goal of the URD, however, it is recognized that there is significant need for basic commercial retail, office use, and other activities that support residential uses in proximity to high density residential areas. The URD recognizes this and incorporates other non-residential uses on a limited basis. The proposed URD is an opportunity to incorporate the City Council adopted Smart Growth and sustainable development goals that have been identified by the community during the last decade.

The URD will encourage pedestrian activity by creating safe and inviting streetscapes with comfortable walking amenities. Traffic flow will be improved by limiting curb-cuts and requiring cross access between parcels. The URD will also make public transit a viable option by increasing density (i.e., the number of potential riders) in neighborhoods that are or can be served by the bus system.

Some of the long term benefits from developing any corridor in this pattern will be to build a livable community, strengthen the area's tax base, reduce driving trips on roadways, support mass transit, improve air quality and reduce sprawl.

The URD is not being developed with a particular corridor or area of the City in which it is to be applied. However, staff has been in preliminary contact with Mountain Housing Opportunities and the West End Clingman Avenue Neighborhood regarding the possible application of this new zoning designation in certain areas of this neighborhood.

At the Planning and Zoning Commission meeting on April 2, 2003, the Commission approved the creation of the Urban Residential District by a vote of 7-0. Staff also supports the adoption of this district.

Based on comments from City Council at their April 15, 2003, worksession, the following revision was recommended under the Permitted Uses by adding: "Noise producing uses such as, but not limited to, restaurants, pubs, bakeries, and laundry establishments are restricted to 50% of the ground floor level but can be buffered by non-residential office uses on the remaining 50% of the ground level and on that portion of the second story that is directly above the noise producing use. Residential units must be provided on the remainder of the second story and subsequent stories." However, after further consideration, staff became concerned that we may be acquiring a variety of noise producing uses in this district in order to gain this extra additional office space and that is not the intent of the URD. The City Attorney was also concerned about the description of noise producing uses and that the vagueness could affect the validity of the ordinance since it's essentially up to the Planning staff on what is or is not a noise producing use. The City Attorney was more comfortable with the original wording leaving the market to drive what ultimately is built in the limited commercial area and letting the developer make the decision of whether or not it's appropriate use for that area, given that there are residential units above and around it. The other alternative to reverting back to the original language would be to try to develop some sort of more objective determinable criteria for distinguishing between what is compatible with the residential use and what isn't, like limiting operating hours to normal work hours.

Upon inquiry of Councilman Dunn, Ms. Tuch said that we have the same design alternative opportunity in the URD that is in the Neighborhood Corridor District.

Upon inquiry of Councilman Mumpower, Ms. Tuch said that the Neighborhood Corridor District actually had an incentives table that allowed for increased stories and increased density. In this ordinance, we have built in some of that incentive to begin with.

Councilman Mumpower asked how much input was received from the developers and the community. Ms. Tuch explained that this has been a work in progress for some time. It differs from the Neighborhood Corridor District in that we had an idea of where the district would be applied (Broadway Corridor) and the Broadway Corridor people had a lot of input into that new district wording. In this case, we do not have an area in mind in which to go to and ask for their input.

Councilman Peterson didn't think City staff circulated the proposed ordinance around enough to obtain public comment. The good thing about this URD is that a lot of this new district is based upon the Neighborhood Corridor District and that was a result of a lot of public input. He felt that if the different areas have input into crafting the new district, they will be more accepting of application of it in their neighborhood.

Planning & Development Director Scott Shuford said that this was a request of City Council to bring this forward and we had a good model of the Neighborhood Corridor District. Planning staff feels comfortable with the opportunity to create an URD with twice the density potential of any of our existing residential districts. With any of our ordinances we do share them early with the Coalition of Asheville Neighborhood representative.

Upon inquiry of Councilman Mumpower, Mr. Shuford said that the size of the area to which this new district would be applied will depend upon the circumstances. They anticipate the district being applied to corridors or clusters – not a single lot.

After a short discussion initiated by Councilman Peterson about shared and remote parking, it was staff's recommendation to amend the shared and remote parking sub-section by adding "Residentially zoned areas may not be used to provide shared or remote parking for this district except that non-residential uses in residential districts may be used" as the second to the last sentence in that sub-section.

Councilman Peterson suggested limiting non-residential uses to some percentage of the building.

After a short discussion, City Attorney Oast suggested amending (b) Permitted Uses (1) to read: "All non-residential non-office uses are restricted to the first story or ground level floor and shall not occupy more than 50% of the ground floor gross square footage. Note: The balance of ground floor gross square footage can be used for common areas supporting the principal residential use."

In addition, City Attorney Oast suggested amending (b) Permitted Uses (2) to read: "Non-residential non-office uses are restricted to 50% of the ground floor level but can be buffered by office uses on the remaining 50% of the ground level on that portion of the second story that is directly above the non-residential non-office use. Residential units must be provided on the remainder of the second story and subsequent stories. Provided that non-residential uses are limited to no more than 30% of the building."

Mr. Pat Whalen spoke in support of the new district, but noted that the biggest problem in mixed-use projects is the noise from bars letting out late at night.

City Attorney Oast said that the City has no ability to control the hours of operation of pubs. He did say he thought there is legislation pending that may give the City more authority over the operation of ABC permitted establishments. The noise ordinance would apply, however, it's not as easy to enforce as the hours of operation.

After a short discussion, it was the recommendation of Mr. Shuford and City Attorney Oast to delete pubs as a conditional use.

Mayor Worley closed the public hearing at 10:41 p.m.

Due to some language inconsistencies and the lateness of the hour, Councilman Mumpower moved to continue this matter until May 27, 2003. This motion was seconded by Councilman Ellis and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-80 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONTINUE WITH NEGOTIATIONS WITH THE NATIONAL GUARD ARMORY FOR THE DEVELOPMENT OF A NEW ARMORY AT RICHMOND HILL PARK

Superintendent of Parks Jim Orr said that the Parks and Recreation Department is requesting City Council approval to proceed with an agreement between the City of Asheville and the North Carolina National Guard for the development of a new Armory at Richmond Hill Park.

The Parks and Recreation Department, along with other City departments, has been working for several months with the North Carolina National Guard for the development of a new Readiness Center to be located on approximately 12 acres at Richmond Hill. The current location of the Armory on Shelburne Road is not meeting the needs of the National Guard Armory and will be closed. In an effort to try to address the Armory's needs and to enhance Parks and Recreation's services at Richmond Hill, the following issues have been tentatively agreed upon as part of the overall agreement between both parties.

1. The National Guard Armory will appropriate approximately $7 million to the overall project. This appropriation will not require any local match by the City of Asheville.
2. The National Guard Armory will develop the entrance road to both the Armory facility and the proposed ball field complex to meet City standards.
3. The National Guard Armory will rough grade four baseball/softball fields and one multi-purpose soccer/football field.
4. As part of the overall construction of the new Armory facility, a gymnasium will be available for public use operated by the Parks and Recreation Department.
5. Landscaping around the Armory facility will meet the City's requirements.
6. The entire Armory facility will be fenced.
7. A shared parking area will be constructed at the Armory site for the Armory's use and as overflow parking for the park area.
8. The final design of the Armory facility will be approved by the City of Asheville.
9. All conditions outlined through the conditional use zoning/conditional use permit process will be implemented.
10. Construction of all facilities will meet Federal, State and Local permitting requirements.
11. The property will revert back to the City of Asheville when the Armory decides to vacate the property.
12. The master plan will be developed over time to provide enhanced recreation opportunities.

This is an excellent opportunity to provide much-needed recreation facilities in the Richmond Hill area as well as a state-of-the-art Readiness Center for Asheville. In August 2000, a community meeting was held in the Richmond Hill area. The information gathered from this meeting was used to develop the master plan for this 187-acre property. Another community meeting was held on March 19, 2003, with over 75 people attending to share their issues and concerns. The issue was discussed at the Planning and Zoning Commission meeting on April 2, 2003. There was no opposition voiced at that meeting and they unanimously approved the conditional use zoning.

The Parks and Recreation Department is seeking City Council's approval to authorize the City Manager to continue with negotiations for this agreement. The final contract will be brought back to City Council for approval at a later date.

Upon inquiry of Councilman Peterson, Mr. Orr explained the mutual use of the facility similar to the existing one on Shelburne Road.

Councilman Peterson asked if there was an appraisal for the 12 acres. City Manager Westbrook replied not to his knowledge. He said the National Guard asked if there was any City-property they could use for a new Armory. He said that this property was available and we would be willing to enter into a partnership to get the park jump-started. He explained that due to the funding situation, it would be awhile before we could actually start on the park. The National Guard has been involved in this community in the past and, after negotiating, they agreed to help clear the ball fields and provide some associated parking. In addition, since there will be a larger unit stationed here, there will be an economic development aspect to it.

Regarding value, Mr. Orr also stated that without doing a full-blown appraisal, the City would be getting a lot more than what the actual value of the property would be. In fact, 4-5 years ago, the cost of the clearing and initial infrastructure of the park totaled over $400,000.

Upon inquiry of Councilman Peterson, City Manager Westbrook said there are no plans yet for the existing Armory on Shelburne Road, which will revert back to the City once the new Armory is built.

Mr. Orr said that after the Armory and ball fields are constructed, the City has agreed with the Armory that there would be no programming of the ball field complex on the weekend that the Armory staff would have their full fledged unit. This will alleviate congestion and traffic.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-80. This motion was seconded by Councilwoman and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 405

B. RESOLUTION NO. 03-81 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Councilman Mumpower said that the terms of Darryl Hart (Regular), David Young (Regular), Chris Goodwin (Alternate) and Scott Fowler (Alternate) on the Board of Adjustment expired on January 21, 2003; however, City Council extended their terms until April 21, 2003.

On April 22, 2003, City Council interviewed Bradley Taylor, Richard Fort, Jane Mathews Jonathan Glover and Jerry Bailey. Raymond McClinton was unable to be interviewed on this date.

For the two Regular Members: Bradley Taylor received no votes, Richard Fort received 5 votes, Jane Mathews received 2 votes, Jonathan Glover received 1 vote and Jerry Bailey received 4 votes. Therefore, Richard Fort was appointed as a Regular Member to serve a three year term, term to expire January 21, 2006, and Jerry Bailey was appointed as a Regular Member to serve a three year term, term to expire January 21, 2006.

For the two Alternate Members: Bradley Taylor received 3 votes, Jane Mathews received 3 votes, and Jonathan Glover received 6 votes. Another vote was taken: Bradley Taylor received 3 votes and Jane Mathews received 3 votes. Therefore Jonathan Glover was appointed as an Alternate Member to serve a three year term, term to expire January 21, 2006, and the second vacancy for an Alternate member will be brought back to City Council when Vice-Mayor Bellamy returns from maternity leave. All appointments are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 406

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of March 28-April 10, 2003: BellSouth (Water), Rhonda Anders (Streets), Clifton Wilkins (Streets), Cynthia Carnes (Fire), Francine Judon (Streets), Carolyn Allen (Civic Center), Francis R. Bowen (Streets) and Sherwin Pevaroff (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilwoman Jones announced an event at Hill Street Baptist Church on Sunday, April 27, 2003, at 6:00 p.m.

Mr. Kevin Nuttall, representative of the Lighthouse Group, spoke to Council about the closing of Vance Monument and the City's park policy, which he feels violates the Free Speech Clause of the First and Fourteenth Amendments.

Mr. Alan Ditmore, Leicester resident, felt that the local presence of the National Guard is a threat to the security of the local population.

Mr. Paul Van Haden spoke about the need for City Council to enforce the citizens' rights to free speech.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 11:14 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 29, 2003
West Asheville Community Center
970 Haywood Road
Asheville, N.C.

7:00 p.m. – Community Meeting

Present: Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy (maternity leave)

The following topics/concerns were raised by residents and addressed by City Council and City staff: what can the Greeley Street community do to start a community watch program; what constitutes a single-family residence; why are homeowners held to higher standards than renters; there is a lot of noise from loud boom-boxes and speeding traffic on Greeley Street; wiring left by telephone company is a problem; sanitation crews who pick up yard waste don't pick all of it up but leaves a trail of waste in the street; street sweeper causes a tornado of dust and litter in the street is swept up into the air; does the noise ordinance address how late people can play loud music; need for pedestrian signal on Haywood Road across from Co-op; need for pedestrian sign on Haywood Road at Ingles; what is the process to get speed bumps on Greeley Street, Fairfax Avenue, Haywood Road and Brevard Road because people park their cars in the road forcing walkers into the street; cars are parked the wrong way on Haywood Road near the Trinity Methodist Church; loud boom-boxes on Haywood Road; prostitution and drug-dealing in front of 420 Haywood Road; Malvern Hills pool is a valuable community resource and hoped it would not be cut out of the budget this year; there is a need in the community for a place to ride trick bikes; garbage collection system should accommodate older and handicapped people; need for joint 911 system; need for more cooperation between City and County departments, in particular Police Department and Sheriff's Department; City Manager salary; concern over tax dollars spent on some art projects and could that money be used for something else; City needs to take care of what they have in Police Department so turnovers don't occur; concern with way Police Officers are evaluated; request for an external investigation of Police Department regarding misappropriation of City employee's time; praise for City's neighborhood walk program; support for additional Police officers in west Asheville; Pisgah View Apartment residents are tired of having their development being blamed for crime in the neighborhood; update on I-26 Connector; update on Haywood Road Corridor Plan; do landlords of rental properties have any obligation to homeowners; West End Bakery is wonderful addition to West Asheville; what can citizens do to become more involved in their community; and Police Department is a highly professional department and has dedicated officers.

Mayor Worley adjourned the meeting at 8:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 6, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy (participating via speaker phone); Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman James E. Ellis and Councilman Brian L. Peterson

CONSENT:

Relinquishing Easement for Sanitary Sewer Project

Summary: The consideration of a resolution authorizing the Mayor to relinquish the City's easement crossing real property owned by Hershel T. Anderson and Lucy D. Anderson.

As part of the Brevard Road Annexation Phase III Contract "3" sanitary system improvements project, the City was required to provide sanitary sewer service to this property and other adjoining parcels. The City acquired an easement from the Andersons. The Andersons conveyed an easement to the City for the aforesaid purpose and the easement was recorded in Deed Book 2446 at Page 523 of the Buncombe County Register of Deeds Office. Subsequent negotiations with other affected property owners resulted in the revision of the horizontal alignment of the sanitary sewer line away from the Anderson's property. The City's Engineering Department has determined that this easement is no longer needed for this purpose or any other future needs.

The Engineering Department recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed relinquishing the City's easement interest.

Clerk to Advertise an Offer to Purchase Disposal Parcel 74 on Martin Luther King Jr. Drive

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 74 in the East End/Valley Street Community for the appraised value of $12,000.

Disposal Parcel 74 is a residential lot located on the east side of Martin Luther King Jr. Drive at the intersection with Miller Street comprising 6,970 square feet. The lot is irregular in shape and sloping upward from street level. The bid from WNC Housing, Inc., equals the appraised value of $12,000. WNC Housing, Inc., proposed to construct a single family dwelling on the lot.

Approval of the resolution will establish the appraised value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 74.

Extension of Contract as a State Regional Hazardous Materials Response Team

Summary: The consideration of a resolution authorizing the City Manager to extend an agreement with the N. C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for Region Six.

North Carolina is divided into seven geographical regions for the purpose of hazardous material emergency response. The N. C. Dept. of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response.

The region six area covers from Rutherford County west to the Tennessee Border. Twenty counties comprise the response region. The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

The City of Asheville has been a regional hazardous materials provider since Fiscal Year 1994-1995, and during the nine years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

The N. C. Dept. of Public Safety and Crime Control is now in the process of extending contracts with seven North Carolina governmental units in North Carolina for provision of regional hazardous materials emergency response.

The State of North Carolina provides funding that fully supports the operational costs of the program.

City staff recommends City Council authorize the City Manager to renew extension of the Regional Hazardous Materials Contract with the N. C. Dept. of Public Safety and Crime Control for Region Six.

Water Authority Bid Awards for Critical Needs Phase III Contracts 1 and 2

Summary: This is a review of the Regional Water Authority's bid awards for Contracts 1 & 2 of the Critical Needs Phase III Water Distribution System Improvements.

Contract 1 - Sealed bids were received and opened on Thursday, March 6, 2003, for the Authority's Critical Needs Phase III Contract 1. Nine bids were received for Contract 1 with Wheeler Construction Company, Inc., submitting the low bid of $751,689.00. Contract 1 includes the installation of approximately 14,400 linear feet of 8-inch and 6-inch ductile iron waterlines with all related appurtenances. A complete list of bidders follows:

Critical Needs Phase III – Contract 1
Engineer's Estimate: $ 900,000

COMPANY	BID
Wheeler Construction Company, Weaverville, NC	$ 751,689.00
Precision Contracting, Inc., Asheville, NC	$ 765,900.00
Buckeye Construction Company, Canton, NC	$ 883,544.75
Payne, McGinn & Cummins, Inc., Travelers Rest, SC	$ 887,137.28

Huntley Construction Company, Inc., Asheville, NC	$ 959,889.00
Steppe Construction Company, Inc., Mill Spring, NC	$ 983,425.00
T & K Utilities, Asheville, NC	$ 985,100.00
Hobson Construction Company, Inc., Arden, NC	$ 993,925.00
BC & D Construction, Cullowhee, NC	$1,164,300.00

This Contract is the second of three that will comprise the Authority's Critical Needs Phase III program and are funded by the $3 million high unit cost grant. The first contract, Contract 3, is being performed by Precision Contracting and is nearing completion. Critical Needs projects are focused at locations where our existing infrastructure is old, leaking and inadequate to maintain high levels of customer service.

The Office of Minority Affairs reviewed these bids and Wheeler Construction Company's bid complies with the requirements of the Minority Business Program. McGill Associates, P.A., the project engineers for Contract 1, have recommended award of this contract to the low bidder, Wheeler Construction Company.

Contract 1 has a liquidated damages clause of $250.00 per day for failure to complete the project in the time allocated. Construction on the project will occur in the months of May through September 2003.

Contract 2 - Sealed bids were received and opened on Thursday, March 6, 2003, for the Authority's Critical Needs Phase III Contract 2. Nine bids were received for Contract 2 with Wheeler Construction Company, Inc., submitting the low bid of $692,172.50. Contract 2 includes the installation of approximately 14,400 linear feet of 8-inch and 6-inch ductile iron waterlines with all related appurtenances. A complete list of bidders follows:

Critical Needs Phase III – Contract 2
Engineer's Estimate: $ 900,000

COMPANY	BID
Wheeler Construction Company, Weaverville, NC	$ 692,172.50
T & K Utilities, Asheville, NC	$ 751,975.00
Precision Contracting, Inc., Asheville, NC	$ 756,700.00
Payne, McGinn & Cummins, Inc., Travelers Rest, SC	$ 756,994.12
Steppe Construction Company, Inc., Mill Spring, NC	$ 802,795.00
Buckeye Construction Company, Canton, NC	$ 838,526.50
Hobson Construction Company, Inc., Arden, NC	$ 933,750.00
BC & D Construction, Cullowhee, NC	$1,118,000.00
Huntley Construction Company, Inc., Asheville, NC	$1,132,307.00

This Contract is the third of three that will comprise the Authority's Critical Needs Phase III program and are funded by the $3 million high unit cost grant.

The Office of Minority Affairs reviewed these bids and Wheeler Construction Company's bid complies with the requirements of the Minority Business Program. McGill Associates, P.A., the project engineers for Contract 2, have recommended award of this contract to the low bidder, Wheeler Construction Company.

Contract 2 has a liquidated damages clause of $250.00 per day for failure to complete the project in the time allocated. Construction on the project will occur in the months of May through September 2003.

This report is provided to City Council for information only.

Water Authority Bid Award for Mount Royal Water Storage Tank

Summary: This is a review of the Regional Water Authority's bid award for the contract known as Mount Royal Water Storage Tank to Hobson Construction Co. Inc., of Arden, North Carolina, as the lowest responsible bidder.

The Engineering Department developed construction documents and specifications for the contract known as Mount Royal Water Storage Tank.

The project was advertised in March and due to lack of interest bids could not be opened as originally scheduled. The project was re-advertised and this time four bids were received and opened on April 10, 2003. The Engineering Department received very competitive bids. The following is a complete list of bidders:

Company	Bid
Hobson Construction Co., Inc	$150,970.00
Cooper Construction Company	$174,200.00
Buckeye Construction Company	$183,892.00
Hickory Construction Company	$219,500.00

The construction time for this project is identified as 90 calendar days in the contract documents. All bids were reviewed by the Office of Minority Affairs for compliance with the City's minority business goals. The bid by Hobson Construction Company, Inc. was found to be in full compliance and was deemed as a responsive bid.

This report is provided to City Council for information only.

Special Worksession on Joint Planning Area Scheduled for Thursday, May 29, 2003, at 12:15 p.m., in the First Floor North Conference Room, City Hall Building

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE FROM THE HAW CREEK PEDESTRIAN SAFETY TASK FORCE

Mr. Calvin Underwood updated City Council on the progress of the Haw Creek Pedestrian Safety Task Force.

Mr. Underwood said that in April of 2001 City Council adopted a resolution establishing the Haw Creek Pedestrian Task Force. The Task Force consists of staff from the City and N. C. Dept. of Transportation as well as community representatives. Members include: Al Kopf, Bernie Arghiere, Bob Brummond, Calvin Underwood, Cathy Ball, Chris Pelly, Deloris File, Gerry Hardesty, Jim Orr, Kenneth Wilson, Scott Shuford and Tony Moore.

He said that the criteria for sidewalks in the Pedestrian Thoroughfare Plan include: ½ mile of school; ½ mile of community center; ½ mile of church; commercial or business center; along major corridor; and high use area/pedestrian generator.

The Task Force has (1) met monthly since July 2001; (2) developed short term goal – install sidewalk between Liberty, Park and School; (3) developed long-term goals – install greenway connections in the Valley; develop an educational/awareness program; and sidewalks the length of the Valley.

The good news is that the TEA 21 Enhancement Grant has been approved for the Avon Road sidewalk as well as New Haw Creek Road sidewalk from Beverly Road to Arco Road.

Regarding the Avon Road Project, the design is complete for approximately 1,100 linear feet of sidewalk by City staff, they have obtained easements for sidewalk, and they have received a TEA 21 grant to fund most of the project.

Regarding New Haw Creek Project of Beverly Road to Arco Road, the design is complete for approximately 1,700 linear feet of sidewalk by City staff; they have received $150,000 from N. C Dept of Transportation (NCDOT) Small Urban Funds for curb and gutter, resurfacing and storm sewer pipe, they have obtained all but three easements needed to construct the sidewalk; and they have received a TEA 21 Grant for most of the remaining funding.

Mr. Underwood explained the financial status of the current Phase I project which estimated costs are $507,000 What they need to complete Phase I is (1) $140,000; (2) in-kind services to complete the work, and (3) continued support for the Task Force.

Mr. Underwood said Phase II consists of (1) New Haw Creek from Arco to the end of the NCDOT right-of-way southwest of the intersection with Tunnel Road; and (2) Trinity Chapel Road.

Regarding the Trinity Chapel Road Project, the design is complete for approximately 1,800 linear feet of sidewalk by City staff, they are exploring options for funding; and they have obtained one of ten easements needed for construction. The estimated costs for this project is $280,000, which is unfunded.

Regarding the New Haw Creek Project of Arco Road to Tunnel Road, the design is in progress for approximately 1,200 linear feet of sidewalk by City staff; they are exploring options for funding; they are preparing easements for sidewalk; they are contracting for easement acquisition; and, the State Road qualifies for NCDOT Small Urban Funds, which were requested in Fiscal Year 2003-04 budget The estimated costs for this project is $400,000, which they have the potential of $250,000.

The current status of Phase II projects is that they anticipate $250,000 from the NCDOT Small Urban Fund money; and the City will need to complete design and easement acquisition.

Beyond Phase II is (1) continue to ask for Small Urban Funds from the NCDOT for $250,000 per year for New Haw Creek Road, (2) apply for TEA 21 Funds Bi-Annually; and (3) request additional City support either in funding or in-kind services.

Mr. Chris Pelly asked Council to direct the Public Works staff to stretch the available dollars as much as possible.

City Engineer Cathy Ball and Task Force member responded to various questions from Council.

On behalf of City Council, Mayor Worley thanked Mr. Underwood, Mr. Pelly and the entire Task Force for their efforts on this important issue.

FINAL REPORT FROM THE SUSTAINABLE ECONOMIC DEVELOPMENT TASK FORCE

Mr. Jack Cecil, Chair of the Sustainable Economic Development Task Force, gave the final report of the Task Force, which has a sunset date of June 30, 2003.

He said that in May 2000, City Council adopted the Sustainable Economic Development Strategic Plan and, at the same time, appointed an Implementation Task Force (ITF) of local citizens to make recommendations for its implementation. The three-year term of the ITF expires in June 2003. He outlined several implementation successes for not only the City of Asheville, but for other agencies as well.

Going forward they would suggest the City prepare for fundamental shift in economic base; capitalize on strongest asset (Quality of Place); collaborate with other agencies; seek public-private partnerships for redevelopment; build tax base, provide housing, enhance community with higher density, mixed use development in commercial areas; improve both inter and intra-city transportation and telecommunications access and connectivity; continue Task Force in advisory capacity; and focus areas where the City has an opportunity for impact: sustainable development pattern; new development tools – regulatory and financial; riverfront development; entrepreneurial/small business development; technology infrastructure; transportation; and creative/knowledge economic workforce.

The Task Force members have determined a need for continuing this effort and have developed a recommendation asking Council to continue the Task Force as an advisory group for Phase II of implementation for an additional two-year period, terms to expire June 30, 2005.

Further, existing Task Force members were asked if they would like to continue serving in this capacity. For any vacancies, the Task Force will seek Council approval of any potential replacements.

City staff recommends City Council approve the resolution and re-appoint the Sustainable Economic Development Implementation Task Force for an additional two-year period to serve in an advisory capacity to City Council and City staff.

Upon inquiry of Vice-Mayor Bellamy, Planning & Development Director Scott Shuford explained how the Sustainable Economic Development Strategic Plan correlates to the Asheville City Plan 2025.

Vice-Mayor Bellamy suggested more women be appointed to the Task Force.

Councilman Mumpower asked how City Council could be more supportive of the Task Force. Mr. Cecil hoped Council will be supportive when there is an appropriate opportunity to make investment of capital; being supportive of the Task Force; and commitment to the Plan itself.

Councilman Dunn asked what the Task Force feels about the merits of annexation and what are some of the negative impacts of the Sustainable Economic Development Plan. Mr. Cecil responded and invited Councilman Dunn and other Council members to attend the Task Force meetings to get various questions and/or comments addressed.

Councilwoman Jones suggested more small business people as well as people who represent the creative economy be appointed to the Task Force.

On behalf of City Council, Mayor Worley thanked Mr. Cecil and the Task Force for their hard work on this Task Force.

486

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on May 13, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Revision to the Requirements for Home Occupations

Mr. Scott Shuford, Director of Planning and Development, said that this is the consideration of an amendment to the Unified Development Ordinance to revise the requirements for home occupations.

This code amendment is a general "housekeeping" type amendment intended to clarify and simplify the wording of this section of the Unified Development Ordinance and to formalize prior interpretations of the code. For example, the existing subsections containing language about prohibitions against advertising and allowance of signage that may have seemed to be potentially conflicting are combined in one section for clarification purposes.

The two material changes to the code are listed below. Each codifies prior interpretations of the code.

- The revision of the parking requirements to establish a specific parking requirement and to allow someone who cannot park in the side or rear to have a home occupation (subsection f).
- The establishment of a specific limitation on the number of visitors allowed (subsection i).

The Planning and Zoning Commission recommended approval of this code amendment on April 2, 2003, by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mr. Shuford responded to a question from Vice-Mayor Bellamy regarding artist's studios and said that he would amend the ordinance in order to allow incidental retail sales.

Mr. Shuford responded to Councilman Mumpower when he asked if there was a way to have the affected people review this amendment. Mr. Shuford said that they could send the ordinance to a number of people who have home occupations to review, but felt that that could not be accomplished prior to the scheduled public hearing next week. After further discussion, Councilman Mumpower felt the scheduled public hearing next week could proceed.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on the May 13, 2003, formal City Council agenda.

AMENDMENTS TO THE SOLICITATION/SIDEWALK ORDINANCES

Solicitation Ordinance

City Attorney Oast said that this is the consideration of amendments to the ordinance regulating solicitation and panhandling.

Back in November of last year, Council adopted some amendments to the City ordinance regulating solicitation and panhandling, particularly in downtown and Biltmore Village. Council expressed some concern about the reach of these amendments, and requested staff to propose further amendments to address these concerns.

The November amendments prohibited panhandling of any sort within a designated "halo" of certain locations such as banks, cash dispensing machines, or bus stops. It also prohibited panhandling while intoxicated or after dark; and prohibited panhandling from people standing in lines, such as for a musical or theatrical performance. The November amendments also prohibited panhandling within certain high traffic areas of downtown and Biltmore Village, because of their high tourist presence.

This draft retains the "halo" limitation, but clarifies that it applies to ATMs and financial institutions, and reduces the size of the halo from 50 to 20 feet; it retains other location-specific prohibitions, such as bus stops and taxi stands, and lines for entertainment venues; it adds outdoor dining areas and outdoor merchandise areas to the list of locations where panhandling is prohibited. The ordinance retains substantially all of the "aggressive begging" prohibitions, and adds some clarification to the acts that constitute aggressive begging. Also retained are the prohibitions against panhandling at night or while intoxicated. The previous ordinance prohibited those activities on public property; this proposal is not limited to public property.

The most significant change is in the regulation of panhandling within the high traffic areas. The areas themselves are the same. However, within these areas, a person would be able to make use of non-verbal means to panhandle or ask for money, such as displaying a sign, an open musical instrument case, or an upturned hat. What is prohibited within these areas is the use of personally-directed words or gestures. Solicitation between mutual acquaintances or family members is excepted from this prohibition.

These amendments target the conduct that has been a problem, and the locations where those problems arise, and is based on ordinances from other cities that have been judicially upheld. With respect to the high traffic areas, the amendments do not prohibit panhandling, but essentially establish a different threshold for what constitutes "aggressive begging".

These amendments are being brought forward with some changes to the sidewalk vendor ordinance.

If Council desires to implement the changes described above, a motion to adopt the ordinance is recommended.

City Attorney Oast explained one suggested change to the proposed amendment, which will permit passive solicitation after dark.

Discussion occurred regarding aggressive, active or passive solicitation; why this ordinance is not applied city-wide; and the need for education of the ordinance.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

Sidewalk Ordinance

Director of Downtown Development Sasha Vrtunski said that this is the consideration of a revised sidewalk ordinance to improve the administration and implementation of the ordinance.

In 1999, City Council approved revisions to the sidewalk ordinance, which regulated outdoor dining, merchandise, pushcarts and street entertainers on City sidewalks in downtown and Biltmore Village. Communities nationwide have discovered that active sidewalks augment downtown revitalization efforts and enhance downtown businesses. Asheville has been a leader in this area for the past ten years. Downtown currently has 21 restaurants with sidewalk dining, 4 retail shops that display merchandise, 12 pushcarts and approximately 70 street entertainers. These uses contribute to our vibrant downtown and help businesses expand their sales area, especially during the warmer months.

It has been four years since the last amendments to the ordinance and staff felt that there was a need to fine-tune the ordinance. Some of the changes are simply wording changes that will make the ordinance clearer for both the public and staff. Other changes are being recommended to you as substantive ways to streamline and improve the ordinance.

This is not a complete summary of changes, but the major proposed changes are as follows:

Street Entertainers - With the revisions to the solicitation ordinance, it will be allowable for anyone to passively solicit. To make the sidewalk ordinance compatible with the solicitation ordinance, permits would no longer be issued for street entertainers. The rules for Street Entertainers in Section 16-145 (general requirements) would still be in force. Currently, police officers provide enforcement for this ordinance, and would continue to do so. If these revisions are passed, the City Development office will notify all current street entertainers of the changes, including the entire list of rules for entertainers.

Amendments to 16-145 include:

- Perform no longer than one hour in a location, and wait an hour before returning to that location. Generally, there have not been conflicts between entertainers, but this requires entertainers to share locations in downtown, especially popular ones.
- Not perform at locations designated for community event or festival, unless permitted to play at the event or festival by the coordinator. This is not a new rule per se, but has been added to this section.
- Minimum distance of 40 feet between entertainers.
- Entertainers must comply with the solicitation ordinance and the noise ordinance, and all other federal, state and local laws.
- Removal of requirement for street entertainers to obtain a permit.

Pushcarts

- Pushcarts may not be enclosed such that the pushcart operator can stand inside it.
- Pushcart operator shall keep the immediate area within a 5-foot radius of his/her pushcart clean.
- If a permitted pushcart operator requests to move, then he/she shall submit a new application and fee.
- Hours of operation extended from 9 a.m. – 10 p.m. to 7 a.m. - 10 p.m.
- Pushcart operators cannot be absent from their location for more than 15 consecutive days during the months of April through September. These months represent the busiest season for downtown, and there is a high demand for pushcart locations in the core of downtown. Currently, there is a problem with people obtaining permits, using the location occasionally, sometimes not at all, and tying up the spot so that no other pushcart vendor can use it. In cases where a pushcart operator is not consistently operating their cart,

staff will be able to revoke their permit for non-use and allow another individual to place a pushcart on the location.

No changes to the Outdoor Dining and Merchandise section.

City staff recommends approval of the proposed sidewalk ordinance revisions.

Upon inquiry of Councilwoman Jones, Ms. Vrtunski said that a permit is $125/year and we have 11 pushcarts.

After a short discussion after Councilwoman Jones brought up the issue about pushcarts being displaced during Bele Chere, it was pointed out that the prohibition applies to all outdoor festivals, not just Bele Chere. However, Ms. Vrtunski said that she would talk to the Bele Chere Board and perhaps a compromise could be reached, noting that the spots are extremely competitive.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

MISCELLANEOUS

At the City Manager's suggestion, it was the consensus of City Council to delete the May 20, 2003, City Council worksession. Councilwoman Jones suggested devoting one Tuesday afternoon for the budget worksession next year.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:58 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy (participating via speaker phone); Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Army veteran Wid Crain led City Council in the pledge of allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. PRESENTATION BY RIVERLINK

Ms. Karen Cragnolin, Executive Director of RiverLink, presented the City with a check, in the amount of $212,835.32, from RiverLink for funds it raised to help pay for the construction of the French Broad River Park. She talked about the on-going partnership with the City and the community at large.

On behalf of the entire Council, Mayor Worley thanked Ms. Cragnolin and RiverLink for their work with the City of Asheville.

B. PROCLAMATION PROCLAIMING THE MONTH OF MAY, 2003, AS "MENTAL HEALTH MONTH"

Councilman Mumpower read the proclamation proclaiming the month of May, 2003, as "Mental Health Month " in the City of Asheville. He presented the proclamation to Ms. Jane Carter, Director of the Mental Health Association in Buncombe County, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING THE WEEK OF MAY 17-23, 2003, AS "NATIONAL SAFE BOATING WEEK"

Councilman Peterson read the proclamation proclaiming the week of May 17-23, 2003, as "National Safe Boating Week" in the City of Asheville.

II. CONSENT:

Councilman Ellis asked that Consent Agenda Item "I" be removed from the Consent Agenda for discussion.

Mayor Worley asked that Consent Agenda Item "B" be removed from the Consent Agenda due to a conflict of interest.

2

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 22, 2003; THE COMMUNITY MEETING HELD ON APRIL 29, 2003; AND THE WORKSESSION HELD ON MAY 6, 2003**

B. **RESOLUTION AUTHORIZING THE MAYOR TO RELINQUISH THE CITY'S EASEMENT CROSSING REAL PROPERTY OWNED BY HERSHEL T. ANDERSON AND LUDY D. ANDERSON** – This item was removed from the Consent Agenda due to a conflict of interest by Mayor Worley.

C. **RESOLUTION NO. 03-82 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE DISPOSAL PARCEL 74 ON MARTIN LUTHER KING JR. DRIVE**

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 74 in the East End/Valley Street Community for the appraised value of $12,000.

Disposal Parcel 74 is a residential lot located on the east side of Martin Luther King Jr. Drive at the intersection with Miller Street comprising 6,970 square feet. The lot is irregular in shape and sloping upward from street level. The bid from WNC Housing, Inc., equals the appraised value of $12,000. WNC Housing, Inc., proposed to construct a single family dwelling on the lot.

Approval of the resolution will establish the appraised value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 74.

RESOLUTION BOOK NO. 27 – PAGE 407

D. **RESOLUTION NO. 03-83 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY TO PROVIDE REGIONAL HAZARDOUS MATERIALS EMERGENCY RESPONSE FOR REGION SIX**

Summary: The consideration of a resolution authorizing the City Manager to extend an agreement with the N. C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for Region Six.

North Carolina is divided into seven geographical regions for the purpose of hazardous material emergency response. The N. C. Dept. of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response.

The region six area covers from Rutherford County west to the Tennessee Border. Twenty counties comprise the response region. The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

The City of Asheville has been a regional hazardous materials provider since Fiscal Year 1994-1995, and during the nine years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

The N. C. Dept. of Public Safety and Crime Control is now in the process of extending contracts with seven North Carolina governmental units in North Carolina for provision of regional hazardous materials emergency response.

The State of North Carolina provides funding that fully supports the operational costs of the program.

City staff recommends City Council authorize the City Manager to renew extension of the Regional Hazardous Materials Contract with the N. C. Dept. of Public Safety and Crime Control for Region Six.

E. RESOLUTION NO. 03-84 - RESOLUTION AMENDING THE CITY COUNCIL 2003 MEETING SCHEDULE TO (1) CANCEL THE MAY 20, 2003, WORKSESSION; AND (2) ADD A SPECIAL WORKSESSION ON MAY 29, 2003, AT 12:15 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., TO DISCUSS THE JOINT PLANNING AREA

RESOLUTION BOOK NO. 27 – PAGE 409

F. RESOLUTION NO. 03-85 - RESOLUTION EXTENDING THE TERM OF THE SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE FOR AN ADDITIONAL TWO YEARS

Summary: In May 2000, City Council adopted the Sustainable Economic Development Strategic Plan and, at the same time, appointed an Implementation Task Force (ITF) of local citizens to make recommendations for its implementation. The three-year term of the ITF expires in June 2003.

Going forward the Task Force suggested the City prepare for fundamental shift in economic base; capitalize on strongest asset (Quality of Place); collaborate with other agencies; seek public-private partnerships for redevelopment; build tax base, provide housing, enhance community with higher density, mixed use development in commercial areas; improve both inter and intra-city transportation and telecommunications access and connectivity; continue Task Force in advisory capacity; and focus areas where the City has an opportunity for impact: sustainable development pattern; new development tools – regulatory and financial; riverfront development; entrepreneurial/small business development; technology infrastructure; transportation; and creative/knowledge economic workforce.

The Task Force members have determined a need for continuing this effort and have developed a recommendation asking Council to continue the Task Force as an advisory group for Phase II of implementation for an additional two-year period, terms to expire June 30, 2005.

Further, existing Task Force members were asked if they would like to continue serving in this capacity. For any vacancies, the Task Force will seek Council approval of any potential replacements.

City staff recommends City Council approve the resolution and re-appoint the Sustainable Economic Development Implementation Task Force for an additional two-year period to serve in an advisory capacity to City Council and City staff.

G. RESOLUTION NO. 03-86 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE AN UNNAMED ALLEY OFF CATAWBA STREET AND SETTING A PUBLIC HEARING ON JUNE 10, 2003

RESOLUTION BOOK NO. 27 – PAGE 411

H. RESOLUTION NO. 03-87 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY AT THE CORNER OF LUFTY AND DRAKE STREETS TO NEIGHBORHOOD HOUSING SERVICES

Summary: The consideration of a resolution authorizing the Mayor to convey property on Lufty Street in the west Asheville community to Neighborhood Housing Services in the amount of $9,500.

On April 8, 2003, the City Council directed the City Clerk to advertise for upset bids on property on Lufty Street. The advertisement ran in the Asheville Citizen-Times on April 11, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Neighborhood Housing Services in the amount of $9,500 was not upset and the sale to Neighborhood Housing Services should be approved.

Approval of the resolution will authorize the sale of the property to Neighborhood Housing Services for the amount of $9,500.

City staff recommends adoption of the resolution authorizing the Mayor to convey property on Lufty Street to Neighborhood Housing Services in the amount of $9,500.

RESOLUTION BOOK NO. 27 – PAGE 412

I. ORDINANCE ESTABLISHING FILING FEE FOR OFFICES OF MAYOR AND CITY COUNCIL – This item was removed from the Consent Agenda for discussion.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Peterson moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Ellis and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA

ORDINANCE NO. 3019 - ORDINANCE ESTABLISHING FILING FEE FOR OFFICES OF MAYOR AND CITY COUNCIL

Summary: The consideration of an ordinance setting the filing fee for candidates for City Council.

One of the recommendations that came out of the work of the Campaign Finance Reform Committee is to increase the filing fee for City Council candidates. State law, N.C.G.S. 163-294.2, establishes a minimum filing fee of $5.00, but permits the governing board to set the fee, provided that the fee is not less than $5.00 nor more than 1% of the annual salary for the office. Council has apparently never set the filing fee, and it is the minimum $5.00 provided for in the statute.

Currently, the annual salary for the Mayor is $13,772; the annual salary for Council members is $9,390. The Vice-Mayor makes $11,268, but the Vice-Mayor is selected from the members of Council, not by election of the people, and is not an office for which the filing fee is applicable. Car allowances are not salary, and are not included in these amounts. One percent of the Mayor's salary is $137.72; one percent of a Council member's salary is $93.90.

The proposed ordinance rounds those amounts down to $135.00 and $90.00 respectively. They can be any amount less than the 1% figures set forth above, but more than $5.00. The statutes contain a provision, N.C.G.S. 163-107.1(d), wherein the filing fee can be avoided through a petition-like procedure.

Since Council salaries increase periodically, Council may want to consider reviewing this ordinance each election year.

If Council wishes to increase the filing fee for candidates for the offices of Mayor and City Council for the City of Asheville, adoption of the ordinance is recommended.

After a brief discussion, Councilman Ellis moved to increase the filing fees for candidates for the office of City Council Member from $5.00 to $75.00 and to increase the filing fees for candidates for the office of Mayor from $5.00 to $100.00. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 286

RESOLUTION NO. 03-88 - RESOLUTION AUTHORIZING THE MAYOR TO RELINQUISH THE CITY'S EASEMENT CROSSING REAL PROPERTY OWNED BY HERSHEL T. ANDERSON AND LUDY D. ANDERSON

Due to a conflict of interest by Mayor Worley, Mayor Worley asked Councilman Peterson to preside over the meeting during this item.

Councilman Mumpower moved to excuse Mayor Worley from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Upon inquiry of Councilman Dunn, City Attorney Oast said he didn't feel there was a disqualifying conflict of interest for Councilman Dunn.

Summary: The consideration of a resolution authorizing the Mayor to relinquish the City's easement crossing real property owned by Hershel T. Anderson and Lucy D. Anderson.

As part of the Brevard Road Annexation Phase III Contract "3" sanitary system improvements project, the City was required to provide sanitary sewer service to this property and other adjoining parcels. The City acquired an easement from the Andersons. The Andersons conveyed an easement to the City for the aforesaid purpose and the easement was recorded in Deed Book 2446 at Page 523 of the Buncombe County Register of Deeds Office. Subsequent negotiations with other affected property owners resulted in the revision of the horizontal alignment of the sanitary sewer line away from the Anderson's property. The City's Engineering Department has determined that this easement is no longer needed for this purpose or any other future needs.

The Engineering Department recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed relinquishing the City's easement interest.

Vice-Mayor Bellamy moved to adopt Resolution No. 03-88. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 413

Councilman Peterson relinquished the gavel back over to the Mayor to preside.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED ON KNOB HILL FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

Mayor Worley said that City Council received the following letter on Tuesday, May 13, 2003, from Michael and Shirley Wells: "The merits of rezoning the property located on Knob Hill Road are numerous. Rezoning the property would not only provide a buffer zone between the industrial area and the residential area that adjoins it, but would also fully utilize the available land as a means of providing for additional affordable housing. Rezoning the property would be a step forward, moving the community toward growth, with a new infusion of people able to liver closer to the Asheville area. The issues at stake today are the same issues that will be faced each and every time a piece of land falls into, what has been defined as, the 'Smart Growth' development pattern. There will be other properties that will come before the council with similar requests. As elected officials, your decision will be a difficult one; represent the best needs of the Asheville area or the best needs of the individual homeowner. Today, however, we will not ask you to make that decision. While we still believe our desire to build a quadraplex is justifiable, several homeowners in the neighborhood have made it clear that they are opposed to any growth to their community and frankly we have invested far too much time and energy in their irrational fears. Therefore, after much deliberation, we have chosen to withdraw our request to have the property located on Knob Hill Road rezoned. We appreciate all of the time and effort that has gone into bringing the request this far but would ask that you allow us to withdraw the petition."

B. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED AT 16 POND ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT (MOBILE HOME OVERLAY) TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3020 - ORDINANCE REZONING OF PROPERTY LOCATED AT 16 POND ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT (MOBILE HOME OVERLAY) TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:25 p.m.

Ms. Shannon Tuch, Urban Planner II, said that this is the consideration of a request to rezone property located at the southeast corner of the intersection of Brevard Road and Pond Road from RS-8 Residential Single-Family High Density District with a Mobile Home Overlay (MHO) to Highway Business District. This public hearing was advertised on May 2 and 9, 2003.

Susan G. and Darrell Fender, Ronald Gentry, Debra K. Gentry and Terry L. Gentry, applicants, are requesting to rezone the southeast corner of the intersection of Brevard Road and Pond Road (PIN No. 9627.16-93-0902) from RS-8 (MHO) to Highway Business District to allow for further development of the Brevard Road corridor. The existing land uses in the area include single-family residences and mobile homes to the north, east, and west of the subject property. However, these residential uses are zoned Highway Business District and are anticipated to change in use over time. Additional residential uses are located to the south of the site and are zoned RS-8, however, they remain underdeveloped or vacant. In addition, there are several commercial or commercial industrial uses to the north and west of the subject property that would be more compatible with a Highway Business use.

The purpose of the RS-8 district is to provide a high density per acre for single family dwellings but this designation appears to have been underutilized with no, or low density, residential development. The lack of high density single family residential development is likely due to the amount of commercial development and commercially zoned properties adjacent to the subject property or in the vicinity. The Highway Business District is established to address the needs of commercial development along major thoroughfares. The existence of an already established Highway Business corridor directs the future development of adjacent properties.

The site is located at the intersection of a major north-south thoroughfare and an east-west connector street, Pond Road, which already provides access to a number of commercial industrial uses to the west of the site.

A rezoning to Highway Business District would provide for appropriate continuity between the adjacent Highway Business zoned properties located along Brevard Road and would also serve as a compatible transition between the unzoned, undeveloped property on the east side of Brevard Road and the existing commercial industrial uses to the west of the subject property.

City staff feels Highway Business District is an appropriate zoning category for the property and recommends approval of the request to rezone the property to Highway Business District. The Planning and Zoning Commission at its April 5, 2003, meeting voted 7-0 to recommend approval of the rezoning as well.

Mr. William F. Wolcott III, listed agent for the property owners, spoke in support of the rezoning request.

Mayor Worley closed the public hearing at 5:32 p.m.

Upon inquiry of Councilman Peterson, Ms. Tuch explained the type of buffer required.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

8

Councilman Ellis moved for the adoption of Ordinance No. 3020. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 287

C. PUBLIC HEARING TO CONSIDER A REVISION TO THE CONDITIONAL USE PERMIT FOR THE BROTHERTON AVENUE MULTI-FAMILY PROJECT LOCATED AT THE INTERSECTION OF BROTHERTON AVENUE AND VIRGINIA AVENUE

ORDINANCE NO. 3021 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT FOR THE BROTHERTON AVENUE MULTI-FAMILY PROJECT LOCATED AT THE INTERSECTION OF BROTHERTON AVENUE AND VIRGINIA AVENUE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:33 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Carter Pettibone, Urban Planner II, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a revision to the Conditional Use Permit for the Brotherton Commons multi-family project to allow for revisions to the approved site plan for the project.

The project site, which is consists of two properties (PIN Nos. 9638.18-21-9316 and 9638.18-31-0773) currently owned by the City of Asheville, is located within the City Limits at the intersection of Brotherton Avenue and Virginia Avenue (City Exhibit 3 – Location Map). The subject properties are zoned RM-8 Residential Multi-Family Medium Density District/Conditional Use and are surrounded by a predominantly detached single-family neighborhood zoned RS-8.

Originally, this project was approved as a conditional use rezoning from RS-8 to RM-8 (CUZ) and a conditional use permit for the project was issued on May 28, 2002. The project then received conditional technical approval from the Technical Review Committee and the developer began site development. On February 28, 2003, the applicant, Jack Morse, submitted development plans for a revision to the conditional use permit for the Brotherton Commons project. The proposed project consists of 32 condominium units along with a community center, open spaces, and two parking areas. The Technical Review Committee (TRC) reviewed the plans at its March 17, 2003, meeting and recommended approval with conditions. Some of the TRC comments were addressed in subsequent revised plans.

Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed.

Originally, the site plan called for the 32 dwelling units on 7.36 acres to be housed in nine buildings and average 1,100 square feet in area. As now proposed, the 32 dwelling units will be consolidated in 6 buildings and average 1,064 square feet (City Exhibit 3 – Site Plan). The arrangement of the buildings has also been revised with fewer units fronting on Virginia Avenue and Brotherton Avenue. The two buildings fronting on Virginia Avenue will remain two stories in height and the remaining buildings will be three stories, which is similar to what was originally proposed (City Exhibit 3 – Building Elevations). No additional dwelling units or developed areas within the site are proposed and the density of the project will remain 4.35 units per acre. Twenty-two of the 32 units will be reserved as affordable units (City Exhibit 3 – Site Plan).

A two-story (one story with basement) community building was also proposed initially and has been changed to a smaller single-story multi-purpose community center that can be converted from open-air shelter to heated space. In the place of the area taken up by the larger community building, the developer is now proposing a community garden and playground area.

The size of the two parking areas have been increased; now proposed are 59 spaces up from the 48 original. The developer also now proposes double-loaded spaces and optional covered parking for some of the spaces in the larger parking lot located off Brotherton Avenue. As originally proposed the dwelling units will utilize the two parking areas and no individual driveways are proposed.

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2(c) of the Unified Development Ordinance (UDO). City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety.

The project received conditional technical approval from the Water Resources Department, the Fire Department, Metropolitan Sewerage District (MSD), Engineering, and other City Departments. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

The project complies with all City standards in regards to maximum clearing and grading, erosion control, and maximum slope for streets The project has been designed with consideration for the natural and topographic features on the site and the immediate vicinity and preserves significant

10

natural areas. Development, the density of which is considerably less than permitted in RM-8, is also concentrated near the intersection of Virginia Avenue and Brotherton Avenue and is not proposed to the east and north, which is significantly steeper and more heavily wooded.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

The project's density is below what is permitted by the either the site's RM-8 or the surrounding area's RS-8 zoning. Building design and scale has also been designed to be compatible with surrounding residential development.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

The project has been designed to take advantage of the slope of the property by incorporating basement dwelling units in some buildings. The proposed density is consistent with the area's current development and the project is intended to be compatible with the character of the surrounding area.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

The proposed residential development is at a density lower than what is permitted by the existing zoning district and appears to be consistent with the 2010 Comprehensive Plan. The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The development will also meet some of the City's Smart Growth policies.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

The project received technical approval from the Technical Review Committee, which includes representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works. Tests of fire hydrants in the neighborhood indicate that recent improvements to the water infrastructure have been effective in resolving concerns about water flow for fire protection and water pressure.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

Originally, as approved as part of the conditional use rezoning, it was thought that the traffic impact generated by the proposed use would not exceed the volume anticipated by single-family residential development. Since no additional dwelling units are proposed, no additional traffic is anticipated. The project has also been designed with pedestrian oriented characteristics.

The plan for the revision to the conditional use permit was reviewed by the TRC at it's March 17, 2003, meeting. The TRC identified a number of outstanding technical issues and recommended approval with the condition that these issues be addressed prior to final approval. At present, the applicant is working with the various City departments to address these outstanding conditions.

Since all the conditions have not been addressed at this time, City staff recommends approval with the following conditions:

- The site plan must be revised to identify forested areas to be preserved on the entire site and provision must be made to protect these areas.
- The applicant and/or landscaper shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development and submit revised landscape plans.
- All plans must clearly and consistently identify areas to be set aside for permanent open space as required by the UDO.
- The developer must apply for a fee in lieu of sidewalks for the frontage of Brotherton Avenue not served by sidewalks.
- Fences to be used along Virginia Avenue or Brotherton Avenue are limited to four feet in height.
- All TRC comments are addressed.

Upon inquiry of Vice-Mayor Bellamy, Mr. Pettibone showed where the additional parking spaces would be located and how the landscaping will change.

When Councilman Dunn asked if the City awarded Community Development Block Grant (CDBG) funds for this project, Community Development Director Charlotte Caplan said that $397,000 of CDBG funds were allocated in 2000 for this project and $147,000 will come back as CDBG programming from the sale of the land.

Councilman Mumpower stated that he voted against the original conditional use permit because of traffic concerns and since there have been no changes to mitigate the traffic pattern, he would have to regretfully vote against the revised permit as well.

Upon inquiry of Councilman Mumpower about the developer paying a fee in lieu of installing sidewalks, Planning & Development Director Scott Shuford explained that due to the topography along Brotherton Avenue and the relatively few houses along that portion of dead-end road, a fee in lieu of was being requested. He said that this would not have to come back to Council in that it is a staff-administered process which must meet certain criteria.

When Councilman Peterson stated that it looks like a clear-cut forest on that site, Mr. Pettibone explained the previous landscaping (City Exhibit 4 – Brotherton Co-Housing Site Plan) plan vs. the new plan (City Exhibit 3 – Site Plan).

Mr. Jack Morse, developer, reiterated Mr. Shuford's comments about why they are applying for a fee in lieu of building sidewalks along Brotherton. He felt that the fee was in the ballpark of what it would cost to install a sidewalk. He said that he has met with the neighbors to outline the changes and he felt the changes were well received. He said that on a total of 7.5 acres, there is only disturbance on about 3 acres and that is where the buildings are located. He then explained the need for increased parking spaces.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:04 p.m.

Councilman Peterson felt the changes are fairly consistent with the original plan and meet the seven standards, but personally he didn't particularly like the way that the houses on Brotherton Avenue will have their backs toward the neighborhood. He felt staff needs to be aware that we are looking for something that is in character with the rest of the neighborhood.

Councilman Mumpower agreed with Councilman Peterson about the design of the project and felt there were many good things about the plan, but would have to vote against the revised permit just on the basis of consistency. He said the traffic issues that existed with the last plan have been enhanced with the addition of 11 more parking spaces.

12

Councilman Dunn was also concerned about the traffic but recognized the need for affordable housing. He hoped that in the future when CDBG money is granted that projects be constructed quicker.

Councilwoman Jones moved for the adoption of Ordinance No. 3021 amending the Conditional Use Permit for the Brotherton Avenue multi-family project located at the intersection of Brotherton and Virginia Avenues, subject to the following conditions: (1) The site plan must be revised to identify forested areas to be preserved on the entire site and provision must be made to protect these areas; (2) The applicant and/or landscaper shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development and submit revised landscape plans; (3) All plans must clearly and consistently identify areas to be set aside for permanent open space as required by the UDO; (4) The developer must apply for a fee in lieu of sidewalks for the frontage of Brotherton Avenue not served by sidewalks; (5) Fences to be used along Virginia Avenue or Brotherton Avenue are limited to four feet in height; and (6) All TRC comments are addressed. This motion was seconded by Vice-Mayor Bellamy and carried on 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE 289

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE REQUIREMENTS FOR HOME OCCUPATIONS

ORDINANCE NO. 3022 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO REVISE THE REQUIREMENTS FOR HOME OCCUPATIONS

Mayor Worley opened the public hearing at 6:08 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to revise the requirements for home occupations. This public hearing was advertised on May 2 and 9, 2003.

This code amendment is a general "housekeeping" type amendment intended to clarify and simplify the wording of this section of the Unified Development Ordinance and to formalize prior interpretations of the code. For example, the existing subsections containing language about prohibitions against advertising and allowance of signage that may have seemed to be potentially conflicting are combined in one section for clarification purposes.

The two material changes to the code are listed below. Each codifies prior interpretations of the code.

- The revision of the parking requirements to establish a specific parking requirement and to allow someone who cannot park in the side or rear to have a home occupation (subsection f).

- The establishment of a specific limitation on the number of visitors allowed (subsection i).

The Planning and Zoning Commission recommended approval of this code amendment on April 2, 2003, by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

At Council's May 6, 2003, worksession an additional clarification was suggested in order to allow incidental retail sales. Staff suggests the following language be added to revise subsection (d): On premise retail sales shall not be a principal component of the home occupation; incidental retail sales of items directly associated with the principal home occupation may be allowed.

Upon inquiry of Mr. Chad Nesbitt, Mr. Shuford explained the ordinance amendment.

Upon inquiry of Mr. Bill Fishburne, Mr. Shuford said that this would not apply to an occasional Tupperware-type party.

Mr. Fred English, Haw Creek resident, felt this ordinance was not necessary.

Ms. Pat Wald briefly explained an incident where a school in the residentially zoned Beaverdam Road area was allowed after City Council had denied their rezoning request. Mr. Shuford explained the circumstances surrounding the rezoning noting that they are in the process of investigating Ms. Wald's concerns and they will report back to her.

Mayor Worley closed the public hearing at 6:21 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

After Councilman Mumpower questioned the limitation of six visitors, Mr. Shuford responded that a City staff member who has the experience of enforcing this ordinance suggested the number six. He felt six represents a reasonable amount of traffic volume and would be what you would typically see at any one time at perhaps at a dance class or musical lesson. He said they didn't research what other communities did in terms of that limit but would be happy to do that research if Council instructed him to do so.

Councilman Mumpower expressed his concerns about the six visitor limitation and wondered if we needed that provision in the ordinance or not. Mr. Shuford replied that in the absence of some specific quantitative study that manages to provide an exact number, it's really a policy issue for Council to decide whether six is a good number or not, or if Council wants to put that provision in or not. If a number is not put in, then you would have to rely on the good judgment of City staff to figure out what that provision means in terms of traffic impact.

Councilman Mumpower explained he was trying to make a case for affordable business for people who may not be able to afford the overhead.

As a compromise, Mayor Worley suggested the following revision to the second sentence of 7-16-1 (c) (32 (i): Pursuant to this, a maximum of six individuals per day will not be deemed to materially increase traffic.

Councilman Mumpower moved for the adoption of Ordinance No. 3022, with the following amendment to 7-16-1 (c) (32) (i) "The home occupation shall not materially increase the traffic that is found in its vicinity when the use is not in operation. Pursuant to this, a maximum of six individuals per day will not be deemed to materially increase traffic." This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 215

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 3023 - ORDINANCE AMENDING THE SOLICITATION AND PANHANDLING ORDINANCE

City Attorney Oast said that this is the consideration of amendments to the ordinance regulating solicitation and panhandling.

Back in November of last year, Council adopted some amendments to the City ordinance regulating solicitation and panhandling, particularly in downtown and Biltmore Village. Council expressed some concern about the reach of these amendments, and requested staff to propose further amendments to address these concerns.

The November amendments prohibited panhandling of any sort within a designated "halo" of certain locations such as banks, cash dispensing machines, or bus stops. It also prohibited panhandling while intoxicated or after dark; and prohibited panhandling from people standing in lines, such as for a musical or theatrical performance. The November amendments also prohibited panhandling within certain high traffic areas of downtown and Biltmore Village, because of their high tourist presence.

This draft retains the "halo" limitation, but clarifies that it applies to ATMs and financial institutions, and reduces the size of the halo from 50 to 20 feet; it retains other location-specific prohibitions, such as bus stops and taxi stands, and lines for entertainment venues; it adds outdoor dining areas and outdoor merchandise areas to the list of locations where panhandling is prohibited. The ordinance retains substantially all of the "aggressive begging" prohibitions, and adds some clarification to the acts that constitute aggressive begging. Also retained is the prohibition against panhandling while intoxicated. The previous ordinance prohibited those activities on public property; this proposal is not limited to public property.

The most significant change is in the regulation of panhandling within the high traffic areas. The areas themselves are the same. However, within these areas, a person would be able to make use of non-verbal means to panhandle or ask for money, such as displaying a sign, an open musical instrument case, or an upturned hat. What is prohibited within these areas is the use of personally-directed words or gestures. Solicitation between mutual acquaintances or family members is excepted from this prohibition.

These amendments target the conduct that has been a problem, and the locations where those problems arise, and is based on ordinances from other cities that have been judicially upheld. With respect to the high traffic areas, the amendments do not prohibit panhandling, but essentially establish a different threshold for what constitutes "aggressive begging".

These amendments are being brought forward with some changes to the sidewalk vendor ordinance.

In response to some questions raised at the May 6, 2003, worksession, the following should serve as a general guide for how the solicitation ordinance will apply:

Passive Solicitation:	Use of signs, open instrument cases; not personally directed
Active Solicitation:	Asking another person for money directly
Aggressive Solicitation:	Asking another person for money in a threatening manner

Under the current ordinance, aggressive solicitation is prohibited City-wide; passive and active solicitation are permitted except in high traffic zones (part of downtown, Biltmore Village), where no solicitation of any kind is allowed.

Under the proposed ordinance, aggressive solicitation is still prohibited City-wide; passive and active solicitation are permitted except in the high traffic zones, where only passive solicitation will be permitted.

All of the location-specific prohibitions (intersections, ATMs, bus stops) will remain (with some clarification).

He suggested the proposed ordinance, Sec. (b)(1)j., be changed to permit passive solicitation after dark.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

When Councilman Dunn explained why he felt this ordinance should be City-wide, not just in the high traffic zones, City Attorney Oast explained that solicitation has certain constitutional recognition as a First Amendment right and our ability to regulate that conduct is accordingly restricted. He said that he reviews cases constantly and if he becomes aware of something he thinks Council would consider, he will bring it back. In addition, if other areas of the City become high traffic zones then the ordinance could be expanded to those areas.

When Councilman Mumpower if other cities prohibit activity panhandling city-wide, City Attorney Oast said that he found none in his research, but did find a few cities that prohibited panhandling in certain defined areas of their towns. That prohibition included solicitation of any sort whether for personal benefit, for a charity, or as consideration for musical talent.

Councilman Peterson pointed out that the ordinance does have several prohibitions city-wide, e.g., within 20 feet of an ATMs, blocking the path of a person, using profane or abusive language, under the influence of alcohol, etc.

Councilman Ellis asked if the owners of private parking lots, like Wal-Mart and K-Mart, have the ability to control solicitation on their property. City Attorney Oast responded that when the areas are large pieces of private property, but essentially perform a public function, they sometimes take on the characteristics of public forums, and even though it is private property, people do have certain First Amendment rights in those areas.

Councilman Dunn felt private property owners, like the Asheville Mall or a strip mall, should not have to pay security officers to enforce the panhandling laws. City Attorney Oast said that the previous ordinance prohibited solicitation on public property and this amendment is not limited to public property. He noted that private property owners have other remedies available to them, such as trespassing, etc. If it is aggressive solicitation, however, then the Asheville Police Department can do something about that.

Mr. Chad Nesbitt wondered why the City was amending their ordinance if there has been no threat to sue the City.

Mr. Fred English pointed out that K-Mart and Wal-Mart have their own security to enforce rules on their own property.

Councilman Ellis moved for the adoption of Ordinance No. 3023. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 217

B. ORDINANCE NO. 3024 - ORDINANCE AMENDING THE SIDEWALK ORDINANCE

Director of City Development Sasha Vrtunski said that this is the consideration of a revised sidewalk ordinance to improve the administration and implementation of the ordinance.

As a result of the City Council's worksession on May 6, 2003, Ms. Vrtunski suggested the following amendment be added as Section 16-144 (17) "Any pushcart with a valid permit as of May 15, 2003, that complies with Ordinance No. 2595 (1) (b); Section 16-144 (13) passed June 22, 1999, or in operation before the passage of said ordinance, will be allowed to continue operation subject to the remaining provisions of this Code section. This exemption will be in effect until the time that the operator can no longer use the cart." She said this amendment would ensure that the one pushcart that does not comply with the size requirement would be allowed to continue operation. In addition, it ensures that all existing carts with permits will be allowed to continue operation.

When Councilman Dunn asked what would happen if the cart needed to be repaired, Ms. Vrtunski explained that if the new cart needed to be replaced, not repaired, it would have to be brought into compliance. Planning and Development Director Scott Shuford also responded that this is very common on zoning codes that if the use or the building is damaged or destroyed to 50% or more of its value then it has to be brought into compliance. For example, if you have a non-complying sign and the sign has to be replaced, it has to be replaced with a sign that would comply with the ordinance. He said the intent of this amendment is for the one cart that is out of compliance to continue to operate and be repaired, but it does fall apart or is unusable, it would have to comply with the ordinance at that point in time.

Ms. Vrtunski gave Council a brief background in the crafting of the ordinance. She said that in 1999, a Sidewalk Usage Team was formed consisting of several City departments. They held meetings with the Downtown Commission, Streetscape Commission, Asheville Downtown Association Issues Committee, Asheville Downtown Association Board, Merchants Action Coalition and held two large public forums in which 500 businesses and residents were invited to give input on this ordinance. In 1999, City Council approved revisions to the sidewalk ordinance, which regulated outdoor dining, merchandise, pushcarts and street entertainers on City sidewalks in downtown and Biltmore Village. Communities nationwide have discovered that active sidewalks augment downtown revitalization efforts and enhance downtown businesses. Asheville has been a leader in this area for the past ten years. Downtown currently has 21 restaurants with sidewalk dining, 4 retail shops that display merchandise, 12 pushcarts and approximately 70 street entertainers. These uses contribute to our vibrant downtown and help businesses expand their sales area, especially during the warmer months.

It has been four years since the last amendments to the ordinance and staff felt that there was a need to fine-tune the ordinance. Some of the changes are simply wording changes that will make the ordinance clearer for both the public and staff. Other changes are being recommended to you as substantive ways to streamline and improve the ordinance.

This is not a complete summary of changes, but the major proposed changes are as follows:

Street Entertainers - With the revisions to the solicitation ordinance, it will be allowable for anyone to passively solicit. To make the sidewalk ordinance compatible with the solicitation ordinance, permits would no longer be issued for street entertainers. The rules for Street Entertainers in Section 16-145 (general requirements) would still be in force. Currently, police officers provide enforcement for this ordinance, and would continue to do so. If these revisions are passed, the City Development office will notify all current street entertainers of the changes, including the entire list of rules for entertainers.

Amendments to 16-145 include:

- Perform no longer than one hour in a location, and wait an hour before returning to that location. Generally, there have not been conflicts between entertainers, but this requires entertainers to share locations in downtown, especially popular ones.
- Not perform at locations designated for community event or festival, unless permitted to play at the event or festival by the coordinator. This is not a new rule per se, but has been added to this section.
- Minimum distance of 40 feet between entertainers.
- Entertainers must comply with the solicitation ordinance and the noise ordinance, and all other federal, state and local laws.
- Removal of requirement for street entertainers to obtain a permit.

Pushcarts

- Pushcarts may not be enclosed such that the pushcart operator can stand inside it.
- Pushcart operator shall keep the immediate area within a 5-foot radius of his/her pushcart clean.
- If a permitted pushcart operator requests to move, then he/she shall submit a new application and fee.
- Hours of operation extended from 9 a.m. – 10 p.m. to 7 a.m. - 10 p.m.
- Pushcart operators cannot be absent from their location for more than 15 consecutive days during the months of April through September. These months represent the busiest season for downtown, and there is a high demand for pushcart locations in the core of downtown. Currently, there is a problem with people obtaining permits, using the location occasionally, sometimes not at all, and tying up the spot so that no other pushcart vendor can use it. In cases where a pushcart operator is not consistently operating their cart, staff will be able to revoke their permit for non-use and allow another individual to place a pushcart on the location.

There are no changes to the Outdoor Dining and Merchandise section.

City staff recommends approval of the proposed sidewalk ordinance revisions.

Ms. Vrtunski said that the dimensions of the pushcart were arrived at due to the sidewalk widths downtown. As the downtown continues to thrive, pedestrian traffic and the demand on public space has increased. Given these dynamics, the City should clearly define the pedestrian passageways and establish boundaries of private use in public space. As the administrator of the of the ordinance, she needs to make sure staff can effectively and efficiently process permit applications and that there is also predictability for cart operators so they know what the City expects. For those reasons, one cart size makes sense; permits are issued on a first-come, first-served basis; and it would be best if all carts (excluding the grand fathered cart) fit the approved sites. The current size is suited to all the locations, however, not all of our locations will accommodate larger carts.

Ms. Vrtunski said that the first sentence in Section 16-144 (2) which reads, "The pushcart shall not be enclosed such that the pushcart operator can stand inside the pushcart" was added to clarify the existing ordinance. City staff would have no problem if Council chose to delete that sentence, however, they would still recommend the 24 square feet size requirement remain.

Councilman Mumpower expressed concern that pushcart operators cannot stand inside their carts. He felt there is nothing wrong with giving consideration to allow people to have some weather protection in a cart. Mr. Davis (the pushcart operator who has the only non-conforming cart) is the only successful pushcart operator in the City so far. He is the example of someone who can maintain a good business by serving consistently and with our weather factors, consistency seems to require some level of protection. Since the City is recommending a maximum of 24 square feet and Mr. Davis' cart is 30 square feet, he felt we should amend our ordinance to allow all our vendors to be protected on a year-round basis. He felt that when we adopt rules, we need to make things better and not restrictive. We felt we should make our ordinance more use-friendly.

Ms. Vrtunski said that Mr. Davis used to be the only pushcart operator but within the last three years we have gone from two operators to approximately seven operators who operate in 11 spots. Even though this seems small, it is a dramatic increase.

Councilwoman Jones moved for the adoption of Ordinance No. 3024, with the addition of Section 16-144 (17) as read by Ms. Vrtunski above. This motion was seconded by Councilman Ellis. Mayor Worley pointed out that Council has not heard from the public yet and that a motion at this time is not appropriate.

Vice-Mayor Bellamy felt that Section 16-144 (2)'s first sentence should be deleted, which deals with pushcarts not being enclosed. In addition, she supported increasing the dimensions of the pushcart from 24 square feet to 30 square feet.

Councilman Ellis supported the ordinance as proposed by staff. He felt that the grand fathered cart was fine, but had concerns about establishing semi-permanent-type pushcarts downtown because they do block traffic and they compete with downtown restaurants that do pay property taxes. This ordinance amendment has gone through the process of the Downtown Commission, Downtown Association and all downtown merchants.

Councilman Mumpower felt that if we get a saturation of pushcarts and they begin to present a problem, then we can amend the ordinance again. However, he was suggesting that we try the experiment that seems to have worked with the one consistent successful example we have of allowing him some protection from the weather

Councilwoman Jones supported the ordinance as proposed by staff as well.

Mr. Fred English pointed out that the vendors do pay $125 for a permit.

Mr. Chad Nesbitt felt that the ordinance was unnecessary.

Mr. Bill Fishburne felt Council should allow all pushcarts to be 30 square feet and suggested the City pro-rate the permit fees.

Councilman Mumpower moved to amend (1) Section 16-144 (2) to delete the first sentence that reads "The pushcart shall not be enclosed such that the pushcart operator can stand inside the pushcart;" and (2) Section 16-144 (13) (ii) to increase the square footage from 24 square feet to 30 square feet. Ms. Vrtunski said that the guiding principle for being sheltered from the elements is the height of the cart. If we strike the first sentence in Section 16-144 (2), there needs to be an adjustment to the height requirement. There was no second to the motion.

Mayor Worley asked if all of the available locations would accommodate the larger 30 square feet size. Ms. Vrtunski replied no, but she hasn't physically measured each location. She also had a concern that if you have someone construct a cart 30 square feet, they might not get the same spot they had last year and the only available location left doesn't fit the cart. City Attorney Oast also responded that we do have ordinances that prohibit people from obstructing the sidewalk.

When Councilman Peterson suggested an ordinance amendment to identify those locations downtown that a larger cart would be permissible, Mayor Worley suggested language be included that allows staff to designate those areas where the larger carts could be accommodated.

Upon inquiry of Councilman Mumpower, Ms. Vrtunski said we currently have 23 sites that are designated as available. One example where a larger cart would not fit is Pack Square, near the four restaurants.

Councilwoman Jones felt it was unfair if someone invests $4,000 in a pushcart and then finds out they can't use it.

Councilman Dunn felt that if the larger cart locations are identified then the pushcart operator should be given advance notice of those locations. It would be up to him then if he chooses to build that larger one.

Councilman Mumpower felt it is not fair for the City to force people to work out in the weather.

At 7:27 p.m., Mayor Worley announced a short break.

Councilman Mumpower moved to adopt the ordinance with the following amendments: (1) Section 16-144 (2) to delete the first sentence that reads "The pushcart shall not be enclosed such that the pushcart operator can stand inside the pushcart;" (2) Section 16-144 (13) (i) to change 4'6" in height to 8" in height; (3) Section 16-144 (13) (ii) to allow for a minimal standing room within a cart; (4) Section 16-144 (13) (ii) to increase the square footage from 24 square feet to 30 square feet and that the width be kept at no wider than 4 feet; and (5) a new Section 16-144 (17) to read as follows: "Any pushcart with a valid permit as of May 15, 2003, that complies with Ordinance No. 2595 (1) (b); Section 16-144 (13) passed June 22, 1999, or in operation before the passage of said ordinance, will be allowed to continue operation subject to the remaining provisions of this Code section. This exception shall be in effect until the time that the operator or his successors can no longer maintain the cart in a fashion acceptable to the Health Department or in a fashion that precludes its ready removal in the event of an emergency situation." This motion was seconded by Councilman Dunn.

Vice-Mayor Bellamy wanted to make sure that the pushcart owners are made aware of the locations of spaces that larger carts would accommodate and also that it's on a first-come, first-served basis. Ms. Vrtunski said that will be made known to the operators during the application process.

Councilman Mumpower didn't believe that pushcarts represent major danger to our existing restaurants and if it appears to be the case, we can amend the ordinance in the future.

Councilman Peterson felt the original proposal is more consistent with how he would like to see downtown developed.

Mayor Worley felt all of Council was in favor of allowing pushcarts because they are a fabric of our downtown. He felt the reality is that these size limitations have been in effect since

1999 after considerable discussion and we have had no complaints about the size limitations. Council's original concern has now been addressed by the grandfather provision. He supported adopting the ordinance as originally proposed, with the grandfather clause, and with the deletion of the pushcarts not being enclosed.

The motion made by Councilman Mumpower and seconded by Councilman Dunn failed on a 3-4 vote, with Vice-Mayor Bellamy, Councilman Dunn and Councilman Mumpower voting "yes" and Mayor Worley, Councilman Ellis, Councilwoman Jones and Councilman Peterson voting "no."

Councilman Peterson moved to adopt the original ordinance as presented by staff with the following amendment: A new Section 16-144 (17) to read as follows: "Any pushcart with a valid permit as of May 15, 2003, that complies with Ordinance No. 2595 (1) (b); Section 16-144 (13) passed June 22, 1999, or in operation before the passage of said ordinance, will be allowed to continue operation subject to the remaining provisions of this Code section. This exception shall be in effect until the time that the operator or his successors can no longer maintain the cart in a fashion acceptable to the Health Department or in a fashion that precludes its ready removal in the event of an emergency situation." This motion was seconded by Councilman Ellis.

Mayor Worley asked if Councilman Peterson and Councilman Ellis would be willing to amend their motion to delete the first sentence in Section 16-144 (2) that reads, "The pushcart shall not be enclosed such that the pushcart operator can stand inside the pushcart." Councilman Peterson and Councilman Ellis both agreed to amend their motion to delete that sentence.

The amended motion made by Councilman Peterson and seconded by Councilman Ellis passed on a 4-3 vote with Mayor Worley, Councilman Ellis, Councilwoman Jones and Councilman Peterson voting "yes" and Vice-Mayor Bellamy, Councilman Dunn and Councilman Mumpower voting "no."

City Attorney Oast said that since the ordinance failed to pass by a 2/3 vote, there would have to be a second reading of the ordinance at the next formal meeting on May 27, 2003.

ORDINANCE BOOK NO. 20 - PAGE 301

C. RESOLUTION NO. 03-89 - RESOLUTION APPOINTING AN ALTERNATE TO THE BOARD OF ADJUSTMENT

Vice-Mayor Bellamy said that on April 22, 2003, there was a tie vote between Jane Mathews and Bradley Taylor for an alternate seat on the Board of Adjustment.

Jane Mathews received 3 votes and Bradley Taylor received 4 votes. Therefore, Bradley Taylor was appointed as an alternate member to the Board of Adjustment to serve a three year term, term to begin immediately and expire on January 21, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 414

VI. OTHER BUSINESS:

Budget Worksession

It was the consensus of City Council to hold a budget worksession on Thursday, June 5, 2003, at 3:00 p.m., in the First Floor North Conference Room of the City Hall Building.

Board Vacancies

Vice-Mayor Bellamy announced that City Council was accepting applications for vacancies on the following Boards: The Civic Center Commission, the Regional Water Authority and the Civil Service Board. The application deadline is Friday, May 16, 2003, at 5:00 p.m.

Claims

The following claims were received by the City of Asheville during the period of April 11-24, 2003: Nancy Restuccia (Inspections), Victor Babaoff – WNC Tire (Fire), James Lauer (Parks & Recreation), BellSouth (Streets), BellSouth (Water) and Nancy Tabel (Sanitation).

The following claims were received during the period of April 25-May 1, 2003: Heidi McDaniel (Water), Jimmy Cole (Water), Esther C. Hollifield (Water) and John C. Redmond (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

The City filed a Complaint on May 2, 2003, which is generally described as follows: City v. Carol Howard, Commissioner of N.C. Div. of Motor Vehicles, Dept. of Crime Control & Public Safety. The nature of the proceeding is a refund of $4,010 paid by the City for a protested civil penalty. This matter will be handled in-house.

The City received a Complaint on May 9, 2003, which is generally described as follows: Buncombe County vs. James B. White Sr. and wife Helen C. White, et al. The nature of the proceeding is tax foreclosure proceedings for unpaid real estate taxes. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Fred English

Mr. Fred English commented on several items and felt that City Council should be looking for ways to save money.

Closed Session

At 8:02 p.m., Councilwoman Jones moved to go into closed session to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorized the payment of economic development incentives will occur in open session. The statutory authorization is contained in G. S. 143-318.11 (a) (4). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:29 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:29 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

22

Tuesday – May 27, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy (participating via speaker phone); Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Veteran of the US Navy Mary Winner led City Council in the pledge of allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF CITY OF ASHEVILLE EMPLOYEES IN 13th ANNUAL EXCELLENCE IN PUBLIC SERVICE AWARDS PROGRAM

Mayor Worley read a proclamation recognizing several City of Asheville employees who were winners in their respective categories in the 13th Annual Excellence in Public Service Awards Program. Employees recognized were Ed S. Stoll, Rita Baidas, Dan Stewart, Thomas M. Brooks, Ronald R. King, Lt. Sarah Benson, Sgt. Curtis Jones, Officer Dwight Arrowood and Detective Rondell Lance. Mayor Worley also noted that Lt. Sarah Benson, Sgt. Curtis Jones, Officer Dwight Arrowood and Detective Rondell Lance won the overall award for 2003.

B. RECOGNITION OF SENIOR CITIZENS WHO WILL BE REPRESENTING OUR AREA IN THE NATIONAL SENIOR GAMES

On behalf of City Council, Mayor Worley recognized Earl Acuff, Thomas Bennett, Ed Bullock, Day Carper, Melvin Ellison, Donald Giersch, Dick Gilbert, David Herbert, Marcia Keith, Kathy Littlejohn, Helen McKie, Jimmie McSwain, Clarke Mitchell, Claudia Nix, Dick Penick, Bob Rhudy, Bobbie Roberts, Larry Seymour, Mary Soyenova, Charles Sproles, Leigh Svenson, William Walker and Norm Wilhelmi who have already won their events in their respective age groups at the local Asheville-Buncombe games in the Spring of 2002, and went on to win in their age groups at the NC State Games in Raleigh (Fall 2002). Mayor Worley wished the individuals good luck as they represent our area in the National Senior Games on May 29, 2003, in Hampton Roads, Virginia.

C. INSURANCE SERVICE OFFICE RATING FOR BUILDING SAFETY DEPARTMENT

Mr. Ralph Dorio, Technical Coordinator with the ISO's office in New Jersey, and Mr. Vaughn Wicker, Regional Manager for the International Code Council, were pleased to announce that on May 1, 2003, Asheville, N.C., became the third city in the United States (joining Coral Gables, Florida, and Fremont, California) to receive the highest rating for building code enforcement possible from Insurance Services Office Inc. He said the evaluation results for Asheville's Building Code Effectiveness Grading Classification includes a "1" for new one and two family residential property and a "1" for new commercial and industrial property. Insurers across the country are starting to use the building code evaluations as a key factor in assessing risk and determining homeowners and commercial insurance premiums.

Mr. Dorio said that only 3 jurisdictions out of 14,754 municipalities that have been evaluated in 44 states over the past eight years have obtained the Class "1" rating. Asheville improved its 1998 rating of Class "2" by focusing on continuous improvements in building inspection and plan review, including a rigorous ongoing training program for building personnel.

On behalf of City Council, Mayor Worley said the City of Asheville is proud of Director of Building Safety Terry Summey and the entire Building Safety staff as they constantly pursue ways to improve our services and enforce the code.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 13, 2003

B. MOTION SETTING A PUBLIC HEARING ON JUNE 10, 2003, TO CONSIDER ADOPTION OF THE 2003-04 ANNUAL OPERATING BUDGET

C. RESOLUTION NO. 03-90 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY DISPOSAL PARCEL 74 ON MARTIN LUTHER KING JR. DRIVE TO WNC HOUSING INC.

Summary: The consideration of a resolution authorizing the Mayor to convey Disposal Parcel 74 of the East End/Valley Street community improvement area to WNC Housing Inc. in the amount of $12,000.

On May 13, 2003, the City Council directed the City Clerk to advertise for upset bids on property for Disposal Parcel 74 located on the east side of Martin Luther King Jr. Drive at the intersection of Miller Street. The advertisement ran in the Asheville Citizen-Times on May 16, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from WNC Housing Inc. in the amount of $12,000 was not upset and the sale to WNC Housing Inc. should be approved.

Approval of the resolution will authorize the sale of the property to WNC Housing Inc. for the amount of $12,000.

City staff recommends adoption of the resolution authorizing the Mayor to convey property on Martin Luther King Jr. Drive to WNC Housing Inc. in the amount of $12,000.

RESOLUTION BOOK NO. 27 – PAGE 415

D. RESOLUTION NO. 03-91 - RESOLUTION AMENDING THE CITY COUNCIL 2003 MEETING SCHEDULE TO INCLUDE A BUDGET WORKSESSION ON WEDNESDAY, JUNE 4, 2003, AT 2:30 P.M., IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 27 – PAGE 416

E. RESOLUTION NO. 03-92 - RESOLUTION SETTING A PUBLIC HEARING ON JUNE 10, 2003, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HIGHWATER CLAYS INC.

24

Summary: The consideration of a resolution setting a public hearing on June 10, 2003, to consider an economic development incentive grant to HighWater Clays, Inc.

HighWater Clays, Inc. is a nationally recognized provider of clays, equipment, and services used to make pottery. The Asheville-based firm employs 27 people. The business is growing and the company is proposing an expansion of its operations in the River District. The owners have requested consideration for an incentive grant under the City of Asheville Economic Development policy. The company is proposing new, taxable, capital investment of $725,000 for additional production equipment and facility improvements and the creation of 5 new jobs. The City of Asheville is considering offering HighWater Clays, Inc., a grant totaling $7,500.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

City staff recommends Council approve the resolution setting a public hearing on June 10, 2003, to consider an economic development incentive grant to HighWater Clays, Inc.

RESOLUTION BOOK NO. 27 – PAGE 417

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

ANNEXATION PUBLIC HEARINGS

Mr. Carter Pettibone, Urban Planner, explained that purpose of these hearings is for the City to explain the plan for extending City services to the proposed annexation areas, and to give all persons resident or owning property within the areas, and all residents of the City, the opportunity to be heard.

On March 25, 2003, the City Council adopted Resolutions of Intent beginning the annexation process for the following five areas referred to as the 2004 annexations: Deaverview Road, Crowell Road, Smoky Park Highway, Sand Hill Road, and Hendersonville Road Areas. The Annexation Services Plan was approved on April 8, 2003, and a public information meeting was held on May 15, 2003. Approximately 10 persons affected by the proposed annexations attended this meeting. On June 10, 2003, City Council will consider adoption of the ordinances extending the corporate limits, with an effective date of the annexations being June 30, 2004.

Mr. Pettibone said that annexation is defined as an extension of the City's corporate limits. Annexation areas under the statutes must be developed to urban standards. Once annexed, the property owners and residents are entitled to City services and are subject to the City's taxes and ordinances. The authority for annexation comes under the N. C. General Statutes. North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population. The fact is that people living in close proximity to cities benefit from the cities, and state annexation law is designed to include these people in the costs and benefits of governing and servicing the City.

Mr. Pettibone explained the standards necessary to qualify areas for annexation – (1) at least 1/8 of the area's boundary must be adjacent to the current corporate limits; and (2) each area must meet at least one or more of four development tests - (a) population/density test; (b) subdivision test; (c) development test; or (d) nonresidential urban use test. The state also recognizes that certain areas within these annexation areas may be classified as non-urban areas and there are two qualifications that must be met.

He explained the City's annexation strategy has been to target areas (1) that are clearly developed, (2) where water and sewer infrastructure is in place, (3) that improve the City's boundaries, (4) eliminate pockets of urban development that are essentially surrounded by the City or where all access is through the City; and (5) disburse the annexation areas geographically instead of just targeting one direction.

He said that the five proposed annexation areas consist of 98 acres with a total population of 40 people. There are 77 individual businesses within the proposed areas, noting that the majority would be considered small businesses.

Mr. Pettibone then reviewed the various services that would be provided to the annexed areas. He then reviewed the following financial plan:

Revenue: Total ad valorem property tax revenue - $128,364; Total state utility tax revenue - $14,234; Total local option sales tax - $49,400; Total Powell Bill allocation - $2,082; and Total fees, permits, licenses and charges for services - $1,683. Total revenue - $195,763.

Annual recurring expenditures: Police (two additional officers) - $70,000; Fire (rural fire department contracts expected to be in place for at least 5 years and the hiring of one Deputy Fire Marshall) - $55,775; Solid waste - $133; and Street lighting - $2,160. Total recurring expenditures - $128,068.

Annual capital expenditures: Police - $75,000 (vehicles and associated capital equipment for the additional two police officers); Fire - $30,000 (vehicles and associated capital equipment for the additional Deputy Fire Marshall position); Water lines - $3,500; Rollout containers - $160; Street lighting - $2,820. Total one-time annual capital expenditure - $11,480.

Mr. Pettibone said that the City has had more detailed boundary description work performed by the City's surveyor that will change the perimeter and contiguity of the annexation areas. No additional properties are included or deleted and those revisions will be presented to Council at their June 10, 2003, meeting.

Mr. Pettibone also noted that

A. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE DEAVERVIEW ROAD AREA

Mayor Worley opened the public hearing at 5:44 p.m.

Mr. Pettibone explained the Deaverview Road area – This is located at the intersection of Deaverview Road and Pisgah View Road. The land use is commercial and residential. This contains four lots totaling 1.48 acres. The estimated population is two. This area meets the development test.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate

26

certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:45 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 10, 2003.

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE CROWELL ROAD AREA

Mayor Worley opened the public hearing at 5:47 p.m.

Mr. Pettibone explained the Crowell Road area – This is located at the intersection of Crowell Road and Farm Street. It is also close to the intersection of I-40 and Smoky Park Highway. The land use is commercial. The access to this area is entirely through the City. The acreage is 2.28 and no estimated population. This area meets the non-residential use test.

When Councilman Dunn asked what is currently on the properties, Mr. Pettibone said that there is an auto repair business and the one to the west is a lodging facility.

Mr. Roland Herbstreit, owner of Smoky Mountain Auto Service, said that it will cost him and the other property owner (Mr. Patel) over $12,620 a year in property taxes if they are annexed into the City. He said his share will be approximately $3-4,000 and he will only save $300 a year on insurance. He will not benefit from trash pick-up and will not be able to vote in City elections since he doesn't live on that property. He said that he employs five people with families that count on him and he may have to let one or two employees go to pay this added expense. He has been in business for over 18 years and already has a problem with paying his County taxes. Again, $12,620 a year is too much money to ask two business owners to pay.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:52 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 10, 2003.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE SMOKY PARK HIGHWAY AREA

Mayor Worley opened the public hearing at 5:52 p.m.

Mr. Pettibone explained the Smoky Park Highway area – This area is made up of one single property. This will bring the total split-jurisdictional commercial property into the City. It is a pocket of development and the access is primarily through Smoky Park Highway, which is in the City. This area meets the non-residential use test. Currently there is an auto sales business on the property. The acreage is 0.86 with no estimated population.

Mr. Michael Fryar, property owner, explained that the prior owner of this property had been paying City taxes since 1981 on a building that was not in the City. When he bought the property, he had to spend a whole day of straightening the mess out. He said he did not want any City services.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:00 p.m.

Upon inquiry of Councilman Dunn, City Manager Westbrook pointed out that it was the previous owner of this property and that owner should contact Buncombe County who is responsible for sending out tax bills.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 10, 2003.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE SAND HILL ROAD AREA

Mayor Worley opened the public hearing at 6:01 p.m.

Mr. Pettibone explained the Sand Hill Road area – This area is made up of four properties totaling 4.24 acres total. This area meets the development test. The primary access is through the City and the estimated population is zero.

Upon inquiry of Councilman Dunn, Mr. Pettibone said that on the property is located the Enka-Candler Post Office/Library, a commercial building and a third building which is under development. City Attorney Oast said that the City can annex county-owned property.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

28

Mayor Worley closed the public hearing at 6:04 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 10, 2003.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE HENDERSONVILLE ROAD AREA

Mayor Worley opened the public hearing at 6:04 p.m.

Mr. Pettibone explained the Hendersonville Road area – This is bounded by Glen Bridge Road to the north, Old Shoals Road to the west and Buck Shoals Road to the south. The property totals 89.45 acres with 39 individual properties. This is mainly commercial and industrial, with a few residential properties. The primary access from Hendersonville Road is through the City. The estimated population is 38. It meets the development test. There is also some non-urban areas.

Councilman Mumpower asked if Day International, who employs 300 people, was contacted to see what type of impact we would be creating on them if annexed. Mr. Pettibone responded that they have not had any communication from them at all. Councilman Mumpower then suggested the City "reach out" to them for their input.

Councilman Dunn pointed out that even though the population in this area is 38, we may be talking about closing a business that employs 300 people. He felt we should start looking at incentives to keep larger employers.

Mr. Fred English, City resident, felt that when other areas get annexed, he gets less service. He felt the City should be more concerned about how to get industry to our area than trying to annex people and businesses.

Mr. Marion Lewald, with Smoky Mountain Auto Services in the Crowell Road area, said that she understands the impact of a business that employs 300 people, but her business has five employees and it seems like the City isn't as concerned about driving out small businesses.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:12 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 10, 2003.

F. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR A 252 UNIT MULTI-FAMILY PROJECT LOCATED AT THE CORNER OF ENKA LAKE ROAD AND SAND HILL ROAD KNOWN AS NORTHVIEW AT BILTMORE LAKE

29

ORDINANCE NO. 3025 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A 252 UNIT MULTI-FAMILY PROJECT LOCATED AT THE CORNER OF ENKA LAKE ROAD AND SAND HILL ROAD KNOWN AS NORTHVIEW AT BILTMORE LAKE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:13 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a revision to the Conditional Use Permit for a 252 unit multi-family project located at the corner of Enka Lake Road and Sand Hill Road known as Northview at Biltmore Lake.

On April 1, 2003, the applicant, Northview Properties, submitted development plans for a Level III site plan review. The property is located in the extraterritorial jurisdiction (ETJ) area of the City and the property is zoned RM-16 Residential Multi-Family High Density District. The proposed project consists of 252 apartment units in nine buildings on 31-acres (PIN No. 9617.17-01-9671) located on Enka Lake Road. The Technical Review Committee (TRC) reviewed the plans at its April 21, 2003, meeting and recommended approval with conditions. Most of the TRC comments were addressed in revised plans submitted for Planning and Zoning Commission review. The Planning and Zoning Commission at their May 7, 2003, meeting voted to recommend approval of the plans with the remaining conditions identified by TRC, which are currently not addressed on the plans at this time.

Residential projects greater than 50 units in size are Level III projects, which are conditional uses in the RM-16 District. Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed.

The parcel is located on Enka Lake Road near the intersection with Sand Hill Road (City Exhibit 3 – Location Map). The zoning in the area reflects a wide variety of potential uses in the vicinity. To the north the property is zoned Highway Business District. To the south and east the property is zoned RM-16 Residential Multi-Family High Density District. To the west the property is zoned Industrial District. The development is accessed from Enka Lake Road by a central street with two residential streets coming from this central spine. Streets in the development will be private but will be built to City of Asheville standards.

30

The development is accessed from Enka Lake Road by a new central street. This new street creates a T-intersection from which two main branches of the apartment community are served.

The apartments are located in nine structures located in the center of the property. The apartments will consist of 70 one bedroom units, 126 two bedroom units and 56 three bedroom units. A clubhouse and pool will also be located on the site (City Exhibit 4 – Landscape Plan).

The Unified Development Ordinance (UDO) requires 500 square feet of open space for every residential unit proposed. Based on the proposed development of 252 residential units 2.9 acres are required for open space. As proposed, the plan will preserve over 14 acres of open space with most this area in undisturbed woodland. Two playground areas for smaller children are provided on-site. Walking trails will create a passive recreation network throughout the property. A trail spur will also connect to Biltmore Lake below the dam.

Street trees and parking lot trees are provided on the plans. A landscape bufferyard is provided on the south side of the property. Credits for existing trees in many area of the site eliminate the need for additional landscaping.

Sidewalks are provided along the new entrance street and on one side of all parking aisles. A sidewalk will need to be provided along Enka Lake Road. In addition walking trails are provided throughout the property.

The engineers for the project have completed a traffic impact analysis (TIA) for the project. Lane additions along Enka Lake Road are the primary result of the TIA study. The developer has been working with the N. C. Dept. of Transportation (NC DOT) and the City Engineering Department to coordinate the proposed improvements. Widening of the bridge along Sand Hill Road over Hominy Creek is scheduled for work in 2004 and 2005. Widening of Sand Hill Road to Lake Drive also has a close timetable.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The development is within standards of development practice set forth by the City of Asheville. Public safety providers reviewed the project as part of the TRC review.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The 31-acre site is mostly wooded and slopes towards Hominy Creek. The developer is proposing to maintain nearly 15 acres as preserved green space land. Much of this area will act as undisturbed buffer along Hominy Creek. This buffer area will provide walking paths and other passive park style amenities.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The proposed development is not expected to injure neighboring property values. The Northview project will be associated with the Biltmore Lake development already under construction.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The surrounding properties include a school property and other wooded property and a stone quarry. This residential project will preserve some existing vegetation along Enka Lake Road and will provide landscape buffers to retain the wooded nature from both inside and outside of the project. As a part of the Biltmore Lake project, the Northview apartments will be a character defining project of the area.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The development will provide additional housing options for current and new residents of the City.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This area has been approved by the NC DOT for roadway improvements for Sand Hill Road. These improvements are on a timely schedule for this project. Other utilities will be adequately served in the area. Currently, Buncombe County will provide protective services in this community. If the area is annexed by the City of Asheville, then the City will extend services here. The plans for Northview have been coordinated with representatives of the NC DOT.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The roadway network in the Enka area has received increased traffic from Sardis Road, along Sand Hill Road to the area of Highway 19-23. The bridge over Hominy Creek on Sand Hill Road will begin construction in 2004 and continue to 2005. The remainder of Sand Hill Road from the bridge southeast to Lake Drive will be widened also in a timely manner. The Northview project development will add to this traffic situation. The developers have had discussions with the NC DOT to determine traffic improvement measures in the area.

The Planning and Zoning Commission voted 7-0 at their May 7, 2003, meeting to recommend approval of the plan with the remaining conditions identified by TRC, which are currently not addressed on the plans at this time. Planning and Development staff concurs with this recommendation.

Upon inquiry of Councilman Peterson about the City's policy regarding open space, Mr. Glines said that if an area is already unbuildable (e.g., a floodplain area) the developers do credit for counting that as open space.

Councilman Peterson asked if the City is imposing any requirements on the developer about contributing to the widening of Enka Lake Road since there are already some major developments in the near future. Mr. Glines said the developer is working with the NC DOT to widening Enka Lake Road with additional lanes to handle the turn traffic going into their development (City Exhibit 5 – Overall Site Plan).

Councilman Peterson feared future problems with single entrance cul-de-sacs on large apartment complexes or developments that have only one entrance funneling traffic onto the primary access road.

Councilman Peterson asked what would happen if the developer installed the sidewalks along Enka Lake Road and then in the future NC DOT widens the road. Mr. Glines said that he doesn't anticipate the widening of the road anytime soon, but if the road is widened by NC DOT, then NC DOT would have to replace the sidewalk. Councilman Peterson was concerned that since there is only a fixed pot of NC DOT money for Asheville and if that has to go to widen Enka Lake Road, then some other project that might be needed might not get funded.

Upon inquiry of Mayor Worley, Mr. Glines said that one outstanding condition needs to be met by the developer – a sidewalk will need to be provided along Enka Lake Road.

Mr. Todd Ferrell, representing Northview Properties, spoke in support of the development. His only concern is the huge expense to the project to provide the sidewalk along Enka Lake Road. He explained there is the road, the shoulder of the road and then a 15-foot drop into a creek. He said that the 600 feet of sidewalk and 7 foot high retaining wall would need to be built against the creek on Enka Lake Road. A normal sidewalk costs about $4.00 per square foot and this sidewalk/retaining wall will cost about $28.00 per square foot. There is a difference of $15,000 vs. $96,000. He explained the sidewalk network already incorporated into the design (City Exhibit 4). He recommended that a sidewalk not be built along Enka Lake Road for purposes of safety.

Upon inquiry of Councilman Mumpower, Mr. Ferrell said that with regard to the sidewalk issue, the City's position has been that perhaps the standards could be lowered from the 6-foot requirement to work with the grades better, the area could be staked and then they could see how they could work within that. He was hesitant on that though because there are places where the shoulder drops into the creek and there is no way to do a sidewalk there unless a lot of fill, a retaining wall and removing trees. He felt that this will be a sidewalk that starts nowhere and goes nowhere.

Upon inquiry of Councilman Dunn, Mr. Ferrell said there are no unresolved stormwater issues.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:44 p.m.

After a brief discussion about a sidewalk along Enka Lake Road, the City's Traffic Engineer Anthony Butzek said that they have worked with the developer's engineer on possible solutions. However, at this point he feels that a sidewalk along Enka Lake Road is what they would like to see be installed as part of this project.

Councilman Ellis suggested a condition be attached to the conditional use permit that the developer and City staff work out the final details on some type of sidewalk along Enka Lake Road.

Upon inquiry of Councilwoman Jones, Mr. Glines said that a one bedroom unit will be approximately $700 climbing to $1,100 for a three bedroom unit.

Councilwoman Jones felt that sidewalks are very important for the future and concur with sidewalks being a priority in the Planning Department. Councilman Peterson agreed that in the future there will be more development in that area and it will not be a sidewalk going nowhere.

Councilman Mumpower said that spending a lot of money on a segment of sidewalk, when we don't know what will be happening on that road in the future, has risk attached to it.

Upon inquiry of Councilman Dunn, Mr. Glines said that this sidewalk would not be affected by the Sand Hill Road widening project.

Councilwoman Jones moved for the adoption of Ordinance No. 3025 granting a Conditional Use Permit for a 252 unit multi-family project located at the corner of Enka Lake Road and Sand Hill Road known as Northview at Biltmore Lake, subject to the conditions identified by the Technical Review Committee which are not currently addressed on the plans. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 313

At 7:00 p.m., Mayor Worley announced a short break.

G. PUBLIC HEARING TO REZONE PROPERTY ON EAST OAKVIEW ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3026 - ORDINANCE TO REZONE PROPERTY ON EAST OAKVIEW ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 7:25 p.m.

Mr. Carter Pettibone, Urban Planner II, said that this is the consideration of an ordinance to rezone 7.96 acres located on East Oakview Road from RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single Family High Density District. This public hearing was advertised on May 16 and 23, 2003.

The applicant, Habitat for Humanity who is represented by Keith Levi, is requesting rezoning of the 7.96 acres (PIN No. 9627.11-75-2688) in order to develop the property for uses permitted in the RS-8 District. The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development.

The property is located in the City limits on the south side of East Oakview Road, a dead-end street that connects to Brevard Road. It is also adjacent to the interchange of Interstates 26 and 40. The existing land uses in the area include single-family residences to the north across Oakview Road and to the east, which are zoned RS-4 and a commercial trucking terminal zoned Commercial Industrial to the south across Hominy Creek. Upon preliminary analysis, both water and sewer are available to the site.

A good deal of the southern portion of property lies in a floodplain and there is some steep topography in the western portion of the property that is not in the floodplain. Both of these factors contribute to reducing the actual development potential of the property. The applicant also believes that the higher density and smaller lot size permitted in the RS-8 District are needed in order to make development of the parcel feasible for its organization.

Rezoning the lot would allow the property owner the opportunity to develop the property for higher density single-family use than currently is permitted. The RS-8 zoning would also provide a better transition from the higher intensity Commercial Industrial zoning of the property's southern neighbors to the surrounding RS-4 zoning, which contains less dense single family residential. In addition, the property is located in a RS-4 District that is completely surrounded by either Commercial Industrial zoning or Interstate rights-of-way and the probable long-term outlook for this area would not be low density residential.

In consideration of the above, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located on East Oakview Road from RS-4 to RS-8. City staff recommends approval as well.

Mr. Maurice Williams, resident on East Oakview Road, said that if the property is rezoned the owners will be able to build 64 houses on that property. If 64 houses are built, the road and bridge will not be able to accommodate that amount of traffic. However, it was his understanding that Habitat for Humanity proposes to build 14 houses and he urged Council, if they can, to limit the number of houses to 14.

Ms. Chris Hagood, resident on East Oakview Road, also asked Council to restrict, if they can, the number of houses to 14 and to move the proposed homes back off the road.

City Attorney Oast reminded Council that if the property is rezoned, they will be able to build the density per acre allowed by the ordinance, but it doesn't mean they have to build that many. Although it is possible to limit the number of units that can be built on a piece of property, this rezoning is not the vehicle within which to do that limitation.

Upon inquiry of Councilman Peterson, Mr. Pettibone said that if a developer wanted to build more than 50 units on that property they would have to come to City Council for a conditional use permit.

At 7:34 p.m., Mayor Worley closed the public hearing.

Mr. Keith Levy, representing Asheville Area Habitat for Humanity, said that they have preliminary site sketches for 14 houses on East Oakview Road and it is their intention to build 14 houses.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3026. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 319

H. PUBLIC HEARING TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW LEVEL III REVIEW CATEGORY FOR LARGER COMMERCIAL AND MIXED USE DEVELOPMENTS WITHIN ½ MILE OF THE DOWNTOWN CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3027 – ORDINANCE TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW LEVEL III REVIEW CATEGORY FOR LARGER COMMERCIAL AND MIXED USE DEVELOPMENTS WITHIN ½ MILE OF THE DOWNTOWN CENTRAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 7:42 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to establish a new Level III review category for larger commercial and mixed use developments within ½ mile of the downtown Central Business District. This public hearing was advertised on May 16 and 23, 2003.

It has recently come to staff's attention that there are a number of properties proximate to downtown Asheville with zoning designations allowing large-scale development as a matter of right. These designations include the Highway Business District which allows up to 200,000 square feet of building floor area and the Regional Business District which allows an unlimited amount of building floor area. Level III (conditional uses) review thresholds for these districts are now 100,000 square feet.

In most cases, these zoning districts have been established in order to recognize existing uses that would be nonconforming in the "typical" zoning districts that adjoin downtown (e.g., Community Business I and Community Business II, allowing 12,000 and 45,000 square feet of building floor area, respectively). Because greater floor area than that allowed in Community Business II has the potential to negatively affect the development pattern surrounding downtown, staff has proposed a code amendment that would allow commercial and mixed-use projects close to downtown that contain 45,000 square feet of floor area or greater to be considered as Level III (conditional use) projects.

This proposal would not create any nonconformities and would still allow the full range of uses and scale of floor area of the underlying zoning district to be available to the property owner, while providing an opportunity for careful review of site impacts in order to maintain the community character of this key area. Properties on Tunnel Road and on the west side of the French Broad River would be exempted from the provisions of this ordinance.

In summary, this code amendment establishes a new Level III review category for larger commercial and mixed use developments within ½ mile of the downtown Central Business District. There are a number of zoning districts in the immediate vicinity of downtown that, while perfectly satisfactory for their current uses, have the potential to accommodate much more intensive land uses that may or may not be appropriate on the periphery of downtown. This code amendment would offer the opportunity for heightened review of larger commercial and mixed use projects in these districts. Areas physically separated from the downtown by geographic features would be exempted from this requirement.

On May 7, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

After discussion initiated by Councilman Peterson, Mr. Shuford said that if the Council chooses to amend the ordinance to include developments within the Central Business District or within ½ mile of the Central Business District, he felt that it would be a too substantial a change and would recommend it be remanded back to the Planning and Zoning Commission.

When Mr. Shuford said that this Code amendment was not circulated for additional input (other than by the Planning & Zoning Commission public hearing), Councilman Mumpower felt he would have to vote against it. He felt that anytime we put additional controls on our community, we should solicit additional input.

Upon inquiry of Councilman Dunn, Mr. Shuford said that even though this is a higher level of review for certain types of projects, the Council discussion and public input has added value to the projects.

At 7:55 p.m., Mayor Worley closed the public hearing.

Councilman Peterson felt this ordinance amendment is a step in the right direction and hoped that the City would continue to look at applying this amendment to the Central Business District as well.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3027. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Councilman Dunn and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 - PAGE 321

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3028 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A NEW URBAN RESIDENTIAL DISTRICT

Mayor Worley said that the public hearing on this matter was held on April 22, 2003. Due to some language inconsistencies and the lateness of the hour on April 22, the matter was continued until this date.

Urban Planner Shannon Tuch gave a brief background of the ordinance amendment to establish a new high density, infill zoning classification called Urban Residential District.

Frequently in community meetings and planning forums and most recently, the forums for the City Plan 2025 comprehensive plan process, citizens have identified the need for:

- access to appropriately scaled mixed use neighborhood services located close to home
- improved pedestrian facilities, projects that relate to the street and attractive streetscapes
- more affordable housing throughout the community and a greater variety of housing choices
- broader transportation options

One of the most pressing problems facing the City of Asheville is the need for affordable housing. The Urban Residential District (URD) has been developed to increase opportunities for the development of affordable housing and a mix of other housing types by allowing for an increase in density, scale, and use in areas of the city where infrastructure can accommodate higher density, infill development. It is intended that the URD be located on significant transit corridors and/or in areas planned for high growth.

Providing residential units is the primary goal of the URD, however, it is recognized that there is significant need for basic commercial retail, office use, and other activities that support residential uses in proximity to high density residential areas. The URD recognizes this and incorporates other non-residential uses on a limited basis. The proposed URD is an opportunity to incorporate the City Council adopted Smart Growth and sustainable development goals that have been identified by the community during the last decade.

The URD will encourage pedestrian activity by creating safe and inviting streetscapes with comfortable walking amenities. Traffic flow will be improved by limiting curb-cuts and requiring cross access between parcels. The URD will also make public transit a viable option by increasing density (i.e., the number of potential riders) in neighborhoods that are or can be served by the bus system.

Some of the long term benefits from developing any corridor in this pattern will be to build a livable community, strengthen the area's tax base, reduce driving trips on roadways, support mass transit, improve air quality and reduce sprawl.

The URD is not being developed with a particular corridor or area of the City in which it is to be applied. However, staff has been in preliminary contact with Mountain Housing Opportunities and the West End Clingman Avenue Neighborhood regarding the possible application of this new zoning designation in certain areas of this neighborhood.

At the Planning and Zoning Commission meeting on April 2, 2003, the Commission approved the creation of the Urban Residential District by a vote of 7-0. Staff also supports the adoption of this district.

She said that based on Council's discussion during the April 22 public hearing, staff proposes the following revisions:

1. Under Permitted Uses the following shall be inserted to read:

   (b) Permitted Uses

   (1) All non-residential uses are restricted to first story or ground level floor and shall not occupy more than 50% of the ground floor gross square footage. Note: The balance of ground floor gross square footage can be used for common areas supporting the principal residential use.

   (2) Where a commercial use occupies the ground level, this use may be buffered by a non-residential office use on the remaining 50% of the ground level and on the second story that is directly above the commercial use. Under no circumstances can the total non-residential use exceed 30% of the building's total square footage.

2. Under Conditional Uses: "Pubs" has been removed.

3. Under Parking / Loading Standards the following text, taken from the Neighborhood Corridor District (NCD) Amendment, has been added to read:

   . . . Rules requiring that shared and remote parking areas must be found in the same zoning classification are waived in the Urban Residential District. Residentially zoned areas may not be used to provide shared or remote parking for this district except that non-residential uses in residential districts may be used. Parcels will require a recorded agreement for the shared or remote parking arrangement.

Also during the April 22 public hearing, City Council requested additional feedback from neighborhood and developer groups. Based on this feedback, staff would like to propose the following revision.

4. Under Height Standards the following has been revised to read:

(6) Height Standards: For multifamily development: Minimum 2 stories and maximum 4 stories with a maximum height of 54 feet. For single family development, the maximum height shall be 40 feet.

Ms. Tuch said that an additional amendment is requested as a result of soliciting additional comments: She suggested Council amend the minimum lot size for multi-family from 10,000 square feet (minimum) to 3,500 square feet (minimum).

Upon inquiry of Councilman Mumpower about any substantial advantages of this amendment, Ms. Tuch said that in order to build affordable housing that is of quality, developers require an increase in density and as our residential properties are currently outlined in the Unified Development Ordinance, they don't allow for this increase in density. We are looking to provide a residential district that affords some protection for residential living but allows for a larger density.

After a brief discussion, Councilman Peterson suggested amending the purpose of the URD to read "The Urban Residential District (URD) is established to … and will be located on significant transit corridors and/or in high growth areas." Mr. Shuford explained how he could foresee problems by making that language so restrictive and felt we needed the flexibility.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3028, with the amendment to the minimum lot size for multi-family being 3,500 square feet (minimum). This motion was seconded by Vice-Mayor Bellamy and carried on a 5-2 vote, with Councilman Peterson and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE 323

B. SECOND READING OF ORDINANCE NO. 3024 – AN ORDINANCE AMENDING THE SIDEWALK ORDINANCE TO IMPROVE THE ADMINISTRATION AND IMPLEMENTATION OF THE ORDINANCE

Mayor Worley said that the first reading of Ordinance No. 3024 occurred on May 13, 2003.

When Councilman Mumpower suggested restricting the number of carts that would be weather-protected, Councilwoman Jones felt there would be a problem of equity.

Councilwoman Jones moved for the adoption of Ordinance No. 3024 on it's second and final reading. This motion was seconded by Councilman Ellis and carried on a 5-2 vote, with Mayor Worley, Councilman Ellis, Councilwoman Jones, Councilman Peterson and Councilman Dunn (who had left the Chamber without being excused) voting "yes", and Vice-Mayor Bellamy and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 27 – PAGE 301

39

V. NEW BUSINESS:

A. UPDATE ON THE METROPOLITAN PLANNING ORGANIZATION EXPANSION

City Engineer Cathy Ball said that this is an update to Council on the status of the agreement to expand the Metropolitan Planning Organization for transportation.

The Metropolitan Planning Organization makes decisions regarding highway funding, transit funding, and long-range transportation plans. The City of Asheville is the largest municipality in the MPO. The urbanized area of Asheville is impacted by much of the regional travel, in the form of increased traffic congestion, road widening projects, and highway projects. In addition, the City of Asheville is the largest provider of public transit in the region.

For these reasons, staff is concerned with making sure that the City of Asheville is adequately represented on the MPO's policy board, and ensuring that project decisions are made with input from the jurisdictions that are directly impacted by the projects. Currently, the City of Asheville has two representatives on the policy board, known as the Transportation Advisory Committee (TAC).

The MPO is in the process of expanding to the Hendersonville area and the Waynesville area. The MPO currently has eight member governments: Asheville, Buncombe County, Biltmore Forest, Black Mountain, Fletcher, Montreat, Weaverville, and Woodfin. Nine new member governments will be added to the MPO. They are: Haywood County, Clyde, Canton, Waynesville, Henderson County, Hendersonville, Laurel Park, and Flat Rock, and Maggie Valley.

As a part of the expansion, the MPO must draft a new agreement known as the Memorandum of Understanding (MOU). All of the local governments must sign the agreement in order to participate in the MPO process. A draft agreement is under consideration by the TAC. The agreement will establish the committee membership and voting policies. The TAC will vote on this draft agreement at their meeting on June 19, 2003.

Staff is bringing this item before Council to make the Council aware that the draft agreement does not provide any additional representatives to the City of Asheville or the other large jurisdictions in the MPO. This is based on a decision made by the TAC at their May 15, 2003, meeting. At that meeting, the TAC decided that each jurisdiction should get only one vote. Councilwoman Jones and Councilman Peterson expressed opposition to this structure. The Technical Coordinating Committee (TCC) recommended a structure that would give two representatives each to Asheville, Buncombe County, and Henderson County.

It should be noted that the draft agreement does include a number of provisions to give local governments the ability to make decisions about projects that impact their jurisdiction. These provisions are in Section 1.I of the draft agreement. These provisions would provide local veto power on certain project decisions. They would not, however, provide any additional representation on other issues that come before the TAC.

Almost all of the MPOs in North Carolina give additional representation to the largest jurisdictions in the MPO. In addition, the four largest MPOs in the state have weighted voting based on population. There are seventeen MPOs in North Carolina. The MPO in the Asheville area is now the seventh largest in the state.

At their meeting on June 19, 2003, the TAC will have an opportunity to once again discuss the draft agreement before taking a final vote. This is an appropriate time for the

40

Asheville City Council to provide feedback to the TAC. After the TAC adopts the agreement it will be presented to each of the seventeen local governments in the MPO for their consideration.

City Engineer Ball said that the City of Asheville has to sign the MOU. If the City doesn't sign the MOU then it doesn't allow the Transportation Management Area to move forward. It is essential for us to work together to come up with an agreement that we can work with. Staff would like the ability to go back and work with the other local governments to be able to come up with something that more fairly represents the citizens of the City of Asheville as is shown by the other local governments who have TMA's.

Councilman Peterson, City's representative on the TAC, explained that the voting procedure should be on some relationship to proportionality of a town. Asheville needs to have a more significant voice and given the diversity of the larger areas (Buncombe County, Asheville, Henderson County, Haywood County) they need to have two representatives so that they are bringing in different views. He asked for Council to take a vote and express an opinion so at the next TAC meeting the rest of the Committee needs to know that Asheville has taken a firm stand.

Councilwoman Jones, City's representative on the TAC, said they are trying to do the best thing for the region and the best thing for Asheville. We are not asking for veto power, but asking for our citizens to have a bit more weight because of the huge amount of weight that so many of the projects have on our community. It does impact Asheville more. She felt this is about representation of Asheville citizens.

Councilman Mumpower asked why, in this region, do we have such a great resistance to giving Asheville more representation based on our population. City Engineer Ball said that her only guess is that maybe in the past there has been a perception that Asheville has held up projects.

There was a brief discussion initiated by Councilman Mumpower about the approach Council's two representatives on the TAC take when voting on matters.

Vice-Mayor Bellamy moved to support staff's proposal and direct them to continue to seek adoption of the staff proposal or something similar. This motion was seconded by Councilman Mumpower and carried unanimously.

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of May 2-15, 2003: Travelers (Streets), Lee Smart (Parks & Recreation), Paul Branks (Streets), Stephen Furey (Water), Marilyn McDonald (Streets) and William Wilmer (Water).

The City received the following claims during the period of May 16-22, 2003: Hiram A. Lewis (Water), Hadiyah Saleem (Streets), Jerome C. Beloff (Water), Krispy Kreme (Water) and Glazer Architect (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English spoke on several issues regarding the Memorial Day Celebration, the lack of affordable housing in the Biltmore Lake projects, and support of the Asheville Police Department.

Ms. Janet Bowman, Vice-President of the League of Women Voters, read a resolution unanimously adopted by the Board of the Asheville-Buncombe League of Women Voters which expressed serious concern regarding recent actions by elected and appointed officials which appear to compromise civil liberties guaranteed by the U.S. Constitution's Bill of Rights. The resolution asked for Council's immediate and thorough examination of these actions and their consequences, and encouraged affirmation of respect for and support of the legitimate rights of all our citizens.

Mr. Mike Fryar said it was his understanding that racing is prohibited at the French Broad River Park and questioned why they can race bikes there.

Richmond Hill Park

Ms. Terry Darakjy, Richmond Hill resident, spoke against the National Guard Armory at Richmond Hill. She felt the building of the new National Guard Armory will result in destruction of existing vegetation, trees, wildlife; will increase people in the area; will be a disturbing military presence; will make it difficult in getting emergency vehicles through area; there will be an upsurge of criminal element; will be an increase of vehicular traffic, noise, lights and activity; there will be negative air quality issues affecting children and elderly; property taxes will be increased; there will be stress on water and sewer due to topography; and flooding and erosion.

Mr. Craig Young, resident on Hornot Circle, spoke against the proposed entrance to the new Richmond Hill Park on Richmond Hill Drive. He felt Council was wrong in allowing the entrance to the park through a neighborhood. He expressed safety concerns of the elderly who walk in the street and children who play and ride their bikes on the road.

Ms. Rebecca Becker, resident on Hornot Circle, said that most of the community is support of the Richmond Hill Park, however, not with the entrance. She also cited safety concerns for children and the elderly and the possibility of speeding through the community.

Since the conditional use permit has already been issued, a brief discussion was held regarding why there were no public comments at the City Council public hearing when the conditional use permit was issued. Planning and Development Director Scott Shuford said that there was ample opportunity given for input and described the formal property owner notification as well and the informal notification. Mr. Shuford said that he would provide City Council with information on the notification process and site access issues for this Park/Armory project. He said that at this point, the neighborhood has the option to file a lawsuit and follow the standard appeal process.

City Engineer Cathy Ball said that they did look at other options for the park entrance and this is the only one they were able to design an entrance into.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Thursday – May 29, 2003 – 12:15 p.m.
First Floor North Conference Room
City Hall, Asheville, N.C.

Special Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

City Council held a special worksession to discuss the Joint Planning Area (JPA) and to give direction to City staff on the following five issues:

Should the entire extraterritorial jurisdiction (ETJ) be converted to Joint Planning Area?

Planning & Development Director Scott Shuford recommended continuing County appointments to the City Planning and Zoning Commission since it is an advisory board and may well have input into issues involving the JPA. Councilman Peterson expressed his reasoning why he felt there should be no County appointees to either the City Board of Adjustment or the City Planning and Zoning Commission.

After discussion, City Council requested more information with regard to the ramifications of the impact on the City Board of Adjustment membership and other issues. If the ETJ goes away entirely, there will be no need for County appointees to the City Board of Adjustment (and perhaps no legal justification for it). Even if only a portion of it goes away, there will likely be a reduced County presence on the City Board of Adjustment. City Council would be interested in hearing Buncombe County's perspectives on this matter to help them come to a decision.

Should City stormwater standards apply in the JPA?

After discussion this issue, City Council felt there should generally be City-type stormwater regulations in the JPA, except with a higher threshold (e.g., perhaps an acre as opposed to 10,000 square feet) before the regulations apply. City Council felt it was a good idea for Buncombe County to contract with City staff to enforce and inspect stormwater facility construction.

Should City curbing and sidewalk standards apply in the JPA?

After discussion, City Council felt there should generally be City-type curbing and sidewalk standards in the JPA. There are some circumstances in which Council would accept a standard consisting of a sidewalk easement combined with grading of the easement simultaneously with the construction of the street. Council was also open to the possibility of fees-in-lieu of sidewalks in certain circumstances. As with stormwater, Council thought it was a good idea for Buncombe County to contract with City staff to enforce and inspect street and sidewalk construction.

Cell tower height.

City Council agreed that the most obtrusive aspect of cell towers is typically the flashing lights placed on top per Federal Aviation Administration requirements and suggested limiting tower height to whatever height eliminates the need for the lights (this appears to be 200 feet in most cases).

Should there be a City of Asheville type traffic impact analysis (TIA) requirement in the JPA?

After discussion, City Council agreed that there should be a TIA process more like the City's than the NCDOT's in the JPA. One idea - the County could contract with City staff to review TIAs.

Mayor Worley adjourned the meeting at 2:05 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

44

Tuesday – June 3, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; and Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brian L. Peterson

CONTINUANCE OF UPDATE ON MINIMUM HOUSING CODE

Vice-Mayor Bellamy asked that Council delay discussion on the update on Minimum Housing Code until Councilman Peterson is present. She felt the issue affects buildings and lives of individuals in the future and it is important for him to hear the discussion and get as much information as possible.

Councilman Mumpower was supportive of other members of Council, but under the circumstances, he was not happy with seeing us step aside from important business and inconveniencing people and staff who attended this meeting to hear this update. Councilman Dunn agreed.

After a brief discussion about whether to postpone this update for two weeks or a month, Vice-Mayor Bellamy moved to postpone the update on the Minimum Housing Code until June 17, 2003. This motion was seconded by Councilwoman Jones and carried unanimously.

CONSENT:

Intent to Close Unnamed Alley off Catawba Street

Summary: The consideration of setting a public hearing on June 10, 2003, to close a portion of an unopened alley off Catawba Street.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process the adjoining property owners have requested to close a portion of the alley off Catawba Street.

Currently there is a structure that exists in the middle of the alley. The request is being made in an effort to correct this situation and get the structure onto private property.

Public Works Department staff has determined that the portion of the alley off Catawba Street running north to south between PIN Nos. 9649-09-05-4276 and 9649-09-05-3233. The portion for which closure is requested extends from Catawba Street to the rear of the lots stated above. Lots bordering the portion of the unopened alley are PIN Nos. 9649-09-05-4276 and 9649-09-05-3233.

Contract to Audit City Accounts

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2002-2003.

N.C. General Statutes 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Crisp Hughes Evans LLP to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2001-2002. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the Fiscal Year 2002-2003 audit. The base fee has been proposed at $54,000 (the fee has remained the same or decreased each of the past three consecutive years). Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution which authorizes the Mayor to execute a contract with Crisp Hughes Evans LLP for auditing services for Fiscal Year 2002-2003.

Finance Director Bill Schafer responded to a question from Councilman Dunn on the firm of Crisp Hughes Evans LLP.

Grant for a COPS in Schools

Summary: The consideration of a resolution to apply for and enter into an agreement with the United States Department of Justice for personnel funds to hire a Supervisor for the current School Resource Officers in the Asheville Police Department.

The COPS in Schools grant program has been an excellent way to provide a quality community service to our city schools through the assigning of School Resource Officers. The Asheville Police Department currently provides 3 officers to our schools. This program has been well received in the school system and has given them the support they need in the areas of safety of the school children and the premises in general; investigation of fights, thefts, and vandalism; and in identifying and mentoring problem students.

The COPS in Schools grant program offers a three-year grant for a maximum of $125,000 for the three-year period. The Asheville Police Department is requesting $184,587.43 in grants from the Department of Justice COPS in Schools Program with a local match of $59,587.43 over the three years, which will be paid for by Asheville City Schools. The grant funds will be used to add an additional sergeant position as a supervisor for the current COPS in Schools officers.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire one supervisor for the current COPS in Schools officers to enhance cooperation with Asheville City Schools.

Grant for a Police Overtime Funding

Summary: The consideration of a resolution to apply for and enter into an agreement with the United States Dept. of Justice for overtime funds to enable the Asheville Police Department to assign a police unit to the public housing communities.

Almost a year ago, the Asheville Police Department lost funding for a police unit dedicated to our public housing communities when the Housing Authority had their funding from the Dept. of Housing and Urban Development reduced. The overtime grant funding from the Dept. of Justice will allow the Asheville Police Department to restore that unit. There has been a noticeable increase in calls for service and crimes committed in the public housing communities

46

since the elimination of their dedicated police unit. This unit will help to address the concerns voiced by the public housing communities to the Housing Authority and Police Department.

The Dept. of Justice Overtime Program offers a one-year grant to support community policing and homeland security efforts. There is a 25% match required for these funds. The Asheville Police Department is requesting the maximum amount of federal share allowed based on our population, which is $100,000 with a match requirement of $25,000. The matching funds will come from the Housing Authority. No financial resources will be required from the City of Asheville. The total grant request will be $125,000.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to assign a police unit to the public housing communities using overtime funding from the Dept. of Justice.

Minority Business Commission

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two (2) of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Ms. Connie Mitchell has been named by the American Institute of Architects (AIA) to represent them on the Minority Business Commission. Ms. Mitchell has been nominated to fill the position left vacant by Ms. Jacquelyn A. Schauer who resigned effective May 8, 2003. Ms. Mitchell's term will run through August 2004 to complete the current term of Ms. Schauer.

City staff recommends City Council adopt the resolution confirming the appointment of Ms. Connie Mitchell as the AIA representative on the Minority Business Commission.

Grant for National Register District Nomination Report

Summary: The consideration of a resolution to enter into an agreement with the North Carolina State Historic Preservation Office for and in consideration of a federal grant from the US Department of Interior, National Park Service in the amount of $2,000 for the purpose of the preparation of the Clingman/Riverside Industrial and Commercial Historic District National Register Nomination Report.

The project is to prepare a National Register nomination form for the Clingman/Riverside Industrial and Commercial Historic District. The proposed district encompasses approximately 20-25 properties on 2 ½ acres located to the west of downtown Asheville in the area north of Lyman Street and east of Riverside Drive. The proposed district, along with two other identified sub-districts was approved for inclusion in the North Carolina Study List in 1999. This nomination will include only the historic and commercial area within the larger West/End Clingman Avenue Neighborhood as identified in the grant application unless modifications are determined necessary through field observation efforts. A consultant who meets the qualifications outlined in 36 CFR 61 will be hired to prepare the nomination according to the guidelines outlined in National Register Bulletin 16A. The complete and final draft will be submitted to the State Historic Preservation Office no later than August 30, 2004.

The total cost for the project is $3,380. The grant is for $2,000 and the remaining local match of $1,380 will be provided by the property owners within the district as indicted on the application. The City will not be responsible for the local match. The grant period is from 6/1/2003-9/30/2004.

City staff recommends that the City of Asheville enter into an agreement with the State Historic Preservation Office to receive grant funds to hire a consultant to complete the nomination report for the Clingman/Riverside Industrial Historic District.

Ms. Stacy Merten, Director of the Historic Resources Commission, responded to questions from Vice-Mayor Bellamy.

Vice-Mayor Bellamy asked staff to make sure that they communicate with the area residents about the process.

Grant for Police Department Traffic Unit

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit.

On March 25, 2003, City Council adopted Resolution No. 03-42 authorizing the City to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit. Following a meeting with the Grant Program Coordinator for the North Carolina Governor's Highway Safety Program, the amount of the grant has increased to $498,747.54, while the City's local match has decreased to $67,765.89.

To remind Council, the Governor's Highway Safety Program offers a four-year grant with graduated match requirements in the personnel, equipment and additional costs categories. The Asheville Police Department is requesting $498,747.54 in grants from the Governor's Highway Safety Program to hire and train four officers and one supervisor, and to purchase five vehicles and computer equipment for the unit in the first year. The first year of the grant there is a 25% match on equipment and training, but there is no match for personnel. The match is $67,765.89 for the first year, which will require an appropriation of $67,765.89 from the Contingency account. Upon notification of grant award, a budget amendment will be brought to Council for the full amount of the grant award, including the City's local match. The original grant amount was for $474,438 and the original local match was $71,365.82. The formal grant application requires that the Mayor sign a pre-formatted resolution created by the North Carolina Governor's Highway Safety Program.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire and train a traffic unit with four officers and one supervisor to reduce the incidence of aggressive driving in the City of Asheville and allow the Mayor to sign the GHSP-02 Local Governmental Resolution from the Governor's Highway Safety Program.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEW

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on June 10, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

More Standard Minimum Lot Sizes in all Residential Zoning Districts and to Clarify Lot Width Requirements for Cul-De-Sac Development and for Flag Lots

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for more standard minimum lot sizes in all residential zoning districts and to clarify lot width requirements for cul-de-sac development and for flag lots.

This code amendment provides for more standard minimum lot sizes in all residential zoning districts and clarifies lot width requirements for cul-de-sac development and for flag lots. This amendment was requested by the City-County Housing Task Force and is summarized below.

Minimum Lot Size

Zone	Current	Proposed
RS-2	21,780	20,000
RS-4	10,890	10,000
RS-8	5,445	5,000
RM-6	7,260	7,000
RM-8	5,445	5,000
RM-16	5,445	5,000 for multifamily*
	or	2,500 for single family attached (townhomes)
	2,722.5/unit	3,500 for single family detached

Lot Widths for Cul-de-Sac Developments

New Language: Lots on a cul-de-sac shall be a minimum of 25 feet wide at the right-of-way line and 75% of minimum at the front setback line and shall average the minimum lot width over the entirety of the lot

Flag Lots

Added Language (incorporates an interpretation):

- No more than one lot in a subdivision of less than 8 units shall be a flag lot
- No more than 2 lots or 10% of the total lots, whichever is greater, shall be flag lots in subdivisions of 8 or more lots

Also included are two "housekeeping" amendments. First, the reference to residential lots having public street access has been corrected to allow for private streets built to public street standards as another option. Second, a correction to an incorrect reference is made.

* Since the adoption of the Urban Residential District, staff reconsidered the multi-family minimum lot size for the RM-16 district. We recommended a 10,000 square foot minimum to the Planning and Zoning Commission, but are now suggesting a 5,000 square foot minimum lot size to accommodate smaller-scale multifamily development; this would be slightly smaller than the current provision of 5,445 square feet.

On May 7, 2003, the Planning & Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well, with the change in the RM-16 multifamily lot area to 5,000 square feet.

Revise the Approval Authority and Process for Modifications to the Subdivision Regulations

Mr. Carter Pettibone, Urban Planner II, said that this is the consideration of an amendment to the Code of Ordinances of the City of Asheville to change the approval authority for subdivision modification requests.

Currently, both the Technical Review Committee (TRC) and Planning and Zoning Commission review requests for modifications to the subdivision ordinance prior to review and approval by the City Council. The typical timeframe for review and approval of these requests is about 2 months. These are technical modifications that address such issues as lots that don't front on a public right-of-way and similar matters.

This ordinance amendment will help streamline the review process for subdivision modifications by allowing their review and approval by the Technical Review Committee. All applicable city departments would still review these requests as part of the TRC review process. The ordinance amendment would also provide for a more equitable treatment of subdivision issues since the TRC is the review and approval authority for major subdivisions.

The review process would be reduced from 2 months to about 14 days. Staff believes this ordinance amendment provides a more streamlined and equitable alternative for subdivision modifications.

At its May 7, 2003, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Upon inquiry of Vice-Mayor Bellamy, Mr. Pettibone explained the appeal process.

Councilman Mumpower was concerned about deleting Planning & Zoning Commission review and City Council review with having no additional input from the public.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these public hearings on the June 10, 2003, formal City Council agenda.

EARLY ACTION COMPACT INITIATIVES

City Engineer Cathy Ball said that this is an update to City Council on the status of potential measures the City may take in meeting the requirements of the Early Action Compact to improve air quality and the first step in the process of developing the Early Action Compact Plan

In December 2002, City Council adopted a resolution to enter into an Early Action Compact (EAC) along with Buncombe County and other local governments. The first step in the process is to develop a list of measures that can be taken by each of the local governments to reduce air pollution. In an effort to develop this list, the Environmental Protection Agency (EPA) recommended that a group of stakeholders be created to make recommendations to local governments. City Council reviewed and approved the list of stakeholders in March 2003.

The Mountain Area Compact is a diverse region of five Western North Carolina counties comprising more than 2400 square miles. According to 2002 estimates, County populations range from 212,907 in Buncombe County to 20,192 in Madison County. Henderson County (93,033), Haywood County (55,299) and Transylvania County (29,997) fall within those extremes. Population density, total workforce and infrastructure development exhibit similar county to county variation. Services and retail trade are strong factors in each local economy. This reflects the area's popularity for retirement living and for travel and tourism.

Due to the differences in size and economic base, it was agreed that each county would identify local control measures individually. This process allows greater stakeholder participation and allows each jurisdiction to evaluate local resources and determine if county-specific control measures can reasonably be implemented.

All counties are targeting implementation dates of April 2005 in order to coincide with the beginning of that year's ozone season. As planning continues, that date may change for some measures.

This group of stakeholders representing the City of Asheville and Buncombe County met every Thursday in April 2003.

Mr. Jan Davis, Chairman of the Stakeholders Group, outlined the list of measures, as well as the process used to develop the measures, developed by the Stakeholders. The deadline for submission of this list is June 16, 2003.

Actions the public can take on an ongoing basis to reduce ozone include: keep your car tuned up, keep tires properly inflated, carpool or vanpool, ride your bike, take a walk, take the bus, use an electric powered mower or a push mower, conserve energy and reduce pollution at home, practice appropriate vehicle operating tips and purchase products that meet the Environmental Protection Agency Energy Star Program.

On ozone action days the public and businesses should: spread the word about Ozone Action Days; delay errands until late in the day; don't mow your lawn until late in the day; bring your lunch or walk to lunch; bus, bike or walk; practice appropriate vehicle operating tips; do not use drive-through services; telecommute; and participate in Ozone Action Day Program.

On ozone action days, the local, state and federal governments should seek participation of state and federal agencies in the following measures: limit morning meetings; practice appropriate vehicle operating tips; limit vehicle/equipment use; reschedule nonessential operations under direct control of the city; reschedule nonessential paving activities; explore the use of alternative fuels; track statewide initiatives to bring clearer burning fuels to area retailers; increase enforcement of smoking vehicles; tree planting program; hybrid-electric car pilot program; retrofit technology; purchase and service contracts should specify energy-efficient equipment and maintenance practices; annual in-house training; Ozone Action Day Coordinators; and telecommute.

Ongoing actions to reduce ozone include: clean burning fuels; WNC Regional Air Quality Agency; public education campaigns; outreach; themes; cultural outreach; community outreach; business involvement; conserve energy and reduce pollution at work; land use; conversion to alternative fuels; low sulfur fuels; ride the bus; Energy Star Program; and Advisory Group to address air quality and other environmental issues.

City staff has been involved in this process and supports the recommendations of the Stakeholders. No action by City Council is necessary at this time.

Mr. Davis responded to various questions and comments from Council regarding the initiatives.

On behalf of City Council, Mayor Worley thanked Mr. Davis and the Stakeholders for working on this very important issue for our entire region.

ALTERNATIVE FUELED VEHICLES GRANT

Public Works Director Mark Combs explained the Alternative Fueled Vehicles Program. He explained that on November 14, 2000, City Council adopted a resolution supporting an alternative fuel vehicle program and authorized staff to submit grant applications to support it. In April 2001, the City received a $400,000 grant from NC Division of Air Quality (DAQ) to construct a compressed natural gas (CNG) fueling station in the City. The two primary reasons for the award were:

a. To complete a State-wide fueling "corridor" master plan along I-40 which would accommodate CNG-powered vehicles from coast-to-coast;
b. To provide a fast-fill source for locally owned/operated CNG vehicles.

Unfortunately, due to State budget challenges in 2001, the grant was not funded as planned.

Last month DAQ staff contacted the City and expressed interest in re-funding the construction of a CNG fueling station.

If City Council wishes to move forward and accept the grant if received, a resolution authorizing the City to accept the grant and entering into an agreement with the N.C. Division of Air Quality, and a budget amendment will be brought before Council.

City staff recommends City Council (1) accept the Mobile Source Emissions Reduction Grant; (2) construct CNG fuel station; (3) fund/develop a Citywide AFV program; (4) maintain partnership(s) for clean air; and (5) research and implement new AFV technology, as available.

Mr. Combs responded to various questions from Council regarding alternative fuel.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ORDINANCE NO. 3029 - BUDGET AMENDMENT TO CONSIDER REQUEST FROM ASHEVILLE REGIONAL AIRPORT AUTHORITY

Director of Economic Development Mac Williams said that this is the consideration of a request from the Asheville Regional Airport for $10,000 from the City of Asheville to support a matching federal grant they have received.

The Asheville Regional Airport Authority (ARAA) recently received a $500,000 grant from the U.S. Dept. of Transportation (USDOT) (1 of only 40 such grants made nationwide and the only one in NC). The purpose of the grant program is to help small airports like Asheville enhance air service by addressing service deficiencies such as limited commercial jet service and high fares. After receiving the grant, the USDOT advised the ARAA that monies it had committed, from its own internal sources, as the local match would not be an appropriate source for all the match and that at least $100,000 cash from outside local sources would be required. Further, the ARAA anticipates such commitments will be needed by July 1, or perhaps, sooner.

The funds are intended to support the recently announced Continental Airlines direct service to Houston (beginning June 12th). Additionally, funding will be used to support other existing carriers with advertising and marketing initiatives to increase competition, upgrade service, and lower fares.

The ARAA is currently undertaking an aggressive fundraising campaign among local private and public sectors and has commitments for $75,000. The ARAA is requesting $10,000 from the City of Asheville in support of this effort.

Staff recommends City Council adopt a budget amendment to provide $10,000 to the Asheville Regional Airport in support of their efforts to leverage a $500,000 federal grant and authorize the City Manager to transfer $10,000 from the general fund contingency account to fund the request.

Councilman Ellis spoke in support of the request and noted that Buncombe County has committed $10,000.

Ms. Susan Phyllis, Marketing and Public Relations Director of the Asheville Regional Airport, said that the Airport has commitments to receive $25,000 from the Grove Park, $25,000 from the Biltmore people, $10,000 from the Tourism Development Authority and $10,000 from Buncombe County.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Ellis moved for the adoption of Ordinance No. 3029. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 337

AMENDMENT REGARDING METHOD OF DESIGNATING PARKING METER ZONES AND PARKING IN DOUBLE METER SPACES

Transit Services Director Bruce Black said that this is the consideration of an ordinance changing the method of designating meter zones and the method of parking in double meter spaces.

Due to economic expansion and construction in the Central Business District and the ever-changing traffic patterns, there are frequent and continual changes in the layout of parking. Appendix E requires a change by City Council to add meters in these new areas when changes take place. By repealing Appendix E and amending Section 19-162, we will be able to install meters immediately as the traffic engineer designates through expansion, contraction, or alteration, new parking spaces in the Central Business District.

An amendment is also necessary to Section 19-164 regarding the parking at double sided parking meters. As a person parks their vehicle there is no way they can be in compliance with the current ordinance if they park in the forward parking space of a double meter. This amendment will reflect the new meters.

City staff requests City Council approve the ordinance.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

PUBLIC SERVICE ANSWERING POINT

Police Chief Will Annarino and Fire Chief Greg Grayson said that staff is requesting formal confirmation that City Council desires to participate with Buncombe County in a joint 911 emergency communications center in approximately three years. In the interim period, staff requests direction on whether to proceed with establishing a City of Asheville primary 911 public safety answering point for all 911 calls originating in the City of Asheville or to contract with Buncombe County to provide fire/rescue dispatch services and continue processing police 911 emergency calls as we are currently doing.

During the 2003-04 City Council Budget Retreat in January, 2003, City staff presented Council with concerns about the delays that were occurring with over 32,849 911 emergency fire/rescue and police calls that are being transferred to the City of Asheville from Buncombe County. At that time, staff recommended to City Council that the City of Asheville create it's own primary 911 Public Safety Answering Point (or PSAP) in order to provide more rapid response to all emergencies occurring in the City of Asheville.

Council requested more information on the subject and most Council members toured the Buncombe County 911 emergency communications center and the City of Asheville emergency communications center. Some Council members toured the Sheriff's communications center. In the past five months, Council has had much discussion about the 911 dispatch situation. In addition, Buncombe County Commission Chairman Nathan Ramsey has recently stepped forward with a written proposal on behalf of Buncombe County Government to construct a joint emergency communications center that should be built and operational in approximately three years.

The operational benefits of a joint emergency communications center are significant. Most importantly, all 911 callers will experience the most minimal delay possible in receiving emergency services. However, Council needs to take action affirming support to participate in a joint emergency communications center when it is built by Buncombe County Government. Council's commitment to this joint venture will allow Buncombe County to properly design a joint center. In addition, city and county staff can begin working together in planning and facilitating the joint operation.

During this three-year interim period, Council needs to provide direction to staff on which one of three options the City of Asheville will take for the next three years, until the joint communications facility is constructed and becomes operational. The three interim options are:

1. Leave operations as they are with the delays on all 32,849+ 911 emergency calls transferred to the City of Asheville.
2. Create a City of Asheville primary 911 PSAP and receive and process all 911 calls originating within the Asheville corporate limits, or
3. Authorize the City Manager to execute a performance contract with Buncombe County Government for dispatch of fire/rescue calls (approximately 11,389 calls annually) and continue dispatching police emergency calls as we are doing currently (approximately 21,460 calls annually).

Police Chief Annarino explained the staff issue of improving the dispatch of emergency services responding to incidents by minimizing delays.

Deputy Police Chief Ross Robinson summarized how the currently 911 calls are routed to the Asheville Police Department from the Buncombe County Emergency Operation Center (EOC). He explained the delay being the current Buncombe County to City of Asheville transfer generates an approximate 15-85 second delay in our police officers and firefighters responding to emergency situations.

Police Chief Annarino said the long term solution is the consolidated communication center.

Fire Chief Greg Grayson feels we should move toward a consolidated communications center. The advantages for a consolidated center include: less delay, more personnel working together, better efficiency, and joint dispatch of multiple agencies.

Police Chief Annarino said that a consolidated center construction will require 2.5 to 3 years. He explained if there is no change, there are no "pros." "Cons" include a 15-85 second delay remains for 32,849 police and fire calls; 911 surcharge unavailable to upgrade city infrastructure; and not addressing staff's dispatch delay concern.

Police Chief Annarino then explained that if the City has a PSAP, the "pros" are: no delay of 32,849 emergency calls for city emergency responders; $312,000 in annual 911 surcharge revenues available to upgrade infrastructure; best Insurance Service Office (ISO) rating for Asheville Fire & Rescue (+2-1/2 points); and independent accountability for the city. "Cons" include: creates delays for 11,365 ambulance dispatches, prompting more fire/rescue responses; startup costs of $869,879; all equipment costs borne by city - $564,000; and additional ongoing costs.

Deputy Police Chief Robinson then explained the projected City call load.

Fire Chief Grayson then explained the Buncombe County offer during this interim period. The "pros" include: contract with Buncombe County for consolidated center; no delays for 11,389 fire calls for service; and improved ISO rating for fire (+2 points).

Police Chief Annarino explained that the "con" is that the staff issue is not addressed for 21,460 police calls per year. These calls will still experience some delay.

Fire Chief Grayson explained that the County's offer includes the following costs to be borne by the County: $148,780 annual staffing costs paid during interim (2.5 years = $371,950); approximately $75,000 start-up cost; and cost of new equipment $564,000 in consolidated center. The County's funding offer totals $1,010,950.

Police Chief Annarino and Fire Chief Grayson recommended City Council give their formal endorsement and commitment to participate in a joint 911 emergency communications center with Buncombe County Government. In the interim period, city staff recommends that if Council wants to address all 911 calls within the corporate limits, that the city proceed with implementing a City of Asheville PSAP. If City Council does want to take this step during the interim period, Council can authorize the City Manager to execute a performance contract with Buncombe County to dispatch all fire/rescue calls.

Police Chief Annarino and Fire Chief Grayson, along with Buncombe County's Emergency Operations Manager Jerry VeHaun, answered several questions from Council, regarding start-up costs, equipment, training, personnel, availability of homeland security monies, and 911 fees.

Mr. VeHaun said that the joint consolidated communication center would be completed by December of 2005.

After discussion, it was the consensus of City Council to (1) formally endorse and commit to participate in a joint 911 emergency communications center with Buncombe County Government; and (2) authorize the City Manager to execute a performance contract with Buncombe County to dispatch all fire/rescue calls and continue dispatching police emergency calls as we are doing currently.

CANDIDATE INFORMATION SESSION

City Manager Jim Westbrook said that several months ago City Council asked him to develop a program of information for members of the public who run for City Council. The feeling was that in the past, if there had been general information sessions about City government and specific programs, misinformation would have been less likely to develop during the election process. In preparing the proposed agenda, all City departments were consulted, as well as the City Attorney, the City Clerk and the Institute of Government.

As you know, City staff could literally take hours going into detail on various programs that would be of interest. However, he felt it most important to allow potential candidates to ask questions so they could decide what is important. In talking with staff at the Institute of Government about this particular initiative, they indicated that they were changing their program for new council members to include processes for working as a group, the need for personal time commitment, and taking a long-term view of both issues and relationships, among other things. Therefore, he included that in the agenda, too.

He would ask that Mayor Worley or a similar elected official act as the leader of the meeting, setting up the ground rules, as well as keeping time and moderating as necessary. After a brief welcome and introduction, he would present some information concerning the City's relationship to the state, as well as the council-manager form of government. He would be followed by the City Attorney who would present information on state law, local law, conflicts of interest, Open Meetings law, etc. The Finance Director and the Budget Director would follow with brief explanations of the budget and financial condition. This general information would be followed by a question and answer session with all candidates, moderated by Mayor Worley.

The last session would be led by a former Mayor and Council Members. The purpose is to follow up on the Institute of Government's suggestion about the need to hear and discuss the democratic process, personal commitments, working as a group, the need for public trust, etc. This would allow persons who are running for Council to hear from a previous Mayor and Council Members who are no longer in elected office their views on these important facets of being an elected Council Member.

The City Manager recommends that City Council approve moving forward with the Candidate Information Session.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BOARD/COMMISSION VACANCIES

It was the consensus of City Council to readvertise for the vacancies on the Civic Center Commission and the Regional Water Authority.

56

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Mr. Gene Bell to the Civil Service Board to serve an additional two-year term.

OTHER BUSINESS

City Attorney Oast responded to Councilman Dunn when he asked what if the property owner who has to give the right-of-way for the entrance at Richmond Hill Drive would not give the right-of-way. Mr. Oast said that Richmond Hill Drive is a state road and the State has the option of condemnation for building roads. He did note that negotiations are still occurring with the property owner.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 10, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Retired Chief Master Sergeant Larry Fowler of the United States Air Force led City Council in the pledge of allegiance.

INVOCATION

Councilman Peterson gave the invocation.

RESOLUTION NO. 03-93 - RESOLUTION OF CENSURE OF COUNCILMAN BRIAN PETERSON

Councilwoman Jones moved to excuse Councilman Peterson from participating in this matter. This motion was seconded by Councilman Ellis and carried unanimously.

Mayor Worley then read the following resolution: "The City Council of the City of Asheville has the authority to address issues relating to the conduct of its members, when that conduct brings disrepute to the City or the Council, or otherwise interferes with the Council's ability to conduct the City's business. Just after midnight on May 27, 2003, Council Member Brian Peterson was observed by an Asheville Police Officer to admit a woman into his personal vehicle in an area under police surveillance for prostitution activity, and later denied the police observations about the circumstances of this incident. Council Member Peterson has engaged in conduct tending to bring the City and the Council into disrepute, and to otherwise interfere with the Council's ability to conduct the City's business and the ability of each member of Council to represent the City and Council. Mr. Peterson's conduct falls short of the standards that the citizens of Asheville have the right to expect of their elected officials, and tends to undermine and damage the Council's credibility with the public in general, and with law enforcement in particular. Now, therefore, be it resolved by the City Council of the City of Asheville that the actions of Council Member Brian Peterson on May 27, 2003, are hereby condemned, and the Council does hereby censure Mr. Peterson for his conduct. Be it further resolved that the Council calls on Mr. Peterson to seriously consider his credibility with Council and his own ability going forward to be effective in his service on Council in appropriately representing the citizens of Asheville and Council.

Councilman Dunn moved for the adoption of Resolution No. 03-93. This motion was seconded by Vice-Mayor Bellamy.

Councilman Dunn said this was a sad day for Council. There is no one in the City hurting more than Councilman Peterson and his family. A censure coming from him or anyone else bothers him because it does conflict with his belief that to publicly judge anyone goes against his religious beliefs. No one on Council is willing to discuss all of their imperfections. This being said, this Council does represent all of Asheville. Council is supposed to uphold the ethical and moral standards of an elected position. We are role models whether we like it or not. City Council should not be held to a lower standard of behavior than the City employees who they make rules for. This country is experiencing moral decline. Family values are being attacked by various special interests. When will honesty replace political correctness? Why do you think that less than 30% of the voters in our City vote – distrust of the system and its representatives. While Council does not have the power to have Councilman Peterson removed from office, which is what the law states, Council can censure him. Personally, this is really not the best solution. Therefore, he sadly requests that Councilman Peterson resign this position for the good of the City. This is the honorable, ethical and right thing to do. It's also time to place ethics ahead of political aspirations. He did not feel comfortable in commenting on this resolution and he didn't like to add to Brian's pain, but our citizens do expect us to deport ourselves in an ethical and honorable higher ground. Excuses and blaming others is easy. Honesty and common-sense seems to be losing favor in this country. Honesty and integrity do have a place in our society. Our criminal justice system has for centuries relied on a judgmental system. This system has been shown to be the best system in the world. If we ignore honesty, integrity and morals, our nation and our society will be thrown into chaos. He was sorry this all had to happen and while he does not like this resolution to censure he would support it, but he would prefer that Councilman Peterson resign.

The motion made by Councilman Dunn and seconded by Vice-Mayor Bellamy carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 418

I. PROCLAMATIONS:

A. KIPP PROGRAM

Vice-Mayor Bellamy recognized Asheville KIPP Director Shawn Jackson who spoke about the success of the first year of the KIPP (Knowledge is Power Program) Asheville Youth Academy. He explained that their mission is to prepare students with the skills, knowledge, and character necessary to succeed in high school, colleges, and the competitive world beyond. Vice-Mayor Bellamy also recognized Miss Miller who has excelled in the KIPP Program.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 27, 2003; THE SPECIAL WORKSESSION HELD ON MAY 29, 2003; AND THE WORKSESSION HELD ON JUNE 3, 2003

B. RESOLUTION NO. 03-94 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH CRISP HUGHES EVANS LLP FOR AUDITING SERVICES FOR FISCAL YEAR 2002-03

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2002-2003.

N.C. General Statutes 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Crisp Hughes Evans LLP to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2001-2002. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the

Fiscal Year 2002-2003 audit. The base fee has been proposed at $54,000 (the fee has remained the same or decreased each of the past three consecutive years). Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution which authorizes the Mayor to execute a contract with Crisp Hughes Evans LLP for auditing services for Fiscal Year 2002-2003.

RESOLUTION BOOK NO. 27 – PAGE 419

C. RESOLUTION NO. 03-95 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY AND ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE FOR A GRANT TO HIRE AND TRAIN A SCHOOL RESOURCE OFFICER SUPERVISOR

Summary: The consideration of a resolution to apply for and enter into an agreement with the United States Department of Justice for personnel funds to hire a Supervisor for the current School Resource Officers in the Asheville Police Department.

The COPS in Schools grant program has been an excellent way to provide a quality community service to our city schools through the assigning of School Resource Officers. The Asheville Police Department currently provides 3 officers to our schools. This program has been well received in the school system and has given them the support they need in the areas of safety of the school children and the premises in general; investigation of fights, thefts, and vandalism; and in identifying and mentoring problem students.

The COPS in Schools grant program offers a three-year grant for a maximum of $125,000 for the three-year period. The Asheville Police Department is requesting $184,587.43 in grants from the Department of Justice COPS in Schools Program with a local match of $59,587.43 over the three years, which will be paid for by Asheville City Schools. The grant funds will be used to add an additional sergeant position as a supervisor for the current COPS in Schools officers.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire one supervisor for the current COPS in Schools officers to enhance cooperation with Asheville City Schools.

RESOLUTION BOOK NO. 27 – PAGE 420

D. RESOLUTION NO. 03-96 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY AND ENTER INTO AN AGREEMENT WITH THE DEPT. OF JUSTICE OVERTIME FUNDS PROGRAM FOR A GRANT TO ASSIGN A POLICE UNIT TO THE PUBLIC HOUSING COMMUNITIES OF THE CITY OF ASHEVILLE

Summary: The consideration of a resolution to apply for and enter into an agreement with the United States Dept. of Justice for overtime funds to enable the Asheville Police Department to assign a police unit to the public housing communities.

Almost a year ago, the Asheville Police Department lost funding for a police unit dedicated to our public housing communities when the Housing Authority had their funding from the Dept. of Housing and Urban Development reduced. The overtime grant funding from the Dept. of Justice will allow the Asheville Police Department to restore that unit. There has been a noticeable increase in calls for service and crimes committed in the public housing communities since the elimination of their dedicated police unit. This unit will help to address the concerns voiced by the public housing communities to the Housing Authority and Police Department.

The Dept. of Justice Overtime Program offers a one-year grant to support community policing and homeland security efforts. There is a 25% match required for these funds. The Asheville Police Department is requesting the maximum amount of federal share allowed based on our population, which is $100,000 with a match requirement of $25,000. The matching funds will come from the Housing Authority. No financial resources will be required from the City of Asheville. The total grant request will be $125,000.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to assign a police unit to the public housing communities using overtime funding from the Dept. of Justice.

RESOLUTION BOOK NO. 27 – PAGE 421

E. RESOLUTION NO. 03-97 - RESOLUTION CONFIRMING A MEMBER TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two (2) of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Ms. Connie Mitchell has been named by the American Institute of Architects (AIA) to represent them on the Minority Business Commission. Ms. Mitchell has been nominated to fill the position left vacant by Ms. Jacquelyn A. Schauer who resigned effective May 8, 2003. Ms. Mitchell's term will run through August 2004 to complete the current term of Ms. Schauer.

City staff recommends City Council adopt the resolution confirming the appointment of Ms. Connie Mitchell as the AIA representative on the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 422

F. RESOLUTION NO. 03-98 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH THE STATE HISTORIC PRESERVATION OFFICE TO RECEIVE GRANT FUNDS TO HIRE A CONSULTANT TO COMPLETE THE NOMINATION REPORT FOR THE CLINGMAN/RIVERSIDE INDUSTRIAL HISTORIC DISTRICT

Summary: The consideration of a resolution to enter into an agreement with the North Carolina State Historic Preservation Office for and in consideration of a federal grant from the US Department of Interior, National Park Service in the amount of $2,000 for the purpose of the preparation of the Clingman/Riverside Industrial and Commercial Historic District National Register Nomination Report.

The project is to prepare a National Register nomination form for the Clingman/Riverside Industrial and Commercial Historic District. The proposed district encompasses approximately

20-25 properties on 2 ½ acres located to the west of downtown Asheville in the area north of Lyman Street and east of Riverside Drive. The proposed district, along with two other identified sub-districts was approved for inclusion in the North Carolina Study List in 1999. This nomination will include only the historic and commercial area within the larger West/End Clingman Avenue Neighborhood as identified in the grant application unless modifications are determined necessary through field observation efforts. A consultant who meets the qualifications outlined in 36 CFR 61 will be hired to prepare the nomination according to the guidelines outlined in National Register Bulletin 16A. The complete and final draft will be submitted to the State Historic Preservation Office no later than August 30, 2004.

The total cost for the project is $3,380. The grant is for $2,000 and the remaining local match of $1,380 will be provided by the property owners within the district as indicted on the application. The City will not be responsible for the local match. The grant period is from 6/1/2003-9/30/2004.

City staff recommends that the City of Asheville enter into an agreement with the State Historic Preservation Office to receive grant funds to hire a consultant to complete the nomination report for the Clingman/Riverside Industrial Historic District.

RESOLUTION BOOK NO. 27 – PAGE 423

G. RESOLUTION NO. 03-99 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR AN ASHEVILLE POLICE DEPARTMENT TRAFFIC UNIT

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit.

On March 25, 2003, City Council adopted Resolution No. 03-42 authorizing the City to apply for and enter into an agreement with the North Carolina Governor's Highway Safety Program for personnel and equipment funds for an Asheville Police Department traffic unit. Following a meeting with the Grant Program Coordinator for the North Carolina Governor's Highway Safety Program, the amount of the grant has increased to $498,747.54, while the City's local match has decreased to $67,765.89.

To remind Council, the Governor's Highway Safety Program offers a four-year grant with graduated match requirements in the personnel, equipment and additional costs categories. The Asheville Police Department is requesting $498,747.54 in grants from the Governor's Highway Safety Program to hire and train four officers and one supervisor, and to purchase five vehicles and computer equipment for the unit in the first year. The first year of the grant there is a 25% match on equipment and training, but there is no match for personnel. The match is $67,765.89 for the first year, which will require an appropriation of $67,765.89 from the Contingency account. Upon notification of grant award, a budget amendment will be brought to Council for the full amount of the grant award, including the City's local match. The original grant amount was for $474,438 and the original local match was $71,365.82. The formal grant application requires that the Mayor sign a pre-formatted resolution created by the North Carolina Governor's Highway Safety Program.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds to hire and train a traffic unit with four officers and one supervisor to reduce the incidence of aggressive driving in the City of Asheville and allow the Mayor to sign the GHSP-02 Local Governmental Resolution from the Governor's Highway Safety Program.

RESOLUTION BOOK NO. 27 – PAGE 424

H. MOTION ACCEPTING A GRANT FROM THE N.C. DIVISION OF AIR QUALITY TO CONSTRUCT A COMPRESSED NATURAL GAS FUELING STATION AND IMPLEMENT A LONG-TERM ALTERNATIVE FUELED VEHICLES PROGRAM

Summary: On November 14, 2000, City Council adopted a resolution supporting an alternative fuel vehicle program and authorized staff to submit grant applications to support it. In April 2001, the City received a $400,000 grant from NC Division of Air Quality (DAQ) to construct a compressed natural gas (CNG) fueling station in the City. The two primary reasons for the award were:

a. To complete a State-wide fueling "corridor" master plan along I-40 which would accommodate CNG-powered vehicles from coast-to-coast;
b. To provide a fast-fill source for locally owned/operated CNG vehicles.

Unfortunately, due to State budget challenges in 2001, the grant was not funded as planned.

Last month DAQ staff contacted the City and expressed interest in re-funding the construction of a CNG fueling station.

If City Council wishes to move forward and accept the grant if received, a resolution authorizing the City to accept the grant and entering into an agreement with the N.C. Division of Air Quality, and a budget amendment will be brought before Council.

City staff recommends City Council (1) accept the Mobile Source Emissions Reduction Grant; (2) construct CNG fuel station; (3) fund/develop a Citywide AFV program; (4) maintain partnership(s) for clean air; and (5) research and implement new AFV technology, as available.

I. ORDNANCE NO. 3030 - ORDINANCE DELETING APPENDIX F OF THE CODE OF ORDINANCES AND CHANGING THE METHOD OF DESIGNATING METER ZONES AND THE METHOD OF PARKING IN DOUBLE METER SPACES

Summary: The consideration of an ordinance changing the method of designating meter zones and the method of parking in double meter spaces.

Due to economic expansion and construction in the Central Business District and the ever-changing traffic patterns, there are frequent and continual changes in the layout of parking. Appendix E requires a change by City Council to add meters in these new areas when changes take place. By repealing Appendix E and amending Section 19-162, we will be able to install meters immediately as the traffic engineer designates through expansion, contraction, or alteration, new parking spaces in the Central Business District.

An amendment is also necessary to Section 19-164 regarding the parking at double sided parking meters. As a person parks their vehicle there is no way they can be in compliance with the current ordinance if they park in the forward parking space of a double meter. This amendment will reflect the new meters.

City staff requests City Council approve the ordinance.

ORDINANCE BOOK NO. 20 – PAGE 339

J. RESOLUTION NO. 03-100 - RESOLUTION REAPPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Summary: The term of Gene Bell, as a member (and Chair) of the Civil Service Board, expired on May 21, 2003.

On June 3, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mr. Bell, as a member (and Chair) of the Civil Service Board, to serve an additional two-year term. His term will expire May 21, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 425

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO CLOSING A PORTION OF AN UNOPENED ALLEY OFF CATAWBA STREET

RESOLUTION NO. 03-101 - RESOLUTION CLOSING A PORTION OF AN UNOPENED ALLEY OFF CATAWBA STREET

Due to a conflict of interest by Mayor Worley, Mayor Worley asked Vice-Mayor Bellamy to preside over the meeting during this item.

Councilwoman Jones moved to excuse Mayor Worley from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Peterson and carried unanimously.

Vice-Mayor Bellamy opened the public hearing at 5:21 p.m.

Public Works Director Mark Combs said that this is the consideration of a resolution to close a portion of an unopened alley off Catawba Street. This public hearing was advertised on May 16, May 23, May 30 and June 6, 2003.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process the adjoining property owners have requested to close a portion of the alley off Catawba Street.

Currently there is a structure that exists in the middle of the alley. The request is being made in an effort to correct this situation and get the structure onto private property.

Public Works Department staff has determined that the portion of the alley off Catawba Street running north to south between PIN Nos. 9649-09-05-4276 and 9649-09-05-3233. The portion for which closure is requested extends from Catawba Street to the rear of the lots stated above. Lots bordering the portion of the unopened alley are PIN Nos. 9649-09-05-4276 and 9649-09-05-3233.

City staff recommends that City Council adopt the resolution to close a portion of an unopened alley off Catawba Street.

Mr. Gerald Green spoke in support of closing this portion of an unopened alley off Catawba Street.

Vice-Mayor Bellamy closed the public hearing at 5:25 p.m.

Vice-Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 03-101. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 426

Vice-Mayor Bellamy relinquished the gavel back over to the Mayor to preside.

B. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HIGHWATER CLAYS INC.

RESOLUTION NO. 03-102 - RESOLUTION OFFERING HIGHWATER CLAYS INC. AN ECONOMIC DEVELOPMENT INCENTIVE GRANT AND AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT

Mayor Worley opened the public hearing at 5:26 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution to consider offering an economic development incentive grant to Highwater Clays, Inc. This public hearing was advertised on May 30 and June 6, 2003.

Highwater Clays, Inc. is a nationally recognized provider of clays, equipment, and services used to make pottery. The Asheville-based firm employs 27 people. The business is growing and the company is proposing an expansion of its operations in the River District. The owners have requested consideration for an incentive grant under the City of Asheville Economic Development policy. The company is proposing new, taxable, capital investment of $725,000 for additional production equipment and facility improvements and the creation of 5 new jobs. The City of Asheville is considering offering Highwater Clays, Inc., a grant totaling $7,500.

City staff recommends Council approve the resolution authorizing an economic development incentive grant to Highwater Clays, Inc.

Upon inquiry of Mr. Fred English, City Manager Westbrook explained the City's economic development incentive policy.

Councilman Dunn spoke ins support of awarding this incentive grant. He felt this was a good way to foster small businesses.

Mayor Worley closed the public hearing at 5:31 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 03-102. This motion was seconded by Councilwoman Jones and carried unanimously.

Vice-Mayor Bellamy thanked Highwater Clays for their investment in the West End/Clingman Avenue area.

RESOLUTION BOOK NO. 27 – PAGE 427

C. PUBLIC HEARING TO CONSIDER AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE STANDARD MINIMUM LOT SIZES IN ALL RESIDENTIAL DISTRICTS AND TO CLARIFY LOT WIDTH REQUIREMENTS FOR CUL-DE-SAC DEVELOPMENT AND FOR FLAG LOTS

ORDINANCE NO. 3031 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR MORE STANDARD MINIMUM LOT SIZES IN ALL RESIDENTIAL DISTRICTS AND TO CLARIFY LOT WIDTH REQUIREMENTS FOR CUL-DE-SAC DEVELOPMENT AND FOR FLAG LOTS

Mayor Worley opened the public hearing at 5: 34 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for more standard minimum lot sizes in all residential zoning districts and to clarify lot width requirements for cul-de-sac development and for flag lots. This public hearing was advertised on May 30 and June 6, 2003.

This code amendment provides for more standard minimum lot sizes in all residential zoning districts and clarifies lot width requirements for cul-de-sac development and for flag lots. This amendment was requested by the City-County Housing Task Force and is summarized below.

Minimum Lot Size

Zone	Current	Proposed
RS-2	21,780	20,000
RS-4	10,890	10,000
RS-8	5,445	5,000
RM-6	7,260	7,000
RM-8	5,445	5,000
RM-16	5,445 or 2,722.5/unit	5,000 for multifamily* 2,500 for single family attached (townhomes) 3,500 for single family detached

Lot Widths for Cul-de-Sac Developments

New Language: Lots on a cul-de-sac shall be a minimum of 25 feet wide at the right-of-way line and 75% of minimum at the front setback line and shall average the minimum lot width over the entirety of the lot

Flag Lots

Added Language (incorporates an interpretation):

- No more than one lot in a subdivision of less than 8 units shall be a flag lot
- No more than 2 lots or 10% of the total lots, whichever is greater, shall be flag lots in subdivisions of 8 or more lots

Also included are two "housekeeping" amendments. First, the reference to residential lots having public street access has been corrected to allow for private streets built to public street standards as another option. Second, a correction to an incorrect reference is made.

* Since the adoption of the Urban Residential District, staff reconsidered the multi-family minimum lot size for the RM-16 district. We recommended a 10,000 square foot minimum to the Planning and Zoning Commission, but are now suggesting a 5,000 square foot minimum lot size to accommodate smaller-scale multifamily development; this would be slightly smaller than the current provision of 5,445 square feet.

On May 7, 2003, the Planning & Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well, with the change in the RM-16 multifamily lot area to 5,000 square feet.

Ms. Janet Moore, Chairman of the Asheville-Buncombe Housing Task Force, spoke in support of this code amendment.

Mayor Worley closed the public hearing at 5:37 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3031. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 341

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE APPROVAL AUTHORITY AND PROCESS FOR MODIFICATIONS OF THE SUBDIVISION REGULATIONS

ORDINANCE NO. 3032 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES OF THE CITY TO ASHEVILLE TO REVISE THE APPROVAL AUTHORITY AND PROCESS FOR MODIFICATIONS TO THE SUBDIVISION REGULATIONS

Mayor Worley opened the public hearing at 5:39 p.m.

Urban Planner II Carter Pettibone said that this is the consideration of an amendment to the Unified Development Ordinance to change the approval authority for subdivision modification requests. This public hearing was advertised on May 30 and June 6, 2003.

Currently, both the Technical Review Committee (TRC) and Planning and Zoning Commission review requests for modifications to the subdivision ordinance prior to review and approval by the City Council. The typical timeframe for review and approval of these requests is about 2 months. These are technical modifications that address such issues as lots that don't front on a public right-of-way and similar matters.

This ordinance amendment will help streamline the review process for subdivision modifications by allowing their review and approval by the Technical Review Committee. All applicable city departments would still review these requests as part of the TRC review process. The ordinance amendment would also provide for a more equitable treatment of subdivision issues since the TRC is the review and approval authority for major subdivisions.

The review process would be reduced from 2 months to about 14 days. Staff believes this ordinance amendment provides a more streamlined and equitable alternative for subdivision modifications.

At its May 7, 2003, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mr. Pettibone explained two additional "housekeeping" amendments to Section 7-3-1 (a) (5) and Section 7-3-5 (a) (3) which text amendments were adopted in 2000.

Upon inquiry of Councilman Mumpower, Mr. Pettibone explained that the appeals of the TRC go to the Planning & Zoning Commission.

When Councilman Mumpower asked about outside groups reviewing this amendment, Planning & Development Director Scott Shuford said that the Council of Independent Business Owners were satisfied with the amendment.

Mayor Worley closed the public hearing at 5:46 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 3032, with the two additional amendments to Section 7-3-1 (a) (5) and Section 7-3-5 (a) (3). This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 344

E. PUBLIC HEARING ON THE FISCAL YEAR 2003-04 ANNUAL OPERATING BUDGET

Mayor Worley opened the public hearing at 5:47 p.m.

Budget Director Ben Durant said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal 2003/2004 Annual Operating Budget was presented to City Council on May 12, 2003, and another worksession was held on June 4, 2003. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 30 and June 6, 2003. Adoption of the Budget Ordinance is scheduled for June 24, 2003, at the City Council meeting.

The Fiscal Year 2003/2004 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.53 per $100 assessed value.

A copy of the Budget is available for public inspection in the City Clerk's Office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which cannot be changed once adopted.

City staff requests City Council conduct the public hearing on the City of Asheville Fiscal Year 2003/2004 Annual Operating Budget and include public input in consideration on the budget.

Mr. Glenn Holbert, Secretary-Treasurer of the Asheville Firefighters Association, addressed the issue of equity as it relates to the monies the City contributes toward retirement benefits for its employees. Even though this inequity has existed for more than 20 years, he would only address the past 18 months of meetings and discussions the Firefighters Association has had with Council. In January of 2002 a meeting was requested with the City Manager to discuss this issue. The Association also conducted fact-based meetings with all members of City Council. During those meetings, the most prevailing concern of the present Council was "why now when the Governor is withholding substantial reimbursements from local governments and we will be lucky to survive the cuts that will be necessary." The firefighters softened their approach and continued with their education process. Their initial proposal contained five specific ways to begin to address the inequities. They also included in their proposal a pay enhancement which they placed on the back burner. During the Fiscal Year 2002-03 budget worksession, they appealed to Council to begin the process to determine the cost of a separation allowance. They felt this enhancement had the most promise. It addressed their needs and would, given a better financial climate, not place an unrealistic burden on the City's budget in any one given year. This is where the distrust of the firefighters and Council began. In June of 2002, Council promised that an actuarial study would be conducted prior to the budget deliberations for Fiscal Year 2003-04. That actuarial study would allow all parties to put to rest the debate relative to the cost of this allowance. To date no actuarial has been conducted and the cost of this proposal has yet to be determined. On February 21, 2003, the Fire Department conducted a staff planning session and during that session Assistant City Manager Jeff Richardson gave a report on the annual City Council retreat. He outlined the Council's priority list and we were pleased to see that the retirement benefit had made the top five. This was when they saw Council's attempt to narrow the discussion perimeters. Social security was Council's focus and all other options were fading. During the meetings in May of 2003, the firefighters reiterated their reluctance to embrace social security as the first and/or step in solving this issue. The $540,000 that will be needed to fund social security at today's salaries seemed the most unrealistic part of this equation. That amount will only increase over time. Secondly, social security does not benefit all firefighters equally. The windfall elimination provisions will penalize firefighters up to 60% of their benefits if they have not been in the social security system for 20 years. Finally, there is no actuarial for the separation allowance costs and we feel those figures would make this issue a no-brainer. It is fiscally irresponsible on the part of this Council not to consider both options and weigh the potential cost and benefits. The funds must be available to administer either program and in your budget worksession, the cost-cutting that would probably have to take place to fund social security would place jobs or the merit-based plan in jeopardy and we will not be the fall guys for that kind of approach. The firefighters have approached this issue in good faith. The City pays 18.32% of salary for benefits for police officers, 16.45% for benefits for all other employees and 10.3% for firefighters. This has been occurring since 1980. What this Council does will send a very strong message to the firefighters that protect the citizens of Asheville. Do their sacrifices count for something other than a pat on the back? Words will no longer suffice. Action is the only thing that will send a clear message. We will not be the scapegoat for tough decisions.

Ms. Paula Robbins, member of the Greenway Commission and Secretary of the Asheville Parks and Greenways Foundation, spoke about the dedicated and talented staff of the Parks and

Recreation Department. Their accomplishments have been rewarded by their professional peers with this year's award as the best Parks and Recreation Department in the Country for this size city. In addition to all of their past accomplishments, there are many exciting projects in the planning stages and nearing completion, e.g., Asheville Film Festival, Azalea Road Park, Richmond Hill Park and the Reed Creek Greenway. All have been collaborative projects with many other organizations so that funding has come primarily from sources other than taxpayer money. The citizens of Asheville need and want the services brought to them by the Asheville Parks and Recreation Department. She urged Council to maintain financial support for this department.

Mr. Fred English wondered if money could be used from Homeland Security to pay Police Department salaries. He spoke in support of the police officers and firefighters.

Detective Rondell Lance, President of the Fraternal Order of Police in Asheville, has seen Council struggle in the past with difficult decisions and how they strive to do what is right. He has seen Council listen and weigh each issue carefully. There are two issues he would like to address. One is the Advanced Certificate Program. As a law enforcement officer, we receive certifications in many different fields, such as radar, breathalyzer, etc. The highest certification that a law enforcement officer can receive is the Advanced Certificate issued by the State of North Carolina Criminal Education and Justice Standard Commission. This program awards officers for their time and service, as well as their education and training. He has been a police officer for 15 years and it has taken him 10 years to achieve his Advanced Certificate. You can be an officer for 20 years and not achieve the Advanced Certificate. It is something that an officer has to strive for and work to achieve. This program can be the difference between an officer deciding to go to Charlotte or the Highway Patrol or Winston-Salem to work because of higher wages. This would also be an incentive for the new officers to work toward and a benefit for those considering employment with the City. He encouraged Council to implement the program to reward the officers for the time, education and training. The second issue is the merit pay. Last year the City Manager sent an email to all employees and said that due to the financial difficulties with the state budget and lack of reimbursements, the City would not be able to give its employees a merit raise as it had in the past. After talking with his organization, they decided it was a legitimate reason for not receiving a merit pay. Being the professional and dedicated public servants that we are, we bit the bullet and did not complain. It was difficult, but we believed that once the City was able, they would once again implement the merit program. We waited in anticipation for the new budget. Also last year, there was an increase in our health insurance so employees were faced with no merit raise and less take-home pay. Last year was a difficult year for City employees. Now this new budget. He attended the first worksession and observed the City Manager and Budget Director present Council with a balanced budget that included the reinstatement of merit pay for employees, as well as the Advanced Certificate Program for law enforcement officers. We were pleased. Then we heard some of Council had a problem with employees receiving their merit raise and some had a problem with the Advanced Certificate Program. Then we were again faced with the possibility of no raise for the second year in a row. What was worse was that we knew that the money was there to implement the programs. He heard a Council member state "when I worked I did not get a merit raise" and as soon as he heard this, he hoped that Council member was just thinking out loud because such a statement has no bearing on raises for City employees. To say he didn't get a raise when he worked so no one else should get one seems selfish and not a reason to deny dedicated employees their merit pay. He also heard a Council member make the statement "that many businesses in our area are not getting raises this year." This is probably true, but there are many businesses in our area that are getting raises this year. And probably one of those reasons for not receiving a raise is the economy, but another one could be poor management. To use this as an excuse to not give the City employees raises has no value and is not a valid reason. To say everyone in our area is not getting a raise, so he employees of Asheville should not get one is ridiculous and based on that theory, we would never get a raise. Council should reinstate the

10

merit raise and Advanced Certificate Program for the following three reasons: (1) Council is investing in the economy of the City. We as City employees eat in the City, buy gas in the City, bring our families to the City, we support charities in the City, and we buy clothes and shop in the City. (2) The money is there. We know from the worksession that the money is there for the programs and for Council to look into the faces of City employees and their families and say "we are not giving you these programs" is a discredit to the employees, to their families, and to the citizens of Asheville. (3) The employees deserve these programs. The City of Asheville is second to none. Our employees receive awards continually on federal, county and state levels. The employees of Asheville are some of the best in the state. The service that they provide on a daily basis is to be commended. The City triples in population daily by people coming from McDowell, Henderson, Haywood, Madison, Polk and all surrounding counties to enjoy what Asheville has to offer. The City is growing because of the efforts of the employees of this City. It's a great City and it's made so by it's employees. Council members come and go and many of you here to today may, in five years, will not be sitting up there on Council. But we employees will still be here, working days, working nights, working in the snow and rain, sleet, during Bele Chere, during Christmas parades and all the other activities the City provides. To have Council tell us that we do not deserve a raise – we can give you one, but we aren't – hurts the City, the employees, citizens and tourism of this City. He encouraged Council to implement these programs. He begged Council to invest in the employees and watch the employees make the City better than it is. Watch us maintain a place that people from all over the country can come and enjoy all that the City has to offer. All we ask is for Council to give the employees what they deserve and earn as dedicated professional employees of this great City.

Mr. James Grant, member of the Recreation Board and commissioner of the National Parks and Recreation Association, challenged Council to keep our parks and recreation alive. We are a health care provider to the residents of Asheville. He explained how inactivity and poor nutrition have a disastrous impact on the health of North Carolinians. As a National Gold Medal Winner for Recreation and Park Management, Asheville provides services to all persons in our region. He explained the Pool Pal Program. All recreation centers help to prevent crime and the fear of crime in our neighborhoods.

Mr. Jim Drummond, Commissioner for the Asheville Youth Sports Program, explained how the Parks and Recreation Department has an economic impact, a wellness impact and an education impact on our citizens.

Ms. Ann Babcock, member of the Recreation Board, explained how parks, recreation programs and greenways define the quality of life in a community.

Mr. Dennis Justice, Fletcher resident, was concerned over the Civic Center. He explained how it is hard to recruit teams and events there due to the condition of the Civic Center. He believed the City should take the auditorium and performing arts center out of the equation and hire an engineer to tell the City what will extend the life of the arena by 20 years or more.

Mr. Mike Lanning, representing the Police Benevolent Association, spoke in support of the Advanced Certificate Program as an incentive to keep trained officers, as well as an inducement to hire new officers.

Mayor Worley closed the public hearing at 6:21 p.m.

After a short discussion, it was the consensus of City Council to begin their June 17, 2003, worksession at 2:00 p.m. in the First Floor Conference Room to discuss the budget prior to their regular worksession items.

It was also the consensus of City Council to postpone the update on the Minimum Housing Code from their June 17 worksession until July 15, 2003, since some key voices will not be available on June 17. City Manager Westbrook noted that City staff is ready to present their recommendations.

Mayor Worley announced that on June 24, 2003, City Council will consider adoption of the Fiscal Year 2003-04 Annual Operating Budget.

At 6:30 p.m., Mayor Worley announced a short break.

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 03-103 - RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN FOR THE 2004 ANNEXATION AREAS TO REFLECT REVISED PERIMETER AND CONTIGUITY FOR THE ANNEXATION AREAS

Urban Planner II Carter Pettibone said that this is the consideration of a resolution amending the Annexation Services Plan for the 2004 Annexation Areas to reflect revised perimeter and contiguity calculations for the five annexation areas.

In adopting an annexation ordinance, the City has the authority to annex all or some of an area proposed for annexation, as long as that area qualifies for annexation. The City may also amend the services plan, as long as the requirements for providing service to the annexation areas continue to be met.

At the public hearing on May 27, 2003, City staff recommended that the perimeter and contiguity calculations for the annexation areas be revised to reflect more detailed metes and bounds descriptions for the annexation areas. These revised metes and bounds descriptions were developed after the adoption of the Resolutions of Intent and the Annexation Services Plan and reflect more detailed and thorough descriptions of the areas. The proposed amendment to the Services Plan results from these revised boundary descriptions. The effects of this change are that it causes the contiguity of the Deaverview Road Area to be increased significantly and the contiguity of the other areas to be revised slightly, but does not cause any of the areas to qualify under any additional tests.

This technical amendment allows us to incorporate improved information for these calculations into the Services Plan. It also does not increase the size of areas under consideration or add any additional property to the annexation areas. There are no changes to proposed services, costs, or revenues associated with this amendment.

As long as the Annexation Services Plan does not show the annexation areas as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

City staff recommends City Council adopt a resolution amending the Annexation Services Plan to revise perimeter and contiguity calculations for the five annexation areas.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 03-103. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 428

72

B. ORDINANCE NO. 3033 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE DEAVERVIEW ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 10, 2003.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Deaverview Road area.

On March 25, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area. The Annexation Services Plan for all of these areas was approved on April 8, 2003, and the Plan was amended on June 10, 2003. A public information meeting was held on May 15, 2003. Public hearings on each of annexations were held by City Council on June 10, 2003. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Staff recommends adoption of annexation ordinance for the Deaverview Road area, with an effective date of June 30, 2004.

Upon inquiry of Councilman Mumpower, Mr. Pettibone reminded Council what was located on this site.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3033. This motion was seconded by Councilwoman Jones.

Councilman Dunn said that it's not because it's politically good to vote against an unpopular theme but rather his negative vote stems from a much bigger issue. Council ran for their City to be a better place. After one year or more, he sees little headway on big issues that affect the City revenues. He has seen a lot on Unified Development Ordinance amendments, proclamations and rezoning issues, but there are much bigger issues that we need to start taking care of if we are going to continue annexing. He doesn't think we are making enough of a strong voice. The room tax. The room tax in Asheville is 4 cents. This Council should go on record, in my opinion, of supporting a 7-cent room tax to go directly to Asheville to support infrastructure, police, and parks and recreation. That's $2-3 Million we would have in our coffers if we would go on record as supporting this. He knows our legislators are the only ones who can do this. They have been voting for room tax increases all over this state continuously as seen by their records, but they will not do it in their own back yard. This is an abomination. The Republicans and Democrats in Raleigh need to hear from this Council. It's time for us to get that room tax to use for these various projects. This is something we need to do. He felt we need to stop wasting money on two school systems. Our citizens are paying 20-cents to supplemental school tax. We are duplicating services and he has the records to prove it. Although we are making headway, he didn't see that we need an administrative top hierarchy to continue using tax dollars on. Part of that supplemental school tax could be used as a tax break to our citizens. He's talked to teachers and they don't really care if the administration is one way or the other, as long as they get their

73

supplements and as long as they have autonomy for the Asheville High School and the other parts of the Asheville School System. That is a significant tax break for some of our citizens. If we were diligent in placing real pressure on our state representatives we could be receiving room tax revenue paid by tourists for roads, streets and the Civic Center. The Mayor will say that we have done that and we have asked them for a menu. That's fine, but it has taken years for that to really happen. It's time for voters in our City to decide if they are going to keep voting for our state legislators when they continue to not support this City. It takes infrastructure money for the hotels and it's time to hit that issue. That is one of the things we need to do. Why pick on schools? It's a political hot potato, but in reality we could save the taxpayers even more dollars. The Blue Ridge Parkway costs our City $10,000 or more a month to haul dirt across the County into Fairview. We are being held hostage by the Blue Ridge Parkway that is costing our taxpayers big dollars. We ought to be incensed about that. We should not allow that to continue. We need to merge some of these City and County government issues. We have done a wonderful job with the 911 and the Joint Planning Agency. By just annexing these areas, we are trying to gain a tax base without the trouble of getting involved politically with the ones he just mentioned. By annexing businesses, like Day International, we are working against the large companies that employ people. When you look at the population of Asheville, which is roughly 70,000 people, it's the same as it was 60 years ago. Annexation is not being the catalyst to keep our density and our population here in Asheville. Look at history, it's failing. What are we offering the people we annex? He personally doesn't think we're offering them a great deal. Some say that the folks should pay taxes to the City because they benefit from being in the City. He would argue that and say he thinks some of the people living in our City are not getting the fair shake they deserve either. He lives in Wilshire Park and it's been in the City 50 years and still no sidewalks there. We talk about 1,700 miles of water lines and only a handful is going to be repaired. Three hundred and fifty miles of streets - $1.2 Million, and we're still 35 years behind. Some of you will argue that we have no control over these issues. He would argue that what Council says and what we do means a lot. We need to become more vocal and push this agenda. Nothing like pressure – that's when things happen. When he leaves this Council after four years of service he wants to make Asheville a better place. But the status quo has got to stop. We have got to take a stand on the room tax and other things to help us pay our bills. They say that by attacking the room tax, we are killing the goose that lays the golden egg. He would say that every goose needs a nest and the nest is Asheville. We need to be giving this some more service besides a little behind the back nudging. He would encourage Council, if we keep annexing, to get vocal about these issues. He would support annexation if he thought we were doing everything we could do to bring more revenue.

Councilman Mumpower said that focusing specifically on annexation, he doesn't like it, he finds it unpleasant and personally it's a distasteful activity, but it's fairness issue. If people live in the immediate proximity of the City or do business in the immediate proximity of the City, then they should share in the cost of running the City. A lot of people that live near the City benefit from the City and a lot of the people that do business near the City benefit from being around all these people. Distasteful as it may be, if we're going to be fair to the people who pay for this City then he thinks that we have to ask some of those people to step up and do their fair share.

The motion made by Councilman Peterson and seconded by Councilwoman Jones carried on a 6-1 vote, with Councilman Dunn voting "no.

ORDINANCE BOOK NO. 20 – PAGE 348

C. ORDINANCE NO. 3034 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE CROWELL ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 10, 2003.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Crowell Road area.

On March 25, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area. The Annexation Services Plan for all of these areas was approved on April 8, 2003, and the Plan was amended on June 10, 2003. A public information meeting was held on May 15, 2003. Public hearings on each of annexations were held by City Council on June 10, 2003. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Staff recommends adoption of annexation ordinance for the Crowell Road area, with an effective date of June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Upon inquiry of Councilman Mumpower, Mr. Pettibone said that property tax for the motel would be approximately $11,336 and the property tax for the Smoky Mountain Auto Service would be approximately $1,283. Fire Chief Greg Grayson also responded that the property owner for the Auto Service said that his insurance company had told him that he would have approximately $300 in savings in insurance premiums and he will also experience a 7.5 cents per $100 value in fire tax savings (approximately $200).

Councilman Ellis said that there are several other motels in that immediate vicinity and not annexing this one puts the other motels at a disadvantage.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3034. This motion was seconded by Councilman Ellis.

Councilwoman Jones felt that the non-residential use test, when utilizing small parcels, isn't really strong and she would therefore vote against this annexation.

The motion made by Councilman Peterson and seconded by Councilman Ellis carried on a 5-2 vote, with Councilwoman Jones and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 20 – PAGE 352

D. ORDINANCE NO. 3035 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE SMOKY PARK HIGHWAY AREA

Mayor Worley said that the public hearing on this matter was held on June 10, 2003.

75

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Smoky Park Highway area.

On March 25, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area. The Annexation Services Plan for all of these areas was approved on April 8, 2003, and the Plan was amended on June 10, 2003. A public information meeting was held on May 15, 2003. Public hearings on each of annexations were held by City Council on June 10, 2003. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Staff recommends adoption of annexation ordinance for the Smoky Park Highway area, with an effective date of June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Upon inquiry of Vice-Mayor Bellamy, Assistant City Manager Jeff Richardson explained the resolution of the property owner's concern regarding the tax issue of the property.

Mr. Mike Fryar, property owner, explained how the building and property were improperly assessed by Buncombe County.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford explained that there is potential for further development in this area and every time we annex property, we improve the future contiguity for the new property to come into the City.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

After discussion, Councilman Mumpower moved for the adoption of Ordinance No. 3035. This motion was seconded by Vice-Mayor Bellamy.

Councilman Ellis felt that we should wait to annex this property until the land around it develops further. Planning & Development Director Scott Shuford said that this is really the dead-end of where the City limits line can go absent the development on the old BASF property.

Councilwoman Jones felt that the non-residential use test, when utilizing small parcels, isn't really strong and she would therefore vote against this annexation.

Upon inquiry of Mayor Worley, Fire Chief Greg Grayson explained how the area would be served for fire protection.

Councilman Ellis decided to vote in favor of this annexation and hoped that in the future the value of the property will be increased considerably though this annexation.

The motion made by Councilman Mumpower and seconded by Vice-Mayor Bellamy carried on a 5-2 vote, with Councilwoman Jones and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 20 – PAGE 356

E. ORDINANCE NO. 3036 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE SAND HILL ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 10, 2003.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Sand Hill Road area.

On March 25, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area. The Annexation Services Plan for all of these areas was approved on April 8, 2003, and the Plan was amended on June 10, 2003. A public information meeting was held on May 15, 2003. Public hearings on each of annexations were held by City Council on June 10, 2003. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Staff recommends adoption of annexation ordinance for the Sand Hill Road area, with an effective date of June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3036. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 20 – PAGE 360

F. ORDINANCE NO. 3037 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE HENDERSONVILLE ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 10, 2003.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Hendersonville Road area.

On March 25, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Deaverview Road area, Crowell Road area, Smoky Park Highway area, Sand Hill Road area, and Hendersonville Road area. The Annexation Services Plan for all of these areas was approved on April 8, 2003, and the Plan was amended on June 10, 2003. A public information meeting was held on May 15, 2003. Public hearings on each of annexations were held by City Council on June 10, 2003. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Staff recommends adoption of annexation ordinance for the Hendersonville Road area, with an effective date of June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

When Councilman Mumpower asked if the City has contacted Day International, Mr. Pettibone said that he had and they expressed concern over rising taxes.

Councilman Mumpower expressed concern that this is a less than ideal time to annex the export business of Day International and risk the loss of jobs. He explained how industrial jobs are at a high risk and how we should try to hold onto them. He asked if Council would be willing to consider deleting the Day International property from this annexation.

Councilman Peterson appreciated the concern about Day International, but noted that they will not have to be paying Skyland Volunteer Fire Department taxes and they might have other savings. If we looked at every major employer in Asheville and said we want to protect those jobs by not charging them property taxes, then all the residents would have to pay 20-40% more for the services. That's not fair. If they are looking to expand, they would have the advantage of applying for the City's economic development incentive grant and get a property tax rebate for a number of years. Cities that are growing have done well economically and there has been job growth and rising incomes. The more people that are brought into the system, the less that everyone else has to pay. If we say we don't want to burden this one, and we don't want to burden that one, what we end up doing is shifting that burden to everyone else. Our job is to look at the bigger picture. If Day International had some particular concern and they wanted some economic rebate, we have a lot of programs to try to encourage jobs to stay here and to bring jobs to the City so we can address that on that front.

Councilman Dunn said that Asheville is becoming the most expensive City in the state to live and we are going to have to find other sources of revenue.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3037. This motion was seconded by Councilman Peterson and carried on a 5-2 vote, with Councilman Dunn and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE [illegible] mb 364

Mr. Shuford showed a chart explaining that the trend around our state is urban growth through annexation.

City Manager Westbrook explained how not growing in population affects other monies the City receives.

V. NEW BUSINESS:

A. RESOLUTION NO. 03-104 - RESOLUTION INITIATING THE CANDIDATE INFORMATION SESSION

City Manager Jim Westbrook said that several months ago City Council asked the City Manager to develop a program of information for members of the public who run for City Council. The feeling was that in the past, if there had been general information sessions about City government and specific programs, misinformation would have been less likely to develop during the election process. In preparing the proposed agenda, all City departments were consulted, as well as the City Attorney, the City Clerk and the Institute of Government.

As you know, City staff could literally take hours going into detail on various programs that would be of interest. However, the City Manager felt it most important to allow potential candidates to ask questions so they could decide what is important. In talking with staff at the Institute of Government about this particular initiative, they indicated that they were changing their program for new council members to include processes for working as a group, the need for personal time commitment, and taking a long-term view of both issues and relationships, among other things. Therefore, that is included in the agenda, too.

The City Manager would ask that Mayor Worley or a similar elected official act as the leader of the meeting, setting up the ground rules, as well as keeping time and moderating as necessary. After a brief welcome and introduction, the City Manager would present some information concerning the City's relationship to the state, as well as the council-manager form of government. He would be followed by the City Attorney who would present information on state law, local law, conflicts of interest, Open Meetings law, etc. The Finance Director and the Budget Director would follow with brief explanations of the budget and financial condition. This general information would be followed by a question and answer session with all candidates, moderated by Mayor Worley.

The last session would be led by a former Mayor and Council Members. The purpose is to follow up on the Institute of Government's suggestion about the need to hear and discuss the democratic process, personal commitments, working as a group, the need for public trust, etc. This would allow persons who are running for Council to hear from a previous Mayor and Council Members who are no longer in elected office their views on these important facets of being an elected Council Member.

The purpose of this report is to explain the program and asks Council's approval to move forward with it.

The City Manager recommends that City Council approve the resolution authorizing the Candidate Information Session.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 03-104. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 435

VI. OTHER BUSINESS:

Award

Mayor Worley proudly announced that Asheville has received City Livability Award for Cities under 100,000 for the Grove Arcade Project from the U.S. Conference of Mayors.

Claims

The following claims were received by the City of Asheville during the period of May 16-22, 2003: John W. Williams (Streets), Delicia Deen (Civic Center) and Kenneth D. Roberts II (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Alan Ditmore spoke about his concern with the growth of density limits and the affect of cost of living.

Mr. Fred English commented about the pushcart provisions of the ordinance and the City's application of those provisions.

Mr. David Lynch, representing Asheville Justice Watch, spoke about the Police Chief's alleged violation of the City's Police Department's Policy No. 1231 (media relations), Procedure 2 (e) with regard to the incident involving Councilman Brian Peterson. A breach of such policy would put an internal review officer in the uncomfortable position of investigating his own chief. Since the Chief has the sole responsibility for issuing findings of fact in such an investigation, he would be charged with determining his own guilt or innocence. We feel that the citizens and leaders of Asheville need to find a way to ensure that our Police Department's professional body is kept as separate as possible from actual or apparent political influence. We submit that this breach of policy illustrates that an independent oversight board is an appropriate and necessary step to provide the safeguards that our community needs and deserves. City Attorney Oast said that he doesn't have any first-hand knowledge, but it is his understanding that the information was already being circulated at the time the Police Chief made a visit to the Citizen-Times.

Mr. Peter Dawes, from the Mountain Guardian, explained an unsatisfactory incident where he asked for information concerning the Councilman Peterson incident from the City Attorney's Office.

Mr. Michael Morgan felt it was wrong of Council to censure Councilman Peterson since he has not been tried in a court of law.

Mr. Dennis Justice, Fletcher resident, felt that Council should close the door on bringing hockey in the Civic Center until the facility is addressed. He passed out additional information concerning the Civic Center and it's budget.

Mr. Mike Fryar supported the City tearing down the Civic Center and building it somewhere else since there is no parking in the downtown area.

Mr. Walter Plaue expressed his appreciation of Council's support of the Memorial Day celebration at the City-County Plaza. He hoped it would become an annual event.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:43 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 17, 2003 - 2:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Worley announced that the Update on the Minimum Housing Code would be delayed until the Tuesday, July 15, 2003, worksession.

BUDGET WORKSESSION

City Council discussed the 2003-04 Annual Operating Budget.

At 4:10 p.m., Mayor Worley announced a short recess.

CONSENT AGENDA:

Community Meeting on July 29, 2003, in South Asheville

Public Hearing Set for July 8, 2003, for Phenix Research's Economic Development Incentive Grant

Summary: The consideration of a resolution setting a public hearing on July 8, 2003, for an economic development incentive grant to Phenix Research Products, a company relocating to Asheville from California.

Phenix Research Products, formerly of Hayward, California, is relocating to Asheville. The company is setting up its corporate headquarters and distribution functions in offices located in the Business Incubator on the Enka campus of AB Tech – a primary factor in their decision to locate here. The firm is a supplier to the biotech and university market offering a range of equipment and instrumentation. The firm intends to employ approximately 45 people over the next two years.

The Asheville location was selected after consideration of other competitive locations. As part of the recruitment process, the City of Asheville made a tentative commitment to support the project with an incentive grant in the amount of $20,000, which is part of a total local incentive package of $50,000 made in partnership with Buncombe County, AdvantageWest, and the Asheville Chamber of Commerce.

Before the tentative commitment by the City can be officially granted, a public hearing is required.

Staff recommends Council approve the resolution setting a public hearing on July 8, 2003, for an economic development incentive grant to Phenix Research Products.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

2003 SAUMUR INTERNATIONAL CONGRESS

Ms. Barbara Hodgson, Saumur Committee Chair, said that Asheville's Sister City Saumur, France, is hosting the first International Congress October 4-8, 2003 and has invited Asheville and their twin cities in Europe to participate. She outlined the purpose of the Conference and the planned activities.

Mr. Carroll Hughes, President of Asheville Sister Cities, recommended the City and the Chamber of Commerce assist them in developing a display for the Saumur exhibit. They felt it was an opportunity to further develop the information in existence with Asheville Sister Cities being responsible for transporting, setting up and maintaining the display in the future.

Mr. Ken Richards, North Carolina Coordinator for Sister Cities International, and Mr. Daniel Robert, member of the Asheville Sister Cities, urged Council to attend the Conference in Saumur, France, and thanked City Council for their support.

NEIGHBORHOOD/DEVELOPER MEETINGS

Planning & Development Director Scott Shuford said that based on City Council's considerable interest in improving developer and neighborhood communication early in the development review and approval process, City staff undertook a focus group process to identify issues and potential solutions in enhancing the existing "neighborhood meeting" approach. Three separate focus groups were convened. One group represented developer interests; one group represented neighborhood interests; and the third group consisted of the Planning and Zoning Commission. After each group had met and a list of critical issues was determined, selected members from each group then met together on two occasions to identify areas of agreement and to prepare recommendations for action. An independent facilitator was used to direct meeting discussion and provide minutes.

He reported that the focus group process has resulted in a recommended procedure for improved Neighborhood/Developer Meetings. The procedure includes an incentive for developers to choose the Neighborhood/Developer Meeting process over the standard review process. It includes an opportunity for expanded notification of property owners in the vicinity of the proposed development. Finally, it includes an organized approach for the conduct of Neighborhood/Developer Meetings that should result in the meetings to be conducted in an effective fashion. The goal of this procedure change is an early, friendly, helpful official partnership between the neighbors, developers and the City.

In summary, the proposal would apply to all rezoning, conditional use rezoning, and conditional use permit requests that involve Planning and Zoning Commission review. The proposed procedure offers developers the option of selecting an enhanced Neighborhood/Developer Meeting process in exchange for skipping the Planning and Zoning Commission step in our current requirements. This results in no additional time being taken in the development review process but creates significantly improved communication between developers and neighborhoods. City Council would continue to hold a public hearing and take final action on all development proposals, just as is done under the current requirements. Even when developers opt to follow the existing procedures, staff will continue to recommend developer contact with affected neighborhoods.

This recommendation would not have been possible without the dedication of time, creative ideas, and enthusiasm on the part of a large number of volunteers. I would like to thank the following persons for their assistance in creating this recommendation:

FOCUS GROUP PARTICIPANTS

Neighborhood Participants	Developer Participants	Planning & Zoning Commission
Barber Melton	George Morosani	Billie Bule
Headlee Howard	Tom Gallaher/David Hill	Tom Cathey
Greg Gregory	John Spake	Selina Sullivan
Mike Lewis	Chris Eller	Jan Davis
John Quigley	Harry Weiss	Hedy Fischer
Norma Baynes	Jerry Grant	Nate Cannady
Stephen Hudzik	Ron Butler	Rod Hudgins
	Ron Moser	

* indicates that the participant served on the final joint focus group.

Additionally, Paul Godfrey provided invaluable assistance by serving as the facilitator for these focus group meetings.

The following headings provide a summary of the work of these focus groups, including the clarification of key issues, identification of expected results (i.e., what the process should look like), and the specific meeting procedures themselves. These headings illustrate the organized way the groups conducted their business and the level of detail that went into their discussions.

Clarifying Issues and Interests

The following items were listed as major issues relating to Neighborhood/Developer Meetings:

- Misinformation
- Full plan details made available to all parties early in the process
- Lack of trust
- Early and accurate complete information sharing
- Clearly definition of neighborhood stakeholders
- Marketing of development process – common understanding of issues and procedures
- Lack of an on-going dialogue as the development process continues (even after development approval has been given and construction is underway)
- Neighbors don't understand technical aspects of the development process
- Need for a better Neighborhood/Developer Meeting process – ground rules; expectations; facilitation
- Need for citizens to be better educated about the development process
- Lack of understanding about the big picture – how does the project help the City meet its broader goals?
- Need for staff participation in Neighborhood/Developer Meetings
- No existing way to alert and document all impacted stakeholders
- Lack of willingness to compromise on each "side"

The following were identified as the key interests of the stakeholder groups:

- Neighbor concerns: Safety; property values; traffic; change in neighborhood character

- Developer concerns: Profit; property rights; desire to impact community in a positive way; need for clearly defined neighborhood meeting process that is reasonable in terms of time and money; staff involvement in neighborhood meetings for informational purposes and to indicate that the process is officially "condoned" by the City.
- Staff concerns: Time involved in meetings; need to be perceived as neutral in the process.

Criteria for Guiding Process Decisions

Participants were asked to develop a set of criteria for use in evaluating any potential process ideas. The following criteria were developed:

- The process must have teeth.
- The process should be viewed as legitimate in eyes of all participants.
- The process should not be burdensome on any one party or on all parties.
- The process should clarify upfront what is and what is not negotiable.
- The process should be reasonable in terms of time and costs.

Improved Neighborhood/Developer Meeting Procedures

Participants identified the following procedures for improved Neighborhood/Developer Meetings:

- Developer registers project application a minimum of 45 days before the City Council meeting at which the public hearing is scheduled to occur.
  - Plans are placed on record and made available to the public at a central location (City Planning and Development Department).
  - Plans will provide as much information as available at time of posting.
  - Plans will be made available on City website if possible.
  - Staff contact person is clearly identified.
- Notification procedures:
  - Property owners within 400 feet of the property proposed for development would receive notice of the Neighborhood/Developer Meeting from the City of Asheville. This is a minimum notification area and developers are advised to determine if additional property owners should be notified (e.g., if the project is located on a dead-end road 600 feet long, perhaps it would be good practice for the developer to notify all property owners fronting the road); developers would be responsible for any additional mailing costs associated with a larger notice area.
  - Any affected neighborhood association registered with the City and located within 400 feet of the property proposed for development would also receive notice of the Neighborhood/Developer Meeting. It is expected that the designated person(s) receiving this notice will identify key participants outside the general notice area and arrange for them to attend the Neighborhood/Developer Meeting. However, this should not be construed as an open invitation for all neighborhood association members outside the notice area to attend. The intent is to have representation from affected neighborhood associations while ensuring that most neighborhood participants are from the notice area.
  - Timing: The City shall mail Neighborhood/Developer Meeting notices 45 days before the City Council meeting at which the public hearing is scheduled to occur. The initial Neighborhood/Developer Meeting shall occur no less than 10 days prior to the City Council meeting at which the public hearing is scheduled to occur.

    - The City of Asheville will provide notice of the public hearing to adjacent and nearby property owners as provided for under state law or City Code requirements, whichever is more restrictive.
    - Meeting location: Neutral site of sufficient size for meeting.
- Meeting Facilitation - The meeting must be managed by someone who knows the rules (mediator/facilitator) and is able to effectively run a meeting. The developer will pay for the cost of the mediator/facilitator. City staff will attend the meeting as technical advisor(s) only and will not facilitate the meeting.
- Meeting Ground Rules - The following set of ground rules were adopted to promote effective communication during Neighborhood/Developer Meetings. These ground rules would be reviewed by the meeting facilitator at the outset of each meeting and "enforced" during the meeting by the facilitator.
    - Listen to one another (really listen before responding)
    - Ask for feedback from one another
    - Accept the need for compromise by each of us
    - No stereotyping (let's keep a level of objectivity in our discussions)
    - Be open minded
    - Let's clearly define our statements to insure that all parties clearly understand their meaning
- Conduct of Meeting – Meetings will have a structured agenda to include: Ground rules for the meeting; Areas of allowable discussion clarified; Clarification of any zoning rule(s) that applies to the situation; Plan presentation (including how plan addresses the big picture); Identification of areas of agreement and disagreement; Negotiation of issues of concern; and Identification of next steps, if any.
    - City staff must attend the meeting to provide technical advice and information and to indicate official "condoning" of the process.
    - Meeting is intended to result in a signed document of supported and non-supported issues that will be generated by the facilitator (who will also identify the necessary signees).

He asked for Council direction as to whether staff should prepare the necessary code amendments, information packets, and process changes to implement this new procedure.

Coalition of Asheville Neighborhood Chair Barber Melton explained the process and how it will help in the mistrust in the community.

Councilman Mumpower felt that a trial period might be in our best interest. Mr. Shuford said that he could write into the Code amendment a sunset date.

When Councilman Mumpower said this sounds like a mandatory process for the developer with a voluntary process for the neighborhoods, Mr. Shuford explained that the goal is to encourage better communication and facilitation of the development process between developers and neighborhoods.

At the request of Councilman Mumpower, Mr. Shuford said that he would provide City Council with what he would think their responsibilities would be and possible options in this process. In addition, he would have the focus group review the proposed Code amendment.

There was a brief discussion, initiated by Councilman Peterson, on if this process would affect the protest petition provisions.

Councilman Peterson felt that we need to educate people at these meetings and suggested information regarding protest petitions and the standards City Council must consider when issuing a conditional use permit be included in the information packet.

It was the consensus of Council to direct City staff to prepare the necessary code amendments, information packets, and process changes to implement this new procedure.

BOARDS & COMMISSIONS

Mayor Worley and Vice-Mayor Bellamy each spoke about the tireless efforts for improving air quality that Mr. Arlis Queen, who had to resign from the Regional Air Quality Agency Board due to health reasons, brought to the Board. In addition, City Council instructed the City Clerk to arrange interviews for Mr. Queen's vacancy on the WNC Regional Air Quality Agency Board.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Peter Crosa, Jerri Goldberg and Lisa Michie to the Civic Center Commission. In addition, City Council asked the City Clerk to arrange interviews for two vacancies on the Commission.

It was the recommendation of the Boards & Commissions Committee, and consensus of City Council, to not reduce the membership of the Civic Center Commission.

It was the consensus of City Council to postpone making appointments to the Economic Development Strategic Plan Implementation Task Force until the Task Force makes its recommendations in July, 2003.

It was the recommendation of the Boards & Commissions Committee, and consensus of City Council, to reduce the membership of the Educational Access Channel Commission from four years to three years.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Marion Mathews, Nat Myers, Tim Amos (City Schools), Alan Hantz (UNC-A) and Shirley McLaughlin (A-B Tech) and to appoint Monty Fuchs (County Schools) to the Educational Access Channel Commission. In addition, it was the consensus of City Council to designate Kent Thompson (UNC-A seat) to serve in the absence of Greg Dillingham (UNC-A seat) until Mr. Dillingham's return from military duty.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Frank Fishburne, Carol Ann Pothier, James Grant and Susan Sparboe to the Recreation Board.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Darryl Hart to the Regional Water Authority of Asheville, Buncombe and Henderson.

It was the recommendation of the Boards & Commissions Committee to not appoint an oversight board regarding animal control services. However, Councilwoman Jones asked that City Council receive an interim report in three months and a full report in six months.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 24, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Billy Cochran, USMC Ret., led City Council in the pledge of allegiance.

INVOCATION

Mayor Worley gave the invocation.

ADDITION TO THE AGENDA

Vice-Mayor Bellamy asked that a topic regarding the budget be placed at the end of the agenda.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 10, 2003, AND THE WORKSESSION HELD ON JUNE 17, 2003

B. RESOLUTION NO. 03-105 - RESOLUTION AMENDING THE 2003 CITY COUNCIL MEETING SCHEDULE TO INCLUDE A COMMUNITY MEETING ON TUESDAY, JULY 29, 2003, AT 7:00 P.M. AT THE SHILOH COMMUNITY CENTER LOCATED AT 121 SHILOH ROAD, ASHEVILLE, NC

RESOLUTION BOOK NO. 27 – PAGE 436

C. RESOLUTION NO. 03-106 - RESOLUTION SETTING A PUBLIC HEARING ON JULY 8, 2003, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO PHENIX RESEARCH PRODUCTS

Summary: The consideration of a resolution setting a public hearing on July 8, 2003, for an economic development incentive grant to Phenix Research Products, a company relocating to Asheville from California.

Phenix Research Products, formerly of Hayward, California, is relocating to Asheville. The company is setting up its corporate headquarters and distribution functions in offices located in the Business Incubator on the Enka campus of AB Tech – a primary factor in their decision to locate here. The firm is a supplier to the biotech and university market offering a range of equipment and instrumentation. The firm intends to employ approximately 45 people over the next two years.

The Asheville location was selected after consideration of other competitive locations. As part of the recruitment process, the City of Asheville made a tentative commitment to support the project with an incentive grant in the amount of $20,000, which is part of a total local incentive package of $50,000 made in partnership with Buncombe County, AdvantageWest, and the Asheville Chamber of Commerce.

Before the tentative commitment by the City can be officially granted, a public hearing is required.

Staff recommends Council approve the resolution setting a public hearing on July 8, 2003, for an economic development incentive grant to Phenix Research Products.

RESOLUTION BOOK NO. 27 – PAGE 437

D. ORDNANCE NO. 3038 - ORDINANCE REDUCING THE TERMS ON THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Summary: The consideration of an ordinance reducing the terms from four years to three years on the Educational Access Channel Commission and appointing members to the Commission.

Ordinance No. 2554 adopted on March 9, 1999, established an Educational Access Channel Commission. On May 25, 1999, members to the Commission were appointed.

On June 17, 2003, it was the consensus of City Council to reduce the terms on the Educational Access Channel Commission from four years to three years in order to bring them in line with the terms of most other boards. The ordinance contains an amendment to that effect.

Council had previously indicated a desire to reduce the membership of the Commission from 11 to 10, and has not filled a vacancy created by the resignation of one of the at-large members. The ordinance also makes that amendment.

Also, on June 17, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) reappoint Marion Mathews (City appointment), Nat Meyers (City appointment), Tim Amos (representative of City Schools), Alan Hantz (representative of UNC-Asheville) and Shirley McLaughlin (representative of A-B Tech); and (2) appoint Monty Fuchs (representative of County Schools). All terms will be for three years respectively, terms to expire June 1, 2006, or until their successors have been appointed.

In addition, it was the consensus of City Council to designate Kent Thompson (representative of UNC-Asheville) to serve in Greg Dillingham's absence while Mr. Dillingham is on military duty. Mr. Thompson will step aside for Mr. Dillingham upon Mr. Dillingham's return to Asheville.

Staff recommends City Council adopt the ordinance reducing the terms from four years to three years on the Educational Access Channel Commission and to adopt the resolution appointing members.

ORDINANCE BOOK NO. 20 - PAGE 368

E. RESOLUTION NO. 03-107 - RESOLUTION APPOINTING MEMBERS TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

See Consent Agenda Item "D" above.

RESOLUTION BOOK NO. 27 – PAGE 438

F. RESOLUTION NO. 03-108 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Summary: The consideration of appointing members to the Recreation Board.

The terms of Frank Fishburne, Carol Ann Pothier, James Grant and Susan Sparboe expire on June 30, 2003.

On June 17, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Frank Fishburne, Carol Ann Pothier, James Grant and Susan Sparboe to each serve an additional three year term, terms to expire June 30, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 439

G. RESOLUTION NO. 03-109 - RESOLUTION APPOINTING A MEMBER TO THE REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE AND HENDERSON COUNTIES

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Regional Water Authority of Asheville, Buncombe and Henderson.

J. Lewis Daniels has resigned from the Regional Water Authority, thus leaving an unexpired term until September 30, 2003.

On June 17, 2003, it was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Darryl Hart to the Regional Water Authority to serve a three year term, term to begin immediately and expire on September 30, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 440

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 165 HILLSIDE STREET TO ALLOW THE CONVERSION OF A SINGLE-FAMILY DWELLING TO A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3039 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 165 HILLSIDE STREET TO ALLOW THE CONVERSION OF A SINGLE-FAMILY DWELLING TO A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:10 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner II Carter Pettibone submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a conditional use permit to allow the conversion of single-family dwelling to a residential duplex in an RS-8 Residential Single-Family High Density (RS-8) District on a 0.17-acre property located at 165 Hillside Street.

On April 25, 2003, the applicants, John and Alice Rutland, submitted an application for a conditional use permit for a duplex in an RS-8 District (PIN No. 9649.14-34-5775). The proposed project consists of converting the basement of the existing single-family home into a separate dwelling unit. The Technical Review Committee (TRC) reviewed the plans at its May 19, 2003, and recommended approval with conditions. The applicant has worked with City staff to address these conditions.

Residential duplexes are permitted as conditional uses in the RS-8 District. Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed.

The parcel is located within the City Limits at the intersection of Hillside Street and North Holland Street west of Merrimon Avenue (City Exhibit 3 – Location Map). There is a mix of zoning and land uses in the immediate area surrounding the site (City Exhibit 3 – Aerial Map). To the east and to the west across North Holland Street are single-family homes zoned RS-8. The property to the south is vacant and also zoned RS-8, while properties directly north across Hillside include apartment buildings zoned RM-16. A Community Business I District containing a mix of commercial uses is also in close proximity along Merrimon Avenue.

Duplexes in single-family districts must be located a minimum of 300 feet from all other multi-family uses on the same street in the single-family district. There are no multi-family uses located within 300 feet of the property in question along either Hillside Street or North Holland Street in the RS-8 District.

The Unified Development Ordinance (UDO) requires that the minimum lot area shall be 125 percent of that required for a single-family residential unit in the respective district. The parcel's 0.17 acre is larger than the RS-8 minimum lot size of 0.125 acre (1/8 of an acre).

The UDO requires parking be located in the rear and screened with vegetation from adjacent uses. Parking for the duplex, consisting of three spaces, will be in the rear of the lot and screened by a combination of existing and proposed trees and shrubs (City Exhibit 3 – Site Plan). Access to the parking area will be from North Holland Street.

Duplexes are required to have a single front entrance and other entrances as required. Only one entrance is proposed on the building front facing Hillside Street, which is the front of the lot. The entrance to the second unit will be located to the rear of the building toward the parking area (City Exhibit 3 – Elevations).

The UDO requires that duplexes must meet the requirements of the North Carolina Building Code. The project has received conditional approval from the Building Safety Department and will need to fully comply with these requirements at the time of building permit application.

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2(c) of the UDO. City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety,

   The project received conditional technical approval from the Water Resources Department, the Fire Department, MSD, Engineering, and other City Departments. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project must comply with all City standards in regards to maximum clearing and grading and erosion control. Very little clearing or grading is expected since the existing building will remain and minimal off-street parking would be required. The site plan calls for a number of existing trees to be preserved and used to satisfy planting and buffering requirements. These factors help minimize the impact on the natural features of the site.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   As the appearance and intensity of the property will not change significantly, little to no harm is anticipated to the value of the adjoining properties. The existing physical design of the building helps assure that it fits within the neighborhood surrounding it. Staff has also determined that the additional traffic generated will not adversely impact the existing road conditions or capacity.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The applicant has proposed that the existing single-family structure on the property be converted to a duplex. As a result, the building would continue to fit into the neighborhood as it currently does now. Parking would be located away from the main street (Hillside Street) on the southern portion of the site and be screened as required by the UDO.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The project will also help meet one of the City's Smart Growth policies, providing higher density residential infill development. The City's Comprehensive Plan indicates this area as planned for residential development and the proposed density of the project is similar to what is currently permitted in the area.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The project received technical approval from the TRC, which includes representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The project was reviewed by the Engineering Department during the TRC process and it was determined that the existing roadway conditions and capacity were sufficient to handle any sort of increase generated by the proposed use, which is anticipated to be minimal.

This project was reviewed by the TRC at it's May 19, 2003, meeting. The TRC identified some unresolved technical issues and recommended approval with the condition that these issues be addressed prior to final approval. The applicant has addressed most of these conditions and is working with the City Staff to address those outstanding.

Since all the conditions have not been addressed at this time, Staff recommends approving the issuance of a conditional use permit for the duplex with the following conditions:

- The applicant works with Planning and Development staff to determine the appropriate locations for vegetation to be used as landscaping and parking lot screening.
- A driveway permit must be obtained in order to create a driveway with access to North Holland Street.
- The applicant obtains all applicable permits for water, sewer, driveway, stormwater, and erosion control provisions.

Upon inquiry of Councilman Dunn about the cost for all the permits required, Mr. Pettibone said that he didn't have that information at this time, but would find out and let him know.

Mr. Pettibone responded to a question from Councilman Peterson regarding on-street parking.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:21 p.m.

Councilman Ellis moved to grant a conditional use permit for property located at 165 Hillside Street to allow the conversion of a single-family dwelling to a duplex in an RS-8 Residential Single-Family High Density District, subject to the following conditions: (1) The applicant works with Planning and Development staff to determine the appropriate locations for vegetation to be used as landscaping and parking lot screening; (2) A driveway permit must be obtained in order to create a driveway with access to North Holland Street; and (3) The applicant obtains all applicable permits for water, sewer, driveway, stormwater, and erosion control provisions. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 370

Upon inquiry of Mr. Pettibone, it was the consensus of City Council to have staff move forward with a text amendment to the Unified Development Ordinance making duplexes, triplexes and quadraplexes a use by right as opposed to a conditional use. Councilman Peterson felt that only duplexes would be appropriate as a use by right.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3040 - ORDINANCE ADOPTING THE FISCAL YEAR 2003-04 ANNUAL OPERATING BUDGET

Budget Director Ben Durant said that he is presenting the Fiscal Year 2003/2004 Annual Operating Budget for City Council's consideration before adoption.

On May 12, 2003, staff presented to City Council the Proposed Fiscal Year 2003/2004 Annual Operating Budget. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 30 and June 6, 2003. City Council conducted a public hearing on the Budget on June 10, 2003. City Council also held two additional budget worksessions on June 4 and June 17, 2003.

The Fiscal Year 2003/2004 Annual Operating Budget is balanced with a tax rate of $0.53 per $100 of assessed valuation, which reflects no increase over the current property tax rate. All essential programs and services are maintained.

The Budget as initially presented to City Council on May 12, 2003, included a net budget of $98,921,523 and a General Fund appropriation of $69,300,859. The Budget presented for adoption today includes a net budget of $96,162,863 and a General Fund appropriation of $69,095,859. Key changes to the initial Proposed Budget are summarized and discussed below:

- The initial budget for the Water Resources Fund included $2,553,660 in revenue from a new capital improvements charge. This new charge would have provided funding for major capital improvements such as water line and treatment plant improvements. Buncombe County Commissioners, however, did not approve the initial Water Resources Fund Budget that included the new capital improvements charge. As a result, staff has removed $2,553,660 in revenue and expenditures from the Water Resources Fund Budget that is being presented for City Council adoption today.

- Shortly after the City Manager presented the Proposed Budget on May 12th, staff received FY 2002/2003 3rd quarter local option sales tax revenue from the State of North Carolina. Two-Cent sales tax revenue in the 3rd quarter fell 6% compared to the 3rd quarter of the previous fiscal year. Due to this unexpectedly large decline, staff now estimates that FY 2002/2003 revenue from the two-cent sales tax will fall short of budget by $205,000. This shortfall in the current year led staff to recommend a $205,000 reduction in the FY 2003/2004 General Fund

Proposed Budget. At the June 4th budget worksession, the City Manager recommended the following General Fund Budget reductions to offset the sales tax shortfall:

1)	Reduce the Manager's contingency account	$100,000
2)	Delay the pavement study until FY 2004/2005	$20,000
3)	Delay the additional 1% 401(k) until November 1, 2003	$85,000

The General Fund Budget presented to City Council for adoption today includes these proposed reductions.

Several Budget issues, including the provision of social security benefits for City Firefighters, remain unresolved at this point and require further direction from City Council. In order to fund social security or any other service priorities, City Council must make further reductions to the Budget and reallocate the funding accordingly, or identify additional revenue sources.

Staff requests that Council review the FY 2003/2004 Annual Operating Budget, make any desired adjustments, and adopt the FY 2003/2004 Budget Ordinance.

Councilman Ellis moved to adopt the budget presented by the City Manager with the following amendments: One, $565,000 for Social Security for the firefighters to be included in the budget. He recommended funding that Social Security as follows: ½ of the cost ($282,500) to come from not purchasing four vehicles currently in our budget – one automated loader truck ($184,300), one full-size SUV from the Fire Department ($33,000), and two Police vehicles ($65,200); and the other half to be appropriated from the Fund Balance ($282,500). Two, delete the $100,000 funding for the Visitor's Center and appropriate $20,000 to the Arts Council for their work with the Urban Trail. This motion was seconded by Councilman Mumpower.

Councilman Ellis said there has been a great deal of interest in other priorities for the community and he would like to see those priorities too, but this Council has responsibilities for many other things. We have talked about needing more police but Council has been made aware that 8-10 additional officers have been applied for through grants and we have a positive attitude about getting those grants. He has also learned that we may be up to 10-15 new officers over the next 12-18 months. If we are going to get that many new police officers over the next 12-18 months then he would have trouble in supporting taking money away from priorities for that purpose.

Police Chief Will Annarino handed out to Council a sheet of additional police positions for Fiscal Years 2003-04 and 2004-05. These are positions they have been working on for bringing in needed personnel but doing it in a way that they felt they could afford by utilizing grants. Grants are a very cost effective way to address issues not at the expense of our local taxpayers. Grants are not quick though and we have to work through the constraints of the budget cycles of the federal and state governments. Our record for receiving grants is good. He explained there is a potential of receiving 20 additional positions, and if the City receives the grants, there will be a savings of $1,106,223. He explained that between the grants and the budgeted positions, there are 16 police officers in the 2003-04 budget and in the 2004-05 budget an additional 4 officers.

Councilman Ellis said that even though additional police officers did not make the top five priorities of City Council at the retreat, all of Council is supportive of utilizing grants as a way to providing services to our citizens.

Upon inquiry of Councilman Ellis, Police Chief Annarino said that even though he cannot predict whether the grants will be awarded or not, the City does have a great track record with the state and the COPS programs. In the grants that require matches, when you have a partnership on a grant match, they look very favorably on that.

Councilman Ellis also said every member of Council supports affordable housing because it is a need in our community, along with a great deal of other needs. We have committed $500,000, which was increased in the last budget year during a very tough time by $100,000. In addition, in our Community Development Block Grant that the City receives, there is another $675,000 for affordable housing. This Council is funding affordable housing with $1,175,000 this coming year. He felt this is a good commitment to affordable housing because there are many other needs that we have in our city. He felt his motion to approve the budget, with his amendments, is a compromise, which does fund Social Security for the firefighters.

Councilman Dunn found it troubling to just now find out the new 20 police officer positions after Council has been talking about the need for new officers for over a month, at least. Police Chief Annarino explained that all the grant positions have been brought before Council for prior approval and Council was aware of the 2 new officers for annexation. The only two Council may not have known about is the 2 new officers for the next Fiscal Year 2004-05. Mayor Worley felt that even though Council approved the applications for the grants, that was outside the budget context and he felt this might have been a lack of clear communication within the budget context that tied all the grants back together.

Councilwoman Jones liked the attention, although late attention, to putting in the budget and identifying where the Social Security for the firefighters will come from. In late January Council held their retreat in the preamble of the proposed budget and formulated their strategic priorities. (1) Infrastructure – staff did a great job of hearing that and funding that; (2) Affordable housing – in my estimation, in a year where we have additional dollars, maintaining does not equal prioritizing; (3) Firefighters Social Security – that was not in the original budget but she is glad to see that in the budget now; and (4) Environment and Transportation – in an almost $100,000,000 budget there was $20,000 allocated. This is a more complicated one, but she would like to see more intention around that. The four priorities that are related to the budget, are not, to her reading, reflected in the budget. She would not be able to support the motion made by Councilman Ellis.

Mayor Worley said that in the budget document, the Council priority reads "to continue to promote affordable housing through the identification of specific strategies to reduce the cost of homes." That doesn't say to increase the funding for affordable housing and he didn't have that understand at the retreat in January. The actual language voted on at the retreat reads "Affordable infill housing stock – cost of building houses – reduce as much as possible." He felt we have a commitment to that strategy and that commitment continues. A prior Council voted several years ago to add a penny to the property tax and dedicate that to affordable housing, which started off at $400,000. Last year, in a very tight budget year, we increased that funding by $100,000. When you look at further increasing contributions to affordable housing, it is again coming out of our taxpayer's pockets. There are a lot of ways that we can fulfill that commitment and we have been doing that this year with a lot of our Unified Development Ordinance (UDO) amendments. The UDO give incentives for affordable housing and other actions that promote affordable housing that makes it easier for affordable housing to take place. We can only do so much with money and we have to find other innovative ways. He did feel that we are fulfilling that commitment. He would support the motion made by Councilman Ellis because we are contributing $1,175,000 for affordable housing. He felt we needed to maintain a balance in our budget process and the services we provide our citizens. We also have needs in police, infrastructure and general services.

Councilman Mumpower felt that this is not a perfect budget but there is a lot more good than bad. He has been diligent in trying to find examples of waste, duplication or poor use of our limited resources. Having made an effort to be diligent about that, he feels more good than bad about the crafted budget. He strongly disagreed with going into our Fund Balance, which is basically our savings account. He felt to have to tap into that when we have a budget this large maybe does not demonstrate as strong level of stewardship as he wished we could attain. But, we all have a responsibility to try to work with one another to craft compromises. He would support the motion made by Councilman Ellis.

The motion made by Councilman Ellis and seconded by Councilman Mumpower failed on a 3-4 vote, with Mayor Worley, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilman Dunn, Councilwoman Jones and Councilman Peterson voting "no."

Vice-Mayor Bellamy moved to approve the budget presented by the City Manager with the following amendments: Cut in revenues by reducing the recycling fee by half - $366,000; Increases in expenditures include: Affordable Housing Trust Fund - $100,000, additional police officers - $150,000; Social Security for Firefighters - $250,000 (with the remaining coming from Fund Balance); and bus passes for City employees - $22,500, which is a total increase in expenditures of $522,500 – for a total revenue need of $888,500. Cuts in expenditures include: Civic Center Fund - $50,000; fire contracts for annexation - $119,000; overtime for annexation - $55,000; Planning Department - $50,000; police and fire overtime - $50,000; delay automated garbage truck - $135,000; cut Parks & Recreation capital budget - $100,000; Visitor's Center - $100,000; 401 (k) - $145,500; Government Channel equipment - $30,000; Council Chamber - $15,000; and Manager's Contingency - $39,500, which is a total cut in expenditures of $888,000. In addition, 25% of the 1-cent property tax dedicated to Parks & Recreation shall be dedicated to police/narcotics enforcement and any vacant positions in the City Development Division of the City Planning Department are frozen. She said that last week Council members were asked to go back and cut where they wanted cuts, after they have asked staff to help them find a way to make sure that all the priorities that all Council members wanted in their budget were met. It was not done, so as a Council member, she has talked with her peers and they have chosen to cut in these areas. She has been pretty clear with her priorities starting at the retreat last year. In our minutes from June 10, 2003, it reads "there has been a noticeable increase in costs for service and crimes committed in the public housing communities, since their elimination of their dedicated police unit." She was concerned that the grants we may, or may not, get won't be in time. She received a letter from the Principal of Johnston Elementary with the signature of teachers there stating that the children in Deaverview are being used as mules and they are fearful in their own homes, that did it for me. When we met with the Housing Authority Board last month at their annual meeting, one thing they cited continuously was the number of crimes committed, the number of crack cocaine vials they find, and the issue of finding guns. When we look at our community about decent, safe and attractive affordable housing, it needs to increase. Our firefighters have come to us and asked over and over again to help them with their retirement benefits. Somewhere along the lines the actuarial study got dropped – since it wasn't in the minutes officially, so they say it wasn't asked for. I remember supporting it to be done. Bus passes for our City employees. We need to increase our ridership and it helps with our Compact Agreement that we must meet. She also supports our police officers initiative that presented. This motion was seconded by Councilman Peterson.

Councilman Peterson asked for two amendments: (1) Regarding the cuts in expenditures, the Manager's Contingency should be $39,000 and the total cuts in expenditures should read $888,500; and (2) Since the cost of providing Social Security for firefighters is a higher number than we were previously provided, the increase from the allocation from the Fund Balance should be increased from $250,000 to $315,000. Vice-Mayor Bellamy accepted those amendments.

97

Upon inquiry of Councilman Dunn, Councilwoman Jones explained the difference in the automated garbage truck purchase amount from Councilman Ellis' motion and Vice-Mayor Bellamy's motion.

Councilman Dunn felt this community deserves more police and will support that. Regarding grants, he felt that you can go broke saving money. Sometimes grants are good and sometimes they are not so good if they require taxpayer money to fund something that is not an essential service, noting that the Police Department is an essential service. He feels that City government is still too big and affordable living should be one of our battlecrys. Firefighters are overdue for retirement benefits.

Councilwoman Jones clarified that the new additional police officers addressed in Vice-Mayor Bellamy's motion would be dedicated to public housing. She hoped that the Police Department does receive the grants but it's time to prioritize the people that are most vulnerable. The School Board has also asked for Council's help and support in making those places where children are living safer. This is a step in the right direction.

Councilman Mumpower said that our history is to research, study programs and get input from the staff and public before we make decisions. The theory being that is the more informed we are the wiser our decisions will be. He has some real trouble with some of the effort to do last minute add-ons in the budget and he has no doubts that will create some difficulties in the future. He felt that when we start cutting things without careful research, we risk doing systemic damage to our system. He suggested a response from each department regarding what kind of impact the cuts will have on City departments and services.

Civic Center Fund - $50,000. Civic Center David Pisha said that this would be an equivalent of a position or the maintenance budget for the year. We are low in overall staffing compared to many Civic Centers. He said they are at the mercy of not only the entertainment cycle, but the economic cycle. The number of concerts have declined as well as the attendance at the previously booked concerts. We have no control over people spending their discretionary income on events.

Councilwoman Jones said that there will still be an increase in the subsidy from the General Fund to the Civic Center. She said that in terms of business, there's always a way to think about in terms of subsidy – it's not just about what you cut, but what you grow.

City Manager Westbrook said that several years ago Council added on an admissions fee to fund maintenance. Whatever that fee is, will still have to go to maintenance. Because of that, we may not be able to take the entire cut out of maintenance but some may have to come out of salaries.

Councilman Peterson explained that he is not looking to impose major cuts but directing the City Manager to do a better job and reduce the loss by 2.5 percent of the Civic Center's overall budget.

Councilman Ellis said that in his opinion the Civic Center makes money for the City, even though some tax dollars go into it. Far more comes back with people spending money in motels/hotels and restaurants. In fact, the subsidy for the Civic Center is less now than it was 10-20 years ago.

Councilman Dunn suggested the Chamber of Commerce help pay for the Civic Center since it's so important to the City of Asheville. He said the hotels/motels and restaurants are the ones making the money.

Fire Contracts for Annexation - $119,000. Fire Chief Greg Grayson said that in preparing the budget we had to provide the amount needed for the Skyland and Lake Julian/CP&L annexations. The total $300,000 increase reflects $238,000 for the annexations pending in litigation and $62,000 for the annexations not in litigation. Since the budget has been prepared however, the Skyland Volunteer Fire Department requested and has had approved by the Buncombe County Board of Commissioners a rate increase from 7.5 cents per $100 to 9.5 cents per $100 effective July 1, 2003. Whatever the Fire District tax rate is affects how much we have to pay in contractual costs. Therefore, since the Skyland rate has been increased by 2 cents, the amount we have to pay for contractual obligations goes up. Regarding the $238,000 for the annexations in litigation, that is for the portion of the year that the annexation will be effective.

Councilman Peterson felt that the two annexations in litigation wouldn't be settled until at least the end of the calendar year, thus needing only $119,000. In fact, if the companies continue to fight the annexation in court, we wouldn't have to spend any of the $238,000.

City Manager Westbrook said that we anticipated the annexation question being settled before the end of the calendar year. City Attorney Oast also responded that we have had one oral argument in one of the Lake Julian cases and we will have another one sometime this fall. He felt it is realistic to say that the annexation could be decided in the first quarter of the fiscal year. The annexation would be effective the last day of the month following the month in which the decision was rendered. Councilman Peterson pointed out they can still continue to appeal.

Overtime for Annexation - $55,000. Fire Chief Grayson said that this is to provide coverage to the two annexed areas in litigation until 9 new firefighters can be hired.

Councilman Peterson felt that this amount is in the budget to be safe until those new firefighters are hired, but if the annexations don't go into effect until January of 2004 then the firefighters will have already been hired and trained and this $55,000 can be eliminated.

Planning Department - $50,000 and Any vacant positions in the City Development Division of the City Planning Department are frozen. Assistant City Manager Jeff Richardson (in the absence of Planning & Development Director Scott Shuford who is out of town) said that the City Development Division was cut from 5 positions last year to 4 positions currently all filled. The workload level in the Planning Department is high and City Development is no exception. City Development facilitates downtown growth, facilitates issues between businesses and residents, and the workload will increase since we are currently expanding services into the Haywood Road area. A reduction in staff would mean a reduction in services. Regarding the $50,000 cut, Mr. Shuford would need to sit down and determine where he could cut that amount with the least level of service reduction possible to our citizens.

Councilwoman Jones said that currently the salaries are $840,000 and they are proposing $900,000, which is approximately a $60,000 increase. That doesn't seem like a cut in personnel to her. That seems like a tiny increase in salaries, noting that Council hasn't touched the merit increases. In addition, they are giving the Planning Director the latitude on how to make the cut. Overall, the current Planning budget is $1,283,391 and what Planning is proposing is $1,417,397, which is a 10% increase. We are saying that Planning gets more money, but just not as much money. She did clarify that if positions become vacant in City Development in the coming year, those positions are to be frozen and that the freezing of positions has nothing to do with the $50,000 cut.

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that normally a freeze in positions is reaction to a revenue shortage from something Council has no control over, such as last year when the State didn't come through with the money promised. It's not normally a budget item. In a budget you either have the position or you cut it out. Mayor Worley responded that he has never seen a budget passed that froze positions. They have either been left in or taken out.

Councilman Dunn said that from a business standpoint, he wouldn't hire someone until he had a little more income. Just because a city doesn't do it, doesn't mean it shouldn't be done. The argument that it's not been done before, doesn't hold a lot of water. Freezes sometimes protect taxpayers from too much government. Councilman Mumpower responded that he appreciated the efforts to save the City money, but you've turned right around and spent all the money saved. Councilman Peterson explained that we are giving back to the residents of Asheville $366,000 in reduced recycling fees.

Assistant City Manager Richardson said that since the Planning Director doesn't know what the impact of the $50,000 cut will be in terms of workload, the new Neighborhood/Developer Meeting concept will have to be considered and balanced. Councilman Peterson responded that the developers won't have to go to the Technical Review Committee or to the Planning & Zoning Commission so there is a lot of work that staff would have to have done, but they won't be doing with the new meeting concept.

Assistant City Manager Richardson pointed that out of the $134,000 increase, over $90,000 would be for salary increases and to pay for fringe benefit increases. If you look at operating costs and such, they will take a cut in day-to-day operating costs. Mr. Shuford will have to either lay someone off or he'll have to cut operating costs. Vice-Mayor Bellamy disagreed in that Planning already has two vacant positions.

City Manager Westbrook said this would be a reduction in service until we can hire those two employees.

Councilman Ellis said that even though the City Development Division is located in downtown it serves Biltmore, west Asheville, north Asheville and all of the City. They are located downtown because of the lack of space in City Hall. A lot of things are happening in our center city and proposed development is in the hundreds of millions of dollars. We have to have staff to respond to those needs. He encouraged Council to go to a Downtown Commission meeting to see what is happening in downtown and what the staff serving all sections of the City is doing.

Police ($25,000) and Fire ($25,000) Overtime - $50,000. City Manager Westbrook said that most of the overtime for the Police goes into the downtown augment, which is additional police officers in the downtown area because there are a lot of visitors and traffic downtown. Several years ago that was a concern of Council and raising the level of overtime was the answer to try to put more officers downtown. He said when police officers are called out for emergencies situations and they have worked more than their shift, they automatically go into overtime and that is the first call on overtime money. The downtown augment will probably be where the overtime will be reduced. The entire downtown augment program is approximately $200,000 and that is probably where the reduction would take place.

Police Chief Annarino said that their increase was in patrol in anticipation of the increase in fringe benefits and merits, understanding the load that the officers are carrying on overtime requests. They do a lot of City-sponsored events and downtown events to accommodate people and with that comes additional overtime requirements. The $25,000 cut will not dramatically impact their department but it will impact them some and they will have to adjust.

Upon inquiry of Vice-Mayor Bellamy, Police Chief Annarino said that the overtime grant was to be specifically earmarked for housing.

Councilman Peterson said that he has confidence in the City managers that they can do a little bit better in managing some of this overtime. We know there may be increases but we're just reducing the amount of the increases.

Fire Chief Grayson said that we have spent this past year extremely frugal in our overtime. It's been a number of years since the overtime amount has been adjusted. One thing about the fire overtime is that a large portion of that is required by the Fair Labor Standards Act (FLSA), and it's not what you consider typical overtime. It's built in over time through 56-hour weeks. Most employees will work 40 hours a week/160 hours a month. Firefighters work 212 hours in a month, so some of that is through FLSA. He said that approximately $120,000 is basic FLSA. He said they will work with the resources they are given but the overtime funding does not adequately reflect the need of the Fire Department.

Regarding Vice-Mayor Bellamy's motion, Councilman Mumpower said that if we are taking $315,000 from our Fund Balance and refunding the recycling fee by $366,000, the rest of it seems like a wash. We are still robbing our Fund Balance to make this work out. Councilman Peterson said this budget is a reflection of the majority of Council's priorities. These are items we wish to have funded and because it has been put on Council members to come up with the cuts, these are the cuts we feel would not hurt services and allow for greater funds for the Civic Center, the Planning Department, the overtime, but limits that increase slightly. It is a slight rearranging of priorities to reflect what Council believes the public has asked Council to do. Councilman Mumpower said that his point is that Council is taking roughly $888,500 out and then adding in roughly $888,500. Councilman Peterson said that was true but they are not spending the entire $888,500 – we are adding to line items $522,000 and we are returning to the residents $366,000. Councilman Mumpower said you have to add $315,000 from Fund Balance to the $522,500, so it's actually $837,500. His point is he applauds Council's efforts to save money, but then you are turning right around and spending that money.

Councilman Ellis said that Council did know about most of the police officers and now we have 20 coming in and now adding 3 more for 23. He felt that was a little overkill to add that much staff and he's not sure taxpayers would be willing to fund that kind of expenditure, when we are cutting some pretty important things. You're adding 3 police officers for the $150,000 and yet you are cutting out the overtime, which puts officers and firemen on the streets. He didn't know of a good corporation in America that doesn't use overtime to some extent. It makes a lot of sense because it's far more efficient to reward your employees with some overtime. It's also cheaper to spend a little bit on overtime than it is to add people to the payroll. Councilman Peterson disagreed in that as a management tool, if you are understaffed so that you have to have all of your employees continue to come in and work overtime and paying them more than the starting salary for a new hire, then it would be appropriate to add more people. The fact that we've had so much overtime indicates that the Police Department is understaffed. City Manager Westbrook said that in many cases using overtime is the preferable way to provide those extra services. In the downtown augment, you want seasoned police officers that can walk those areas and can provide law enforcement protection to the general public. The best way to provide those services, since the officers want to do it and they are familiar with the territory, is to do overtime. It's the least costly way to do it. It really depends on whether Council thinks it's more prudent to try to provide the service at the least possible cost or whether Council desires to hire more police officers to whatever service level they feel necessary.

Upon inquiry of Councilman Mumpower, Police Chief Annarino said that overtime gives him a lot more latitude in being able to put officers out in the street when and where we need them. Regarding downtown augment, we find it more beneficial to use overtime money to put off-duty officers downtown because we place them when and where we need them. What he presented to Council earlier was the potential for police positions we have over the next year. He said that if Council instructs him to add the $150,000 for new officers in public housing, we will

701

have to notify the appropriate agency that we are no longer eligible for the COPS ARGUS program grant. He suggested that Council give him an opportunity to check with the agency to see if he can get some kind of idea where that grant stands. Usually their fiscal year starts in October so we should know fairly soon if we are going to get that grant. Then, Council can make the decision on whether to fund the additional 3 positions on top of that or if we are given word we won't get the grant, we would have these 3 positions in place and go ahead and put them in the ARGUS Unit right away.

Councilman Mumpower was concerned that the majority of the police positions are grant funded, which means we have differing levels of grant participation. The City is going to have to assume progressive responsibilities in our budget for eventually within the next three years to fully fund 16 police positions, plus the three new positions. After Police Chief Annarino said that it would be approximately $555,000, Councilman Mumpower suggested to Council that this is not the way that we should orchestrate our law enforcement budget. This last minute modification has the potential to create budgetary concerns in the future.

Councilman Ellis applauded Council's efforts to try to save taxpayers money, but he thinks we are making a mistake to try to micromanage the details of the Police, Fire and Planning Departments down to this detail.

Councilwoman Jones clarified that the Civic Center subsidy, the Planning Department reduction, and the Fire and Police overtime are still net increases from last year. All of them will grow from where we are now. We are cutting the proposed increases.

Councilman Mumpower said the implication of that those budget increases are predicated on fat, waste, bad decisions by our management personnel and staff. He knows a couple of the cuts pretty well and if Council digs a little deeper, it's just not that simple. Why do we have a budget director or department managers or a city manager if we don't have some faith and trust in these folks. He was concerned that Council is doing last minute second-guessing without thorough research and that will come back to cost us more money in the end.

Councilman Peterson responded that this is not last minute. We have been talking about this for months. Council members are elected to pass the budget. The budget for the Police Department has a certain number of employees and Council members are hearing that should be a greater number – that is what we are doing. We're doing our job passing a budget and determining it's in the budget how many employees there are. It's our job to say that's too many or that's not enough. The Planning Department asked for growth of 10% and we're cutting them back to 6%. We're not slashing their budget. We are asking them to do a better job and he has confidence they can do a good job managing their budget and managing a 2% reduction. That is our job. If we are just here to rubber-stamp what has been prepared by staff, why even have an election and have elected Council members.

Delay Automated Garbage Truck - $135,000. City Manager Westbrook said they will delay that service enhancement for another year.

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that the highest worker's compensation rate is in Sanitation workers who work on the garbage trucks. Part of the motivation automation is getting those people who are at risk to do other things. Also the efficiency of having automation doing what three people used to do with one. After the automated truck is on line, City Manager Westbrook said that actually the turnover is such that probably those positions wouldn't be filled once the truck arrives and starts operation.

Cut Parks & Recreation Capital Budget - $100,000 and 25% of the 1-cent property tax dedicated to Parks & Recreation shall be dedicated to police/narcotics enforcement. Vice-Mayor

Bellamy said this is a $100,000 of new money not in the budget last year and they will leave it up to Parks & Recreation Director Irby Brinson to determine what to reduce.

Mr. Brinson asked for clarification of the "25% of the 1 cent property tax dedicated to Parks & Recreation shall be dedicated to police/narcotics enforcement." He asked if that was in addition to the $100,000 or is that where the $100,000 will be dedicated. Vice-Mayor Bellamy said that it is where the $100,000 will be dedicated, not an additional $100,000.

Mr. Brinson said their particular needs dealt with some maintenance and repair and some new park construction. It will be a balance between both of those to make sure we are able to meet our priorities. Instead of three tennis courts, we may do one. Instead of two playgrounds, we may do one. We may not do all of the Broadway Greenway construction. We would do a combination of both to try to minimize the impact. A little bit of background about the Parks and Recreation Department is that it's just not parks and recreation. All of the City's building maintenance falls within our capital request. We have capital requests of $300,000 for City Hall new chiller operations, we have fire safety issues in City Hall that we need to address, we have elevator issues, and we have roof needs not only in recreation centers but also fire stations. All of those issues add up to a lot more than $500,000. We do get about $200,000 for maintenance and repair but that does not go a long way. We try to do a systematic approach of looking at the needs of the community. We've had a matrix for our playground construction for about 6 years now and that is based upon what we felt were high priorities and we try to address at least two of those a year. We are not in compliance with the Americans with Disabilities Act in a lot of our playgrounds. We have a lot of safety issues we need to address. We also have equipment needs just like any other department. We try to do the best we can. He felt that additional maintenance needs would be approximately $500,000. Regarding the French Broad River Park, he said that for every 15-cents that the City puts in we are returning $1 investment. About 15% of the cost of the French Broad River Park has been from the City and the rest has been from grants or donations.

Councilman Mumpower said that Mr. Brinson has honored many discussions with him and has provided him with facts and truth and he felt we are making a real mistake to take money from this budget when we are leveraging 15-cents into $1.

Mr. Brinson said the one negative impact of this would be the delay for them doing things that have been promised for several years to the community. New greenway construction would be one thing we would need to look at. We would hate to disturb the leveraging of $185,000 to the French Broad River that is matching another $360,000 we received in grant funds. That is not saying we can't go out and try to raise more funds to reduce that match. Mr. Brinson said a lot of this is tied to grant funds or funds that have already been received that have certain deadlines to meet. We are tied to those constraints. There is a lot of talk on the State side about reducing the Parks and Recreation Trust Fund as one option to balance the State budget. If we don't continue to aggressively apply, that Fund may not be there. That is generally around $250,000 a year that we have been able to receive to meet other needs by using that match. If we lose that money, it means he has to ask Council for $500,000 instead of $250,000. He won't stop asking and the needs aren't going to away. He realized Council has a very difficult decision and he will do the best job he can to serve the citizens.

Councilman Dunn was concerned about the City's liability if we build fishing piers at the French Broad River Park and someone falls off and drowns.

Councilwoman Jones stressed we are cutting back an additional $100,000 to parks and recreation because it was not prioritized. Presently it's the priority we want to maintain and the non-priority we want to grow – we're saying let's change that around. The priority we want to grow and the other important things, let's maintain.

Councilman Peterson also noted that the budget is not written in stone in that Council can adopt budgets amendments. He said after the cut, it still leaves $400,000 in the capital fund for the Parks and Recreation Department.

City Manager Westbrook explained that a few years ago the Council raised the property taxes for affordable housing, parks and recreation, and streets and sidewalks. During the budget when the last revaluation took place, the Council wanted to increase the money going into affordable housing, which reflected 1-cent on the tax rate. They did not make that increase for parks and recreation, which also had previously been allocated 1-cent increase on the tax rate. The Parks and Recreation Advisory Commission felt that it was the intent of the former Council to also increase the money for Parks and Recreation, so this $100,000 in the budget would accomplish that.

Visitor's Center - $100,000. City Manager Westbrook said that the City has an agreement with the Chamber of Commerce that over a period of five years we will fund $100,000 a year towards a Visitor's Center. Other entities are doing the same. The City's contract provides a provision that the Chamber must perform certain activities before the $100,000 is paid each year. They have not provided the proof to the City that those activities have been performed this year. Therefore, the $100,000 budgeted this year can be carried forward until next fiscal year and the $100,000 for next fiscal year is saved.

401 (k) - $145,500. - City Manager Westbrook explained that when the third quarter sales tax figures came in from the State he recommended to offset the sales tax shortfall by three things, one of which was delaying the additional 1% 401 (k) until November 1, 2003, to make up some of that shortfall. The $145,500 represents the remaining portion of additional 1% of the 401 (k) for employees. This cut will take the additional 1% for employees out entirely for next fiscal year.

Mayor Worley explained that there is a certain group of employees that, under a mandated from state law, have a 5% 401 (k). All other employees have a 4% 401 (k). This was designed to bring the other City employees up to the same level as the select group, so we treat all employees equally.

Government Channel Equipment - $30,000. – City Manager Westbrook said that City Council wanted to have their meeting broadcast live. In order to make that happen, the dedicated person who works in that job has used some of his own personal equipment. A portion of this money was for him to take his own personal equipment out and to buy City equipment to put in its place. In addition, there was some money to enhance the service by providing educational programs on Channel 11.

Council Chamber - $15,000. – City Manager Westbrook said that this was an effort to have Council use laptop computers and go paperless at the Council meetings. Staff is unable to do this because of the historic desks. The $15,000 was to provide lumber for City staff to build a new dais and to purchase some additional pieces of electronic equipment to make that happen.

Manager's Contingency - $39,000. – City Manager Westbrook said Manager's contingency is for emergencies that come along. He had first recommended $300,000, but after the third quarter sales tax figures came in from the State, this was another item he recommended be reduced to $200,000. This will now reduce that fund to $161,000.

At 7:18 p.m., Mayor Worley announced a short break.

When Councilman Peterson asked if another budget ordinance should be brought before Council with the changes Council would like to see, City Manager Westbrook said what Council

704

has provided to him is sufficient. He understands what Council wants and they have given him policy guidance for levels of service. He will implement what Council adopts. He said that if we do run across something that none of us is seeing right now, they will come back to Council prior to June 30. If it is something that we can fix after June 30 by a budget amendment, then we will do that.

Upon inquiry of Councilman Peterson, City Manager Westbrook said that he understands the guidance from Council regarding Social Security for firefighters. He said that we are still trying to work out with the State how this whole process works because apparently it happens so infrequently they are trying to work through it. The Council will have to adopt a resolution specifically allowing the firefighters to vote at a later date, as soon as we get that guidance from the State. That would not hinder Council from making appropriations now to do that.

Vice-Mayor Bellamy said that two weeks ago she asked for an additional budget worksession, in addition to the many Council has had before. She requested it because she felt the priorities of Council still were not being addressed in the budget. At the budget worksession she began the session with this in mind – let's talk as Council members on what we agree on and start from there and ask staff to go back with what we agree on and find it in the budget. At that time the City Manager informed her that if any changes need to be made that Council needed to make them. She felt that more money in affordable housing was a policy issue. Go back, find the money and give Council some options. More money for the Social Security for firefighters. That is a policy issue – go back and find the money. There were different things that Council all stated at different times, that there was consensus on, to go back and find the money. But it didn't happen. So Council had to decide what to cut. It is not easy to decide on these cuts. Not one of them was easy. It's not a cut; it's a reduction or a delay. It's unfortunate as a Council member that we could not direct staff to do what we've asked them to do as policy-makers. What we are recommending leaves in money for the merit raises, the worker's compensation, insurance and bonds, 9 new firefighters for Skyland annexation, fire annexation contracts, group health insurance increase of 15%, the parks and greenway capital projects (and that's in addition to the $400,000 that was talked about earlier), the debt service on fire station 5, the law enforcement officers professional certificate program, 3 officers in training position, fire and public works small capital, some of the debt services on automated trucks, public works vehicles (which others have suggested that we cut), police separation allowance, increase of Buncombe County taxes, the debt service on radio microwave, some of the Civic Center subsidy, fleet charges, the lobbyist, debt service on fire engine, the Board of Elections, unemployment, the real estate program, and even the pavement study. It's unfair for Council members not to have staff to support our goals and our ideas to go back and do what we've asked them to do. We, as Council members, had to do the job of staff.

Councilman Mumpower felt it was a mistake to do last minute add-ons or changes without research, public comment, and deliberation. He felt it was a serious mistake and some of these will bite us. Many times it's been said that if we plan it in the planning session, that should turn into dollars. He never remembered that being said at any point in our retreats. Strategic planning is not the same, necessarily, as budgetary planning. His participation at our next retreat will be much different than his last, if we are going to go forward with that assumption. We are talking a lot about staff not following our guidelines. He didn't think we were clear. He thought the Mayor demonstrated that in, for example, the affordable housing guidelines. They didn't say for staff to plug in more money into that issue. He didn't come away thinking that. He didn't realize, until the Mayor showed the picture of what Council voted on at the retreat, just how narrow and specific their request was. He felt it was pretty easy for Council to beat up on staff, but he's not sure that Council has done their homework. He has a hard time of playing catch-up at the last minute and dumping the accountability on our staff.

Upon inquiry of Councilman Mumpower about the reduction of the recycling fee, Councilman Peterson said that the current recycling fee is $5.10 per bill every other month for City residents. He proposes to cut the fee in half to $2.55 every other month. Every resident will see a reduction in their water bill totally $15.30 over the year. Councilman Mumpower said three of the people who are speaking on behalf of this budget voted for a 2-cent tax increase last year. He felt this is tokenism. If anyone is excited about getting $15 back this year when you see all the things that we spend money on – the almost hundred million dollar budget we have. He is disturbed by that theme. It does not encourage him, as the leadership model that he would hope that he, as a Council would embrace. Another point is that the suggested budget did pursue cuts and frankly he agreed with a good number of those cuts. But then Council turns around and spends everything they cut, with a few exceptions. He will have to speak against this budget because he felt we're doing last minute things that don't result in any significant savings. It's more of a shift to some personal preferences and he doesn't believe that is a responsible budget setting process.

Vice-Mayor Bellamy said she doesn't fault the entire staff. We can only direct three employees so she can only direct those three employees. Two of them don't have anything to do with the budget directly. She can only fault one employee.

Councilman Peterson said that the reduction in the recycling fee is something he pursued. He has pursued it for the 3.5 years he has been on Council. He agreed that it is not a lot, but for someone who owns a $150,000 house, which is a pretty typical house in Asheville, this would be comparable to a 1-cent property tax savings. He would like to get rid of the recycling fee altogether and see some real savings. He'd like to reduce taxes, but we can only do so much. We're doing the best we can. He voted to raise taxes 2-cents last year because the State withheld potentially millions of dollars. This coming budget year we're going to be getting almost all of that money and he felt like it was time to give something back. This was the easiest way to give something back that a person who lives in a modest home will see some savings. He felt that as high as our water bills are, to have $2.55 lower on your water bill every other month, people will see the savings and we are giving something back to the residents of Asheville. He will continue to support that.

Councilman Dunn said he did not vote for a tax increase last year. He believes the citizens of this City deserve as much of their tax money back in their pocket as they possibly can. Five dollars is not much, but it's a start. Secondly, this will make the City cut their spending by $366,000 next year. As far as he is concerned, this is cutting government spending. He has a problem with the way some of this has been presented tonight. We suddenly get more information on police officers, which really does upset him. We wanted $500,000 for the Fire Department and four of Council voted for it and it never came up as a priority in the budget. These officers and firemen deserve that. Affordable housing. We need it. He's not crazy about some of this, but he will support affordable housing along with it. He thinks we need to give people a break on what government costs them – cut their taxes and give them a place to live too. We're talking about less than 1% of a $100,000,000 budget. If some of the Council wants to hold that against him in the future, then so be it. He doesn't have a problem with this. He hated that we had to go to this extreme to become managers instead of policy-makers, but it had to be this way. He's been public about that and he didn't get elected to sit back and listen to staff. He's going to get involved with what he sees is something that need to be done. If Mr. Brinson wants to take that $100,000 and do whatever he wants to, that's fine. But he wants to cut $100,000. He will support this motion. There are some things here that he is not famous for supporting, but he thinks the spirit of what we're trying to do is well worth it. We all gained something and we all lost something, but we've managed to finally work together.

Councilwoman Jones said there were some things that Holly Jones is not famous for supporting either, however, she felt very good about the public having a concrete way to understand how we make decisions and how we web them with dollars. It is not what comes across their table last and what they like. It is what we collectively came up with. Affordable housing is her passion and she makes no apology for that. It is also, time and time again, the number one issue that is quoted at the top of the list at forums. Call it a personal agenda – fine, she embraces it. But she knows she is not alone in that personal agenda. She has many residents in the City of Asheville right behind her and she has Council members that care about it too. She can respectfully understand where maybe some people interpreted "maintain means priority" or "strategies doesn't mean budget," but not in her world. In the budget book's first pages, it lays out the priorities. The public has access to this book. Next year if we don't prioritize it – fine, but this year we did. She felt absolutely responsible as an elected official of the people to web those new dollars. We have additional new dollars this year and are all of them up for grabs – absolutely not because we have fixed costs. Just like businesses have new fixed costs. Businesses have unemployment costs and health insurance. Non-profits have those same fixed costs that aren't negotiable, but even when you get rid of all those fixed costs, there are some variable dollars in there. In her estimation, too many of the variable dollars were directed toward things that we did not raise up. And this is redirecting those to what we raised up. To reiterate, the vast majority of the expenditure cuts are not cuts from this budget year, they are reductions in a proposed increase. If it's difficult, then we're all dealing with difficult matters and that is just part of the land what we live in. She was watching a news show on Sunday and the reporter said 1/3 of our towns and cities are facing lay-offs. This budget lays no one off. This budget gives merit raises to employees, which she personally thinks may be a little rich this year, but it rewards hard work and people wearing a couple of different hats. That is in a year where many towns and cities are laying off. In terms of proposing expenditures that will ultimately cost more money, in a $2 Million budget for example in one of the funds, the Civic Center Fund, if we can't manage a $50,000 swing, which is 2.5%, we are in hot water. If we can't find a way to manage that small of swing then we have a lot of bigger problems. No one would have liked to have seen this done differently more than me. Any of you that were in this room know how hard I tried. So she hates that we had to come to it like this, but she feels very good about all the cuts and she doesn't think anything will be paralyzed. This remains faithful to why we were sent to office – not only in content, but in spirit.

Councilman Ellis does support affordable housing. We did allocate $500,000 in addition to the $675,000 from Community Development Block grants. He doubted that many cities are allocating that much. He also pointed out that the $500,000 is money that we are loaning out and people are paying back to us, so every year the fund increases. He felt this year there are other priorities we need to look at. He felt the other motion was very fair motion and a compromise. He said that if we cut the 401 (k) out, we're cutting the firefighters again and other employees and that is unfortunate. He does support additional police officers but we've had a report from the Police Chief that we're probably going to get up to 20 new officers the next year to year and one-half. We are now adding 3 more and saying we're going to put them in public housing and if we do that, we're likely to lose a grant. That doesn't compute, and at the same time, you're cutting their overtime. He felt there was a good compromise, but now feels like we're getting too detailed and could not support the motion.

Mayor Worley felt that if we adopt this budget then we are moving from the policy-making into the management. We are a policy-making body. He was one of those that voted in favor of affordable housing for a priority, and he can assure you that he didn't have the slighted inkling that that would be used to justify additional funding. If he did, his vote wouldn't have been there. He said that he is committed to affordable ways and there are many ways to address that. We increased the contribution to the Affordable Housing Trust Fund last year by $100,000. He felt there is a capacity that this community can endure in terms of how much dollars we take out of our tax revenues and contribute to affordable housing. And he is concerned that we are exceeding that capacity. You also talk about priorities and there is much to be said from those who are proposing this budget that it meets the priorities. It adds $150,000 for additional police officers. If you go back and look at our retreat, one of the items we voted on was adding more police officers and that did not receive enough votes to be a priority. A lot has been said that the budget didn't reflect our priorities. He would certainly argue that it did. We did not ask in our retreat that police officers be added to the budget. And, yet, at the same time, he commended our Police Department for recognizing the need and finding innovative ways to add police officers through grants and he thinks we have added, through that process, the police officers that we need to add. He was also concerned when he hears the Police Chief say that if $150,000 in this proposal for additional police officers is directed to public housing that may make us ineligible for the grant for 3 police officers for public housing. We are taking on one hand and giving on the other. We are reducing the recycling fee by half. There has been really no Council discussion of the effect and no staff input on that. He certainly is not aware that this Council has been receiving an outcry from the public saying we need to reduce the recycling fee. The recycling fee covers half the cost of recycling. It costs us to recycle. It's a good thing to do and he totally supports it. It's the right thing to do. It reduces waste going into our landfill and it is environmentally sound. The recycling fee was designed to cover half the cost to the City and the General Fund covers the other half. We are now asking the General Fund to cover ¾ of that cost. Is there a savings? Yes, you can say the water bill is reduced -- actually it's the recycling charge on the water bill that is being reduced. But, we pick it up ultimately in our property taxes. When you look at the specific cuts starting with the Civic Center Fund. Taking $50.000 out of that from where? We don't have the answer from those who are proposing it. It just takes $50,000 and leaves it up to staff to figure out where. That's where are already losing money. When you talk about the money for fire contracts for annexation, there is a risk there and it is dependant upon when the annexations might become effective. If that happens in the first quarter of this coming fiscal year, we'll have to find that money from somewhere. Overtime for annexation falls in the same category. Those who are proposing the $50,000 from the Planning Department don't know where it's going to come. There is talk that the Planning budget has increased so we're just reducing the amount of the increase. That's true of every City development. He thinks the budgets generally have increased across the board. Why? We have in the budget a merit increase for our employees and we also have in the budget fringe benefits that have increased in costs, insurance has gone up dramatically, worker's compensation insurance, health insurance, and liability insurance. We have had a dramatic increase of over $1.5 Million in our insurance costs. Our budget figures have increased and our costs have increases as well, and yes our employee costs have increased. In the Planning Department there are 17 full-time equivalent employees in there now and there will be 17 in the next budget year. Again, he asked where the $50,000 going to come from. We're cutting $50,000 out of police and fire overtime and that's going to affect the service that we provide. We slashed $100,000 from the Parks & Recreation capital budget. The specific items in that Parks & Recreation capital budget are clearly set forth in the capital portion of the budget. He could talk about each one of the other cuts, but he won't. He did want to talk about the freezing any vacant positions that might come up in the City Development Division of the Planning Department. It's already been said it's pretty unusual to freeze positions in a budget. Particularly positions that aren't vacant. Usually you do that in a drastic budget situation and then you cut staff positions that are vacant. That does not seem to be a reasonable request. We are making a number of cuts but we are making increases. When he looks at the total revenue that we need for making cuts of $888,500, but we're adding revenue needs of $1,203,500 and that includes the money we lose by cutting the recycling fee because we have to make that up. We have to pay for recycling. He thinks our citizens deserve a responsible budget process and he thinks the budget we will be voting on is irresponsible. We are going about it the wrong way. He thinks our staff has responded to our priorities that we set forth at the retreat. He thinks they responded very well. We, as a Council, have not talked well together during this process nor have we communicated policy decisions very well to staff. He thinks we have made a major mistake if we try and go through randomly making cuts to put in things that some of us want. He was very disappointed in this budget process.

Councilman Dunn said that the Mayor talked about a risk. Maybe the greater risk is to never do anything. Maybe we keep on spending money and keep on and on because it's painful and it hurts. Sooner or later you draw a line in the sand. It's painful, yes, but it's not impossible to take care of. He thinks the citizens did get a fair budget process and we tried everything we could to try to talk to people. He talked to everyone on Council, except maybe one. He tried to work with Council and this is what we had to do. This is where leadership starts to take over.

The motion made by Vice-Mayor Bellamy and seconded by Councilman Peterson carried on a 4-3 vote with Vice-Mayor Bellamy, Councilman Dunn, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Ellis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 - PAGE 375

V. NEW BUSINESS:

A. RESOLUTION NO. 03-110 - RESOLUTION APPOINTING A MEMBER TO THE WNC REGIONAL AIR QUALITY AGENCY BOARD

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the WNC Regional Air Quality Agency Board.

Mr. Arlis Queen has resigned from the WNC Regional Air Quality Agency Board, thus leaving an unexpired term until July 1, 2008.

On June 17, 2003, it was the consensus of City Council to interview Dean Kahl, Cecil Beumer, J. Loyd Kirk and Lawrence Haas.

After Council talked about the excellent qualifications of all candidates, Dean Kahl received 4 votes, Cecil Beumer received no votes, J. Loyd Kirk received 3 votes and Lawrence Haas received no votes. Therefore, Dean Kahl was appointed as a member of the WNC Regional Air Quality Agency Board to fill the unexpired term of Mr. Arlis Queen, term to expire July 1, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 - PAGE 441

B. RESOLUTION NO. 03-111 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Civic Center Commission.

There currently exists two vacancies on the Civic Center Commission - Kent Wolff, whose term expires June 30, 2003, and Dan Breneman, whose term expires on June 30, 2004. In addition, the terms of Jerri Goldberg, Lisa Michie and Peter Crosa expire on June 30, 2003.

On June 17, 2003, City Council instructed the City Clerk to arrange interviews for Larry Smith, Charlie Cole and John Broadbooks.

In addition, on June 17, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Jerri Goldberg, Lisa Michie and Peter Crosa to each serve a three year term respectively, terms to expire June 30, 2006, or until their successors have been appointed.

After Council talked about the excellent qualifications of all candidates and the upcoming additional vacancy opportunities, Larry Smith received 6 votes, Charlie Cole received 6 votes, and John Broadbooks received 2 votes. Therefore, (1) Charlie Cole was appointed to serve the unexpired term of Kent Wolff, term to begin immediately and expire on June 30, 2006; and (2) Larry Smith was appointed to serve the unexpired term of Dan Breneman, term to begin immediately and expire June 30, 2004.

RESOLUTION BOOK NO. 27 – PAGE 442

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of May 23-June 12, 2003: Ronnie Cole (Water), Judy McMahan (Streets), Donald Brigman (Fire), Sondley Estates (Water), Thomas W. Harrill (Transit Services) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English, resident in east Asheville, made several comments regarding the budget from the City shouldn't be involved in the real estate business to supporting the police department pay increases.

Mr. Mike Fryar explained how City Council was given misinformation by the Planning staff when they were considering the annexation of his property.

Ms. Cheryl Wegner related to Council traffic concerns about the proposed entrance to the Richmond Hill Park on Richmond Hill Drive. The City Engineer has looked at an entrance off Riverview Church Road, but it will be very expensive. Since it is clear that dollar signs mean more to Council then the grave concerns of your citizens, they implored council to amend the Conditional Use Permit to include traffic mitigation. She explained that Council is violating their Traffic Calming Policy.

Regarding the Richmond Hill Park entrance and upon inquiry of Councilman Dunn, City Attorney Oast said that it is his understanding that the property that is under consideration for condemnation can be condemned for use as a public road. If it were the City that was doing the condemnation work, the title in that condemnation would vest immediately. He assumed the law for the State is the same but it may not be. He tended to think that it would actually stronger in favor of the State in that regard. What could be tied up for years would be what is actually paid for that property. But, if the property is being condemned for public road purposes, the title vets immediately. Again, what may take a long time is to determine how much they pay for the property. City Manager Westbrook said that it was his understanding that the only other reasonable entrance would cost in excess of $1 Million and that is a cost the State will not incur.

At the request of Councilman Mumpower, City Manager Westbrook said that he would have the City Engineer look into the issues of traffic mitigation with consideration for future uses of the adjacent site and report back to Council with their recommendations. It was his understanding that this would be for traffic calming in the future.

110

Closed Session

At 8:32 p.m., Vice-Mayor Bellamy moved to go into closed session pursuant to N. C. Gen. Stat. sec. 143-318.11 (a) (6) to discuss a personnel matter. This motion was seconded by Councilman Dunn and carried on a 5-2 vote, with Mayor Worley and Councilman Mumpower voting "no."

At 10:03 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:03 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 8, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

U.S. Army Veteran Walter Plaue led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 24, 2003

B. RESOLUTION NO. 03-112 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT REGARDING ENTERING INTO A LEASE WITH THE MEN'S GARDEN CLUB OF ASHEVILLE FOR ½ ACRE ON AZALEA ROAD

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed lease with the Men's Garden Club of Asheville (MGCA) for 1/2 acre of land on Azalea Road.

The 1/2 acre on Azalea Road is a portion of the property acquired by the City of Asheville from John Moyer. The City previously leased the space to the MGCA for one year from November 1, 2001, to October 1, 2002.

The MGCA has offered to enter into a nine (9) year lease for the space where it currently has constructed a greenhouse and appurtenant facilities at a rent of $750.00 per year payable in goods and services. The proposed lease will enable MGCA to continue operating the greenhouse facility in its current location. The lease may be terminated by either party upon 60 days written notice.

Approval of the resolution will authorize the City Clerk to publish a Notice of Intent to enter into the Lease.

The Parks and Recreation Department and Planning & Development Department staff recommend adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 443

C. RESOLUTION NO. 03-113 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT A DONATION OF REAL PROPERTY AT THE INTERSECTION OF ERSKINE AND LIVINGSTON STREETS FROM THE HOUSING AUTHORITY

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property at the intersection of Erskine and Livingston Streets from the Housing Authority of the City of Asheville for the City of Asheville parks system.

Erskine Street Park consists of 0.429 acre of land improved with children's playground equipment located at the intersection of Erskine and Livingston Streets. Jointly developed by the City and the Housing Authority, the land is owned by the Housing Authority and the improvements were funded by the City using a Community Development grant. In 1998 the park was designated Herbert J. Watts Park in honor of a former City Councilman and retired City Police Officer

The Housing Authority has proposed to donate the park to the City because the City is better equipped to provide the long-term management and maintenance of the park.

Parks and Recreation staff have reviewed the proposed donation and found that the property is appropriate for incorporating into the City's park system.

City staff recommends City Council adopt the resolution authorizing the Mayor to accept the donation of real property from the Housing Authority.

RESOLUTION BOOK NO. 27 – PAGE 444

D. RESOLUTION NO. 03-114 - RESOLUTION CONFIRMING THE APPOINTMENT OF LATRETTA HIGGINS AS THE REPRESENTATIVE OF THE COUNCIL OF INDEPENDENT BUSINESS OWNERS ON THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two (2) of who are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Ms. Latrella Higgins has been named by the Council of Independent Business Owners to represent them on the Minority Business Commission. Ms. Higgins has been nominated to fill the position left vacant by Ms. Vonna Cloninger who resigned effective July 1, 2003. Ms. Higgins' term will run through August 2004 to complete the current term of Ms. Cloninger.

City staff recommends City Council adopt the resolution confirming the appointments of a member of the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 445

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO PHENIX RESEARCH PRODUCTS

RESOLUTION NO. 03-115 - RESOLUTION TO OFFER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO PHENIX RESEARCH PRODUCTS

Mayor Worley opened the public hearing at 5:08 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution offering an economic development incentive grant to Phenix Research Products, a company relocating to Asheville from California. This public hearing was advertised on June 27 and July 4, 2003.

Phenix Research Products, formerly of Hayward, California, is relocating to Asheville. The company is setting up its corporate headquarters and distribution functions in offices located in the Business Incubator on the Enka campus of AB Tech – a primary factor in their decision to locate here. The firm is a supplier to the biotech and university market offering a range of equipment and instrumentation. The firm intends to employ approximately 40 people over the next two years.

The Asheville location was selected after consideration of other competitive locations. As part of the recruitment process, the City of Asheville made a tentative commitment to support the project with an incentive grant in the amount of $20,000, which is part of a total local incentive package of $50,000 made in partnership with Buncombe County, AdvantageWest, and the Asheville Chamber of Commerce.

Before the tentative commitment by the City can be officially granted, a public hearing is required.

Staff recommends Council approve the resolution authorizing an economic development incentive grant to Phenix Research Products.

Mr. Greg Schultz, President of Phenix Research Products, briefed Council on the background of his company and gave to Council material regarding his company. He spoke about how pleased he was to move to Asheville and how they hoped to fill the facility with other biotech companies.

Upon inquiry of Mr. Walter Plaue, Mayor Worley explained the terms of the incentive grant.

Councilman Ellis explained that the grant is not a cash payout.

City Manager Westbrook also added that the agreement states that the company will employ 14 people with salaries of not less than $25,000 per year.

Mayor Worley closed the public hearing at 5:15 p.m.

Councilman Dunn spoke about how pleased he was that this company was taking a chance on Asheville. He spoke about how the Council is working hard to recruit businesses to our area.

Vice-Mayor Bellamy agreed with Councilman Dunn noting that the City is working with other community partners to support the initiatives of bring economic development to our area.

City Attorney Oast said that the economic development incentive grants are not reductions in taxes. We use the amount of property taxes paid as one of the factors in determining the amount of the grant.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-115. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 446

IV. UNFINISHED BUSINESS:

A. ASHEVILLE CITY PLAN 2025

Mayor Worley said that the public hearing on the Asheville City Plan 2025 was held on April 22, 2003, at which time City Council listened carefully to all the public comments. It was the consensus of City Council to then study the plan carefully, taking into consideration the comments. At that meeting it was then determined that at a future date undetermined City Council would consider adoption of the plan.

Planning & Development Director Scott Shuford said that since City Council cancelled its first worksession in July and, with the rescheduling of the consideration of the Minimum Housing Code to later in July, the opportunities for discussing the draft Asheville City Plan 2025 in July were scarce. Since the July 8 formal Council meeting was relatively "light" due to rescheduling the Minimum Housing Code from this meeting, he was taking this opportunity to get some additional feedback on the Plan from Council prior to bringing a final draft forward for consideration.

As previously suggested by the Mayor, staff is interested in hearing each of Council's five most significant concerns about the Plan so that we can make any changes necessary to move it forward. We are seeing an increasing amount of development activity, ranging from the final permitting of the Sayles Wal-Mart to a large number of other fair-sized projects. Consequently, we need to get the Plan revision and final consideration to Council so that we can concentrate on these projects.

This will be a listening opportunity for staff – we want to hear Council's concerns so we can get the Plan in order for your final consideration in possibly August or September.

Councilman Ellis thanked the hundreds of citizens that spent thousands of hours helping to put this document together. This 400+ page document is a great guide for what might happen in the next 22 years. It is a guideline and not something set in concrete. It is a culmination of the thoughts of hundreds of people. He felt it was an excellent document and would support adoption of the Plan when appropriate.

Vice-Mayor Bellamy read that successful city plans create long-term community value. She said this Plan is for 22 years and wondered what the average life of a plan like this is. Mr. Shuford responded that the average life of a plan is around 10-25 years. We were following the concept of the 2010 Plan when we set the timeframe. In addition, we also felt this was a good timeframe to be looking at because the first land use plan for the City was adopted in 1925. The 100-year mark was to be reflected in the name of the Plan as well as the timeframe involved in it.

Vice-Mayor Bellamy noted that a comment from the Plan from Max Haner, former Chair of the Planning & Zoning Commission, states that after adoption of the 2010 Plan, 15 years later they were ready to get rid of that and move on. She wanted to make sure that we are not looking too far out with the 22 years. She wondered if it should it be the 2015 Plan. Mr. Shuford responded that we do anticipate there being multiple amendments to this Plan between now and 2025. The Plan is intended to be updated on a regular basis. One of the faults of the 2010 Plan was that it was updated after the first two years, but then not updated since 1989. A lot has been changed since then. In 1996 there were amendments to create the Unified Development Ordinance and the City-wide rezoning made great changes to the 2010 Plan and the Plan was never amended to reflect those changes. Staff will do a better job of bringing the amendments forward. That is one reason why we have an implementation matrix in the Plan so that we can give Council a frequent report on how well we're doing in implementing the Plan and meeting the deadlines and guidelines that Council has established.

Vice-Mayor Bellamy said that there are no benchmarks in the matrix to say that at this five year point this will be established, or at the ten year mark, this will be established. The goals and the strategies outlined could last the entire 22 years and then we won't technically know if they were actually met. She felt it would be good to have benchmarks and some time periods to measure the strategies to see if we're successful. This is one of the most valuable components missing. Mr. Shuford said that Vice-Mayor Bellamy raises a good point and maybe we do need to clarify somewhere in the purpose and intent section that there will be periodic reports made to Council about progress that has been made. Resulting from direction that comes from that, staff will modify the Plan accordingly.

Vice-Mayor Bellamy asked what part does the new Metropolitan Statistical Area (MSA) and our expanding region play in this overall document. Mr. Shuford responded that it wouldn't have an effect from the standpoint of either the transportation or land use aspects of it. What may happen, and it probably doesn't need to be reflected in our Plan, is that because our MSA has gotten to a certain level, we will start to attract a wider range of development activity from around the country. Basically they break the areas into different tiers and as a result of the data that is used to generate development market analyses, he thought we are going to see a lot of development attention turned to us from outside our area, but he thought we had that covered in terms of our land use plan. Vice-Mayor Bellamy disagreed because in the matrix it talks about what types of development we don't want – like big box. But, because our MSA has changed and we are the hub for Western North Carolina, she believed we may attract more big box developments because of our area and the desirability of our area. However, our Plan says we don't want that. Mr. Shuford explained that that was an issue he has heard from more than one Council member with regard to the statement in the Plan that big box development was regarded as either less desirable or undesirable. That was a summary of what came from the public input process. Council members have made him quite aware that that has a tendency to be incendiary and he is planning on taking that section out. He doesn't think that the Plan will lose anything by dropping that grouping because we address it in other areas. He recognizes that Asheville is going to be the center of commerce for Western North Carolina because of our size and our location at two Interstates. We are going to receive development pressure for big box type development and we need to accommodate it.

116

Vice-Mayor Bellamy felt that green development is wonderful and how the benefits of it are outlined in the Plan is good. However, one thing missing is the need for the creation of an incentive program for developers to actually do green development. Mr. Shuford responded that green development is often more expensive than regular development and as a result there should be some incentive for that. We have been working with Peter Alberice to look at a grant that would be used to develop strategies for providing those incentives. We can also look at our rules and regulations and see where they are disincentives for green development that might exist and remove those.

Vice-Mayor Bellamy asked how the new developer/neighborhood meetings would mesh into this Plan. Mr. Shuford said this is one of the cases of where our regular work program is starting to catch up to the goals of the Plan. In many ways it's like the Joint Planning Area and the Early Action Compact occurring since we started this process and we need to address those. It may make meeting some of the implementation steps that are listed in the matrix with regard to community involvement a lot easier because we have already taken some of the steps in that direction. Regarding voluntary vs. mandatory, Mr. Shuford said that right now we are not proposing a mandatory process for developer/neighborhood meetings. We feel like we have a program that's going to take a few years to try to see how it works and to measure its benefits. First we have to get it implemented and there has to be code amendments. Until we have had a change to see if it is absolutely the right way to go, he wouldn't recommend to Council that we go with a mandatory process. Because there are added expenses associated with the process that we have laid out, it may make it difficult for certain types of development. For example, if we continue to have duplexes as a conditional use permit, right now they don't go to the Planning & Zoning Commission for approval – they come straight to City Council. He'd hate to get us in a situation that anything that came to City Council would have to have a mandatory public involvement process if it is that small of scale. Vice-Mayor Bellamy felt this is the type of thing that needs a benchmark.

Vice-Mayor Bellamy asked what is the timeframe for incorporating the LEED system in the development of the green building program. Mr. Shuford said that he is working with the local architects to develop that program. He said that the LEED system is an internationally recognized green building program.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford said that the Downtown Asheville Center City Plan, that just deals with downtown Asheville, is an addendum to the overall Plan. The goals in that Plan deal directly with downtown issues and not with City-wide issues.

Vice-Mayor Bellamy felt that within 22 years discussion needs to take place about a housing bond and that needs to be included somewhere in this document.

Vice-Mayor Bellamy said that we don't give a strong enough emphasis on our support for incremental tax credits. We need to say that we are going to pursue legislative approval for that. We need to talk about the importance of it and how the community can benefit from it.

Vice-Mayor Bellamy said that there was a debate at the retreat about how when we plan for something, should dollars should be considered. She felt they both should go together. She felt that the City should commit to support this, not just in theory, but what we will place value and dollars in in the future. Mr. Shuford said that speaking on behalf of the Planning Department, there are some aspects in the Plan that deal with capital improvement suggestions and certainly he hoped those would be reflected in the budget. But again, this is a guideline and Council implements it potentially at every meeting. Every time Council makes a decision, it has the potential to add to the list of things we need to change or amend to this Plan. When the Plan and Council's priorities not in alignment is when we need to make adjustments. In fact, in a month or two we will be bringing to Council the infill development ordinance that deals with duplexes, triplexes and quadraplexes. Depending upon Council's action on that, it will either stay in the Plan or it will be something we will take out.

Councilman Dunn said that it's difficult to pick five things out of a document over 200 pages that he has concerns about. We have a Planning Department, a City Development Office and a Unified Development Ordinance. That is a lot of people to plan the City's future. He realized this document is supposed to help it, but it seems to him that we already have plenty of regulations, departments and planners to do that very thing. We talk about the 2025 Plan, but where is the role of government. He knows that's not the purpose of this Plan, but we must be thinking of that too. He felt the Plan is unrealistic. It talks about annexation continuing. If we look back at the history of Asheville in the past 60-70 years, the City is a lot bigger as far as square footage, but the population is going downhill. The transportation goals are unrealistic. If we lived in the northeastern corridor of New York or New England, it would be different. People around here are not going to ride bicycles and they are not going to ride the bus. He wished they would, but they're not. Some of this is elitist. Statements on pages 14 and 15 say that low paying jobs are less desirable, and national franchise and restaurants are not wanted. We, on this Council, agree that those are low paying jobs, but they are still jobs. When a community, council or a plan decides that we are going to decide what is a good job and what is a bad job is dangerous. Any job is better than no job. So he has a real problem with the wording. How are we going to grow our tax base with higher taxes, annexation, and the cost of housing? They are all placing a strain on our young people who can't afford a place to live. This Plan is loaded with regulations. This Plan might be counter productive to the City in the long run. On page 33 it lists successes in smart growth. It says the Gerber Urban Village is a success – there is nothing happening out there. It's still a vacant piece of land. Regarding Azalea Road Park - we're still waiting on the Blue Ridge Parkway to do something with that. The I-26 Connector Public Input Process was wonderful but we won't have it done until 2012. How can you say that's successful? When we put these kinds of things into the Plan that aren't even implemented yet and may not even work, why include them. On page 60, it says the City wants to have the responsibility to guide growth and development. It also states it has the ability. To him that means that staff, and not the private sector, will have the heavy hand. They will quote this Plan and implement the regulations. This scares him. If you carefully read page 65, staff already can micromanage site designs and now they want to manage structure designs. Where are we going to stop? If the staff can do all that plus regulate structures, then staff has a heavy hand and will probably continue to make business and development tough in the City. It says the reason for this is to make things streamlined. But in fact, it puts more power on the staff and to him it will be more erroneous in some ways that what we are trying to accomplish. On pages 158 and 159, it talks about trees. If the Plan is adopted, a person in the City who has trees to cut down will have to get a permit for it as well as hire a professional tree surgeon. This is a minor thing, but again that is more control. He can understand that if it's on the City's streets but not if it's in their backyards. It seems to him that the City wants to control people, property and permitting. There is even a suggestion in this Plan that new foliage for buffers has to be common and indigenous to western North Carolina. As an outdoorsman, he knows there is no way you can control that. If you look in the woods, there are trees from all over the southeast growing. There is an area that talks about the City of Asheville building, or helping to support, a railroad terminal in Biltmore. Railroading is a hobby he has had for 30 years. Northfork Southern's railroad ties aren't strong enough to support high speed rail. If the City's going to build this, Northfork Southern has a lot of work to do on their tracks before it will ever be high speed rail service. It seems to him this will be a long, long time coming and the money spent on this would be better off spent somewhere else. On page 208, there is only 1.5 pages out of over 200+ in this entire Plan about police. He, and members of this Council, have recently supported more police in our neighborhoods due to high crime rates. The unreported ones are the ones that worry him the worst. To put a 200+ page document together and say we don't have a police problem or a crime problem really disturbs. If our children aren't safe in their homes, why worry about where they are going to play. On page 47, it states that a mobile home can't be considered home ownership. Ask any person with a mortgage on a mobile home what they think about that statement. Some of these statements don't need to be in the Plan. Mr. Shuford responded that a mobile home is not taxed as real property so it can't be considered as a home. But he didn't disagree at all that a mobile home is considered as a home. Councilman Dunn then continued by saying that maybe technically it can't be considered, but if someone is paying for their home, you may have an argument there. In closing he pointed out the many areas of increased control, unrealistic expectations and goals. Many people have worked on this Plan and all of them have the best interest in Asheville. But all of us have different opinions. He would suggest that we change the verbiage in a lot of areas and put a disclaimer on it making it clear that it's a vision and not a plan. He sees places where we can waste money and create bad will in the community if we do some of this. The 2025 Plan has already been quoted by staff and it does include some areas of elitism in his opinion He can't support this document as it's written right now. Many things addressed in it are worthy, but there is room for further intrusion by City government into the lives of taxpayers. We already have a Unified Development Ordinance, a Planning Department and a City Development Office for this very purpose. When you look at the matrix, it will show you how tough this is going to be. Surely we can find a way to re-word and shorten this Plan and only undertake realistic steps. All these things will cost money and create more bureaucracy. Plans often change and visions are like ghosts – they only appear to certain people. Let's not put that much faith in either one of them.

Councilman Peterson said that the citizens committee and staff has done a great job with trying to further flush out some of the principles of smart growth and he feels this is a good solid document because there is a good solid foundation to build on. One area that he sees as a weakness is that whenever there is a new development going into any part of Asheville, either a park with the Armory or some housing development, the public comes in and says the roads can't handle it, the waterlines can't handle it, etc. Their concerns are always the infrastructure. Going hand in glove with greater density, particularly with infill, the City is going to have to make that commitment. There are some comments in the Plan that address this but it's not clearly linked that to encourage that greater density, in particular the infill, the City is going to make the commitment to improving infrastructure in areas that may have the old waterlines, or streets that need improvements. Particularly as we saw with the Richmond Hill area, when they see more development and more traffic, they want some traffic calming measures. He felt that if the City was more pro-active about it and said, we know with greater density we're going to need better infrastructure and we're going to make that commitment, that people will be more willing to accept it. He thinks that what most of the public hears staff say is, once you build all these new housing units, then there will be the demand for this infrastructure. The public wants the infrastructure before the development comes. He would like to see something that clarifies that smart growth means not just putting more people downtown or more people in the neighborhoods, but improving those qualities so that it doesn't bring everybody's quality of life down by just having more people.

Councilman Peterson said that on the flip side of focusing on having greater growth downtown and in the existing developed areas, he felt the document is very weak on managing growth in areas that we don't want to see greatly developed. That as long as people can develop up on the mountain ridges and build greater density, they won't have that pressure to do infill development. And, the impact doing something along the mountain ridges is going to be a greater impact than doing something with infill in the neighborhoods. He would like to see that link being made that we're not just going to open up the door for greater density closer in town, but to make it clear that that will mean growth management measures in other areas that we don't want some of that greater density. If we are going to make smart growth work, it has to be encouraging growth where we want it and limiting growth where we don't want it. He doesn't see that mentioned much in the Plan.

Vice-Mayor Bellamy asked about the other plans mentioned in the 2025 Plan. Mr. Shuford said that when the 2025 Plan is adopted, the attached Center City Plan would be adopted as well. Mr. Shuford explained that the reason the plans are separate is that we often get people who are interested in the downtown area and we wanted to have a document that we could separate and distribute to them that would deal only with that one area. He did say that there are a number of different plans mentioned in the 2025 Plan though. Some of those that are referenced in the Plan, which have already been officially adopted, are the Greenway Plan and the Pedestrian and Bike Plan. Some other plans mentioned are some small area plans in five priority areas. Those are plans that will come before Council in the future.

Councilman Mumpower said that we've inherited this from the previous Council and it's also had the touch of a whole lot of people, including staff. It is obviously supported by a number of my colleagues on Council. He is personally not interested in tossing a lot of disrespect toward any of those entities, so he will be brief. He has had many conversations with Mr. Shuford and a lot of correspondence about this and it is very clear that he has a significant number of concerns about this document. In summary of those, he does believe the document is much too large and bulky. Anything staff can do to condense it down to a more practical format that the average user can put to practical use is a good investment of time and energy. Secondly, he would question the title of the document. This is one of the things that threw him the most in the beginning. This document does not reflect what he, from a commonsense prospective and from the average person on the street, would see as a comprehensive city plan. There are just far too many things that are not addressed in the document. He hoped one day we could do a comprehensive plan. He would like to see this Council suggest a format and then see if there are some ways that we might pursue that. But for now, we're talking about Asheville's 2025 Land Use Guide. He thinks that would be a much more appropriate title and one that he personally he could feel more comfortable with. Without going into detail, he has some similar concerns about the content that Vice-Mayor Bellamy, Councilman Dunn and Councilman Peterson mentioned. He would be comfortable in communicating those concerns directly to Mr. Shuford. He does believe there is some detail in the Plan that could be changed. He is especially concerned about elitist language. He feels that when you do a document this large it's hard to do everything perfectly. But, there is a tone and comments made that he doesn't think reflect a good model for a community that is trying to be inclusive and considerate of our variety of peoples that want to make people bring decent jobs to this community feel welcome. People that work in jobs that may not be considered the ideal, best or elite need to feel good about what they do. The fact is that we need jobs of almost any decent sort here and he felt language that reflects otherwise is a poor investment in our future. He suggested we remove examples of non-existing or future projects. He thinks we reference examples that really haven't happened, may not happen and there should be examples out there that we can use to substantiate the content. Mr. Shuford agreed and he was as disappointed as anyone that, for example, the Gerber Urban Village has not moved forward. There are some reasons for that but he is hopeful that project will move forward soon. He agreed that referring to it in the document perhaps is a bit premature and there are other examples. Councilman Mumpower continued in that he hopes that we learn from this for our future. He's not sure this has been the best investment of our time and energies for our future. He tends to personally be more inclined toward activities that have a more concrete nature. He's heard us speaking really from both sides of our mouth on this document. On one hand we say it's a guide, it's nothing that locks us down, and it's nothing that Council has to vote on all these issues. It's played as not a terribly serious document. On the other hand we've had the input of hundreds of people and spent no telling how many staff hours. It's 200+ pages long and we know from past experience that we do reference these guides seriously and frankly, he thinks we should. He hoped in the future we can get settled on one place or the other. We either are going to have a serious document that deserves serious consideration and has serious buy-in by everyone, or if it's just a guide, or a vision, personally he's not sure this is the best place for us to put so much time and good energy on our future.

Councilwoman Jones said that there is a structure in the matrix, like the land use, air quality, economic development, City services, etc. that all makes good sense. But there are a couple of headings in the matrix that are very important, but they are sub-categories. For example, the entire development tools should be sections, because it's so much of what we do day in and day out as far as government services go. That applies to affordable housing too. It's just in those two places. In her very brief study of city planning, she understands that in strategic plans if the subsections are cross-referencing each other, that actually makes it a stronger plan because you're being consistent within the different functions. As we update it down the line, she suggested we do that to really build on each section. Some people may think it's duplicative, but really it's a stronger base. She expressed her gratitude towards the powerful public input and did think the input was from a cross-section of people. She really didn't care what we call the document – vision, guide or plan. She felt the word "vision" is powerful. She thinks that is part of what leadership has to offer a community is a vision. Then we have staff and citizens that help us live out the concrete part. She will interpret this document as a strong informative plan, guide, vision, or roadmap. She will take it very seriously and very seriously to heart. The word will not change the power. In terms of all the responsibilities of the City government including public safety, infrastructure and land use planning, we use the word balance. What is happening is we have to hold everything in tension and that, to her, is the hard work of Council. Balance at the end of the day is arbitrary as everyone's balance will be different. But what we need to do is keep everything in tension and she thinks this Plan actually does that. She hopes the economy turns around and we can allocate dollars to see these things put into action. She wanted to be clear where she will be coming from, in terms of how she will be interpreting this document and how she will be looking at budgeting going forward. She thinks it's a good job.

Mr. Shuford wanted to be clear that the intent of this Plan is an effort to establish a series of tasks for staff to work on and bring them forward for separate consideration. How Council acts on those tasks will determine how the plan is implemented. It's not an implementation, but a tool that gets you to the implementation.

Councilman Dunn said that five years from now another Council will be seated and since this Council adopted this Plan staff will have to implement it. He felt the next Council will be locked in to a certain degree. He sees some problems with that up the road. Mr. Shuford responded in that in five years he'd like to think there will be substantial changes to this document to reflect new things. Last year we had an Early Action Compact to deal with air quality issues, we have a Joint Planning Area concept, we've made significant progress in attempting to achieve the developer/neighborhood coordination communication aspects, we've had a number of different zoning districts adopted, and efforts to promote smart growth ranging from code amendments to development projects. Not updating this document on a regular basis is a huge mistake and so it must stay current with the times and hopefully that will mean that it's current with the councils.

Mayor Worley said that this is a guide. There is nothing in the document that carries the force of an ordinance that we enact. It may lead us to enact ordinances, but it's a guide, just like the 2010 Plan has been a guide. The 2010 Plan has been followed and it has been not followed on occasion where circumstances and a particular council thought it was in conflict with where they wanted to go. That certainly is the prerogative of this Council or any council. In reality, what you are telling us and what we intended with the 2010 Plan, but it didn't always happen, is that where a council chooses not to follow that Plan, that in itself constitutes an amendment to the Plan to bring it into consistency with whatever the philosophy of that council is. That is something we need to recognize that when we adopt this Plan, or if we adopt this Plan. We are not setting something in concrete that can't be changed. We are setting a guideline that as things come up we will see fit to follow or future councils will see fit to follow. If not, change the Plan. Things do change and things do come up that are unanticipated. There is a section in the Plan that deals with annexation and extraterritorial jurisdiction and certainly encourages us to continue expanding in that vein. There is no mention of our current agreement that we are working on with Buncombe County for a Joint Planning Area. That certainly changes the extraterritorial aspect of it. It was his recommendation to change the language to deal with that current situation. Mr. Shuford agreed and said that we are planning to do that. Mayor Worley continued by saying when he looked at the implementation timeline, it struck him as being rather aggressive in terms of the timeframe. When you look at the timeframe shown, it's either ongoing for a good number of things or for those that have dates, it's generally 2003 to 2005 time period. The 2003-05 time period struck him as being too aggressive since we're almost at the end of 2003. It seems like some of those things should be a little longer. He felt the Fire Department area was the only area he saw was stretched out as far as 2010. Mr. Shuford said we do plan on making some adjustments for a variety of reasons. Mayor Worley made an editing note by saying tax increment financing is now called project development financing. In area of transit planning and particularly efforts to manage transportation demand, he has served on the Transportation Demand Management Panel with the N. C. Dept. of Transportation and the final report from that is in the process of being prepared and will be circulated very soon. He believed that report was going to call for the creation of a couple of transportation demand associations to try and foster some alternative modes of transportation usage. Of the two that are recommended, one is recommended for Asheville. So, potentially incorporating what he thinks will be a forthcoming transportation demand association into the Plan would be consistent with what he thinks will be coming out from the N. C. Dept. of Transportation within the next month or so. Mr. Shuford said that he would contact Mary Clayton for verification.

Mr. Shuford thanked Council members for the comments. He will list all the changes report back to Council in a month or so.

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Vice-Mayor Bellamy announced vacancies on the following boards and commissions: Clean Air Community Trust Board, Economic Development Strategic Plan Implementation Task Force, Historic Resources Commission, Board of Electrical Examiners, Noise Ordinance Appeals Board, Transit Commission and Tree Commission. For an application form please call the City Clerk at 2659-5601.

Councilman Ellis read a letter from Victor R. Trantham Jr., Vice-President of the Haywood Street Redevelopment Corporation, dated June 25, 2003, thanking all those who worked with diligence to ensure that the Haywood Street and Battery Park project went smoothly.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English felt the City should not be in the affordable housing business. He also felt that money allocated for bus passes should be used for something else.

Mr. Mike Fryar explained how City Council was misinformed by City staff about how much of his property was already in the City prior to his recent annexation and about development behind his property.

Mr. Gabriel Ferrari, west Asheville resident, alleged sabotage of his North Carolina Corporation by the Director of Building Safety in 1997. He said that after he related his allegations to the North Carolina Corporate Division, they advised him to hire a lawyer and sue the City for damages. He advised Council he would pursue that avenue.

122

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:26 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 15, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Utility Agreement with NC DOT to Relocate Water Line on US 19-23 at Bridge 123

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line in the State right-of-way on US 19-23 at Bridge 123 (Smoky Park).

The Water Resources Department operates a 6-inch water main along 19-23 under the policies of the Regional Water Authority of Asheville, Buncombe and Henderson (RWA), which is owned by the City of Asheville. According to the 1996 Master Plan, this line needs to be upgraded to an 8-inch line. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT and the City staff agreed to relocate the 6-inch water line and upgrade it to an 8-inch main to meet the requirements of the 1996 Master Plan. The NCDOT has estimated the construction cost of this relocation at $32,424.75. An additional $4,875.25 needs to be added to include contingency and inspections, so the total amount that is budgeted is $37,300.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. The lump sum payment $32,424.75 is due within sixty days of invoicing by NCDOT. Funding will be available in the 35 Fund – Water Major Capital Improvements Fund effective July 1, 2003. The Fiscal Year 2003-2004 Transfer to Capital will fund this NCDOT project as well as other NCDOT Projects, Annexation Projects, and Treatment Plant Improvements.

Staff recommends that City Council approve a resolution authorizing the Mayor to execute a Utility Agreement with NCDOT to relocate a water line in the State right-of-way on US 19-23 at Bridge 123 (Smoky Park).

Interim Resources Director David Hanks responded to questions from Councilman Peterson regarding this improvement.

Clerk to Advertise Offer to Purchase Property between Courtland Avenue and Houston Street

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located between Courtland and Houston Streets.

The subject property is an RS-8 Residential Single-Family High Density District parcel located on Courtland Avenue and extending south to Houston Street comprising of approximately 3.8 acres (PIN No. 9639.20-91-4343). The Fair Reuse Value for the parcel is $65,600. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development. The property was appraised by Richard L. Smith, SRA, on May 22, 2003, at a value of $65,600.

Flynn Christian Fellowship Home has submitted a bid to purchase the property in the amount of $65,600. The proposal includes a plan to build three two-story buildings on Courtland Avenue for office and residential space along with an additional two story residential structure on Houston Street at an anticipated development cost of $700,000.

Approval of the resolution will establish a minimum price of $65,600 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution authorizing advertisement for upset bids.

Municipal Agreement with the N. C. Dept. of Transportation for Sidewalk Along US 19-23/74A

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for the installation of approximately 1,600 linear feet of concrete sidewalk along US 19-23/74A from Asheville School to the newly constructed bridge over the railroad tracks.

NCDOT is currently in the process of replacing a bridge on US 19-23/74A (also know as Smoky Park Highway). This bridge is located in front of Lowe's. As part of this project we have requested that sidewalk be installed along the section of roadway adjacent to the construction.

The agreement will require NCDOT to pay up to $50,000 for the construction of the sidewalk. The City of Asheville will be required to pay any costs above this amount. The City has an additional amount of $10,000 budgeted in this year's budget for this project. While the sidewalk has not been constructed, the cost of the sidewalk is not expected to exceed $60,000.

As part of this agreement the City will be responsible for maintaining the sidewalk which is standard operating procedure for all sidewalks on State maintained roadways.

The consideration of a resolution authorizing the City Manager to sign a municipal agreement with NCDOT for the installation of approximately 1,600 linear feet of concrete sidewalk along US 19-23/74A from Asheville School to the newly constructed bridge over the railroad.

Modification of Fire Code Violations

Summary: The consideration of an ordinance amending the fire code violations in order to be consistent with the new State Fire Code.

The North Carolina State Building Code Council adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective January 1, 2002. Section C of Appendix B (Schedule of Civil Penalties) establishes Fire Code violations that coordinate with Chapter 6 of the Code of Ordinances, which is the Fire Code for the City of Asheville.

Staff recommends City Council adopt the ordinance amending Section C of Appendix B (fire code violations) of the Code of Ordinances in order to be consistent with the new State Fire Code.

Non-Warranty Deed on Westchester Drive

Summary: The consideration of a resolution authorizing the Mayor to convey by non-warranty deed whatever interest, if any, the City may have in a portion of Westchester Drive containing residential encroachments.

Westchester Drive is located between Chiles Avenue and Holland Place in the Kenilworth Community. Harry M. Weiss and wife Roberta J. Cole along with Mary Caudill Weiss own the real property located at the corner of Chiles Avenue and Westchester Drive, being 17 Chiles Avenue. Situated on the property at 17 Chiles Avenue is a residential structure with a garage. Approximately 3 ft. of the garage along with a portion of the porch and foundation wall, encroaches onto the right of way of Westchester Drive. It is unclear whether the encroachments existed before or after the right of way of Westchester Drive was established; although the evidence appears to indicate that the dwelling existed prior in time to the designated right of way. Due to future plans for the property, the property owners desire to resolve the encroachment issue as such is a potential cloud on title. City staff has investigated and determined that the encroachment of the garage and possibly the other encroachments have been in existence since 1925. The City has exercised neither dominion nor control of the area of the encroachments and has no interest in exercising such control. To the extent the City has any interest in the area of the encroachments, which the City believes it has no interest, conveying such interest is in the City's best interest.

The Public Works Department recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed conveying whatever interest, if any, the City has in the right of way containing the encroachments as specified above.

Demolition Contract for Haywood Street Parking Garage

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with E. Luke Green Co., Inc., in the amount of $184,377 for the demolition of four structures on the proposed Haywood Street Parking Garage Project.

In an effort to remove buildings for the new downtown parking deck, City staff, through the capital improvement process, has determined that four buildings have to be demolished. City staff solicited sealed bids from General Contractors, three of which were minority contractors, to provide demolition services. The following seven qualified bids were received:

E. Luke Green Co., Inc.	$184,377
Jones Grading & Fencing, Inc.	$224,000
Cherokee, Inc.	$230,500
Buncombe Const. Co., Inc.	$259,500
Still Enterprise, Inc.	$288,995
Taylor & Murphy Const. Co., Inc.	$327,889
Empire Dismantlement Corp.	$345,670

City staff has reviewed all bids and determined that E. Luke Green Co., Inc., is the lowest bidder. City staff recommends acceptance of the total bid amount of $184,377.

Approved funding is available in the capital improvement project account to pay for the demolition of these four buildings.

City staff recommends City Council authorize the City Manager to enter into an agreement with E. Luke Green Co., Inc., in the amount of $184,377 for the demolition of four

126

structures on the proposed Haywood Street Parking Garage Project with the condition that the City own all the structures prior to authorizing the contract to proceed.

Upon inquiry of Vice-Mayor Bellamy, City Engineer Cathy Ball said that the contractor is responsible for removing the inert debris and they will probably take it to the Buncombe County landfill. Ms. Ball explained that there would be no surface parking where the structures will be demolished. A permanent construction fence will be built, noting that businesses and residents in the area are working with the schools to sponsor a program about the history of downtown Asheville, using plywood, which will be attached to the fence.

Upon inquiry of Councilman Mumpower, Ms. Ball said that the range of the bids are not uncommon for this type of project.

Upon inquiry of Councilman Dunn, Ms. Ball said that construction would start around August 1 and it will take approximately 45 days.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON MINIMUM HOUSING CODE

Director of Building Safety Terry Summey said that this is the consideration of receiving options from staff and the Citizen Task Force teams concerning amending the Minimum Housing Code, and consideration of setting a public hearing on August 12, 2003.

Since July 1994, the City has been aggressively implementing one of the most proactive Housing Codes in the country. During that period over 90% of the rental units in the City are in compliance with the Code. At least 25% of owner occupied units have been inspected for compliance with the Code. The program has been highly successful with minimum City Council or court action. The current Code with its fees, penalties and enforcement tools has resulted in owners and landlords bringing their units into compliance with the Code. Nevertheless, it is the opinion of the Director of Building Safety that the Code should be modified to reduce the burden and expense upon owners and landlords that comply with the code. Consequently, several options have been developed. Options A and B reflect the recommendations of the Housing Code Citizens Task Force groups. Options C and D reflect the recommendations of City staff based upon the issues presented at the worksession on March 18, 2003, informal discussions with all City Council members as well as members of the Housing Code Citizens Task Force group. The informal meetings with City Council members focused on options 1-4.

Four options have been summarized on the a matrix for further consideration by Council:

Option A	Recommendation developed by the Citizen's group interested in a complaint based code, with a mandatory program only for units with major life safety issues
Option B	Recommendation developed by the Citizen's group interested in maintaining a mandatory program with some changes and reductions to the enforcement process
Option C	Staff recommendation with an emphasis on reducing the percentage of rental units inspected
Option D	Staff recommendation to address only life safety issues for owner occupied properties, and reduce the percentage of rental properties inspected

The above options include but are not limited to:

- Editorial and technical changes with an emphasis on reducing costs and having a more flexible Code; these changes will be finalized after Council has decided the type of enforcement program to be used by the City
- Technical changes will include updates to references to the North Carolina State Building Codes and State laws
- Proposed new penalties for units not in compliance
- Changes to the Fees and Charges Manual
- Update and finalization to the inspection forms

City staff recommends that Council consider setting a public hearing on July 22 for a public hearing on August 12, 2003, to consider changes to the Housing Code. Staff recommends that Council first consider changes to how the Code will be enforced, and upon adoption of those changes, that Council then continue the public hearing to a specified date to consider editorial and technical amendments to the Housing Code, and amendments to the Fees and Charges Manual.

After Mr. Summey briefly explained Options A-D and Options 1-4, he responded to various questions/comments from Council, some being, but are not limited to, what is the difference in penalties from the different options; how many structures have been inspected and how many people are still working on bringing them into compliance; what happens if people do not pay the penalties; what percent does a homeowner have to pay to administer the program; ability for abuse by staff who will be looking for noncompliance to pay for their positions; what is the difference of Option A of the Citizen Task Force's recommendation for owner occupied inspections; there is no way the City can guarantee that all life safety issues are addressed; how many complaint calls have been received from people living in substandard housing; where is hard core proof that shows that the Minimum Housing Code is reducing fires; how does Asheville's Code regarding commercial properties compare to other cities; request for background information about third party inspectors and if they are useful; why does it state "not determined" under Options A & B of the fees/penalties; what types of checks and balances does the City use to not get into family feuds regarding complaints; do we currently require names and addresses for complaints; what is the cost to the City of a fire; and are our inspectors licensed to be home inspectors.

Upon inquiry of Councilman Mumpower, Mr. Summey said that Options C and D are staff generated options.

It was the consensus of City Council to have Mr. Summey make a collective recommendation to Council at their August 12, 2003, public hearing, and to reformat the information presented by adding an additional column at the end. Mr. Summey said that he would email the reformatted chart to Council and would also place a hard copy of the chart in Council's mailbox.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the July 22, 2003, formal City Council agenda to set a public hearing on August 12, 2003.

PUBLIC ART BOARD PRESENTATION – PURCHASE OF IDA KOHLMEYER SCULPTURE

Dr. Barbara Cary, Chair of the Public Art Board, explained the history of the Public Art Board and the City's Public Art Policy. She explained how the Board is carrying out its charge. She said that this is the consideration of a resolution approving the purchase of a piece of public art to be installed on City-owned property.

Ms. Barbara Clark, member of the Public Art Board, read an article from USA Today entitled "Arts create economic powerhouse for N.C. City" that talks about public sculptures making Asheville a popular destination. She also briefed Council on information of Ida Kohlmeyer and her works.

Ms. Pam Myers, member of the Public Art Board, said that the Board is requesting City Council approval for the purchase of a piece of art from the Ida Kohlmeyer collection known as "Conversation Piece #4C." As part of the approved Public Art Master Plan, the Public Art Board is given the authority to recommend the purchase of public art pieces for the City of Asheville. Currently, approximately $50,000 is appropriated per the approved ordinance to go towards public art for the City of Asheville. The ordinance requires the Public Art Board to raise half of the funds to be spent on the acquisition of public art. The Kohlmeyer piece will cost $55,000 with 1/3 of the cost being provided by the Kohlmeyer Foundation, approximately $18,000 raised by the Public Art Board through various fund raisers, and the balance coming from the funds already appropriated in the Public Art Board account by the City of Asheville. On June 22, 2003, another fundraiser was held in which an additional $5,800 in donations was received. She said that they are requesting $18,300 from the existing appropriation.

No decision has been reached on where the art piece will be placed. The Public Art Board is requesting City Council approval to proceed with the purchase of the Ida Kohlmeyer piece "Conversation Piece #4C."

Councilman Mumpower expressed concern about the investment in this piece of art. He believes that public art plays an important role in our community and he wouldn't want to do anything to harm the arts or to step beyond the reasonable perimeter regarding public art. However, he believes our public art money should be invested in what the majority of our citizens can embrace with acceptance and understanding and he was not sure that this piece of art accomplishes that goal. He was also concerned that the site has not been determined yet.

Mayor Worley spoke in support of the purchase noting that Asheville has been named as one of the top destinations for art. He thinks the piece will be a part of the uniqueness of Asheville.

Vice-Mayor Bellamy did note that this is a conversation piece and she felt we should try to meet the needs of all our citizens.

When Councilman Dunn asked what exactly the piece was supposed to be, various members explained what the piece meant to them.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At 4:50 p.m., Mayor Worley announced a short break.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on July 22, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Revision to Requirements for Signs

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to revise the requirements for signs.

This code amendment is a general "housekeeping" type amendment intended to add language allowing community identification signs, create sign code allowances for several new zoning districts, and to formalize prior interpretations of the code.

A summary of the Sign Code changes include:

- Adds language relating to approval bodies in first paragraph.
- Codifies community identification sign allowances and standards.
- Adds provisions for Urban Residential District, Urban Village District, and Neighborhood Corridor District.
- Achieves consistency with building code permitting requirements (previous requirement was for 60 day permit validity).

The Planning and Zoning Commission unanimously recommended approval of this code amendment on June 19, 2003 by a vote of 4-0. City staff also recommends approval of the proposed code amendment.

Upon inquiry of Councilman Mumpower, Mr. Shuford explained the different organizations that reviewed the ordinance amendment.

It was the consensus of City Council to place this public hearing on the July 22, 2003, formal City Council agenda.

Provision for Development Standard Bonuses in Residential Districts

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to provide for more flexible application of development standards, including density requirements, in all residential zoning districts.

This code amendment provides for more flexible application of development requirements in all residential zoning districts. Affected districts include: RS-2, RS-4, RS-8, RM-6, RM-8 and RM-16. Under certain circumstances, a conditional use permit process can be used to modify development standards, including increasing density above the maximum permitted in each of these zoning districts, if the applicant successfully demonstrates that the project would exhibit exceptional site and/or structure design that is appropriate to the architectural and/or environmental context of the surrounding neighborhood, and would also achieve one or more of the following City goals:

- Promote the City of Asheville's affordable housing programs by providing housing that is affordable for purchase by people with household income below the area median or for rental by people with household income less than 80% of the area median, and particularly housing that meets the needs of people who have special needs or household income less than 60% of median income.
- Implement an officially-adopted development plan for the area.
- Exhibit exceptional site design that preserves critical environmental features on the site.
- Assist the City of Asheville in meeting critical infrastructure needs, including but not limited to the preservation of open space, the creation of regional stormwater retention facilities, and achieving greater interconnectivity of the street network.
- Effectively incorporate public transit as a primary mode of transportation to and from the development.

On June 19, 2003, the Planning and Zoning Commission unanimously recommended approval of the proposed code amendment by a vote of 4-0. City staff recommends approval of the proposed code amendment as well.

Councilman Peterson initiated discussion surrounding his concern that the protest petition process would be eliminated since the application of this amendment would not be considered a rezoning.

Upon inquiry of Councilman Mumpower, Mr. Shuford said that he has met with Mr. James Judd, who was very involved in the Ross Creek Commons Project, and Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods (CAN), on this amendment. In fact, Mr. Judd provided good suggestions for the code amendment. He was not certain if CAN officially voted on this amendment, but they have been involved in the entire process.

Upon inquiry of Councilman Mumpower, Mr. Shuford said that Council directed him to make a more streamlined developer process with more flexibility with regard to Council's decision-making process. He felt this code amendment accomplished that. To add the protest petition process would require the amendment to be modified substantially.

Upon inquiry of Councilman Peterson, City Attorney Oast said that he would explore the conditional use zoning process which has been approved in Charlotte to see if that might be something City Council would be interested in.

Councilman Ellis felt he could support his amendment as staff is following the direction of City Council to make the UDO streamlined.

Councilman Dunn felt it was time to appoint a Task Force to review the entire UDO. Mr. Shuford said if Council chooses to do that, he would recommend that the review not be undertaken by staff, but a consultant so staff can work on their day to day activities.

Councilwoman Jones felt this would be another good tool for Council to work with.

When Councilman Mumpower suggested he meet with Mr. Shuford to discuss his concerns, Mr. Shuford suggested the public hearing be postponed until August 12, 2003, in order to give him an opportunity to meet with Councilman Mumpower and time for the City Attorney to explore the Charlotte process.

It was the consensus of City Council to continue the public hearing originally scheduled for July 22, 2003, until August 12, 2003.

BOARDS & COMMISSIONS

It was the consensus of City Council to wait until the Clean Air Community Trust Board makes its recommendations for Council to confirm members to the Board.

It was the consensus of City Council to appoint Laura Webb (Webb Insurance Services), Jacqueline Grant (Roberts & Stevens) and Daniel Prevost (Institute of Biltmore) as members to the Economic Development Strategic Plan Implementation Task Force, as recommended by the Task Force members.

It was the consensus of City Council to appoint Brian Kintner and reappoint Tommy Wilson, Ronnie McAbee, Terry Ponder and Harold Garland to the Board of Electrical Examiners.

It was the consensus of City Council to reappoint Frank Thomson and Curtis Walk to the Asheville-Buncombe Historic Resources Commission.

It was the consensus of City Council to reappoint James Fink (regular member) and Scott Fowler (alternate member) and to appoint Sieglinde Anderson (regular member) to the Noise Ordinance Appeals Board. It was also the consensus of City Council to amend the terms of members of the Board from two years to three years, effective immediately.

It was the consensus of City Council to appoint Jennifer Knudtson to the Transit Commission. It was also the consensus of City Council to amend the terms of the members of the Commission from two years to three years, effective December 31, 2003.

It was the consensus of City Council to arrange interviews for a vacancy on the Tree Commission.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:55 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 22, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn

PLEDGE OF ALLEGIANCE

Marine Corp Veteran Danny Roberts led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING AUGUST 12, 2003, AS "WORKPLACE PARTNERSHIP FOR LIFE CELEBRATION DAY"

Mayor Worley read the proclamation proclaiming Tuesday, August 12, 2003, as "Workplace Partnership for Life Celebration Day " in the City of Asheville. He presented the proclamation to Mr. Ed Jenest and Mr. Alan McKenzie who briefed City Council on some activities taking place during the day. They passed out to Council a lapel pin and an organ/tissue donor card.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 8, 2003, AND THE WORKSESSION HELD ON JULY 15, 2003

B. RESOLUTION NO. 03-116 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A UTILITY AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO RELOCATE A WATER LINE IN THE STATE RIGHT-OF-WAY ON US 19-23 AT BRIDGE 123 (SMOKY PARK)

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line in the State right-of-way on US 19-23 at Bridge 123 (Smoky Park).

The Water Resources Department operates a 6-inch water main along 19-23 under the policies of the Regional Water Authority of Asheville, Buncombe and Henderson (RWA), which is owned by the City of Asheville. According to the 1996 Master Plan, this line needs to be upgraded to an 8-inch line. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT and the City staff agreed to relocate the 6-inch water line and upgrade it to an 8-inch main to meet the requirements of the 1996 Master Plan. The NCDOT has estimated the construction cost of this relocation at $32,424.75. An additional $4,875.25 needs to be added to include contingency and inspections, so the total amount that is budgeted is $37,300.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. The lump sum payment $32,424.75 is due within sixty days of invoicing by NCDOT. Funding will be available in the 35 Fund – Water Major Capital Improvements Fund effective July 1, 2003. The Fiscal Year 2003-2004 Transfer to Capital will fund this NCDOT project as well as other NCDOT Projects, Annexation Projects, and Treatment Plant Improvements.

Staff recommends that City Council approve a resolution authorizing the Mayor to execute a Utility Agreement with NCDOT to relocate a water line in the State right-of-way on US 19-23 at Bridge 123 (Smoky Park).

RESOLUTION BOOK NO. 27 – PAGE 447

C. RESOLUTION NO. 03-117 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY BETWEEN COURTLAND AVENUE AND HOUSTON STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located between Courtland and Houston Streets.

The subject property is an RS-8 Residential Single-Family High Density District parcel located on Courtland Avenue and extending south to Houston Street comprising of approximately 3.8 acres (PIN No. 9639.20-91-4343). The Fair Reuse Value for the parcel is $65,600. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development. The property was appraised by Richard L. Smith, SRA, on May 22, 2003, at a value of $65,600.

Flynn Christian Fellowship Home has submitted a bid to purchase the property in the amount of $65,600. The proposal includes a plan to build three two-story buildings on Courtland Avenue for office and residential space along with an additional two story residential structure on Houston Street at an anticipated development cost of $700,000.

Approval of the resolution will establish a minimum price of $65,600 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution authorizing advertisement for upset bids.

RESOLUTION BOOK NO. 27 – PAGE 448

D. RESOLUTION NO. 03-118 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE INSTALLATION OF SIDEWALK ALONG US 19-23/74A

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for the installation of approximately 1,600 linear feet of concrete sidewalk along US 19-23/74A from Asheville School to the newly constructed bridge over the railroad tracks.

NCDOT is currently in the process of replacing a bridge on US 19-23/74A (also know as Smoky Park Highway). This bridge is located in front of Lowe's. As part of this project we have requested that sidewalk be installed along the section of roadway adjacent to the construction.

The agreement will require NCDOT to pay up to $50,000 for the construction of the sidewalk. The City of Asheville will be required to pay any costs above this amount. The City has an additional amount of $10,000 budgeted in this year's budget for this project. While the sidewalk has not been constructed, the cost of the sidewalk is not expected to exceed $60,000.

As part of this agreement the City will be responsible for maintaining the sidewalk which is standard operating procedure for all sidewalks on State maintained roadways.

The consideration of a resolution authorizing the City Manager to sign a municipal agreement with NCDOT for the installation of approximately 1,600 linear feet of concrete sidewalk along US 19-23/74A from Asheville School to the newly constructed bridge over the railroad.

RESOLUTION BOOK NO. 27 – PAGE 449

E. ORDINANCE NO. 3041 - ORDINANCE AMENDING APPENDIX B – SCHEDULE OF CIVIL PENALTIES – ESTABLISHING FIRE CODE VIOLATIONS

Summary: The consideration of an ordinance amending the fire code violations in order to be consistent with the new State Fire Code.

The North Carolina State Building Code Council adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective January 1, 2002. Section C of Appendix B (Schedule of Civil Penalties) establishes Fire Code violations that coordinate with Chapter 6 of the Code of Ordinances, which is the Fire Code for the City of Asheville.

Staff recommends City Council adopt the ordinance amending Section C of Appendix B (fire code violations) of the Code of Ordinances in order to be consistent with the new State Fire Code.

ORDINANCE BOOK NO. 20 – PAGE 385

F. RESOLUTION NO. 03-119 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY BY NON-WARRANTY DEED WHATEVER INTEREST THE CITY MAY HAVE IN A PORTION OF WESTCHESTER DRIVE

Summary: The consideration of a resolution authorizing the Mayor to convey by non-warranty deed whatever interest, if any, the City may have in a portion of Westchester Drive containing residential encroachments.

Westchester Drive is located between Chiles Avenue and Holland Place in the Kenilworth Community. Harry M. Weiss and wife Roberta J. Cole along with Mary Caudill Weiss own the real property located at the corner of Chiles Avenue and Westchester Drive, being 17 Chiles Avenue. Situated on the property at 17 Chiles Avenue is a residential structure with a garage. Approximately 3 ft. of the garage along with a portion of the porch and foundation wall, encroaches onto the right of way of Westchester Drive. It is unclear whether the encroachments existed before or after the right of way of Westchester Drive was established; although the evidence appears to indicate that the dwelling existed prior in time to the designated right of way. Due to future plans for the property, the property owners desire to resolve the encroachment issue as such is a potential cloud on title. City staff has investigated and determined that the encroachment of the garage and possibly the other encroachments have been in existence since 1925. The City has exercised neither dominion nor control of the area of the encroachments and has no interest in exercising such control. To the extent the City has any interest in the area of the encroachments, which the City believes it has no interest, conveying such interest is in the City's best interest.

The Public Works Department recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed conveying whatever interest, if any, the City has in the right of way containing the encroachments as specified above.

RESOLUTION BOOK NO. 27 – PAGE 450

G. RESOLUTION NO. 03-120 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH E. LUKE GREEN CO., INC., TO PROVIDE DEMOLITION SERVICES TO REMOVE FOUR BUILDINGS AT THE HAYWOOD STREET PARKING DECK LOCATION

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with E. Luke Green Co., Inc., in the amount of $184,377 for the demolition of four structures on the proposed Haywood Street Parking Garage Project.

In an effort to remove buildings for the new downtown parking deck, City staff, through the capital improvement process, has determined that four buildings have to be demolished. City staff solicited sealed bids from General Contractors, three of which were minority contractors, to provide demolition services. The following seven qualified bids were received:

E. Luke Green Co., Inc.	$184,377
Jones Grading & Fencing, Inc.	$224,000
Cherokee, Inc.	$230,500
Buncombe Const. Co., Inc.	$259,500
Still Enterprise, Inc.	$288,995
Taylor & Murphy Const. Co., Inc.	$327,889
Empire Dismantlement Corp.	$345,670

City staff has reviewed all bids and determined that E. Luke Green Co., Inc., is the lowest bidder. City staff recommends acceptance of the total bid amount of $184,377.

Approved funding is available in the capital improvement project account to pay for the demolition of these four buildings.

City staff recommends City Council authorize the City Manager to enter into an agreement with E. Luke Green Co., Inc., in the amount of $184,377 for the demolition of four structures on the proposed Haywood Street Parking Garage Project with the condition that the City own all the structures prior to authorizing the contract to proceed.

RESOLUTION BOOK NO. 27 – PAGE 451

H. MOTION SETTING A PUBLIC HEARING ON AUGUST 12, 2003, TO CONSIDER AMENDING THE MINIMUM HOUSING CODE

I. RESOLUTION NO. 03-121 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO A LEASE WITH THE MEN'S GARDEN CLUB OF ASHEVILLE FOR ½ ACRE ON AZALEA ROAD

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease with the Men's Garden Club of Asheville (MGCA) for 1/2 acre of land on Azalea Road.

The 1/2 acre on Azalea Road is a portion of the property acquired by the City of Asheville from John Moyer. The City previously leased the space to the MGCA for one year from November 1, 2001, to October 1, 2002.

The MGCA has offered to enter into a nine (9) year lease for the space where it currently has constructed a greenhouse and appurtenant facilities at a rent of $750.00 per year payable in goods and services. The proposed lease will enable MGCA to continue operating the greenhouse facility in its current location. The lease may be terminated by either party upon 60 days written notice.

The Parks and Recreation Department and Planning & Development Department staff recommend adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 452

J. RESOLUTION NO. 03-122 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE

Summary: This is the consideration of appointing members to the Sustainable Economic Development Implementation Plan Task Force.

There currently exists three vacancies on the Sustainable Economic Development Strategic Plan Implementation Task Force: Bob Roberts, Paula O'Hara and Jean Keen.

The Task Force has presented City Council with the following list of people who have been contacted and who have confirmed their willingness to serve, if asked: Laura Webb (Webb Insurance Services), Jacqueline Grant (Roberts & Stevens), John Mark Stroud (Fast Signs), Daniel Prevost (Institute at Biltmore), David McConville (Black Box Studio) and Peter Alberice (Camille-Alberice Architects).

On July 15, 2003, it was the consensus of City Council to appoint Laura Webb (Webb Insurance Services), Jacqueline Grant (Roberts & Stevens) and Daniel Prevost (Institute at Biltmore) to each serve a two year term, all terms to expire June 30, 2005

RESOLUTION BOOK NO. 27 – PAGE 453

K. RESOLUTION NO. 03-123 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ELECTRICAL EXAMINERS

Summary: This is the consideration of appointing members to the Board of Electrical Examiners.

The terms of Tommy Wilson, Ronnie McAbee, Terry Ponder, Joe Enderle and Harold Garland expired on July 1, 2003.

On July 15, 2003, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Tommy Wilson (electrical contractor), Ronnie McAbee (journeyman electrician), Terry Ponder (utility representative) and Harold Garland (layman) to each serve an additional three-year term. All terms will expire on July 1, 2006, or until their successors have been duly appointed.

In addition, on July 15, 2003, City Council instructed the City Clerk to prepare the proper paperwork to appoint Brian Kintner (licensed engineer) to serve a three year term, term to expire July 1, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 454

L. RESOLUTION NO. 03-124 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: This is the consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

The terms of Frank Thomson and Curtis Walk expired on July 1, 2003.

On July 15, 2003, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Frank Thomson and Curtis Walk to each serve an additional three year term, terms to expire July 1, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 455

M. ORDINANCE NO. 3042 - ORDINANCE LENGTHENING THE TERMS OF THE NOISE ORDINANCE APPEALS BOARD FROM TWO YEARS TO THREE YEARS

Summary: The consideration of an ordinance increasing the length of term for Council appointees to Noise Ordinance Appeals Board from 2 years to 3 years.

In connection with its appointment of new citizen members to the Noise Ordinance Appeals Board, Council requested an amendment to the noise ordinance, increasing the length of the term from two years to three years. This three-year term length is consistent with most other boards and commissions in the City. The ordinance will be effective for the terms of Council's appointments made at this July 22 meeting.

ORDINANCE BOOK NO. 20 – PAGE 386

N. RESOLUTION NO. 03-125 - RESOLUTION APPOINTING MEMBERS TO THE NOISE ORDINANCE APPEALS BOARD

Summary: This is the consideration of appointing members to the Noise Ordinance Appeals Board.

The terms of James Fink (Regular member), Susan Andrew (Regular member) and Scott Fowler (Alternate member) expired on July 1, 2003.

On July 15, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint James Fink (Regular member) and Scott Fowler (Alternate member) to each serve a three year term respectively, terms to expire July 1, 2006, or until their successors have been appointed.

In addition, on July 15, 2003, City Council instructed the City Clerk to prepare the proper paperwork to appoint Sieglinde Anderson (Regular member) to serve a three year term, term to expire July 1, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 456

O. RESOLUTION NO. 03-126 - RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Summary: This is the consideration of appointing a member to the Transit Commission.

Mickey Mahaffey has resigned as a member of the Transit Commission, thus leaving an unexpired term until December 31, 2003.

On July 15, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Jennifer Knudtson to serve the unexpired term of Mr. Mahaffey, term to expire December 31, 2003, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 457

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE DEVELOPMENT STANDARD BONUSES IN RESIDENTIAL DISTRICTS

Vice-Mayor Bellamy moved to continue this public hearing until August 12, 2003, in order to give Councilman Mumpower an opportunity to meet with Planning & Development Director Scott Shuford and time for the City Attorney to explore the Charlotte conditional use zoning process. This motion was seconded by Councilman Ellis and carried unanimously.

B. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE REQUIREMENTS FOR SIGNS

ORDINANCE NO. 3043 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE REQUIREMENTS FOR SIGNS

Mayor Worley opened the public hearing at 5:12 p.m.

Planning Development Services Director Joe Heard said that this is the consideration of an amendment to the Unified Development Ordinance to revise the requirements for signs. This public hearing was advertised on July 11 and 18, 2003.

This code amendment is a general "housekeeping" type amendment intended to add language allowing community identification signs, create sign code allowances for several new zoning districts, and to formalize prior interpretations of the code.

A summary of the Sign Code changes include:

- Adds language relating to approval bodies in first paragraph.
- Codifies community identification sign allowances and standards.
- Adds provisions for Urban Residential District, Urban Village District, and Neighborhood Corridor District.

- Achieves consistency with building code permitting requirements (previous requirement was for 60 day permit validity).

The Planning and Zoning Commission unanimously recommended approval of this code amendment on June 19, 2003 by a vote of 4-0. City staff also recommends approval of the proposed code amendment.

Mr. Heard said that the Coalition of Asheville Neighburhoods and the Council of Independent Business Owners have reviewed this amendment. He said that each group has had an opportunity to comment and amendments have been made accordingly.

Upon inquiry of Councilman Peterson, Mr. Heard explained the procedure of placing a sign in the median.

Mayor Worley closed the public hearing at 5:20 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3043. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 388

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-127 - RESOLUTION AUTHORIZING CITY COUNCIL TO AUTHORIZE THE PUBLIC ART BOARD TO PROCEED WITH THE PURCHASE OF THE IDA KOHLMEYER PIECE TO BE PLACED ON CITY-OWNED PROPERTY

Dr. Barbara Cary, Chair of the Public Art Board, presented a proposal to City Council for the acquisition of a piece of sculpture by an American artist from the south, Ida Kohlmeyer. They are carrying out the charge made to the Board by City Council. That charge includes making recommendations to Council for the acquisition of high quality artwork that reflects Asheville's unique character, that will be visible and accessible to as many residents and visitors as possible, and that will promote Asheville as an arts destination city. The Board is a group made up of local artists, arts educators and other arts professionals. Knowledgeable about public art and mindful of the best interests of the people of Asheville, the Board has selected this artwork. It's a piece created by a distinguished, highly regarded American artist and we believe that it's an artwork that any art savvy American city would be proud to own. The following are some cities that own outdoor Ida Kohlmeyer art sculptures: Two in New Orleans, LA; Charlotte, NC; Mobile, AL; Palm Springs, CA; San Francisco, CA; Santa Fe, NM; Miami, FLA; Hampton, NY; and Chicago, IL. A list of major museums exhibiting Ida Kohlmeyer's work are: Tate Museum, London; New Orleans Museum of Art; Museum of Women in the Arts, Washington, DC; High Museum, Atlanta, GA; National Gallery, Washington, DC; Jewish Museum, NY City; and Metropolitan Museum and the Museum of Modern Art, NY City. The sculpture stands eight feet high on a two-foot display pad. It is constructed of ¼ inch aluminum and finished with a baked on paint like a car finish. It can be maintained in much the same way that you maintain a car finish, with annual waxing, which should protect it from weather and make graffiti easy to remove, if necessary. The expense of maintaining this piece will be minimal. Several sites for the piece have been considered by the Board including the Glenn's Creek Greenway on Weaver Boulevard, a site on Patton Avenue as a gateway sculpture, and in various park systems along the French Broad River. Because the Public Art Board Master Plan includes a provision for neighborhood and gateway art, it may not be placed downtown. Other reasons for a non-downtown site are that downtown is in a state of design flux right now and also that the downtown area is almost approaching art saturation. When installed, it will join the City's other 35 artworks as the only outdoor piece created by a woman.

Upon inquiry of Councilman Peterson, Dr. Cary said that the total cost of the piece is $55,000 and that doesn't include installation. Out of the $55,000, $32,000 has already been raised and $5,000 is yet to be raised by the Board. They are requesting $18,000 from the City, which has already been appropriated for public art. She said that this piece would help further tourism and attractions of Asheville as an art city. She said that the policy is to have the most diverse collection that can be acquired. Asheville has traditional representational pieces and what we wanted to do was to find something that would add some breath to our collection and add some diversity. She said most of our collection is conservative and more traditional and this piece is for people who don't have conservative tastes.

Upon inquiry of Councilwoman Jones, Dr. Cary explained how the board selected this piece. She said various artists made presentations to the Board of their work. The Board talked about the characteristics of the piece they wanted Asheville to acquire. This recommendation is being made after a lot of consideration was given. We wanted to acquire a piece by a woman artist, which was unlike anything else that we had, and a monumental piece. She said this is the first major acquisition that the Art Board has made to Council for art since the City set up the fund in 2000.

Upon inquiry of Councilman Ellis, Dr. Cary said that with outside public art vandalism is an on-going concern and something that can't be ensured against. This piece has a high resistant finish and if it is waxed and maintained, graffiti and those kinds of things are fairly easy to remove. We did research that and talked to people who were familiar with the conservancy of pieces like this.

Upon inquiry of Councilman Ellis, Ms. Pam Myers, member of the Public Art Board, said that Ida Kohlmeyer has passed away and the Foundation she set up continues to exist to safeguard the future of her work. They are placing remaining artworks in museums and with communities throughout the country. As with anything that becomes scarcer over time, the value will continue to increase.

Upon inquiry of Vice-Mayor Bellamy, Parks & Recreation Director Irby Brinson said that his department currently maintains the existing 35 pieces the City has under its ownership, which majority of that being the Urban Trail locations. We maintain those with in-house crews and they know how each piece is required to be maintained. We have a scheduled maintenance for each piece which is generally every 2-3 months and once vandalism or graffiti is seen we remove it that day. The on-going maintenance of this piece is probably less than what we are doing with some of the current Urban Trail pieces. Regarding the installation of this piece, Mr. Brinson said that we will probably have an engineer give us a drawing of what is needed and we will handle it in-house, as we do it all the time.

Upon inquiry of Vice-Mayor Bellamy, Dr. Cary said that they are making this recommendation to Council to broaden the collection. Asheville is an arts destination city. This is a sophisticated piece and for people who know something about art will enjoy.

Mr. Walter Plaue spoke in opposition of the purchase. He suggested the City donate a piece of property for the piece to be located on and the Public Art Board come up with the balance of the funds.

Mr. Fred English, Haw Creek resident, spoke against purchasing the piece in that Asheville already has too much diversity.

Mr. Chad Nesbitt spoke in opposition of the purchase. He felt that money should be allocated to the film business because that will put jobs back in our area.

Mr. Alan Ditmore, Leicester resident, spoke against the purchase and was concerned about the materials of the sculpture.

Mayor Worley said that Councilman Dunn could not be present at this meeting, but asked that he read the following statement on his behalf: "While I realize the value of the arts within our city, and how much it impacts the lives of many people, I feel I must go on record, despite the fact that I am not present for this vote. Public money that we spend on any issue must, in my opinion, look out for the well being and needs of the majority of our citizens. This is especially true in tight economic times. I would not be making these statements if our city found itself in a good financial situation. Art is a very subjective thing. It can bring out emotions in everyone that sees, hears, or feels the thoughts of the artist who create the piece. In this case, it is really not my place to judge the art. Whether I like it or not has nothing to do with my decision. My decision not to support this purchase is based on the fact that our city has not recovered from budget problems that have lead us into two stormy years of trying to get the maximum use of smaller amounts of money. I do not have to remind the Council that we have supported the Arts Council, the Civic Center, Parks and Recreation, and the list goes on and on. All of these ventures support art in one way or another. I also do not have to tell Council that many worthy causes were not supported by this last budget. Help-Mate was one of many that was not funded. But while we could not fund these areas, some members on Council are ready to support taxpayer dollars on a piece of art that is very costly! Sure, $18,000 does not seem like a lot of money, but to those citizens who are burdened by higher taxes and poorer service, this sends a message that their hard earned tax dollars are not being cared for as much as they should be! This piece of art does not reflect our city's or region's personality, culture or history. We have many local artists who can create art for our city in wonderful ways. This money could be kept within our community instead of going to New Orleans. I have serious doubt that a large majority of our citizens will appreciate this purchase. Those fine folks in our community who will appreciate it will be in a small minority. I feel our citizens will find this piece to be divisive in nature and create more conflict than study and reflection. The tax money taken from our citizens needs to be cared for carefully. To say that this purchase meets the needs of our city is 'very doubtful at best.' I had an email from a very hard working citizen who just wanted to know how we can spend this amount of money when her street has not been paved in 40 years? Another call left a message saying she did not want to hear Council crying about not enough funding for basic city services, where there is money available for these kinds of projects. I have to agree with them both. In closing, I do not feel our city is in the position of spending money on projects like these. If the arts community strongly feels this piece needs to come to Asheville, I would suggest they use their money to do so. Place it in a museum for those who will appreciate it and are willing to pay to see it. Let's turn our attention to local artists and allow them to create art for the public's consumption that reflects our region, state and city in a more understandable way! Finally, many citizens are being very careful with any small excess money they have. I feel City Council needs to show the same restraint. When this money was given to the board for art purchases, we were not in such a tough financial constraint. Circumstances change. We need to show that our decisions truthfully reflect situations as they now exist. Buying this piece at this time will send the wrong message to our citizens. Maybe at another time or place this could be appropriate, but tonight is not that time!"

Councilman Mumpower said it was not pleasant to resist folks that we have appointed to help us with this issue. He feels the Board knows what they are doing. Council is required to vote on this project for a number of reasons. One of them is we are charged to be good stewards with our money. He believes we have a responsibility to spend our limited public art money on projects that a reasonable majority of our citizens can embrace. He is concerned that this piece goes to an end of the spectrum that will lose a lot of folks who might otherwise appreciate a public art opportunity. Art should stimulate, but art can also alienate. He believes the Board when they say art is important to the community, but is concerned again that when we go to certain extremes we risk alienating people unnecessarily. We have a large pool of local artists in the community and he would like to see us spend our local money on local efforts. Whatever the vote is, he personally encouraged the Board to reach out to some of the local artists. If this becomes a private effort, he will donate a couple weeks of his City Council take-home pay to the Board. But, when it comes to spending the public's money on this effort, he was afraid that he will be compelled to say no. He thinks it steps a little further than he is personally comfortable with.

Councilwoman Jones said that she would support the purchase of this piece. City Council takes the job of placing people on our boards very seriously and this Council-appointed Board has studied this for three years. She knows this is a lot of money, however, there is buy-in from other sectors and that bodes well that a lot of people in this community do care about this piece and do want to see it here. She feels like putting in 1/3 of the purchase price is fair, particularly since the Board was charged with public art and expanding our collection. She was initially concerned about the artist's reputation, but with additional research she feels a lot better about that, particularly with a list of the other cities that have chosen to display her art. Even though art is not her passion, she does feel like we need to hold all of the citizens' interest and attention. Public art is something that we have charged this Board with and they have done their job. On a personal note, she is excited that we will have an outdoor piece of public art by a woman.

Councilman Ellis thanked the members on the Public Art Board for doing this. There is no question that this is not a conversation piece and the Board has raised the awareness of arts in this community to a level we haven't seen in a long time. He understands that is what the Public Art Board is doing tonight, but many times pubic hearings are held prior to coming to City Council. He used the Civic Center Commission and the Planning & Zoning Commission as examples: (1) The Civic Center Commission has held at least two public hearings regarding the possibility of hockey returning to Asheville and he felt they have done their due diligence in their recommendation to Council; and (2) The Planning & Zoning Commission always has at least one public hearing prior to coming to Council. In his opinion, because this is such a conversation piece in the community, and thus controversial, he would prefer to have a little more due diligence by the Public Art Board. He would like to see a little more effort to bring the community to a buy-in on a piece of this type. He was also concerned about the piece being safe and secure. He suggested the Board come back to Council after more public input on this piece and with a more definite location of it. He does want to support the Board because Council appoints boards to bring recommendations to Council on behalf of the citizens.

Mayor Worley said that he intends to support the acquisition of the piece. This is not about whether he likes or dislikes this particular piece. He recognizes that no matter what piece of public art we might seek to obtain, someone will like it and someone will dislike it. It's about individual tastes. It's not about diverting funds from some of our needs in the City. These funds were set aside for the purchase of public art long ago. It's not about local art vs. out of town art. We have a lot of public art that reflects our heritage. We are a diverse community. He thinks this is really about who we are and what we want to be for all of our citizens. We tend to view issues, like the acquisition of public art in isolation and we forget how they relate to the goals of the entire City. It's easy to say don't spend that money when we do have other needs in other areas. Again, these funds come from monies that have already been set aside. This is $18,000 to apply towards a purchase price of $55,000. This is a bargain in terms of the City's expenditures to acquire it. Our budgets are always tight. No matter what the art or when the occasion, you will have that thrown out as a reason not to purchase it. We have a lot of needs in the community.

First and foremost we need jobs. We are like many communities that have experienced the decline in the manufacturing jobs. We have infrastructure needs. But the question is how do we fulfill those needs. If you think about this in the big picture, we pay for those needs by attracting business to Asheville and by bringing people here. It's a changing climate when it comes to the economy and success in providing jobs. Sense of place becomes critical to our success in bringing companies here. We are in a new economy, a knowledge-based economy, and a technology-based economy that has replaced the traditional manufacturing. We are in an economy where those who control the jobs and those who can bring the jobs can live and work anywhere in the United States. It is that sense of place, along with the other basic infrastructures, such as broadband and things that we have developed, that enable us to be successful. For at least three years, Asheville has been named as one of the top 25 art destinations in the United States. That helps create the sense of place. We are in a wonderful area and art adds to that. When he looks at the acquisition of this art, he looks at it in the context of the big picture. Is this what we need to do to make Asheville successful, not just in the arts, but in all areas of economy in ways that will bring us jobs and ways that will keep our children here? He thinks the answer is yes. We need to maintain our place as one of the top art destinations in the county. He thinks we need to do more things like this that maintain and improve our sense of place. He thinks it's not just the acquisition of art, but an investment in our future.

Vice-Mayor Bellamy said that many years ago Council developed Amboy Road Park. When the idea was before Council it required a lot of money, including grants. She didn't like the idea, but she felt that there were citizens in our community who appreciate open spaces, greenways and parks. Earlier this month we received an award for that Park. Over 75,000 people last year enjoyed that Park. It required a leap of faith from the Council to support that Park in the beginning. Asheville is an arts destination. That is who we are. That is one of the reasons why tourists come to our City. Tourists pay taxes and taxes help pay for streets and sidewalks. City Council is made up of seven individuals who represent nearly 70,000 people. Of that 70,000 people, all of them do not like affordable housing, parks and greenways, or art; however, we have to keep collectively in mind that we can't only support our passions. We must keep in mind all of our citizens. She personally doesn't like the art piece, but it's not for her to decide on who does and doesn't like this art. She will support this acquisition because there are people in the community who believe this art should be here. Also, in her trip to Portland, Oregon, they have an ordinance mandating that every development in their downtown area set 1% aside that must be used for art. They believe it makes a difference in their economy. She doesn't think Asheville needs to go that far but feels we must be supportive of all the citizens in our community.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 03-127. This motion was seconded by Vice-Mayor Bellamy and carried on a 4-2 vote with Councilman Ellis and Councilman Mumpower voting "no".

Mayor Worley said that since Resolution No. 03-127 passed by a 4-2 vote and it involves the expenditure of public funds, it must have a second reading before final adoption. The second reading will be held on August 12, 2003.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that if a Council Member is absent from a meeting entirely, their vote doesn't count one way or the other.

RESOLUTION BOOK NO. 27 – PAGE 458

B. RESOLUTION NO. 03-128 - RESOLUTION MAKING APPLICATION FOR COVERAGE OF RETIREMENT COVERAGE GROUPS OF EMPLOYEES UNDER THE OLD AGE, SURVIVORS, AND DISABILITY INSURANCE PROVISIONS OF TITLE II OF THE FEDERAL SOCIAL SECURITY ACT

Human Resources Director Belinda Odom said that this is the consideration of a resolution approving Social Security Contributions for firefighters providing the referendum outcome on Monday, October 27, 2003, is approved by the majority of voters.

City Council, during the budget process, appropriated funds to cover Social Security Contributions for firefighters, provided firefighters, by majority vote, approve the referendum.

The State Treasurer's Office requires an approved resolution by City Council, an appointed referendum officer, an effective date of coverage, and the date of the referendum prior to the referendum taking place.

Adoption of this resolution will accomplish the following: (1) appoint Belinda Odom, Human Resources Director, as the appointed referendum officer; (2) establish October 27, 2003, as the date of the referendum and the effective date of coverage providing the referendum is approved; and (3) verify that there will be 203 eligible voters in the referendum.

City staff recommends City Council adopt a resolution approving the date of the referendum as October 27, 2003, on the question of mandatory social security contributions/deductions for all firefighters.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-128. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 459

C. CIVIC CENTER MINOR LEAGUE PROPOSALS

Mr. Peter Crosa, Chair of the Civic Center Commission, made the following report to Council:

Recommendation #1 – We recommend that, while hockey is a viable event for the Civic Center, it would be best to wait until the following year (2004/2005) to schedule and host a hockey team.

- Booking hockey at the Civic Center represents 30 potentially profitable events, thus, further reducing the City's contribution to operating the Civic Center.
- It is understood that a hockey team would need six to 10 months to prepare for a successful season.
    a.) Attempting to execute a contract and initiate a Hockey season now (even by August 1, 2003) would only allow two months for a team to:
        - confirm investors,
        - set up offices and staff,
        - recruit players and coaches,
        - schedule games, and
        - sell tickets and sponsorships.

- Postponing a hockey season to October 2004 would allow the team a better choice of dates, thus, a greater chance for success.
- Postponing a hockey season to October 2004 would allow City staff to determine which league represents the best deal for the citizens of Asheville.

Recommendation #2 – We recommend that City staff and Council use this additional time to conduct thorough "due diligence" to determine which league has the greater potential for success and that staff negotiate the best possible contract with that league by November 10, 2003, for the hockey season starting October 2004.

- Due diligence should include:
  a. Adequate review of business plans,
  b. Learning the identity and commitment of investors,
  c. Review the general franchise document to determine investor commitment and liability to the team,
  d. Checking references of league and team owners,
  e. Evaluate management's (or proposed management) experience in sports management, marketing, recruiting, etc.,
  f. Community outreach,
  g. Review performance (financial, outreach, etc.) in cities with existing teams,
  h. Interview facility managers in other cities to determine the advantages and disadvantages of the league's team in that city's facility, and
  i. Establish a weighted evaluation template with the objective of an impartial, numerical representation of the relative value/viability of the teams, prior to beginning the "due diligence" function.

Upon inquiry of Councilman Mumpower, Mr. Crosa said that there has been no official statement by either league that they can put this together in a couple of months, but at least one investor questioned whether it was getting too late in the year to begin a new season.

When Vice-Mayor Bellamy asked about the timeframe for this to come back to City Council, Mr. Crosa said that the Commission and City staff will have a contract negotiated with the chosen league by November 10, 2003, for the hockey season starting October 2004. They will bring their recommendation to the November 18, 2003, City Council worksession with anticipated formal action on November 25, 2003.

Vice-Mayor Bellamy noted that the major reason for delaying a recommendation at this time is because of the timing. Mr. Crosa explained that it's not only the Commission's opinion that it is too late in the season, but the opinion of other experts in the field of sports team management that felt at least 6-10 months would be desirable to prepare for a new team in a given city.

Upon inquiry of Councilman Peterson, Mr. Crosa said that Asheville wants a viable team and to give the team the best possible chance for success. Bringing in a team two months before the season starts is a recipe for trouble. It would be better for the City and the Civic Center to do it right starting off and not just jumping in.

Councilman Ellis thanked the Commission for their hard work at arriving at the best possible solution at this time.

Councilman Peterson said this is a good example of a citizen advisory board reviewing the options and coming up with better suggestions to recommend to Council.

Upon inquiry of Councilman Peterson, Civic Center Director David Pisha said that if hockey were to begin this season, they would only have seven weekend dates. If they start next season, then the NBDL's contract allows for an equitable sharing of dates. As far as finances, there is a sliding rent scale that actually protects the City from a lot of the change-over costs because that is built into the rent. Both leagues have said they would accept that.

When Councilman Peterson asked about the cooling tower, Mr. Pisha said that the cooling tower could not be replaced within two months so delaying the season would give the City an opportunity to study that issue as well. City Manager Westbrook said that the cooling tower is a large dollar cost item and it's one of those long-term issues. We have been repairing the cooling tower part by part, so even though it is an old structure functionally, it is operating. He said he didn't anticipate replacing the cooling tower because it is very expensive, but he would be glad to work with a league if they would be willing to finance it.

Councilman Peterson asked if we have received any information about the NBDL staying in Asheville after their contract runs out at the end of this season. He said that if the timeline for making a decision about a hockey league is this fall, then it would make a big difference whether the NBDL is here or not. He said there seems to be a concern that there are only so many weekend dates and can the City support two teams trying to play at the same time at the same facility and how that affects public skating. Mr. Pisha responded that there will be public skating, with or without hockey. It was the consensus of City Council to have the City Manager contact the NBDL's representative to find out about their future plans.

Councilman Mumpower said that in his discussion with the NBDL's local representative, it was his understanding that they fully intend to stay in Asheville and that they are actually expanding the league into other regions.

Councilman Mumpower said that Mr. Pisha and the Commission have been very careful to make a cautious decision and weight out realities of the facility with the demographics of our community. He appreciated them taking measured, cautious steps that give consideration to the fact that ice is a desired resource in the community, but it's also a very expensive resource and a complex resource and when you are talking about an older facility maintaining it, is it tough.

Mr. Fred English stated that since the Civic Center has never turned a profit since it opened in 1974, it should be closed.

Councilman Ellis spoke strongly in support of the Civic Center. In fact, the subsidy has lost less money almost every year since it opened. He has not been able to find one Civic Center around the country where the building itself makes money. The Civic Center is here to serve the people of this area. The vibrant downtown with all the restaurants is made possible by the Civic Center. He also pointed out that more people have been going through the turnstiles at the Asheville Civic Center since the Greenville Bi-Lo Center opened.

Mr. Chad Nesbitt felt the Civic Center staff should reach out to bring in shows.

Mr. Alan Ditmore felt the role of government is human needs and not luxury activities.

Mr. Walter Plaue felt the City needed to start bringing in more entertainment at the Civic Center.

Mr. Cliff Finegold, Asheville resident, briefed Council on the present situation of hockey. The Atlantic Coast Hockey League (ACHL) has been attempting to negotiate with the City and locate a group of local investors since April of 2003. The success of hockey would hinge on local people being involved in the ownership and promotion. The World Hockey Association 2 has not sought any local ownership support. The ACHL makes good sense for an Asheville team. Travel expenses would be very manageable and rivalries, which promote more attendance, would be possible. He said that Mr. Ron Hansis, from the ACHL wanted him to ask the City Council what steps are necessary to get a commitment from Asheville for the ACHL. He told him as late as last night that the ACHL would still be willing to start this season in Asheville if an equitable lease could be negotiated in the next couple of days. With the limited number of Saturday dates available and the shortness of time between now and the beginning of the season in mid-October this is certainly not ideal, but they are still willing to make every effort to make this a success in Asheville for this coming season. If the lease cannot be worked out as soon as possible, he asked what the City Council would require of the ACHL to get the commitment for next season? Mr. Hansis will come to Asheville for meetings along with League Commissioner Mr. Jim Riggs whenever requested. The ACHL has its mid-winter meetings in January and they would very much like to announce and have representation from Asheville at those meetings. The Civic Center will make money from a hockey lease and concessions, public skating, figure skating clubs, youth hockey and adult recreation league hockey. The City will profit from increased use of downtown parking, taxes from increased usage of downtown restaurants and hotels, and enhancement of the quality of life.

Mr. Dennis Justice felt the NBDL is committed to being in Asheville, but they may want to negotiate their lease. The City has not heard from any league on how they can help address the renovations of the Civic Center,

A Candler resident hoped that the City Council will bring hockey back to Asheville.

Councilman Mumpower moved to instruct City staff and the Civic Center Commission to continue exploration of a tenant relationship with an appropriate hockey league for the 2004-05 season with anticipated resolution of contractual discussions by November 10, 2003. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

D. MOTION SETTING A PUBLIC HEARING ON AUGUST 12, 2003, FOR THE SALE OF DOWNTOWN PROPERTY TO THE GROVE PARK INN

City Attorney Oast said that this is the consideration of adoption of a motion setting a public hearing on August 12, 2003, on the conveyance of City-owned property.

Earlier this year, the City entered into a Downtown Development Agreement with Grove Park Inn for the possible development of two sites for mixed use buildings. Site #1 is a relatively small site (approximately four-tenths acre) located at the southeast corner of the intersection of Market Street and College Street, and is traversed diagonally by Patton Avenue. Site #2 is a larger tract consisting of several acres in several tracts on the south side of City Hall (the parking lot). The agreement provides that the City will consider entering into option agreements with the Grove Park Inn for purchase of the properties, and further provides that Council will have a public hearing on the options as required by law, and that those hearings will occur on or before August 12, 2003. The purpose of this motion is to set the public hearing date for the option as to Site #1.

The option will incorporate the material terms of the Development Agreement, and will include a more precise description of the property, as well as a selling price (which has yet to be determined), and this information will be summarized in the required public notice.

For a variety of reasons, neither the City nor Grove Park Inn are in a position to proceed with the option on Site #2 at this time, but we anticipate doing so soon. An extension of the public hearing date for this option may be required.

City staff recommends City Council setting a public hearing for August 12, 2003, on the conveyance of City-owned property.

City Attorney Oast said that when Council votes on this issue, it would be approving the City entering into an option. That could lead to a sale. Again, Council would be approving the terms of that sale to be incorporated into an option that would be consummated within 3-6 months.

After a brief discussion initiated by Councilman Peterson, it was the consensus of City Council to not vote on the proposed sale to the Grove Park Inn immediately after the August 12, 2003, public hearing to give an opportunity for Council and the public to become more informed. City Clerk Burleson was instructed to note on the August 12, 2003, agenda that it is the intent of City Council to not vote on the item immediately after the hearing.

Vice-Mayor Bellamy pointed out that the public hearing on August 12, 2003, is for Site #1 only and that is for the site east of the Biltmore Building and borders on College Street and Market Street.

Councilman Peterson moved to set a public hearing on August 12, 2003, for the sale of downtown property to the Grove Park Inn. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Upon inquiry of Councilman Peterson about the public hearing for Site #2, City Attorney Oast said that the Grove Park Inn is not interested in moving as fast on Site #2 and they have informally asked of we would postpone that public hearing date. We do not need to do that right now and he will have a better idea soon of when that public hearing might occur.

E. RESOLUTION NO. 03-129 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Tree Commission.

Kasty Latven has resigned as a member of the Tree Commission, thus leaving an unexpired term until December 31, 2005.

On July 15, 2003, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Robert Wieselman and Bill Jones.

It was the unanimous recommendation of Council to appoint Bill Jones to serve the unexpired term of Mr. Latven, term to expire December 31, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 461

VI. OTHER BUSINESS:

Minimum Housing Code Public Hearing

After a brief discussion, it was the consensus of City Council to hold the public hearing on August 12, 2003, and after the hearing to make a determination on whether Council is prepared to vote or not.

Claims

The following claims were received by the City of Asheville during the period of June 13-July 10, 2003: Tara L. Johnson (Transit Services), Miriam Weinstein (Inspections), Amie Paul (Transit Services), Lyna Brigman (Water), Bellsouth (Water), United Producers (Streets), Gary Sergent (Sanitation), McDonalds (Water), Ted Knicely (Water), Robin Williams (Sanitation), Kathy Tweed (Sanitation), Martin K. Anderson (Police) and Mountainbrook Long Term Care (Water).

The following claims were received by the City during the period of July 11-17, 2003: Charlie Tucker Jr. (Water), BellSouth (Water), BellSouth (Water), Adrienne Crowther (Parks & Recreation), Ted Warner – Broadways (Water), Heidi Muelenberg (Water) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. and Mrs. Atkins, owners of a loft at the Sawyer Motor Building located at the corner of Hilliard Avenue and Coxe Avenue, asked for City Council's help in cleaning up the prostitutes and drug dealers in their immediately area. City Council instructed the City Manager to meet with the Atkins' to see what the Asheville Police Department can do to combat these problems.

Mr. Fred English spoke about several different issues ranging from Asheville being too diverse to never receiving any City services in the Haw Creek area.

Mr. Mike Fryer spoke about the high property taxes in the City and felt the City wants to expand, but provide no services. He felt he was picked out specifically for annexation and Council was mislead by City staff.

Mr. Chad Nesbitt spoke about the good quality of work by APAC and Taylor-Murphy on the new 19-23 Connector to Tennessee.

Mr. Dennis Justice felt that City Council needs a smart strategy plan to get money for renovations at the Civic Center. He noted that Ashevilleciviccenter.com has been cyber-squatted and if Ashevilleciviccenter.org isn't reserved by August 21, 2003, he will get it himself and cyber-squat it.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 29, 2003
Shiloh Community Center
121 Shiloh Road

7:09 p.m. – Community Meeting

Present: Mayor Charles Worley, Presiding; Vice-Mayor Terry Bellamy; Councilman Jim Ellis; Councilwoman Diana Hollis Jones; Council Member Dr. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and Deputy City Clerk Phyllis Corns

Absent: Councilman Dr. Joseph C. Dunn; Councilman Brian L. Peterson

The following topics were raised by residents and addressed by City Council and City staff: questions were asked concerning the status of the Police Department's use of the Shiloh Community Center for such items as report writing, etc.; City staff was commended for the effectiveness of the recent community walk in the Shiloh vicinity; a traffic stop was requested for the area near Forest Street and Hendersonville Road, especially due to the Biltmore Forest turn off, which causes confusion for motorists; assistance with parked cars and overgrown shrubbery along Brooklyn Road and White Avenue, and throughout the Shiloh community; problems with trash collection along roadsides, including West Chapel and Brooklyn Road, were addressed; traffic hazards caused by nearby Sweeten Creek Road were raised; concerns about continuing drug activity in the community and its impact on the children and property values was raised; the need for the reestablishment of locally-owned, small businesses within the Shiloh community was raised; a request was made for a three-year summary of the type of assistance that has been offered to persons who have been convicted of drug related crimes, including job training and treatment programs, with the summary to be sent to the Shiloh Residents Association; concerns about speeding on Rock Hill Road and Craven Street were discussed, as well as a request for speed bumps on Caribou Road and near the end of Shiloh Road; the status of the Appledorn project was asked, and whether the traffic impact of the project on the community has been considered; staff was asked about a possible land purchase by Mission-St. Joseph Hospital on Caribou Road and what future plans were for the location; the 2025 Plan was discussed and staff asked how the plan will impact the Shiloh community; a suggestion was made to allow adult volunteers to ride school buses to encourage good behavior and build relationships with the students; the need for more affordable housing in the community was raised; the spirit of cooperation and community concern exhibited during the meeting was commended, as well as Ms. Marilyn Bass' return to the Asheville community in her capacity with Neighborhood Housing Services (NHS); the need for improved street maintenance in Shiloh was requested; Chris Slusher with NHS spoke on future plans for a task force to work in concert with the Shiloh community; Mrs. Bessie Greenlee of the Shiloh community was commended for her efforts in collecting roadside litter.

Mayor Worley adjourned the meeting at 7:55 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 5, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson (arrived at 3:32 p.m.); City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy and Councilman Joseph C. Dunn

CONSENT AGENDA:

Recommendation to Name Creek in West Asheville "Rhododendron Creek"

Summary: The consideration of a resolution to name a creek in West Asheville as Rhododendron Creek.

The Asheville Greenway Commission has identified a potential site for a neighborhood greenway in West Asheville that would connect Vance School, the West Asheville Library, and other locations west of Sand Hill Road with the West Asheville Park. This greenway would provide a safe pedestrian and bike route from the West Asheville community to the French Broad River. The proposed greenway would be along parts of an unnamed creek that runs along Sand Hill Road south of Wachovia Bank on Haywood Road, through the West Asheville Park, crossing Shelburne Road and running into Hominy Creek. In an effort to obtain community support for this greenway, the Greenway Commission sponsored a "Name the Creek Contest." The winner of the contest was announced at West Fest in May and was 12- year old Henry McGuire. Henry has been instrumental in spearheading a clean-up of this creek. Henry's research included a number of interviews with long-time West Asheville residents who remember Rhododendron Park that was located near the confluence of this creek and Hominy Creek at the present day Aston Park Health Center. Henry's recommendation along with the Asheville Greenway Commission is to name this creek Rhododendron Creek in recognition of this former park. The process requires that this recommendation be submitted to City Council and that City Council forward this request to the United States Board of Geographic Names for official recognition and adoption.

The Asheville Parks and Recreation Department and the Asheville Greenway Commission recommends City Council's approval to name an unnamed creek in West Asheville as Rhododendron Creek and requesting that this recommendation be forwarded to the United States Board of Geographic Names for official recognition and adoption.

Interlocal Agreement with Buncombe County for Parking Enforcement

Summary: The consideration of a resolution authorizing the City Manager to sign an Interlocal Agreement with Buncombe County to patrol County parking lots and issue city tickets for illegally parked cars.

Buncombe County has asked the City Of Asheville to patrol their parking lots and issue citations to all vehicles illegally parked. They have passed an ordinance prohibiting parking by all but permitted vehicles.

Enforcement will be carried out by the City of Asheville, using current Parking Enforcement Officers. No additional personnel will be required to carry out this task, and all proceeds from citations will be retained by the City of Asheville. All appeals will go to the Parking Services Division and will be decided on the basis of existing City policies concerning parking citation appeals.

City staff requests that City Council approve the resolution authorizing the City Manager to sign an Interlocal Agreement with Buncombe County to patrol County parking lots and issue city tickets for illegally parked cars.

Kimberly Avenue Paving Project, Phase I

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with APAC Atlantic, Inc. to mill, crack seal and pave Kimberly Avenue between Gracelyn Avenue and Beaverdam Road.

The City is in need of a contractor to repair and pave Kimberly Avenue, Phase 1, from Gracelyn Avenue to Beaverdam Road. This project will include: The milling of 14,000 square yards of existing asphalt, cleaning and crack sealing all longitudinal and transverse joints, adjustment of all utilities to be equal to final pavement level, and repaving of 1,538 tons of heavy duty asphalt mix. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for these construction services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
APAC Atlantic, Inc.		Yes		$107,452.00
Precision Contracting, Inc.	100%	Yes		$121,706.00
Asphalt Unlimited of Asheville, Inc.	100%	Yes		$143,800.00

The Public Works Department staff recommends City Council adopt the resolution to repair the pavement on Kimberly Ave from Beaverdam Road to Gracelyn Avenue.

GIS Grant from the Governor's Crime Commission

Summary: The consideration of a budget amendment, in the amount of $50,000, to accept a grant from the N.C. Dept. of Crime Control and Public Safety for GIS training and software and to enhance the GIS Capabilities Emergency Operations Center.

In January the Asheville Police Department applied for a $50,000 grant from the Governor's Crime Commission (GCC) for GIS training and software, a large plasma PC monitor and a GIS Specified Workstation for the Emergency Operations Center. There was a 25% match requirement of $12,500 for the grant and the remainder, $37,500, came from GCC. The matching funds are available from the Asheville Police Department's Drug Tax Revenue, which are dispersed to the department by the State of North Carolina.

The purpose of the grant was to use the variety of applications of Geographic Information Systems (GIS) to help improve the services provided by public safety officials. The City of Asheville Police Department will use the training and additional software to enhance the capabilities of the Asheville Police Department Crime Analysis Unit. This will improve public safety for the citizens of Asheville by assisting the Police Department in clearing more cases through better identification of suspects and an enhanced capacity to identify crime patterns and trends.

City staff recommends City Council adopt a budget amendment, in the amount of $50,000, to accept a grant from the N.C. Dept. of Crime Control and Public Safety for GIS training and software and to enhance the GIS Capabilities Emergency Operations Center.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PACK SQUARE DESIGN GUIDELINES

Planning & Development Director Scott Shuford said that this is the consideration of a resolution adopting the design guidelines for the Pack Square Renaissance Project. The development of design guidelines for the Pack Square Renaissance project area is a contractual obligation of the Pack Square Conservancy, Inc. in its agreement with the City.

The Pack Square Conservancy (PSC) has prepared design guidelines for City Council approval as required in their contract with the City of Asheville. These guidelines will provide design criteria and requirements for the publicly owned space within the boundary established by this contract. Since the PSC is raising millions of dollars of private funds for improving this critical public space, it is important that it has a definite say in how development within this space occurs. The PSC has held meetings with City staff, stakeholder groups and the public in late July to get input regarding these guidelines. Changes have been made to the guidelines to reflect this input.

The PSC is proposing both general guidelines for the entire area, and specific guidelines for separate development sites. The general guidelines provide direction for composition, ground floors, upper floors and setbacks, building tops, entryways, materials and windows. These guidelines should result in new structures that complement and enhance the surrounding development and the future development of the park. Based on staff review of the draft of the guidelines, we recommend the guidelines be approved. This draft incorporates earlier staff comments that address applicability of the guidelines to particular sites and appropriate height limits for Site A.

City staff recommends City Council approve the guidelines.

Ms. Carol King, Chair of the Downtown Association and member on Pack Square Conservancy Inc., explained to Council that the design guidelines are meant to present an overview of the vision for Pack Square and City-County Plaza. The guidelines outline specific massing guidelines for each site, as developed by the Pack Square Conservancy, in order to provide consistency in façade articulation and special features. She reviewed the design principles for great urban spaces. She said that the Pack Square Conservancy retains authority, as part of these design guidelines, to grant minor variances to these guidelines on a project specific basis. All interpretations of these guidelines by Pack Square Conservancy shall be final. She then reviewed the general guidelines consisting of composition; ground floors; upper floor setbacks and terraces; building tops; entryways and portals; materials; and windows and bays.

Ms. King then briefly reviewed the design guidelines for Sites A and D and the suggested design guidelines for Sites B and C. She also reviewed the sun/shadow study.

Ms. King answered various questions/comments from Council, some being, but are not limited to: what kind of public input was obtained, and why is the Jackson Building the standard regarding height.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ASHEVILLE-BUNCOMBE VISION DIALOGUES

Mr. Joe McGuire invited City Council to participate in the 2003 VISION Community Dialogues and explained that the goal of Asheville-Buncombe VISION Inc. is (1) to encourage discussion among diverse residents in order to promote understanding of how local issues affect different segments of our community and (2) to encourage citizens to collaborate on efforts that benefit the whole community. This year's topic, "How Do We Create the Housing that Matches our Community Needs", will focus on community housing needs.

When Councilwoman Jones suggested using the Government Channel to publicize the meetings, Mr. McGuire said that they have done that in the past and they will try to do it again.

UPDATE ON THE METROPOLITAN PLANNING ORGANIZATION MEMORANDUM OF UNDERSTANDING

City Engineer Cathy Ball said that this is the initial review of Memorandum of Understanding for the French Broad River Metropolitan Planning Organization.

The Metropolitan Planning Organization (MPO) is in the process of expanding to include all of the local governments in Buncombe, Haywood, and Henderson Counties. As a part of the expansion, the MPO must draft a new agreement known as the Memorandum of Understanding (MOU). All of the local governments must sign the agreement in order to participate in the MPO process.

This final draft of the Memorandum of Understanding was approved by the Transportation Advisory Committee on July 17, 2003. The agreement establishes the membership and voting policies for the Transportation Advisory Committee (TAC) and Technical Coordinating Committee (TCC).

The TAC and TCC developed this draft Memorandum over several months. The document is a result of significant negotiation and discussion regarding representation and voting policies. At the end of the negotiation process, the TAC unanimously approved the draft.

The draft Memorandum establishes the membership of the TAC with two representatives for Asheville, two for Buncombe County, two for Haywood County, and two for Henderson County. Each of the other jurisdictions will have one representative. The draft Memorandum also includes a number of provisions to give local governments the ability to make decisions about projects that directly impact their jurisdiction. These provisions would provide for local veto power or weighted voting on certain project decisions.

This draft agreement has been mailed to all eighteen jurisdictions for their review and comment. The N. C. Dept. of Transportation has asked us to complete the expansion process by October 1, 2003. The MPO staff has asked all of the jurisdictions to provide comments on the draft by August 20, 2003. Once all of the comments have been received, staff will coordinate a process to address any concerns, and if necessary, make changes to the document.

If this process proceeds according to schedule, City Council will be asked to formally approve the document sometime during the month of September. Once Council has reviewed the document, please provide staff with any comments, questions, or concerns.

Ms. Ball explained the purpose of the MPO; the MPO expansion; the boundary agreed upon, but would need to be altered to include the Town of Mills River; the current member governments; the new member governments; the major MPO functions; the MOU, and the TAC representation. She then reviewed the weighted voting with an example on how that voting would take place.

Ms. Ball then answered various questions/comments from Council, mostly relating to the weighted voting, membership proxies, TAC membership, and TCC membership.

SETTING A PUBLIC HEARING TO CONSIDER THE JANE HALL LIDDELL BATTLE HOUSE LOCATED AT 288 MACON AVENUE AS A LOCAL HISTORIC LANDMARK

Ms. Stacy Merten, Director of the Historic Resources Commission, said that this is the consideration of setting a public hearing on August 26, 2003, to consider an ordinance designating the Jane Hall Liddell Battle House located at 288 Macon Avenue as a local historic landmark.

The Battle House is located within the Grove Park Neighborhood, at 288 Macon Avenue, approximately 1 mile northeast of its intersection with Charlotte Street, on a 1.76-acre tract of land. The boundaries of the proposed designated property, however, do not include the full tax parcel, but encompass a 1.23-acre parcel. The structure is located between the Grove Park Inn and the Bynum House, on the west side of Macon Avenue. The house stands below the elevation of the street and overlooks the former Asheville Country Club Golf Course, now owned by the Grove Park Inn.

The Battle House was built in 1927-1928 for prominent Asheville resident Mrs. Jane Hyde Hall Liddell Battle, the widow of Dr. Samuel Westray Battle. The house is a highly refined example of the Tudor Revival style and is architecturally unusual in its features as compared to most other housed in Asheville designed in this style. The Battle House is significant for its association with Jane Hall Liddell Battle, landscape designer Earl Summer Draper and prominent New York architect Warringon G. Lawrence. The Battle House is the only known example of Lawrence's work in Asheville.

In 1954 the Battle House was bought by Skyway Broadcasting Company. Skyway owned an AM and FM radio station with the call letters WLOS. On September 18, 1954, WLOS-TV aired the first VHF station in Asheville, channel 13, from their new radio and television studios in the Battle House. Some $200,000 in renovations and new equipment transformed the stately home on into a technological landmark. With VHF transmission from one of the country's highest transmitters atop Mount Pisgah, national and local programming could be enjoyed with a high level of clarity throughout the entire Western North Carolina region. WLOS-TV broadcast from this location until 2000, when it was purchased by the Grove Park Inn Resort and Spa.

The house retains the majority of its original exterior features and detailing with some minor exceptions. The most substantial changes to the building's exterior are the additions on the south side, constructed in 1974 & 1983 to house the WLOS-TV's offices and studio. The large two story additions obscure the original south elevation, but the remainder of the building's appearance was not significantly affected. Other alterations include the replacement of several original windows and doors. Unfortunately little of the original interior survives except for the entrance hall. Additionally, much of the original exterior landscape features have been lost.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes, which is approximately $4,300. Currently the tax appraisal for the property is $1,686,800 with the house alone appraised at $1,510,800 and the land valued at $176,000.

The ordinance designates the Battle House a local historic landmark. The property included in the designation consists of the Battle House and 1.23 acres. The designation

156

includes the exterior of the house, garage and remaining landscape features as described in the report. Also included are the paneled entrance door, interior paneled closet doors, main stair and balustrade, stair hall windows and marble mantel in the former library.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County (HRC). All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Although the State Historic Preservation Office expressed concern that the Battle house may have lost integrity due to the alterations and additions made while WLOS occupied the Building, the HRC found that the use of the building by WLOS as the first VHF station in Asheville was culturally significant in its own right and that the structure continues to convey its significance. The HRC voted unanimously, with two members abstaining, to recommend to the Asheville City Council that the Battle House be designated a local historic landmark. Staff concurs with the recommendation of the HRC for this designation. Additionally, while not related to the historic aspects of the property, the Planning staff recommends the designation to encourage the utilization of the property to help buffer the existing neighborhood from any proposed new development by the Grove Park Inn.

City staff recommends City Council set a public hearing on August 26, 2003, to consider an ordinance designating the Jane Hall Liddell Battle House located at 288 Macon Avenue as a local historic landmark.

Mr. Gerald Green, representing the Grove Park Inn, explained why the Grove Park Inn no longer supports this designation, even though the originally request was by them.

Mr. Bill Wescott, member of the HRC, explained that the HRC discussed the Grove Park Inn's non-support of the designation, but decided they would support the designation.

Discussion by Council surrounded the role of the State Historic Preservation Office in local designations and information received by that organization concerning this landmark designation request.

Mayor Worley asked that pertinent letters and information from the State and the Grove Park Inn be submitted to Council prior to the public hearing on August 26, 2003.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the August 26, 2003, formal City Council agenda.

OTHER BUSINESS:

It was the consensus of City Council to cancel the September 9, 2003, formal City Council meeting due to the Chamber of Commerce's InterCity visit to Providence, Rhode Island.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:55 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 12, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Veteran Brenda Graham led City Council in the Pledge of Allegiance.

AGENDA CHANGES

It was the consensus of City to consider the Unfinished Business item regarding the second reading of purchasing a public art piece after the Consent Agenda.

Due to the items on the agenda, it was the consensus of Council to meet until 10:30 p.m. and at that time determine whether or not to continue the remaining items on the agenda to another date.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 22, 2003; THE COMMUNITY MEETING HELD ON JULY 29, 2003; AND THE WORKSESSION HELD ON AUGUST 5, 2003**

B. **RESOLUTION NO. 03-130 - RESOLUTION NAMING CREEK IN WEST ASHEVILLE "RHODODENDRON CREEK" AND REQUESTING THIS RECOMMENDATION BE FORWARDED TO THE U.S. BOARD OF GEOGRAPHIC NAMES FOR OFFICIAL RECOGNITION AND ADOPTION**

Summary: The consideration of a resolution to name a creek in West Asheville as Rhododendron Creek.

The Asheville Greenway Commission has identified a potential site for a neighborhood greenway in West Asheville that would connect Vance School, the West Asheville Library, and other locations west of Sand Hill Road with the West Asheville Park. This greenway would provide a safe pedestrian and bike route from the West Asheville community to the French Broad River. The proposed greenway would be along parts of an unnamed creek that runs along Sand Hill Road south of Wachovia Bank on Haywood Road, through the West Asheville Park, crossing Shelburne Road and running into Hominy Creek. In an effort to obtain community support for this greenway, the Greenway Commission sponsored a "Name the Creek Contest." The winner of the contest was announced at West Fest in May and was 12- year old Henry McGuire. Henry has been instrumental in spearheading a clean-up of this creek. Henry's research included a number of interviews with long-time West Asheville residents who remember Rhododendron Park that was located near the confluence of this creek and Hominy Creek at the present day Aston Park Health Center. Henry's recommendation along with the Asheville Greenway Commission is to name this creek Rhododendron Creek in recognition of this former park. The process requires that this recommendation be submitted to City Council and that City Council forward this request to the United States Board of Geographic Names for official recognition and adoption.

The Asheville Parks and Recreation Department and the Asheville Greenway Commission recommends City Council's approval to name an unnamed creek in West Asheville as Rhododendron Creek and requesting that this recommendation be forwarded to the United States Board of Geographic Names for official recognition and adoption.

RESOLUTION BOOK NO. 27 – PAGE 462

C. RESOLUTION NO. 03-131 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY TO PATROL COUNTY PARKING LOTS AND ISSUE CITY TICKETS FOR ILLEGALLY PARKED CARS

Summary: The consideration of a resolution authorizing the City Manager to sign an Interlocal Agreement with Buncombe County to patrol County parking lots and issue city tickets for illegally parked cars.

Buncombe County has asked the City Of Asheville to patrol their parking lots and issue citations to all vehicles illegally parked. They have passed an ordinance prohibiting parking by all but permitted vehicles.

Enforcement will be carried out by the City of Asheville, using current Parking Enforcement Officers. No additional personnel will be required to carry out this task, and all proceeds from citations will be retained by the City of Asheville. All appeals will go to the Parking Services Division and will be decided on the basis of existing City policies concerning parking citation appeals.

City staff requests that City Council approve the resolution authorizing the City Manager to sign an Interlocal Agreement with Buncombe County to patrol County parking lots and issue city tickets for illegally parked cars.

RESOLUTION BOOK NO. 27 – PAGE 463

D. RESOLUTION NO. 03-132 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH APAC ATLANTIC INC. FOR THE KIMBERLY AVENUE PAVING PROJECT, PHASE I

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with APAC Atlantic, Inc. to mill, crack seal and pave Kimberly Avenue between Gracelyn Avenue and Beaverdam Road.

The City is in need of a contractor to repair and pave Kimberly Avenue, Phase 1, from Gracelyn Avenue to Beaverdam Road. This project will include: The milling of 14,000 square yards of existing asphalt, cleaning and crack sealing all longitudinal and transverse joints, adjustment of all utilities to be equal to final pavement level, and repaving of 1,538 tons of heavy duty asphalt mix. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for these construction services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
APAC Atlantic, Inc.		Yes		$107,452.00
Precision Contracting, Inc.	100%	Yes		$121,706.00
Asphalt Unlimited of Asheville, Inc.	100%	Yes		$143,800.00

The Public Works Department staff recommends City Council adopt the resolution to repair the pavement on Kimberly Ave from Beaverdam Road to Gracelyn Avenue.

RESOLUTION BOOK NO. 27 – PAGE 464

E. ORDINANCE NO. 3044 - BUDGET AMENDMENT FROM N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR GIS SOFTWARE AND TRAINING

Summary: The consideration of a budget amendment, in the amount of $50,000, to accept a grant from the N.C. Dept. of Crime Control and Public Safety for GIS training and software and to enhance the GIS Capabilities Emergency Operations Center.

In January the Asheville Police Department applied for a $50,000 grant from the Governor's Crime Commission (GCC) for GIS training and software, a large plasma PC monitor and a GIS Specified Workstation for the Emergency Operations Center. There was a 25% match requirement of $12,500 for the grant and the remainder, $37,500, came from GCC. The matching funds are available from the Asheville Police Department's Drug Tax Revenue, which are dispersed to the department by the State of North Carolina.

The purpose of the grant was to use the variety of applications of Geographic Information Systems (GIS) to help improve the services provided by public safety officials. The City of Asheville Police Department will use the training and additional software to enhance the capabilities of the Asheville Police Department Crime Analysis Unit. This will improve public safety for the citizens of Asheville by assisting the Police Department in clearing more cases through better identification of suspects and an enhanced capacity to identify crime patterns and trends.

City staff recommends City Council adopt a budget amendment, in the amount of $50,000, to accept a grant from the N.C. Dept. of Crime Control and Public Safety for GIS training and software and to enhance the GIS Capabilities Emergency Operations Center.

ORDINANCE BOOK NO. 20 – PAGE 393

F. RESOLUTION NO. 03-133 - RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Summary: Mr. James Grant has resigned from the Civic Center Commission, thus leaving an unexpired term until June 30, 2004.

On June 24, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint John Broadbooks to serve the unexpired term of Mr. Grant, term to expire June 30, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 20 – PAGE 465

G. RESOLUTION NO. 03-134 - RESOLUTION MODIFYING THE SCHEDULED 2003 CITY COUNCIL MEETINGS IN ORDER TO CANCEL THE SEPTEMBER 9, 2003, FORMAL MEETING

RESOLUTION BOOK NO. 20 – PAGE 466

H. RESOLUTION NO. 03-135 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY BETWEEN COURTLAND AVENUE AND HOUSTON STREET TO FLYNN CHRISTIAN FELLOWSHIP HOME

Summary: The consideration of a resolution authorizing the Mayor to convey property located between Courtland Avenue and Houston Street to Flynn Christian Fellowship Home for the amount of $65,600.

The subject property is an RS-8 Residential Single-Family High Density District parcel located on Courtland Avenue and extending south to Houston Street comprising of approximately 3.8 acres (PIN No. 9639.20-91-4343). The Fair Reuse Value for the parcel is $65,600. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development. The property was appraised by Richard L. Smith, SRA, on May 22, 2003, at a value of $65,600.

Flynn Christian Fellowship Home has submitted a bid to purchase the property in the amount of $65,600. The proposal includes a plan to build three two-story buildings on Courtland Avenue for office and residential space along with an additional two story residential structure on Houston Street at an anticipated development cost of $700,000.

On July 22, 2003, the City Council directed the City Clerk to advertise for upset bids on the subject property. The advertisement ran in the Asheville Citizen-Times on July 25, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Flynn Christian Fellowship Home in the amount of $65,600 was not upset and the sale to Flynn Christian Fellowship Home should be approved.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey property to Flynn Christian Fellowship Home in the amount of $65,600.

RESOLUTION BOOK NO. 27 – PAGE 467

I. RESOLUTION NO. 03-136 - RESOLUTION SETTING A PUBLIC HEARING ON AUGUST 26, 2003, FOR THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS CEDAR HILL ROAD AREA

Summary: The consideration of a resolution fixing the date of a public hearing on August 26, 2003, on the question of the voluntary annexation of property located east of Pisgah View Road and identified as the Cedar Hill Road Area.

The applicant, Lynda Rerych, has submitted an annexation petition for the Cedar Hill Road Area, which is located on the eastern side of Pisgah View Road near the intersection of

Pisgah View Road and Cedar Hill Road. This area is contiguous to the existing corporate limits, being bordered to the south by the city.

The area proposed for annexation consists of 5.326 acres and is currently undeveloped. This area is within the extraterritorial jurisdiction and currently zoned RM-8 Residential Multi-Family Medium Density District.

City services for the area will begin on the effective date of annexation, which the applicant has requested be six months from approval date of the petition, or February 26, 2004.

City staff recommends City Council adopt a resolution fixing the date of a public hearing on August 26, 2003 on the question of the voluntary annexation of property located east of Pisgah View Road and identified as the Cedar Hill Road Area.

RESOLUTION BOOK NO. 27 – PAGE 468

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. UNFINISHED BUSINESS:

A. SECOND READING OF RESOLUTION NO. 03-127 – RESOLUTION AUTHORIZING THE PUBLIC ART BOARD TO PROCEED WITH THE PURCHASE OF THE IDA KOHLMEYER PIECE

Mayor Worley announced that the first reading of Resolution No. 03-127 was held on July 22, 2003. Since the resolution passed by a 4-2 vote and it involves the expenditure of public funds, it must have a second reading before final adoption.

Vice-Mayor Bellamy moved for the final adoption of Resolution No. 03-127. This motion was seconded by Councilman Peterson and carried on a 4-3 vote with Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 27 – PAGE 458

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AMENDING THE MINIMUM HOUSING CODE

Mayor Worley opened the public hearing at 5:17 p.m.

Director of Building Safety Terry Summey said that he is recommending that all residential rental buildings (except new structures built since 7/1/94) receive a Housing Certificate under the standards of the Minimum Housing Code and thereafter, be enforced pursuant to a complaint based program. In addition, that owner occupied residential properties be inspected pursuant to a complaint-based program. This public hearing was advertised on August 1 and 8, 2003.

Since adoption of the 1994 mandatory inspection program, housing conditions in the City have substantially improved. The program is almost 10 years old and to a large degree has accomplished the intended goal of providing decent and safe rental properties, as well as mandating improvements to owner occupied properties at the time of sale. While there continues to be those who escape the mandatory inspection program for various reasons, thousands of landlords and owners have complied with the Code. It is the opinion of the Director of Building Safety, that the Code should be modified to reduce the burden and expense upon those who have complied with the code. Any future efforts to improve housing conditions in the City should be focused on those rental properties not in compliance with the Code and/or dwellings that physically impact neighborhoods.

Owner Occupied Dwellings: In 1994, the General Assembly enacted N. C. Gen. Stat. sec. 143-151.46, which established a Home Inspector Licensure Board. This law provides a program to license and regulate the activities of those engaging in the profession of conducting home inspections. In 1996, the N.C. General Assembly enacted Chapter 47E, Residential Property Disclosure Act, which in part, requires, with some exceptions, Owners of residential properties to provide to the Buyer a disclosure statement regarding the conditions of the property. With the disclosure statement, and the right of the Buyer to obtain a home inspection, the need for stringent regulation by the City is reduced.

Rental Dwellings: Staff believes that the current inspection program is one of the most successful programs in the United States. The program has resulted in approximately 90% of the rental units being brought into compliance with the Code. For landlords who have complied with the Code, there is tremendous incentive for them to maintain them due to the increased marketability of their properties and the right of the tenant to lodge a complaint for their failure to do so. Therefore, staff time could be better utilized if the focus is upon rental properties not in compliance with the Code, and ensuring through a complaint based system that properties continue to maintain compliance.

The above recommendations include but are not limited to:

- Editorial and technical changes with an emphasis on reducing costs and having a Code focused upon complaints lodged by those in a position to know, the tenant; technical changes to include updates to references to the North Carolina State Building Codes and State laws
- Changes to the Fees and Charges Manual; propose dealing with noncompliance by increasing the penalties
- Update and finalization to the inspection forms

It is recommended that the Housing Code be amended to mandate that all residential rental buildings have at least one inspection to ensure compliance with the City's Housing Code. For those residential rental buildings that obtained the required housing certificates in accordance with the Code, no further inspections shall be required. For those that did not obtain the required inspections and receive a housing certificate, that such buildings remain subject to a one-time mandatory inspection program. For those residential rental buildings constructed as of July 1, 1994 or thereafter, that such properties be inspected pursuant to a complaint based enforcement program. Owner occupied properties are recommended to be inspected pursuant to a complaint based program. Council should consider changes to how the Code will be enforced and upon adoption of those changes, that Council then continue the public hearing to September 23 to consider editorial and technical amendments to the Housing Code, and amendments to the Fees and Charges Manual.

Mr. Summey reviewed with Council the Housing Code enforcement options, noting the current code and the Citizen Task Force recommendations. He summarized by saying that the current Code has been successful with updating the housing stock in the City. Since the 1994 implementation of the Code, state laws have been passed for Licensing Home Inspectors, and providing for a Disclosure Statement by sellers. He therefore recommended Option #3 – (1) each rental building completing one cycle of inspections since 1994, and receiving a Housing Certificate, moves the building into a complaint based program; (2) annexed properties would follow a program of inspecting 20% of the units/building within 5 years; (3) owner occupied properties on a complaint based program; and (4) new residential properties built since 7/1/94 will be a complaint based program.

Mr. Summey and Assistant City Attorney Martha McGlohon answered various questions and comments from Council, some being, but are not limited to: what are the questions in Options A and B that renders those options not to be considered by City Council at this time; is the Building Inspections Department fully staffed to handle the current Code system enforcement; can the City guarantee that a home is completely safe after an inspection; what is the current process of a structure being inspected but it's not in compliance; how does the City characterize "lost and found" units; of a city Asheville's size, what is the percentage of rentals yet to be discovered; what are the tools the City has with enforcement of the Code; what is the penalty range; what are some of the changes to the life safety issues City staff would suggest; how was this recommended Code change developed; was Asheville's housing stock compared with other cities; will a complaint based system, strongly enforced, maintain our current housing; why does the data show that other cities in North Carolina which don't have a code have seen a reduction in fires; how many landlords are there in Asheville; what is the state law regarding complaints; how does the Building Inspections Department follow-up on complaints received; does a person need to supply their name for a complaint to be investigated; is the name of the complainant confidential; is disclosure of a complainant optional; is there a written policy on how complaints are investigated; does the Code Enforcement Officer have the discretion to follow up on a complaint or not; is there anything in State law to prohibit City Council from requiring all complaints to be investigated; how much does it cost to demolish a structure; what is the volume of complaint calls; has the number of complaint calls decreased since adoption of the existing mandatory code; how many cities in North Carolina have this type of existing mandatory enforcement; what does staff feel are items on inspection checklist that are cosmetic in nature; how is lead-based paint and radon handled; does the City do all re-inspections; and how does the third-party inspector program work.

Councilman Ellis suggested a compromise on owner-occupied residential properties. He suggested staff identify 17 life safety issues (with citizen input) and then when the property changes ownership, there be one mandatory inspection, which would be limited to the 17 life safety standards.

Councilwoman Jones' biggest concern is with the rental properties being complaint based. With rental properties being complaint based, we expect the landlords in Asheville to keep their properties in good condition. But, what has made a difference in our successful existing Code enforcement has been the water turn-on policy and the penalties. That is how we have gotten people to come into compliance.

There was a lot of Council discussion about the pros and cons of having a complaint-based program for rental properties.

At 7:33 p.m., Mayor Worley announced a short recess.

At 8:05 p.m., Vice-Mayor Bellamy moved to continue the remaining three items on Council's agenda to Tuesday, August 19, 2003, at 3:30 p.m., in the Council Chamber of the City Hall Building due to the length of the public hearing on the Minimum Housing Code. Those items being: (1) Public hearing to consider entering into an option to convey certain City-owned property in the Central Business District to the Grove Park Inn for a mixed use development project; (2) Public hearing relative to amending the Unified Development Ordinance to provide development standard bonuses in residential districts; and (3) Resolution approving the Pack Square design guidelines. This motion was seconded by Councilwoman Jones and carried unanimously.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities, but speaking on behalf of the Affordable Housing Coalition of Asheville and Buncombe County, supported Compromise B from the Citizen Task Force, which is mandatory inspections. He felt Compromise B would reduce the frequency and number of required inspections, but would not seriously impact safety. He explained the pros of Compromise B for homeowners and rentals. A complaint-based system depends on the competence, diligence, honest and goodwill of the landlord. In cases where that is missing or when a competent landlord falls down on the job, then the enforcement falls back to the tenant, which depends on the tenant having both the knowledge and courage to ask for safety and if necessary to stand up and insist safety. If that enforcement depends on the tenant having both the technical knowledge and courage to make a complaint, he feels that a dangerously small percentage of the hazards in rental homes and apartments will be corrected.

The following individuals spoke in support of keeping the existing mandatory Code for several reasons, some being, but are not limited to: the preservation of the local housing code is in the best interest of the City's residents; keep mandatory inspections of rental homes for the safety of the families who will live there as well as for the sake of housing stock preservation in the City; tenants who are young, old or inexperienced in housing maintenance and safety maybe unlikely or unable to recognize potential safety hazards; tenants cannot report in a complaint-driven system something they do not recognize as a hazard but Code inspections can catch such situations; tenants fear retaliation by landlords; people complain when they move because that is when they feel safe to complain; people with fixed or low income will pay financially for problems because furnaces are not running properly or broken windows are allowing cold air into their homes; health risks increase; people will not willingly have their homes inspected; the system works now and to change it would be moving backwards; mandatory inspections is the best way to preserve the housing stock in Asheville; if the Code is not mandatory, all leases for rental properties should have an attachment about the Housing code and the way to make complaints; our existing Code has been envied across the state; people will be living in substandard housing because the City did not require an inspection; keep mandatory inspections on rentals, but delete them from owner-occupied residences; and the current Code requires people to maintain their homes:

Ms. Nelda Holder, President of the League of Women Voters of Asheville-Buncombe County
Mr. Joe Scarborough, member of the N. C. Electrical Contractors Association
Ms. Pat Farmer, resident at Vanderbilt Apartments
Mr. Bill Whalen, staff attorney with Pisgah Legal Services
Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods
Ms. Pauline Council, resident in Willow Ridge Apartments
Ms. Leni Sitnick, Asheville resident
Mr. Fred English, Haw Creek resident
Ms. Robin Merrill, attorney with Pisgah Legal Services
Mr. Grant Millin, Oteen resident
Ms. Joyce Peek, tenant
Ms. Beth Trigg, Asheville resident
Ms. Minnie Jones, Asheville resident
Ms. Lottie Myers, West Asheville resident
Recent Asheville resident
Ms. Geraldine Melendez, Homeownership Educator at the Affordable Housing Coalition
Ms. Rebecca Campbell, Weaverville resident

Ms. Robin Jacobs, Co-President of the Young Lawyers Division of the 28th Judicial District Bar
Ms. Beth Maczka, Asheville resident
Ms. Elizabeth Bocklet, West Asheville resident
Mr. James Davis, third-party inspector
Mr. Tony Sayer
Mr. Dudley Wilson, Kenilworth resident
Mr. Goldwag, West Asheville resident
An employee with the Affordable Housing Coalition
Mr. Jim Barrett, Asheville resident
Mr. Christopher Slusher, North Asheville resident

The following individuals spoke in support of (1) all residential rental buildings (except new structures built since 7/1/94) receive a Housing Certificate under the standards of the Minimum Housing Code and thereafter, be enforced pursuant to a complaint based program; and (2) that owner occupied residential properties be inspected pursuant to a complaint based program, for several reasons, some being, but are not limited to: fires have declined everywhere - not just in Asheville because of the mandatory Housing Code; there are severe penalties for retaliation by landlords; there is duplication because there is state law that affects buyers and sellers and laws that affect the rights of tenants; there are multiple City inspections already; suggestion of grace period of approximately 12 months from date of implementation so everyone can make corrections and get their Certificate of Compliance without penalty; one of the reasons people are getting out of the rental business is because of the Certificate of Occupancy process; landlords will not let their property run down because they will want to keep their tenants and get more rent from the apartment; the City needs to put their attention to the problem areas and not require re-inspection of properties that are okay; inspections add to the cost of housing; there is a problem with the current Code enforcement; and we are adding burdens on the people that can help with affordable housing by requiring duplication of inspections:

Mr. Steven Duncan, member of the Housing Task Force
Ms. Judy Carver, member of the Housing Task Force
Mr. John Carroll, Vice-President of the Council of Independent Business Owners
Mr. Tom Wilson, North Asheville resident
Mr. Ed Siler, resident on Cisco Road
Mr. Curt Booth, President of the Asheville Board of Realtors
Mr. Bill Goacher, member of the Housing Task Force
Mr. George Morosoni, property manager
Mr. Mike Summey, property manager
Mr. Colin Robertson, member of the Housing Task Force
Mr. Bill Stamey, member of the Housing Task Force
Ms. Julie Brant, property manager
Ms. Helen Morrison, West Asheville resident
Mr. Ben Holloway
Mr. Alan Ditmore, Leicester resident
Mr. Walter Plaue

Mayor Worley closed the public hearing on the enforcement issues at 10:40 p.m. The issues regarding technical and editorial changes to the Minimum Housing Code will remain open and be continued to September 23, 2003.

At 10:40 p.m., Mayor Worley announced a short recess.

Councilman Ellis moved to adopt staff's recommendation to inspect residential rental buildings one time and then go to a complaint based program; that owner occupied properties be subjected to a one-time mandatory inspection upon property transfer for life safety issues only (said issues to be developed by City staff with citizen input) and thereafter be enforced pursuant to a complaint based program. This motion was seconded by Councilman Dunn.

Councilman Peterson moved to amend Councilman Ellis' motion so that rental properties continued to be subjected to a mandatory inspection program; that multi-family that complies with verifiable maintenance program have only 10% of units/buildings inspected, and that the tenant sampling be reduced to 20% of units/buildings. He said that he would not amend Councilman Ellis' original motion regarding owner occupied properties.

Upon inquiry of Vice-Mayor Bellamy, Councilman Peterson said that the mandatory inspection for rental properties would be on the current inspection schedule. She then asked if Councilman Peterson would include in his amendment that all rental properties built since July 1, 1994, be exempt from the mandatory schedule for 15 years. Councilman Peterson agreed to include that amendment to his motion.

Vice-Mayor Bellamy then seconded Councilman Peterson's amended motion.

Councilman Peterson said that the 1990 Census showed 1/3 of the City's housing stock was substandard and the existing Code worked to address that. If Council abolishes mandatory inspections, he feels that after the next census in 2010, we will start seeing those same sorts of numbers again.

Councilwoman Jones spoke on how she supported the amended motion in that she felt it is a true compromise.

The amendment to the original motion was voted on and failed on a 4-3 vote with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

Vice-Mayor Bellamy said that she could not support the original motion. She would be interested in hearing what the staff will be doing to educate the citizens of their rights, landlord responsibilities, etc. She understands that the existing Code wasn't the only thing that changed our community, but the Code did help change the mind-set of the individuals in our community to make them responsible for their property. She feels the staff recommended motion gives away too much.

Councilman Peterson felt Council is gutting the Housing Code to serve the financial self-interest of a small group of people.

Councilman Ellis feels what the City has done in the past ten years has made great strides in bring our housing stock up. He feels we are wasting our resources in inspecting million dollar houses and he wants the City to concentrate on the areas were there are problems. He pledges to try to come up with additional resources to do even more for the areas where we have problems. Let's spend our money to help people that need help.

Councilman Dunn feels that inspections are subjective, they cost a lot of money, and there is no way inspections can guarantee that a home is safe. He feels that the existing Code is a heavy hand on people and it does hurt the affordable housing stock.

Councilwoman Jones explained how there are some real fundamental inconsistencies with this Council and all of Council needs to be held accountable. She was curious to see in next year if more affordable housing will come to Asheville since we already have the 10 years of proof of what the Code has done for the quality of housing now.

Councilman Mumpower said that he doesn't pander to special interests on either side of the fence. He does try to listen to people and weigh out the facts and try to make an informed decision. The laws and the safety net has changed since this ordinance was adopted. If it turns out that is not true and some of the fears are realized then he feels this Council has the courage to fix it. We are trying to balance safe, affordable and available housing. He doesn't think that balance can be reached with extremes either way. He feels we are not walking away from people who are shy, have trouble in raising complaints, have disabilities, or are less capable than others. What we are trying to do is share the load between property owners, tenants, government and a free society. In the next phase of the public hearing he will be serious about enforcement – fair, consistent, and enthusiastic enforcement.

Mayor Worley was on the Council in 1993 when the existing Minimum Housing Code was adopted. He recalled adopting this because the old Code was not effective because it wasn't enforced and there was no awareness of the problems of the rights that tenants had under the old complaint driven system. The current Code has certainly raised that awareness and it has succeeded in bringing our housing stock up to good shape. He believed that it is worth trying the recommendation from staff after the process they have gone through. Even if a tenant is reluctant to complaint until they leave the property, the average turnover is 1-1.5 years so a complaint will trigger an inspection in that process perhaps even quicker than it might otherwise. He wants to be certain that we put steps in to educate our tenants and to encourage complaints and perhaps even requiring some sort of notice be given to each tenant of their rights under the Minimum Housing Code.

The original motion made by Councilman Ellis and seconded by Councilman Dunn carried on a 4-3 vote, with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

Councilman Ellis moved to continue the public hearing on the Minimum Housing Code's technical and editorial changes until September 23, 2003. This motion was seconded by Councilman Dunn and carried unanimously.

At 11:23 p.m., Mayor Worley recessed this meeting unit 3:30 p.m. on Tuesday, August 19, 2003, in the Council Chamber of the City Hall Building, Asheville, N.C.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 19, 2003 - 3:00 p.m.
1st Floor North Conference Room – City Hall

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

New Street Name Approval – Trellis Circle

Summary: The consideration of a resolution accepting the new proposed street name "Trellis Circle."

The City of Asheville's Community Development Division, owner of lots in Brotherton Commons off of Virginia Avenue, has petitioned the City of Asheville to accept the street name " Trellis Circle." The new street will begin at Virginia Avenue and end at Brotherton Avenue.

City staff recommends adoption of the resolution accepting the new street name of "Trellis Circle."

New Street Name Approvals – Strawbridge Court and Lovely Lane

Summary: The consideration of a resolution accepting the new proposed street names of "Strawbridge Court" and "Lovely Lane."

The Givens Estates United Methodist Retirement Community, owner of lots in Givens Estates off of Sweeten Creek Road and Wesley Branch Drive, have petitioned the City of Asheville to accept the street names of "Strawbridge Court" and "Lovely Lane."

The new street Strawbridge Court will begin at Wesley Branch Drive and end at Lovely Lane.

The new street Lovely Lane will begin a Wesley Branch Drive and end at the cul-de-sac on Lovely Lane.

City staff recommends adoption of the resolution accepting the new proposed street names of "Strawbridge Court" and "Lovely Lane."

New Street Name Approval – Prarie Path

Summary: The consideration of a resolution accepting the new proposed street name of "Prarie Path."

Mayfair Partners LLC, owners of lots off of Dillingham Road, have petitioned the City of Asheville to accept the street name " Prarie Path." The new street will begin at Dillingham Road and end on Prarie Path.

City staff recommends adoption of the resolution accepting the new proposed street name of "Prarie Path."

New Street Name Approval – Restaurant Court

Summary: The consideration of a resolution accepting the new proposed street name "Restaurant Court."

Pinnacle Properties, LLC, owners of lots off of Tunnel Road, have petitioned the City of Asheville to accept the street name " Restaurant Court." The new street will begin at Tunnel Road and end on Restaurant Court.

City staff recommends adoption of the resolution accepting the new proposed street name of "Restaurant Court."

New Street Name Approval –Catalina Court

Summary: The consideration of a resolution accepting the new proposed street name "Catalina Court."

Mr. Charles Burnett, owner of lots in Bradford Park off of Sand Hill Road, has petitioned the City of Asheville to accept the street name " Catalina Court." The new street will begin at Sand Hill Road and end at Catalina Court.

City staff recommends adoption of the resolution accepting the new proposed street name "Catalina Court."

Agreement with the Asheville Humane Society

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

On July 1, 2002, Buncombe County required the City to pay for animal shelter services with the Asheville Humane Society who has contracted to run the shelter. On July 1, 2003, the City approved the budget for Fiscal Year 2003-2004, and in that budget approved $121,000 to pay for shelter services. The City and Humane Society need to enter into an agreement for shelter services for the term of July 1, 2003, through June 30, 2004.

City staff recommends adoption of the resolution for animal shelter services for the term of July 1, 2003, through June 30, 2004.

Minority Business Commission Appointment

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two (2) of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Mr. Thomas Kling has been named by Eagle Market Streets Development Corporation (EMSDC) to represent them on the Minority Business Commission. Mr. Kling has been nominated to fill the position left vacant by Mr. Iba Taye who resigned effective January 21, 2003. Mr. Kling's term will run through August 2004 to complete the current term of Mr. Taye.

City staff recommends City Council adopt the resolution confirming the appointment of a member of the Minority Business Commission.

Grant for Crash Investigation Equipment and Software

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program for crash investigation equipment and software and travel/training money for the Asheville Police Department's Regional County Coordinator, and accompanying budget amendment in the amount of $8,000.

The Governor's Highway Safety Program has $10,000 available through their Small Highway Safety Project Contract for highway safety equipment and travel/training for regional county coordinators. The Police Department has identified $5,000 in crash investigation equipment and software needs and $3,000 in travel/training needs for the regional coordinator. There is no match requirement for these funds.

The crash investigation equipment and software will enhance the capabilities of the Police Department to investigate vehicular accidents and provide greater safety to the officers at the scene of an accident. The travel/training funds will allow the Regional Coordinator to participate in highway safety meetings throughout the southeast offered by the Federal government as well as those in North Carolina offered by the State government to fulfill their duties as the Regional Coordinator.

City staff recommends the adoption of a resolution and budget amendment, in the amount of $8,000, to accept a grant from the N.C. Governor's Highway Safety Program for crash investigation equipment and software and travel/training funds for the Regional Coordinator.

Speed Limit Changes and Establishments of Through Truck Prohibitions

Summary: The consideration of an ordinance to enact or change speed limits and enact through truck prohibitions on specific city streets.

The streets listed below have been identified for speed concerns or truck concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions and/or speed studies. Streets with requests for truck prohibitions have been reviewed for appropriateness. The Police Department supports these recommendations.

Through Truck Prohibitions

The following streets are residential streets on which it is recommended that through trucks be prohibited.

1. Catawba Street, in its entirety
2. Olney Road, in its entirety
3. Swannanoa Avenue, in its entirety
4. Vance Crescent, in its entirety
5. Vance Crescent Extension, in its entirety

15 Miles Per Hour

The following streets are narrow residential streets with extreme street geometry problems, including severe and frequent crests and curves, and heavily used on-street parking. These streets warrant a significantly lower speed limit than the typical 25 mph. The recommended safe operating speed on these streets is 15 mph:

1. Circle Street, in its entirety
2. Huntington Street, in its entirety
3. Knob Street, in its entirety
4. Pine Street, in its entirety
5. Tuskeegee Street, in its entirety

20 Miles Per Hour

Most of the following streets are narrow residential streets with street geometry problems, including frequent crests and curves, and heavily used on-street parking. These streets warrant a lower speed limit than the typical 25 mph. Brook Street and Oak Street are business district streets with a combination of operating characteristics and street geometry features that warrants a speed limit slower than the current 35 mph speed limits. Pedestrian crossings and on-street parking maneuvers are frequent, and the roadway width is constrained. As stated in Section 19-111 of the Asheville Code of Ordinances, business district streets are to be 20 mph. The recommended safe operating speed on these streets is 20 mph:

1. Brook Street (US 25A), between Biltmore Plaza and Fairview Road (NCDOT)
2. Clemmons Street, in its entirety
3. Dundee Street, in its entirety
4. Grail Street, in its entirety
5. Hilderbrand Street, in its entirety
6. Jordan Street, in its entirety
7. Lincoln Avenue, in its entirety
8. McTindle Circle, in its entirety
9. Mountain Street, between Martin Luther King, Jr. Boulevard and Hilderbrand Street
10. Oak Street (Central Business District), in its entirety
11. Peeler Drive, in its entirety
12. Ridge Street, in its entirety
13. South Beaumont Street, between Martin Luther King, Jr. Boulevard and Hazzard Street
14. South Jordan Street, in its entirety

25 Miles Per Hour

Most of the following streets are typical local residential streets without street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. Eliada Home Road and Chestnut Street are residential collector streets which have a combination of street geometry features which warrant speed limits slower than the typical speed limit for residential collector streets of 30 mph. The recommended safe operating speed on these streets is 25 mph:

1. Eliada Home Road (SR 1318), between New Leicester Hwy and east corporate Limits (NCDOT)
2. Bevlyn Drive, in its entirety
3. Birch Court, in its entirety
4. Birch Lane, in its entirety
5. Broadview Drive, between Fairview Road and Onteora Boulevard
6. Carroll Avenue, in its entirety
7. Charlotte Street, between Edwin Place and Evelyn Place

8. Cherry Street (S. Asheville), between Royal Pines Drive and Birch Court
9. Chestnut Street, between Charlotte Street and Montford Avenue
10. Cumberland Avenue, in its entirety
11. Dover Street, in its entirety
12. Elkmont Drive, in its entirety
13. Farrwood Avenue, in its entirety
14. Hazzard Street, between Charlotte Street and Knob Street
15. Hazzard Street, between Pine Street and College Street
16. Highland Street, in its entirety
17. Linden Street, in its entirety
18. Max Street, in its entirety
19. Mimosa Drive, in its entirety
20. Mountain Street, between Martin Luther King, Jr. Boulevard and College Street
21. Mulberry Street, in its entirety
22. North Oak Forest Drive, in its entirety
23. Oak Forest Boulevard, in its entirety
24. Pheasant Drive, in its entirety
25. South Oak Forest Drive, in its entirety
26. Swannanoa Avenue, in its entirety

30 Miles Per Hour

The following streets are streets with features that warrant operating speeds less than the typical collector street speed limit of 35 mph. Charlotte Street is a transitional overlay district intended to promote street-oriented businesses and pedestrian use, and has significant pedestrian and bicyclist usage adjacent to the travel lanes. Fairview Road is a narrow winding collector street with limited sight distance in a number of locations and residential frontage in many areas. Both streets have frequent roadside hazards (i.e. utility poles) within the desired "clear zone", the space between the curb and hazards necessary for 35 mph. Moody Avenue is a primarily residential street that exhibits characteristics of a collector street and has adequate sight distance. Woodfin Street is located in the Central Business District but does not exhibit the characteristics that warrant the typical 20 mph business district speed limit. The recommended safe operating speed on these streets is 30 mph:

1. Charlotte Street, between Orchard Street and Edwin Place
2. Fairview Road, between Sweeten Creek Road and Fairview Street
3. Moody Avenue, between Monte Vista Road and Brookside Circle
4. Woodfin Street, between North Market Street and Oak Street

The Engineering Department requests that City Council approve the ordinance amending these speed limit and through truck prohibition changes.

Mr. Anthony Butzek, Traffic Engineer, answered various questions from Council, some being but are not limited to, the cost of signage and how speed limit changes are investigated.

When Councilman Mumpower suggested the City contact some of the people who would be affected by these speed limit changes, City Engineer Cathy Ball explained how these changes are based upon technical factors of the street.

Councilman Mumpower was concerned about the enforcement of our existing speed limits. City Engineer Ball explained that speed limits and signs are not traffic calming measures, but safety issues.

173

Setting Public Hearing to Close a Portion of the Right-of-Way known as Greenbriar Road West from Bent Street to Parkwood Road

Summary: The consideration of a resolution of intent to close a portion of the right-of-way known as Greenbriar Road West from Bent Street to Parkwood Road and setting a public hearing on September 23, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Steven Goldstein, on behalf of PT Business Park, LLC, has requested the City of Asheville close the right-of-way known as Greenbriar Road West from Bent Street to Parkwood Road.

Public Works Department staff have researched and determined that Greenbriar Road West from Bent Street to Parkwood Road is a City maintained right-of-way. The only lot abutting the affected portion of Greenbriar Road West is identified by the PIN No. 9628.12-86-6464.

PT Business Park, LLC intends to upgrade Bent Street from Greenbriar Road West to Patton Avenue to a paved width of twenty feet. Additionally, PT Business Park will grant the City a vehicle access easement and a pedestrian access easement across their property connecting Parkwood Road and the portion of Greenbriar Road that will remain open.

City staff recommends that City Council adopt the resolution setting a public hearing for September 23, 2003, to close Greenbriar Road West from Bent Street to Parkwood Road.

Clerk to Advertise for Upset Bids for Disposal Parcels 162 and 163 on Baxter Street

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for Disposal Parcels 162 and 163 located on Baxter Street.

The subject parcels, zoned RS-8 Residential Single-Family High Density District and comprising 0.03 acres each are located on the south side of Baxter Street (PIN Nos. 9649.19-60-6613 and 6681). The current tax values for the parcels are $900 each for a total value of $1,800. The proposed land use for the subject property in the East End/Valley Street Community Improvement Program is for assemblage with adjoining residential property.

David Freck, who owns the improved property adjoining and in between the subject parcels, has submitted a bid to purchase both parcels for the sum of $1,800. Mr. Freck desires to assemble the parcels with the property he owns to provide yard space and off-street parking for his tenants.

Approval of the resolution will establish minimum prices of $900 each and initiates the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution authorizing advertisement for upset bids for Disposal Parcels 162 and 163 on Baxter Street.

Agreement for Temporary Services with Forsyth Initiative for Residential Self-Help Treatment Inc.

Summary: The consideration of a resolution to approve a Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. (F.I.R.S.T.) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation Division), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized F.I.R.S.T staff for the past two years with excellent results.

City staff recommends City Council approve the Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

Setting Public Hearing to Close Bellview Road from Belvedere Road to London Road

Summary: The consideration of a resolution of intent to close the right-of-way known as Bellview Road from Belvedere Road to London Road and setting a public hearing on September 23, 2003.

N. C. Gen. Stat. sec. 160A -299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Scott Buchanan, on behalf of Thoms Community Care Foundation, has requested the City of Asheville close the right-of-way known as Bellview Road from Belvedere Road to London Road.

Public Works Department staff have researched and determined that Bellview Road from Belvedere Road to London Road is a City maintained right-of-way. The only lot abutting the affected portion of Bellview Road is identified by PIN No. 9647.08-98-5093.

Thoms Community Care Foundation intends to construct and dedicate a new public right-of-way to the City to be known as "New Bellview Road," prior to closing Bellview Road.

City staff recommends that City Council adopt the resolution setting a public hearing for September 23, 2003 to close Bellview Road from Belvedere Road to London Road.

State Law Requirements for SkatePark

Director of Parks & Recreation Irby Brinson said that this is the consideration of an ordinance requiring participants at the Food Lion SkatePark to wear helmets, elbow pads and kneepads, and to ensure appropriate signage is posted.

In the last General Session of the N.C. General Assembly, Senate Bill 774 was approved for the establishment of certain guidelines for operating skate parks within local governments. This Bill requires operators of skateboard parks to post appropriate signage and require participants who use the park to wear helmets, elbow pads and kneepads. The results of this Bill have been posted at the Food Lion SkatePark for the last few months in order to inform participants of this change from the N.C. General Assembly.

The Parks and Recreation Department and the Risk Management Department have not received any claims for the operation of the Food Lion SkatePark since it was opened two years ago. However, both departments feel that this requirement will further ensure the safety of the participants and reduce any potential claims with the City of Asheville.

The Parks and Recreation Department requests City Council approval of the ordinance requiring participants to wear helmets, elbow pads and knee pads and to post appropriate signage.

Provisions for Alcohol at Two Festivals

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: Lexington Avenue Arts & Fun Festival, and La Fiesta Grande de La Musica.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Lexington Avenue Arts & Fun Festival, scheduled for August 31, 2003, is a festival committed to helping raise money for Arts 2 People and the Asheville Mural Project as well as promoting Lexington Avenue businesses.

- La Fiesta Grande de La Musica, scheduled for September 20, 2003, at Memorial Stadium and is a concert proposed as an entertainment event for the local Hispanic population in WNC.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on August 26, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Group Homes in Certain Residential Zoning Districts

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for group homes in certain residential zoning districts.

This code amendment provides for group homes in the RS-8 Residential Single-Family High Density District, RM-6 Residential Multi-Family Low Density District and RM-8 Residential Multi-Family Medium Density District residential zoning districts as a conditional use. Additionally, the amendment adds group homes to the Urban Residential District as a use by right subject to special requirements (i.e., treating it the same as RM-16 Residential Multi-Family High Density District). This amendment was prepared pursuant to City Council direction to expand the zoning districts that group homes may be allowed in. The amendment includes design and operational standards for group homes in these zoning districts.

The amendment has been routed to Coalition of Asheville Neighborhoods, the Affordable Housing Task Force of Asheville and Buncombe County, CREIA, and Council of Independent Business Owners for review and comment.

On August 6, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0, including two amendments. City staff recommends approval of the proposed code amendment as amended.

After discussion by Council, it was the consensus to place this public hearing on the August 26, 2003, formal City Council agenda.

BOARDS AND COMMISSIONS

It was the consensus of City Council to appoint Ms. Bonnie Love and Ms. Carol Ann Pothier to the ADA Compliance Committee.

It was the consensus of City Council to determine who to interview for vacancies on the Planning & Zoning Commission at the August 26, 2003, formal meeting, with interviews being held prior to the September 2, 2003, worksession. It was also the intent of Council to make appointments to the Commission at the September 2, 2003, worksession.

It was the consensus of City Council to reappoint Mr. Herman Turk to the Buncombe County Tourism Development Authority.

At 3:40 p.m., Mayor Worley announced the remainder of the August 12, 2003, meeting would take place in the Council Chamber on the Second Floor of the City Hall Building.

CONTINUATION OF AUGUST 12, 2003, CITY COUNCIL MEETING

PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ENTERING INTO AN OPTION TO CONVEY CERTAIN CITY-OWNED PROPERTY IN THE CENTRAL BUSINESS DISTRICT TO THE GROVE PARK INN FOR A MIXED USE DEVELOPMENT PROJECT

Mayor Worley opened the public hearing at 3:55 p.m. Mayor Worley announced that it is the intent of City Council to not take formal action at this meeting, but to receive the input and apply it to the proposal.

City Attorney Oast said that this is the consideration of entering into an option to convey certain City-owned property in the Central Business District to the Grove Park Inn (GPI) for a mixed use development project. This public hearing was advertised on August 1 and 8, 2003.

In May, following a discussion at a Council meeting, the City entered into a Downtown Development Agreement with the GPI that involved the potential development of two properties overlooking City-County Plaza. One of the sites (Site #1) is located just east of the Biltmore Building, at the intersection of Market Street and College Street, and is partially traversed by Patton Avenue; it is six-tenths of an acre in size. The other site (Site #2) is located to the south of the City building, is approximately 3 acres in size, and is currently used as a parking lot for City employees. Part of Site #2 is currently owned by Buncombe County but the City and County have agreed for the City to acquire it, which should occur soon.

Ordinarily, when the City sells property, it uses an upset bid or other competitive-type process, and there is no requirement for a public hearing. The downtown development agreement law, N.C.G.S. 160A-458.3, provides that cities may in essence "place" City-owned property with a selected developer in connection with a downtown development project. There is no upset bid or other competitive process requirement, provided that there is a public hearing, and provided that the consideration received is not less than the appraised value of the property.

Since entering into the Downtown Development Agreement, the GPI's attorneys and the City have obtained a survey and appraisal, and performed some title research, and worked with the Pack Square Conservancy (Conservancy) on some design issues. All of this work was done in connection with Site #1, and we have drafted an option agreement setting out the proposed terms of the conveyance.

City Attorney Oast used a map to describe what used to be on Site #1. This was part of a redevelopment area that was established by the City Council in the late 1950's and early 1960's. The process actually began around 1958 and a redevelopment plan was adopted in 1962. The properties that were there (which were primarily in private hands) were acquired by the Redevelopment Commission. That Commission was a separate political entity from the City. Some properties were sold by private sale or by condemnation to redevelopers and the City for purposes consistent with the plan. The property we acquired was developed basically as a park and for street purposes as it was intended to be under that plan. Those restrictions were recorded in the Buncombe County Register of Deeds Office and they expired on December 31, 1987. It is his opinion that those conditions are no longer binding.

In summary, the terms of the draft option agreement are:

Sale price	$656,000 plus some non-monetary considerations in the nature of public amenity improvements. Appraised Fair Market Value (November 2002)
Description:	A copy of a part of a survey of the property is attached to the draft option agreement. Further title work may cause the boundaries to change slightly, reducing the size of the property conveyed, but these changes should not be significant. The building footprint will be substantially smaller than the property sold, but GPI's plans are to put much of the parking for the building underground, for which some subterranean horizontal area is required. The area over the parking will be restored as a park in accordance with plans for the area.
Design:	The building will comply with the Pack Square Design Guidelines, which are currently being developed by the Conservancy, and will be subject to approval by the City.
Other matters:	Any area disturbed by GPI during construction will be restored in accordance with the approved plans for City-County Plaza.

178

Use: The option does not specify what uses are to be made of the building, but the Downtown Development Agreement specifies mixed use, and this is the use intended by GPI. The option period (at least six months) will provide an opportunity to develop more information as to the range of uses.

Termination: If GPI decides to terminate the option, the City will be entitled to GPI's earnest money ($10,000). If the City decides to terminate the option or for some reason does not convey the property, GPI will receive a refund of its earnest money, together with up to $5000 in costs.

At Council's direction, the vote on whether to authorize the City to enter into this option will occur at a later meeting. This is to enable staff to address any issues that come up during or as a result of the public hearing.

The Downtown Development Agreement will need to be amended to revise the schedule as to Site #2, and a resolution to that effect will be submitted under a separate Staff Report.

City Attorney Oast and Planning & Development Director Scott Shuford responded to various questions/comments from Council, some being, but are not limited to: since the footprint of the building is contemplated to be smaller than the property proposed to be sold, what protects the City from selling that to the GPI and the Conservancy allows the footprint to be the entire parcel; how can City be assured of design standards if the Conservancy can grant variances to the guidelines; if the City is asking for significant restrictions regarding height and the footprint, those should be in the agreement between the City and the buyer and not left to the Conservancy who is not appointed by Council; the height guidelines are set out in the Downtown Development Agreement which is incorporated into the Option; what exactly are the height restrictions and can they be set out in the option; clarification of subterranean parking; can Council design the box that the building goes in and then make restrictions; why did the City not use a competitive bidding process to see what other developers might have proposed for that area; is there anything in the downtown development agreement law that requires the City to sell the property for the appraised value; has the City been approached by others who want to build something different on that property; what are the non-monetary considerations to the sales price and what is the value of those considerations; can the GPI's underground parking extend further than the property line; is there space for pedestrian-friendly sidewalks around the proposed building; can concerns about pedestrian access, view lines and height restrictions be incorporated into the option; since the appraisal was done in November of 2002, is there a need for a newer one; if the building is over a certain size, will it require a public hearing for a Level III conditional use permit; and will there be a net gain of open space or a loss of green space.

Mr. James Craig Madison, President and Chief Executive Officer of the Grove Park Inn Resort and Spa, said that they are committed to work together with the Conservancy, Eagle-Market Streets Development Corporation, City staff and City Council on these projects. Twenty years ago the GPI employed 50 full-time people and decisions were made to grow and expand. Today the GPI is the 16th largest resort in America in terms of sales per available room and he employs 1,000 people. The decisions of the past affect the economy of today. We have just received the design guidelines and have spent a great deal of money to where we are today. To move forward we need to make sure that the option for Site #1 is secure. The GPI has a vested interest in the quality growth of downtown. We are in the final stages of choosing an architect to work with the Conservancy to work within the guidelines to build a quality product that is right for the City, but has the quality that matches our name. We look at Site #1 as the beginning of moving toward to Site #2. The combined increase in property tax is $1.5 Million. If we are successful in completing the retail component on Site #2 we are talking about another $1.6 Million in sales tax. The most conservative figure of the two projects combined will create over 500 new jobs. Our parent company is Sammons Enterprises with assets of $20 Billion. He said the combined investment is $225 Million. He stressed that capital follows capital. If they can move forward on this investment, they will expose this region to new levels of investment. There needs to be strong leadership in both the public and private sector because the decisions we make today have a tremendous impact on the economic vitality of the future.

Upon inquiry of Councilwoman Jones, Mr. Madison explained the kind of jobs he envisioned.

In response to Vice-Mayor Bellamy, Mr. Madison said that they haven't begun extensive programming, particularly on Site #2, however, he sees is a connection point from the park to the Eagle Street area. There is tremendous opportunity to border the Spruce Street and Eagle Street area with retail, both in terms of shops and restaurants. Based on early modeling, we will have to build 350,000 square feet of parking on Site #2, but no matter where you put a business, people want to park close. Again, he believes they are the connection point from the park to Eagle-Street Market Development Corporation.

The following individuals spoke in support of the option to convey Site #1 to the GPI for several reasons, some being, but are not limited to: need for City to disseminate information concerning project to the public; the GPI has a rich tradition of corporate citizenship; development of both parcels could result in the addition of 350 new jobs and a $225 Million investment in our region; this would be one of the largest single economic development projects in the history of Western North Carolina; such mega-projects create significant milestones in the history of a local economy, with benefits multiplied across a region; architectural style will fit in with the historical nature of our community; need to make sure the view corridor is protected; proposal is good for business, good for Asheville and will benefit the tax-payer; there are safeguards in place to address the majority of concerns; Asheville needs to welcome business; and job creation only happens when business is created:

Mr. Don Yelton, resident of Jupiter
Mr. Dale Carroll, President & Chief Executive Officer of AdvantageWest-N.C.
Mr. Nathan Ramsey, resident of Fairview
Mr. John Lantzius, resident of Fletcher
Mr. Dennis Justice, resident of Fletcher
Ms. Katina Zoumbos, downtown property owner
Ms. Margaret Koutris, downtown property owner
Mr. Scott Osborn, resident of Arden
Mr. Jay Winer read a letter from Eugene W. Ellison
Ms. Janice Nash, Buncombe County resident

The following individuals spoke in opposition of the City selling City-owned property to the GPI for several reasons, some being, but are not limited to: minimum wage jobs or more service level jobs will not help the City with raising the income level; will parking be available to the public; will the upscale condominiums be a wall, instead of a bridge, to the Eagle-Market Streets area; there should have been a competitive bidding process; although it can be argued that deed restrictions on the properties with constitute Site #1 have expired, the sale and use of the properties for other than park and street purposes are clearly contrary to principles adopted as part of the urban renewal plan in the 1960's; the view corridor, which is sought to be protected in the Pack Square design guidelines, would be greatly intruded upon by the proposed building on Site #1; question of legal authority to sell the properties and the procedure used to sell the properties; the sale and private use of the properties contravenes the purposes of the condemnation of the properties, contradicts the planned uses of the properties as shown on the urban renewal plan, conflicts with the draft Pack Square Design Guidelines, and may not be legally or otherwise proper; the construction of a building on Site #1 and the draft guidelines do not address vehicular and pedestrian traffic patterns adequately, infrastructure requirements, underground and above-ground easements, festival use and access, U.S. Dept. of Interior guidelines nor the impact on the Urban Trail artwork; the re-routing of vehicular traffic from Patton Avenue will be greatly affected and may impact the safe routing of fire trucks from the Municipal Building; major concern on Site #2 is the need for input from the Eagle-Market Street community because there is already a considerable amount of development occurring in that area; what affect will this have on the Grove Arcade's ability to lease it's space; can our downtown sustain these major undertakings; loss of green space; destruction of surrounding area when construction begins; not enough information given on projects; downtown Asheville will be walled in; don't close off the Eagle-Market Street area; Asheville-Buncombe Historic Resources Commission should be involved in the interpretation of the Pack Square design guidelines as well as the Conservancy; concern over the size of the buildings; increase in density should not be forced on Pack Square or the City-County Plaza; not enough input from community; Asheville needs affordable housing not luxury high rises; how was the height restriction of the Jackson Building determined; Pack Square design guidelines are vague; need for a current appraisal on property; City should emphasize renovation of existing buildings rather than build new buildings; City should find out what they want and then put the design out for bid; building will not provide recreation or living space for our poor; no design competition for prime piece of real estate; public space is priceless and should not be sold for monetary gain; other cities are planting more trees and adding more green space; and GPI should buy a block on Coxe Avenue and fix it up:

Mr. Walter Plaue, Buncombe County resident

Ms. Rebecca Campbell, Asheville resident
Mr. Ukiah Morrison
Ms. Nelda Holder
Ms. Karen Daily
Mr. Adam McBroom, Asheville resident
Mr. Bill Spencer, Asheville resident

After discussion and input from Mr. W. Louis Bissette Jr., attorney representing the GPI, at 7:03 p.m., Mayor Worley announced that he would not close the public hearing, but continue it until a date to be determined prior to the close of this item on the agenda.

Mr. Shuford then responded to many questions raised by the public, some being, but are not limited to: how input was solicited for public involvement from the Conservancy; soil testing by the GPI; emergency vehicle access; festival access; impact on other downtown businesses; dumpster outside building; two types of design guidelines; and the competitive bidding process.

Mr. Shuford then responded to various questions/comments from Council, some being, but are not limited to: will there be infrastructure costs and what will be the City's responsibility in those costs; do we need to get a more current appraisal of the property; is there a construction timetable; will the downtown development agreement need to be amended to adjust the date for the Site #2 public hearing; the Site #1 building was identified on the site in the plan approved by City Council; are the plans available to the public and can we put as much information as possible on the City's website; and is the City going against the intent of the urban renewal plan.

Councilman Ellis felt this would be a smart development in that we will be putting the property back on the tax base and after both sites are developed we will have more green space.

Councilman Peterson said that the Pack Square design guidelines were unclear about the height restriction. He asked that the restriction be clarified and inserted in our option with the GPI that the height limitation shall not including the penthouse, red roof or the bell tower. In addition, he asked for clarity on what is the footprint and in the area that we are going to be selling, are there any limits on what will be done in that space. Another issue is sidewalks. If the design standards talk about having a pedestrian oriented design, and on 2 or 3 sides of the building there is no sidewalks, it won't be pedestrian oriented. He would like to make sure that the building will fit in as surrounding property to a park. He requested information on how normal traffic and emergency traffic will be re-routed. Finally, he asked for clarify on the non-monetary considerations in the sale price.

Mr. Shuford stated that any street closing will have to be a separate public hearing by City Council.

Vice-Mayor Bellamy asked if staff could provide Council with the level of services at the major intersections in that particular area.

Upon inquiry of Councilman Peterson, City Attorney Oast explained the termination clause in the option and the timeline of the option.

Upon inquiry of Councilman Jones, City Attorney Oast explained why the City used the downtown development agreement law and not the competitive bidding process on these projects. He said the City was presented with an opportunity to not only get Site #1 developed with a building that we thought would add to the downtown, but also Site #2. It also gave Council a good opportunity to control that development. This is with a corporate entity that has had a long presence in Asheville and an interest in seeing that things are done in a sound manner. If you use an upset bid process, you lose a little bit of control over who gets the property and ultimately you don't have to see the property, but if you do sell it, you have to sell it to the highest bidder.

Councilwoman Jones was concerned about the public perception and their being included in the process and informed of the process. She suggested that a link of frequently asked questions about this proposal should be put on the web.

Vice-Mayor Bellamy asked if we could require some mixed income housing. Mr. Shuford felt that the opportunity for affordable housing was more pronounced in Site #2 because the scale of it is much larger. The GPI has had some concerns they have been able to overcome with regard to the scale of the footprint of the Site #1 building based upon the design guidelines. He thinks they have a limited tolerance of additional restrictions on what they might be able to realize in terms of their financial investment on that site. Site #2 is much larger and has much more opportunity for us to look at that type of requirement.

Councilman Mumpower said that this is extraordinary development and this is how extraordinary development happens. This is a $225 Million on a 6/10 acre.

182

Mayor Worley spoke about the need of an option and the City's need to get some assurances on what the building will look like.

City Attorney Oast said that any restrictions can be clarified in the option and he felt that two weeks would be sufficient in order for him to draft the option for Council consideration.

At 8:20 p.m., Councilman Dunn moved to (1) revise the September 2, 2003, worksession time from 3:00 p.m. to 4:00 p.m. and move it from the 1st Floor North Conference Room to the Council Chamber, Second Floor of the City Hall Building; (2) continue this public hearing until Tuesday, September 2, 2003, at 4:00 p.m. in the Council Chamber, Second Floor of the City Hall Building; and (3) to take action on entering into an option to convey certain City-owned property in the Central Business District to the Grove Park Inn for a mixed use development project at Council's worksession on September 16, 2003. This motion was seconded by Councilman Ellis and carried unanimously.

B. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE DEVELOPMENT STANDARD BONUSES IN RESIDENTIAL DISTRICTS

Mayor Worley said that this public hearing was continued from the July 22, 2003, meeting. Mayor Worley then opened the public hearing at 8:32 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for more flexible application of development standards, including density requirements, in all residential zoning districts. This public hearing was advertised on July 11 and 18, 2003.

This code amendment provides for more flexible application of development requirements in all residential zoning districts. Affected districts include: RS-2, RS-4, RS-8, RM-6, RM-8 and RM-16. Under certain circumstances, a conditional use permit process can be used to modify development standards, including increasing density above the maximum permitted in each of these zoning districts, if the applicant successfully demonstrates that the project would exhibit exceptional site and/or structure design that is appropriate to the architectural and/or environmental context of the surrounding neighborhood, and would also achieve one or more of the following goals:

- Promote the City of Asheville's affordable housing programs by providing housing that is affordable for purchase by people with household income below the area median or for rental by people with household income less than 80% of the area median, and particularly housing that meets the needs of people who have special needs or household income less than 60% of median income.
- Implement an officially adopted development plan for the area.
- Exhibit exceptional site design that preserves critical environmental features on the site.
- Assist the City of Asheville in meeting critical infrastructure needs, including but not limited to the preservation of open space, the creation of regional stormwater retention facilities, and achieving greater interconnectivity of the street network.
- Effectively incorporate public transit as a primary mode of transportation to and from the development.

On June 19, 2003, the Planning and Zoning Commission unanimously recommended approval of the proposed code amendment by a vote of 4-0. City staff recommends approval of the proposed code amendment as well.

Councilman Peterson initiated discussion surrounding his concern that the proposed amendment would not provide for the use of protest petitions by residents opposed to developments.

Discussion surrounded organizations that have received copies of the proposed ordinance and their comments, the conditional use permit process, and the neighborhood/developer meetings.

At the suggestion of Councilman Mumpower, Mr. Shuford amended two places in the proposed ordinance by deleting the word "city" when referring to goals.

At the suggestion of Vice-Mayor Bellamy, Mr. Shuford said that he would report back to Council in the future on whether this amendment is achieving goals identified.

Mr. Mike Lewis, Asheville resident, voiced opposition to the proposed amendment.

Mayor Worley closed the public hearing at 9:05 p.m.

Discussion occurred amongst Council regarding restrictive covenants and whether they control or City ordinances control.

Vice-Mayor Bellamy and Councilwoman Jones indicated their prior support for the amendment was wavering due to their concerns that the developments approved using the development standards bonus conditional use permit process would not be properly maintained if the Minimum Housing Code was modified.

Councilwoman Jones felt it was important for City Council members to know when developments are brought before them for review if they have restrictive covenants.

Councilman Mumpower moved to adopt the proposed ordinance with the two amendments outlined by Mr. Shuford. This motion was seconded by Councilman Dunn.

Vice-Mayor Bellamy and Councilwoman Jones asked that this matter be postponed until after the September 23, 2003, meeting regarding the Minimum Housing Code.

Vice-Mayor Bellamy didn't feel that we have the foundation to help ensure the residential neighborhoods will be protected.

Councilman Mumpower felt we have to make a responsible effort to address affordable housing and if we find this amendment doesn't work, it can be amended.

Vice-Mayor Bellamy moved to continue this matter until October 14, 2003. This motion was seconded by Councilman Dunn and carried on a 5-2 vote, with Councilman Ellis and Councilman Mumpower voting "no."

NEW BUSINESS:

A. RESOLUTION NO. 03-137 - RESOLUTION APPROVING THE PACK SQUARE DESIGN GUIDELINES

Planning & Development Director Scott Shuford said that this is the consideration of a resolution adopting the design guidelines for the Pack Square Renaissance Project. The development of design guidelines for the Pack Square Renaissance project area is a contractual obligation of the Pack Square Conservancy, Inc. in its agreement with the City.

The Pack Square Conservancy (PSC) has prepared design guidelines for City Council approval as required in their contract with the City of Asheville. These guidelines will provide design criteria and requirements for the publicly owned space within the boundary established by this contract (see Exhibit A.). Since the PSC is raising millions of dollars of private funds for improving this critical public space, it is important that it has a definite say in how development within this space occurs. The PSC has held meetings with City staff, stakeholder groups and the public in late July to get input regarding these guidelines. Changes have been made to the guidelines to reflect this input.

The PSC is proposing both general guidelines for the entire area, and specific guidelines for separate development sites. The general guidelines provide direction for composition, ground floors, upper floors and setbacks, building tops, entryways, materials and windows. These guidelines should result in new structures that complement and enhance the surrounding development and the future development of the park. Based on staff review of the draft of the guidelines, we recommend the guidelines be approved. This draft incorporates earlier staff comments that address applicability of the guidelines to particular sites and appropriate height limits for Site A.

City staff recommends City Council approve the guidelines.

After discussion initiated by Councilman Peterson, Mr. Shuford suggested if Council is concerned about design issues on Site #1, those should be addressed in the option agreement and not through these design guidelines. He did note that Buncombe County will have to approve these guidelines as well.

Ms. Carol King, Chair of the Downtown Association and member on Pack Square Conservancy Inc., explained to Council that the design guidelines are meant to present an overview of the vision for Pack Square and City-County Plaza. The guidelines outline specific massing guidelines for each site, as developed by the Pack Square Conservancy, in order to provide consistency in façade articulation and special features. She reviewed the design principles for great urban spaces. She said that the Pack Square Conservancy retains authority, as part of these design guidelines, to grant minor variances to these guidelines on a project specific basis. All interpretations of these guidelines by Pack Square Conservancy shall be final. All projects subject to these guidelines, "Permanent Improvements," must be approved as conforming with these guidelines by the Pack Square Conservancy prior to being permitted or approved by the City of Asheville or other regulatory agencies, as applicable. Sufficient project information, as determined b the Pack Square Conservancy, must be submitted at least 21 days prior to the date requested for review. The Pack Square Conservancy will notify the applicant as to the actual date of the review after its receipt of all pertinent information. The Pack Square Conservancy will be available for preliminary review at design stages, including preliminary review at design stages, including preliminary building massing and site design, material and roof form design, or such other design stages, prior to consideration of the final design for approval. She then reviewed the general guidelines consisting of composition; ground floors; upper floor setbacks and terraces; building tops; entryways and portals; materials; and windows and bays.

Ms. King then briefly reviewed the design guidelines for Sites A and D and the suggested design guidelines for Sites B and C.

When Councilman Mumpower asked what the Public Art Board's involvement is in these guidelines, Ms. King replied that they are involved in the Park, but not involved in the design review guidelines.

Councilman Mumpower explained his concern that the entrepreneurial spirit may be of risk in these guidelines

City Attorney Oast responded to various questions of Council, some being but are not limited to: can Council turn down a plan purely on aesthetics; what areas of the City does this guideline cover; can Council impose stricter standards than the guidelines call for; exactly what is the Conservancy's role and the City's in these guidelines;

When Councilman Mumpower asked for the reason for these guidelines, Mr. Shuford said that the Conservancy is raising millions of dollars and they want some assurance that the development that occurs within the area they are raising money for (1) is going to be compatible with the architecture of the area and the Park; and (2) they want to have long term control over that because, as you have seen from the pictures presented today, there is a tendency for inappropriate things to be put in at the Square and the City-County Plaza.

Mr. Scott pointed out that the Conservancy has not skimped on design advice.

After Councilwoman Jones found a consistency in the guidelines, Ms. King asked that the last sentence in the design guidelines for Site A should read, "Ground floor uses shall be active and pedestrian oriented."

Councilwoman Jones' concern is the height of the building as well and wasn't sure if she wanted the standard to be the height of the Jackson building, until that height was clarified.

Ms. Julie Brandt voiced concern about the process for developing these guidelines. She suggested this matter be tabled for further citizen input.

Mr. Fred English felt it would be inappropriate for the Renaissance Hotel to sell its parking lot.

Mr. Alan Ditmore said that if Council commits to height limits, they would be unable to waive them to negotiate a deal for a percentage of affordable housing units.

Ms. Patsy Meldrum Brison, attorney representing the Biltmore Company, (1) explained how the Pack Square design guidelines conflict with the existing downtown design guidelines regarding height; (2) how the view corridor will be intruded upon by the proposed building on Site #1; (3) why the building mass that could be approved on Site #1 is simply too large; and (4) questioned the Council's legal authority to delegate to another body the design review guidelines, especially variances.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 03-137, with the amendment read by Ms. King.

Councilman Mumpower acknowledged some discomfort with the complexities of these guidelines.

Councilman Peterson felt these guidelines were a good start, however, explained some of his concerns relating to the height, and the delegation of authority to the Conservancy especially regarding variances.

The motion made by Councilman Dunn and seconded by Councilman Ellis carried on a 6-1 vote, with Councilman Peterson voting "no."

RESOLUTION BOOK NO. 27 – PAGE 470

OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of July 18-24, 2003: Heather Tate (Sanitation), Claudia Hudson (Water), Jessica Curcio (Water) and Self Help Ventures Fund (Water).

The following claims were received by the City during the period of July 25 – August 7, 2003: Kame Stanley (Parks & Recreation), Mary Bryan Roberts (Streets), Robert Wise (Transit Services), Days Inn (Water), Linda Frankl (Sanitation) and Daren Pinkerton (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English said that all government property should be sold to the highest bidder and if any portion of public property is sold, he will form a citizens group to stop it.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:56 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 26, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

CHANGES TO AGENDA

I. PROCLAMATIONS:

A. SISTER CITY GIFT

Mr. G. Carroll Hughes, President of Asheville Sister Cities Inc., and Dr. Tom Jones, Chairman of the San Cristobal Committee, presented Mayor Worley with a hand-carved wooden statue of a Chamula Indian as a gift from the Municipal President Enoc Hernandez Cruz, San Cristobal de las Casas in the State of Chiapas, Mexico.

II. CONSENT AGENDA:

At the request of City Manager Westbrook, and consensus of Council, a resolution amending the September 2, 2003, worksession time and place was added to the Consent Agenda.

Vice-Mayor Bellamy asked that Consent Agenda Items "R" and "S" be removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 12, 2003, AND THE WORKSESSION HELD ON AUGUST 19, 2003

B. RESOLUTION NO. 03-138 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "TRELLIS CIRCLE" OFF OF VIRGINIA AVENUE AND BROTHERTON AVENUE

Summary: The consideration of a resolution accepting the new proposed street name "Trellis Circle."

The City of Asheville's Community Development Division, owner of lots in Brotherton Commons off of Virginia Avenue, has petitioned the City of Asheville to accept the street name " Trellis Circle." The new street will begin at Virginia Avenue and end at Brotherton Avenue.

City staff recommends adoption of the resolution accepting the new street name of "Trellis Circle."

RESOLUTION BOOK NO. 27 – PAGE 471

C. RESOLUTION NO. 03-139 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "STRAWBRIDGE COURT" AND "LOVELY LANE" IN THE GIVENS ESTATE METHODIST RETIREMENT COMMUNITY

Summary: The consideration of a resolution accepting the new proposed street names of "Strawbridge Court" and "Lovely Lane."

The Givens Estates United Methodist Retirement Community, owner of lots in Givens Estates off of Sweeten Creek Road and Wesley Branch Drive, have petitioned the City of Asheville to accept the street names of "Strawbridge Court" and "Lovely Lane."

The new street Strawbridge Court will begin at Wesley Branch Drive and end at Lovely Lane.

The new street Lovely Lane will begin a Wesley Branch Drive and end at the cul-de-sac on Lovely Lane.

City staff recommends adoption of the resolution accepting the new proposed street names of "Strawbridge Court" and "Lovely Lane."

RESOLUTION BOOK NO. 27 – PAGE 472

D. RESOLUTION NO. 03-140 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "PRARIE PATH" OFF DILLINGHAM ROAD

Summary: The consideration of a resolution accepting the new proposed street name of "Prarie Path."

Mayfair Partners LLC, owners of lots off of Dillingham Road, have petitioned the City of Asheville to accept the street name " Prarie Path." The new street will begin at Dillingham Road and end on Prarie Path.

City staff recommends adoption of the resolution accepting the new proposed street name of "Prarie Path."

RESOLUTION BOOK NO. 27 – PAGE 473

E. RESOLUTION NO. 03-141 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "RESTAURANT COURT" OFF TUNNEL ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Restaurant Court."

Pinnacle Properties, LLC, owners of lots off of Tunnel Road, have petitioned the City of Asheville to accept the street name " Restaurant Court." The new street will begin at Tunnel Road and end on Restaurant Court.

City staff recommends adoption of the resolution accepting the new proposed street name of "Restaurant Court."

RESOLUTION BOOK NO. 27 – PAGE 474

F. RESOLUTION NO. 03-142 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "CATALINA COURT" OFF SAND HILL ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Catalina Court."

Mr. Charles Burnett, owner of lots in Bradford Park off of Sand Hill Road, has petitioned the City of Asheville to accept the street name " Catalina Court." The new street will begin at Sand Hill Road and end at Catalina Court.

City staff recommends adoption of the resolution accepting the new proposed street name "Catalina Court."

RESOLUTION BOOK NO. 27 – PAGE 475

G. RESOLUTION NO. 03-143 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

On July 1, 2002, Buncombe County required the City to pay for animal shelter services with the Asheville Humane Society who has contracted to run the shelter. On July 1, 2003, the City approved the budget for Fiscal Year 2003-2004, and in that budget approved $121,000 to pay for shelter services. The City and Humane Society need to enter into an agreement for shelter services for the term of July 1, 2003, through June 30, 2004.

City staff recommends adoption of the resolution for animal shelter services for the term of July 1, 2003, through June 30, 2004.

RESOLUTION BOOK NO. 27 – PAGE 476

H. RESOLUTION NO. 03-144 - RESOLUTION APPOINTING THOMAS KLING AS THE REPRESENTATIVE OF THE EAGLE-MARKET STREETS DEVELOPMENT CORPORATION ON THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two (2) of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Mr. Thomas Kling has been named by Eagle Market Streets Development Corporation (EMSDC) to represent them on the Minority Business Commission. Mr. Kling has been nominated to fill the position left vacant by Mr. Iba Taye who resigned effective January 21, 2003. Mr. Kling's term will run through August 2004 to complete the current term of Mr. Taye.

City staff recommends City Council adopt the resolution confirming the appointment of a member of the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 477

I. RESOLUTION NO. 03-145 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR A GRANT TO THE POLICE DEPARTMENT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program for crash investigation equipment and software and travel/training money for the Asheville Police Department's Regional County Coordinator, and accompanying budget amendment in the amount of $8,000.

The Governor's Highway Safety Program has $10,000 available through their Small Highway Safety Project Contract for highway safety equipment and travel/training for regional county coordinators. The Police Department has identified $5,000 in crash investigation equipment and software needs and $3,000 in travel/training needs for the regional coordinator. There is no match requirement for these funds.

The crash investigation equipment and software will enhance the capabilities of the Police Department to investigate vehicular accidents and provide greater safety to the officers at the scene of an accident. The travel/training funds will allow the Regional Coordinator to participate in highway safety meetings throughout the southeast offered by the Federal government as well as those in North Carolina offered by the State government to fulfill their duties as the Regional Coordinator.

City staff recommends the adoption of a resolution and budget amendment, in the amount of $8,000, to accept a grant from the N.C. Governor's Highway Safety Program for crash investigation equipment and software and travel/training funds for the Regional Coordinator.

RESOLUTION BOOK NO. 27 – PAGE 478

J. ORDINANCE NO. 3045 - BUDGET AMENDMENT FOR GRANT FOR CRASH INVESTIGATION EQUIPMENT AND SOFTWARE AND TRAVEL/TRAINING MONEY FOR REGIONAL COUNTY COORDINATOR FOR THE POLICE DEPARTMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY

Summary: See Consent Agenda Item "I" above.

ORDINANCE BOOK NO. 20 – PAGE 395

K. RESOLUTION NO. 03-146 - RESOLUTION CALLING FOR A PUBLIC HEARING ON SEPTEMBER 23, 2003, TO CONSIDER THE CLOSING OF A PORTION OF THE RIGHT-OF-WAY KNOWN AS GREENBRIAR ROAD WEST FROM BENT STREET TO PARKWOOD ROAD

Summary: The consideration of a resolution of intent to close a portion of the right-of-way known as Greenbriar Road West from Bent Street to Parkwood Road and setting a public hearing on September 23, 2003.

191

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Public Works Department staff have researched and determined that Greenbriar Road West from Bent Street to Parkwood Road is a City maintained right-of-way. The only lot abutting the affected portion of Greenbriar Road West is identified by the PIN No. 9628.12-86-6464.

PT Business Park, LLC intends to upgrade Bent Street from Greenbriar Road West to Patton Avenue to a paved width of twenty feet. Additionally, PT Business Park will grant the City a vehicle access easement and a pedestrian access easement across their property connecting Parkwood Road and the portion of Greenbriar Road that will remain open.

City staff recommends that City Council adopt the resolution setting a public hearing for September 23, 2003, to close Greenbriar Road West from Bent Street to Parkwood Road.

RESOLUTION BOOK NO. 27 – PAGE 479

L. RESOLUTION NO. 03-147 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR DISPOSAL PARCELS 162 AND 163 ON BAXTER STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for Disposal Parcels 162 and 163 located on Baxter Street.

The subject parcels, zoned RS-8 Residential Single-Family High Density District and comprising 0.03 acres each are located on the south side of Baxter Street (PIN Nos. 9649.19-60-6613 and 6681). The current tax value for the parcels are $900 each for a total value of $1,800. The proposed land use for the subject property in the East End/Valley Street Community Improvement Program is for assemblage with adjoining residential property.

David Freck, who owns the improved property adjoining and in between the subject parcels, has submitted a bid to purchase both parcels for the sum of $1,800. Mr. Freck desires to assemble the parcels with the property he owns to provide yard space and off-street parking for his tenants.

Approval of the resolution will establish minimum prices of $900 each and initiates the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution authorizing advertisement for upset bids for Disposal Parcels 162 and 163 on Baxter Street.

RESOLUTION BOOK NO. 27 – PAGE 480

M. RESOLUTION NO. 03-148 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC.

Summary: The consideration of a resolution to approve a Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. (F.I.R.S.T.) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation Division), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized F.I.R.S.T staff for the past two years with excellent results.

City staff recommends City Council approve the Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

RESOLUTION BOOK NO. 27 – PAGE 481

N. RESOLUTION NO. 03-149 - RESOLUTION CALLING FOR A PUBLIC HEARING ON SEPTEMBER 23, 2003, TO CONSIDER THE CLOSING OF BELLVIEW ROAD FROM BELVEDERE ROAD TO LONDON ROAD

Summary: The consideration of a resolution of intent to close the right-of-way known as Bellview Road from Belvedere Road to London Road and setting a public hearing on September 23, 2003

N. C. Gen. Stat. sec. 160A -299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Scott Buchanan, on behalf of Thoms Community Care Foundation, has requested the City of Asheville close the right-of-way known as Bellview Road from Belvedere Road to London Road.

Public Works Department staff have researched and determined that Bellview Road from Belvedere Road to London Road is a City maintained right-of-way. The only lot abutting the affected portion of Bellview Road is identified by PIN No. 9647.08-98-5093.

Thoms Community Care Foundation intends to construct and dedicate a new public right-of-way to the City to be known as "New Bellview Road," prior to closing Bellview Road.

City staff recommends that City Council adopt the resolution setting a public hearing for September 23, 2003 to close Bellview Road from Belvedere Road to London Road.

RESOLUTION BOOK NO. 27 – PAGE 482

O. ORDINANCE NO. 3046 - ORDINANCE REQUIRING PARTICIPANTS AT THE FOOD LION SKATEPARK TO WEAR HELMETS, ELBOW PADS AND KNEE PADS, AND TO ENSURE APPROPRIATE SIGNAGE IS POSTED

Summary: This is the consideration of an ordinance requiring participants at the Food Lion SkatePark to wear helmets, elbow pads and kneepads, and to ensure appropriate signage is posted.

In the last General Session of the N.C. General Assembly, Senate Bill 774 was approved for the establishment of certain guidelines for operating skate parks within local governments. This Bill requires operators of skateboard parks to post appropriate signage and require participants who use the park to wear helmets, elbow pads and kneepads. The results of this Bill have been posted at the Food Lion SkatePark for the last few months in order to inform participants of this change from the N.C. General Assembly.

The Parks and Recreation Department and the Risk Management Department have not received any claims for the operation of the Food Lion SkatePark since it was opened two years ago. However, both departments feel that this requirement will further ensure the safety of the participants and reduce any potential claims with the City of Asheville.

The Parks and Recreation Department requests City Council approval of the ordinance requiring participants to wear helmets, elbow pads and knee pads and to post appropriate signage.

ORDINANCE BOOK NO. 20 – PAGE 398

P. RESOLUTION NO. 03-150 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Summary: The term of Herman Turk, as a member on the Buncombe County Tourism Development Authority, in the position of an owner or operator of a hotel/motel over 100 rooms, expires on August 30, 2003.

On August 19, 2003, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Herman Turk to serve a three year term, term to expire August 30, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 483

Q. RESOLUTION NO. 03-151 - RESOLUTION APPOINTING MEMBERS TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: The terms of Carole Williams and Glenda McDowell, as members on the ADA Compliance Committee, expired on August 22, 2003.

On August 19, 2003, City Council instructed the City Clerk to prepare the proper paperwork to appoint Bonnie Love (representing the business or non-profit sector) and Carol Ann Pothier (representing the education/health/medical profession) as members to the ADA Compliance Committee to each serve a three year term respectively, terms to expire August 22, 2003, or until their successors have been appointed.

T. **RESOLUTION NO. 03-152 - RESOLUTION AMENDING THE 2003 CITY COUNCIL MEETING AGENDA TO CHANGE THE SEPTEMBER 2, 2003, WORKSESSION AGENDA TO BEGIN AT 4:00 P.M. IN THE COUNCIL CHAMBER, SECOND FLOOR, CITY HALL BUILDING**

RESOLUTION BOOK NO. 27 – PAGE 485

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 03-153 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL ON AUGUST 31, 2003

RESOLUTION NO. 03-154 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LA FIESTA GRANDE DE LA MUSICA ON SEPTEMBER 20, 2003

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: Lexington Avenue Arts & Fun Festival, and La Fiesta Grande de La Musica.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Lexington Avenue Arts & Fun Festival, scheduled for August 31, 2003, is a festival committed to helping raise money for Arts 2 People and the Asheville Mural Project as well as promoting Lexington Avenue businesses.

- La Fiesta Grande de La Musica, scheduled for September 20, 2003, at Memorial Stadium and is a concert proposed as an entertainment event for the local Hispanic population in WNC.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Councilman Dunn moved for the adoption of Resolution No. 03-153. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 27 – PAGE 486

Councilman Dunn moved for the adoption of Resolution No. 03-154. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 27 – PAGE 488

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER DESIGNATING THE JANE HALL LIDDELL BATTLE HOUSE LOCATED AT 288 MACON AVENUE AS A LOCAL HISTORIC LANDMARK

Mayor Worley said that the Planning and Development Department staff recommends tabling the consideration of the ordinance designating the Jane Hall Liddell Battle House (208 Macon Avenue) as a local historic landmark in order to allow us time to resubmit the amended report to the State Historic Preservation Office for additional comment and to confer with the Grove Park Inn regarding their continued support for the nomination. Staff has discussed this approach with both the Historic Resources Commission Executive Committee and the Grove Park Inn and all parties are in agreement with tabling the ordinance.

Vice-Mayor Bellamy moved to table the designation of the Jane Hall Liddell Battle House located at 288 Macon Avenue. This motion was seconded by Councilman Dunn and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF TWO LOTS LOCATED ON POLE CREASMAN ROAD AND BREVARD ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM 8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Planning & Development Director Scott Shuford said that on August 25, 2003, the applicant's representative informed the Planning Department that the compromise zoning proposal agreed to during the Planning and Zoning Commission is no longer being pursued by his client. The compromise proposal contemplated the rezoning of only a portion of the property owned by the applicant and this property was what was advertised.

The whole site is now proposed for rezoning, which will require re-advertisement. Since a public hearing has been scheduled for this date, Council will need to take action to continue the request until September 23 or October 14 to allow us time to advertise it properly. Alternately, you could refer the request back to the Planning and Zoning Commission since their vote reflected the compromise proposal. He believes the six members present when this item came before the Commission would not have supported the rezoning of the entire property. If Council chooses this latter approach, he recommended Council refer it back to the Commission with the understanding that it will be considered at the October 1 Commission meeting.

Vice-Mayor Bellamy moved to remand this rezoning request back to the Planning & Zoning Commission. This motion was seconded by Councilman Ellis and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED ON STARNES AVENUE AND FLINT STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3047 - ORDINANCE TO REZONE TWO LOTS LOCATED ON STARNES AVENUE AND FLINT STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley then opened the public hearing at 5:20 p.m.

Mr. Carter Pettibone, Planner II, said that this is the consideration of an ordinance to rezone two lots located on Starnes Avenue and Flint Street from Neighborhood Business District to RM-8 Residential Multi-Family Medium Density District. This public hearing was advertised on August 15 and 22, 2003.

The property owners, Thomas Wolfe and David Crossley, wish to rezone the properties in order to develop one lot, which is vacant, as a single-family residence and to bring the existing single-family residence on the other lot into compliance with the Unified Development Ordinance (PIN Nos. 9649.17-22-4097 and 9649.18-21-5938). The intent of the RM-8 District is to permit a full range of medium density multi-family housing types along with single-family detached and attached residences. The Neighborhood Business District does not allow detached single-family residential as a use permitted by right.

The properties, which total 0.17 acres, are located in the City limits on the northwest and southwest corners of the intersection of Starnes Avenue and Flint Street. The subject properties are also located in the Montford Historic District. The predominant land use in the area is single family residential, even though there are number of vacant and multi-family uses in the vicinity. All properties directly surrounding the subject parcels are zoned RM-8.

Due to the vacant parcel's location within the Montford Historic District, the owner of the lot, Mr. Wolfe, will also need to obtain approval of the Asheville-Buncombe Historic Resources Commission for the design of the building and for flexible development standards if the proposed rezoning is approved in order to build a single-family residence on the property.

Rezoning the lots to RM-8 would allow one property owner the opportunity to build a single-family home and bring the existing single family home on the other property into compliance with the Unified Development Ordinance. The RM-8 zoning would fit into the existing zoning pattern seamlessly because the properties are entirely surrounded by RM-8 zoning. There are also two other Neighborhood Business districts within the Montford Neighborhood, as well as two Community Business I Districts in close proximity that would provide alternative locations for small scale, neighborhood-oriented business uses that could serve the general neighborhood.

In consideration of the above, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

The Planning and Zoning Commission voted 6-0 to recommend approval of the rezoning of the properties at Starnes Avenue and Flint Street from Neighborhood Business District to RM-8 Residential Multi-Family Medium Density District. Staff recommends approval of the rezoning request as well.

Mr. Thomas Wolfe, property owner, spoke in support of the rezoning.

Mayor Worley closed the public hearing at 5:25 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3047. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 400

D. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR THE BUNCOMBE COUNTY DETENTION CENTER EXPANSION ON PROPERTY BORDERED BY DAVIDSON, VALLEY AND MARJORIE STREETS

ORDINANCE NO. 3048 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY DETENTION CENTER EXPANSION ON PROPERTY BORDERED BY DAVIDSON, VALLEY AND MARJORIE STREETS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:28 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a conditional use permit request to construct an 53,700 square foot addition to the existing Buncombe County Detention Center on property owned by the City of Asheville but under contract by Buncombe County.

On, June 26, 2003, Bruce Youngberg, AIA, from Cort Architectural Group, submitted plans for proposed additions to the Buncombe County Detention Facility. Under the Unified Development Ordinance (UDO) requirements, a jail facility is a conditional use in the Central Business District.

The conditional use request is for a 53,700 square foot addition to the existing detention facility. The parcel is approximately .65 acre (PIN No. 9649.19-50-4467) and is located adjacent to the existing detention facility and behind the City Building (City Exhibit 3 – Location Map). The addition will provide facilities for men and women. The lower levels of the structure will provide space for a coordinated 911 Call Center and Emergency Medical Service (EMS) facility.

The new structure will share its primary entrance with the existing Buncombe County Detention Center on Davidson Street. The building will front on Davidson Street and Valley Street (City Exhibit 4). The remainder of the lot (with frontage on Marjorie Street) will be used for parking. This parking area may be used at a future date for expansion of the facilities. Access to the parking area will be from Davidson Street and Valley Street. Landscaping will be included in the project in the form of street trees and parking lot landscaping (City Exhibit 5).

The height of the proposed structure will be below the height of the balustrade on the second floor of the City Building. This height restriction was a requirement of City Council for the transfer of the property for this use.

The Technical Review Committee (TRC) met on July 21, 2003, and recommended approval of the detention facility addition with conditions noted below.

As a part of the conditional use review process City Council must state if the project meets or does not meet each of the standards for Detention centers, jails and related correctional facilities found in section 7-16-2(c) of this chapter.

- Design Standards - The project must comply with the design guidelines for projects located in this area:

  The project was reviewed by the Downtown Commission for compliance with the design guidelines. They requested some variations with some materials used. The architect for the project was able to work those changes into the plan. The Downtown Commission allowed a variance for fewer openings for the street facing facades because of the special nature of the use. The project appears to meet the design guidelines for downtown.

- Fencing - No chain link, barbed wire, razor wire or similar fence material shall be used in areas that are visible from adjacent properties or from the public way unless specifically permitted by the City Council approving the conditional use permit.

  No chain link is proposed adjacent to the public way or visible from the public way.

- Fenced Areas - Fenced areas shall not abut any principal street unless specifically permitted by the City Council.

  No fenced areas are proposed on the plan.

- Lighting - Lights in pedestrian areas and parking lots shall not exceed 16 feet in height. All lights other than those in public pedestrian areas, including security lights, shall be full cut-off type fixtures, and shall not produce direct glare or light trespass on adjacent properties.

  Lighting provided as a part of the project will comply with these requirements.

- Signage - All signage must be reviewed and approved as part of the conditional use permit application. City Council may attach conditions addressing the location, size, number, and illumination of signs based upon circumstances related to the location and impact of the sign.

  The detention facilities will share an entrance with the Buncombe County Detention Center located on Davidson Street. Buncombe County is seeking an additional sign on Marjorie Street. City staff recommends approval of a sign up to 12 square feet to be worked by City and County staff. No additional signage will be required. In addition the other uses in the basement of the structure are not proposing additional signage.

- Operational Standards - No outdoor speaker systems shall be permitted. Vehicle entering and or leaving the facility shall not use sirens or emergency lights unless responding to an emergency.

  No outdoor speaker systems are proposed for the project and vehicles will not use sirens unless responding to an emergency.

- Loading and Unloading - All loading and unloading areas shall be located internally on the site and screened from view from adjacent properties and public ways. All loading and

D. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR THE BUNCOMBE COUNTY DETENTION CENTER EXPANSION ON PROPERTY BORDERED BY DAVIDSON, VALLEY AND MARJORIE STREETS

ORDINANCE NO. 3048 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY DETENTION CENTER EXPANSION ON PROPERTY BORDERED BY DAVIDSON, VALLEY AND MARJORIE STREETS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:28 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

- Signage - All signage must be reviewed and approved as part of the conditional use permit application. City Council may attach conditions addressing the location, size, number, and illumination of signs based upon circumstances related to the location and impact of the sign.

  The detention facilities will share an entrance with the Buncombe County Detention Center located on Davidson Street. Buncombe County is seeking an additional sign on Marjorie Street. City staff recommends approval of a sign up to 12 square feet to be worked by City and County staff. No additional signage will be required. In addition the other uses in the basement of the structure are not proposing additional signage.

- Operational Standards - No outdoor speaker systems shall be permitted. Vehicle entering and or leaving the facility shall not use sirens or emergency lights unless responding to an emergency.

  No outdoor speaker systems are proposed for the project and vehicles will not use sirens unless responding to an emergency.

- Loading and Unloading - All loading and unloading areas shall be located internally on the site and screened from view from adjacent properties and public ways. All loading and unloading activities shall take place between the hours of 6:00 a.m. and 9:00 p.m. unless specifically waived by the City Council

Loading and unloading of inmates will take place as part of in the existing detention facility inside to the building.

- Exercise Yard – Exercise yards and other outdoor activity areas shall be located internally on the site and screened from view from adjacent properties and public ways.

  Exercise yards are inside the building and are not visible from adjacent properties or public ways.

- Vehicle Storage - All vehicles associated with the use shall be stored in an enclosed or screened area. The vehicle storage area may be screened with vegetation, fences, a combination or fences and landscaping material or other means designed to effectively screen the stored vehicles from adjacent properties and the public way.

  No vehicles will be stored on the property. Parking will be used by Buncombe County employees. Ambulances used as a part of the EMS unit will be stored inside the building in vehicle bays.

In addition to the specific conditions pertaining to detention facilities, City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met provided certain impacts are mitigated through site design modifications and off site road improvements.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The use or development as proposed will create no public health or safety problems as determined by TRC review.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The proposed development is essentially an in-fill project and is compatible with the topographic features of the site.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The location of this special use adjacent to the existing detention facility is appropriate and will not injure the value of nearby property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The detention center addition went through the design review process and was approved by the Downtown Commission. As proposed, the building and development will be in scale and harmony with buildings in the vicinity.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

Locating the detention facility addition on an in-fill lot adjacent to the existing facility makes good sense. It will ease coordination of security and operations issues for the long term. These factors fit in well with smart growth goals.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The Detention Center Addition will be suitably located for all of these services. These issues were studied during the TRC review process.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The plans will not cause undue traffic congestion or create a traffic hazard

Staff recommends approval with the following conditions: (1) Water line extension plans must be submitted through the City of Asheville Engineering Department for review and approval; and (2) A construction-related traffic control plan will need to be developed and submitted to the City Traffic Engineer for review and approval.

When Councilman Mumpower asked about the loss of City employee parking, Mr. Glines said that the Parking Services staff has reviewed this and advises that City employee parking will be handled through existing parking.

Upon inquiry of Councilman Dunn, Mr. Jon Creighton, Assistant County Manager, explained that the existing facility is not a country club. He said the existing facility is experiencing severe problems with overcrowding, especially with the female population. The existing facility today has 393 inmates but they can only house sufficiently 353 inmates.

Councilman Dunn asked if the addition would house prisoners from other counties. Mr. Creighton responded that they would not be bringing in any other prisoners from other parts of western North Carolina, but if there is space available and the need arises, they will house prisoners from other facilities, which will be at a cost borne by that county.

When Councilman Dunn asked about when the facility might need to expand again, Mr. Creighton said it would be in approximately 8-9 years. He said the construction costs for this addition is $10 Million and construction is anticipated to take two years.

Upon inquiry of Councilman Mumpower about the design of the facility, Mr. Creighton responded that they did go through downtown design review and have made changes to lessen the impact as what people would say what they like or dislike about the appearance.

It was Vice-Mayor Bellamy's understanding that when the County approached the City with this idea approximately two years ago, the County was to have met with the surrounding neighborhood prior to bringing this before Council. She was disappointed that did not happen. Mr. Creighton responded that he didn't realize that, but would be happy to set up a neighborhood meeting.

201

Councilwoman Jones' comments on the need for a future expansion included her hope (1) that the City will do its part to be tough on crime so in the long run it will become apparent that we are a community that will not tolerate crime; and (2) that in the County's long-term plans, they think about prevention of crime.

Mayor Worley spoke about the good working relationship between the City and County on this project.

Mr. Fred English spoke in support of building this addition to the Detention Facility.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:52 p.m.

Councilman Mumpower moved to adopt Ordinance No. 3048, to issue a conditional use permit for the Buncombe County Detention Center expansion on property bordered by Davidson, Valley and Marjorie Streets, subject to the following conditions: (1) Water line extension plans must be submitted through the City of Asheville Engineering Department for review and approval; (2) A construction-related traffic control plan will need to be developed and submitted to the City Traffic Engineer for review and approval; and (3) Buncombe County staff have an informational opportunity for the local residents about the planned addition. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 402

E. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS THE CEDAR HILL ROAD AREA

ORDINANCE NO. 3049 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS THE CEDAR HILL ROAD AREA

Mayor Worley then opened the public hearing at 5:53 p.m.

Mr. Carter Pettibone, Planner II, said that this is the consideration of an ordinance extending the corporate limits of the City of Asheville to include property located east of Pisgah View Road and identified as the Cedar Hill Road Area. This public hearing was advertised on August 15, 2003.

The applicant, Lynda Rerych, has submitted an annexation petition for the Cedar Hill Road Area, which is located on the eastern side of Pisgah View Road near the intersection of Pisgah View Road and Cedar Hill Road. This area is contiguous to the existing corporate limits, being bordered to the south by the city.

The area proposed for annexation consists of 5.326 acres and is currently undeveloped. This area is within the extraterritorial jurisdiction and currently zoned RM-8 Residential Multi-Family Medium Density District.

City services for the area will begin on the effective date of annexation, which the applicant has requested be six months from approval date of the petition, or February 26, 2004.

City staff recommends City Council adopt an ordinance extending the corporate limits of the City of Asheville to include property located east of Pisgah View Road and identified as the Cedar Hill Road Area.

Upon inquiry of Councilman Ellis about any costs anticipated with this annexation, Mr. Pettibone said that the City would assume any debt to the fire department that is currently serving that area.

Upon inquiry of Councilwoman Jones, Mr. Pettibone said that Ms. Rerych is working with our Community Development Division on an affordable housing development of approximately 120 affordable units on this property and another piece of property to the south. On this particular property, approximately 42 units are proposed.

Mayor Worley closed the public hearing at 5:55 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 3049. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 408

F. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTY KNOWN AS THE KENSINGTON-WINDSOR AREA TO BE ZONED RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3050 - ORDINANCE TO INITIALLY ZONE RECENTLY ANNEXED PROPERTY KNOWN AS THE KENSINGTON-WINDSOR AREA RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley then opened the public hearing at 5:56 p.m.

Mr. Carter Pettibone, Planner II, said that this is the consideration of an ordinance to initially zone recently annexed property known as the Kensington-Windsor area RS-4 Residential Single-Family Medium Density District and RM-16 Residential Multi-Family High Density District. This public hearing was advertised on August 15 and 22, 2003.

The RS-4 District is intended to establish a medium-density residential area for single-family dwellings. The RM-16 District is intended to permit a full range of high density multi-family housing types along with limited institutional, public, and commercial uses appropriate within high density residential areas.

The Kensington-Windsor Annexation Area, which consists of 66.7 acres and 30 properties, was annexed by the City on June 30, 2003. The area is located south and east of the existing zoned districts on the east side of Sweeten Creek Road south of Mills Gap Road. Land uses in the annexation area include single-family and multi-family residential and vacant properties to the north, a large multi-family development along Sweeten Creek Road (Kensington Place Apartments), and a single-family subdivision to the south (Windsor Park).

In terms of surrounding zoning, there is RM-16 to the north along Mills Gap Road and to the west across Sweeten Creek toward the southern portion of the area. Commercial Industrial exists to the west across Sweeten Creek Road along the majority of the area's frontage and to the northwest towards the intersection of Sweeten Creek Road and Mills Gap Road. Properties to the east are outside the City Limits and zoned as part of Buncombe County's Limestone Township zoning.

The Planning and Development Staff recommends approval of the proposed initial zoning for the area for a number of reasons. In the northern section of the annexation area an RM-16 District would provide for the existing multi-family developments as well as for possible redevelopment of the adjacent and rather sizable parcels that are currently used for low density residential uses or are vacant. All the existing land uses in the proposed district are use permitted by right in the RM-16 District except for a mobile home which is located on the easternmost parcel along Mills Gap Road. This mobile home would most likely become a legally non-conforming use. RM-16 zoning would also continue the existing pattern of the RM-16 from the existing zoning to the north of the annexation area.

RS-4 zoning to the south would provide appropriate zoning for the existing single-family detached homes in the Windsor Park subdivision, which consists of 22 lots. No non-conforming use situations would result from rezoning this portion of the annexation area RS-4.

The Planning and Zoning Commission voted 6-0 to recommend approval of the proposed initial zoning for the Kensington-Windsor Annexation Area to RS-4 Residential Single-Family Medium Density District and RM-16 Residential Multi-Family High Density District. Staff recommends approval of the initial zoning as well.

Upon inquiry of Councilman Dunn, City Attorney Oast said that if the non-conforming use is damaged by fire or other casualty, it could be replaced, but not expanded, subject to specific provisions in the Code.

Mayor Worley closed the public hearing at 6:03 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3050. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 410

G. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTY KNOWN AS THE LEICESTER HIGHWAY AREA TO BE ZONED COMMERCIAL BUSINESS II DISTRICT AND HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3051 - ORDINANCE TO INITIALLY ZONE RECENTLY ANNEXED PROPERTY KNOWN AS THE LEICESTER HIGHWAY AREA TO BE ZONED COMMERCIAL BUSINESS II DISTRICT AND HIGHWAY BUSINESS DISTRICT

Mayor Worley then opened the public hearing at 6:05 p.m.

Mr. Carter Pettibone, Planner II, said that this is the consideration of an ordinance to initially zone recently annexed property known as the Leicester Highway area to be zoned

Commercial Business II District and Highway Business District. This public hearing was advertised on August 15 and 22, 2003.

The Highway Business District is established to address the needs of commercial development along major thoroughfares. The Community Business II District is established to provide areas for medium-to-high density business and service uses serving several residential neighborhoods.

The City annexed the Leicester Highway Annexation Area on June 30, 2003. The unzoned portion of the annexation area consists of 12 properties and 18.9 acres and makes up the area bounded by New Leicester Highway to the east, Eliada Home Road to the south, and Old County Home Road to the west. The remainder of the annexation area was part of the City's extraterritorial jurisdiction and was zoned at the time of annexation. Land uses in the proposed zoning area include a mix of commercial, vacant, and residential uses.

Currently, there is RS-8 Residential Single-Family High Density and Highway Business zoning to the east across New Leicester Highway and RM-6 Residential Multi-Family Medium Density and Community Business II/Conditional Use to the south across Eliada Home Road. Properties to the west are outside the City limits and unzoned.

In the southern portion of the annexation area, Highway Business zoning would mirror the existing Highway Business zoning to the east across New Leicester Highway. It would also accommodate the existing commercial uses in the proposed zoning district, which include a flea market, veterinarian clinic, retail sales, and automobile sales, as well as the remaining single-family residences, since all are permitted uses in the district. The only uses in the area that would not be permitted under Highway Business zoning would be two mobile homes, but they could remain as legally non-conforming uses. This zoning could also provide for the possible future redevelopment of the vacant and/or residential parcels on New Leicester Highway, which is a heavily traveled thoroughfare. Highway Business is proposed for eight of the twelve parcels that make up the unzoned area.

Staff feels Community Business II is an appropriate zoning district for the four remaining parcels to the north due to the proximity of the existing RS-8 zoning and residential development across Leicester Highway to the east. The existing land uses in this area (office, residential, and vacant) are permitted uses in the Community Business II District. In addition, since these parcels are generally shallower as measured from New Leicester Highway than those to the south, they would benefit from the smaller setbacks allowed in the Community Business II District if they were to be redeveloped.

The Planning and Zoning Commission voted 6-0 to recommend approval of the proposed initial zoning for unzoned portion of the Leicester Highway Annexation Area to Highway Business District and Community Business II District. City staff recommends approval as well.

Mayor Worley closed the public hearing at 6:07 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3051. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 413

H. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR GROUP HOMES IN CERTAIN RESIDENTIAL ZONING DISTRICTS

ORDINANCE NO. 3052 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO PROVIDE FOR GROUP HOMES IN CERTAIN RESIDENTIAL ZONING DISTRICTS

Mayor Worley opened the public hearing at 6:10 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for group homes in certain residential zoning districts. This public hearing was advertising on August 15 and 22, 2003.

This code amendment provides for group homes in the RS-8 Residential Single-Family High Density District, RM-6 Residential Multi-Family Low Density District and RM-8 Residential Multi-Family Medium Density District residential zoning districts as a conditional use. Additionally, the amendment adds group homes to the Urban Residential District as a use by right subject to special requirements (i.e., treating it the same as RM-16 Residential Multi-Family High Density District). This amendment was prepared pursuant to City Council direction to expand the zoning districts that group homes may be allowed in. The amendment includes design and operational standards for group homes in these zoning districts.

The amendment has been routed to Coalition of Asheville Neighborhoods, the Affordable Housing Task Force of Asheville and Buncombe County, CREIA, and Council of Independent Business Owners for review and comment.

On August 6, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0, including two amendments. City staff recommends approval of the proposed code amendment as amended.

Upon inquiry of Councilman Dunn, Mr. Shuford explained the language "a use by right subject to special requirements."

At the request of Councilman Peterson, Mr. Shuford explained other restrictions that would apply if a group home were located in a single-family district.

Councilman Peterson was concerned that by not including the RS-2 and RS-4 districts in this amendment, it appears that this amendment is based more on the class and income of the zoning districts. Mr. Shuford explained that in terms of the RS-8, RM-6 and RM-8 districts, staff felt that those were more intense-type residential districts and should be subject to these more intense requirements. He said the RS-8 is a fairly intense zoning district that allows 8 residential units to the acre and that way it is very similar to the RM-8, which is a multi-family zone - in fact, it allows more density than the RM-6. We did select these districts based on their potential of allowable density and the fact that you would expect a greater concentration of human beings in those types of districts Mr. Shuford noted that under State law you can have a family care home which would allow up to six individuals to be cared for and that is regarded as a single-family use under our law. That could occur in our RS-2, RS-4 or any of our zoning districts. He said that he would be happy to study and evaluate the possibility of other residential zoning districts for this amendment.

Upon inquiry of Councilman Mumpower, Mr. Shuford explained the protest petition process and why it would not be applicable with this amendment.

Upon inquiry of Councilman Dunn, Mr. Shuford explained how group homes are regulated.

City Attorney Oast said an attorney for the Blue Ridge Mental Health has requested an amendment to clarify in the definition of group homes that family care homes are not included within that definition. He agreed with that amendment.

Ms. Laurie Tollman, Executive Director of Flynn Christian Fellowship Homes and Chair of the Asheville-Buncombe Homeless Coalition, spoke in support of this proposed amendment.

Mayor Worley closed the public hearing at 6:31 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 3052 including the addition of all residential districts and the amendment clarifying the definition as recommended by City Attorney Oast.

City Attorney Oast felt that to expand this ordinance to include more residential districts than what is presented before Council now would require re-advertisement.

Councilman Peterson withdrew his motion and then moved to adopt Ordinance No. 3052 including the addition of a sentence to the definition for group homes that reads, "this definition does not include family care homes as defined herein." This motion was seconded by Councilwoman Jones.

Councilman Mumpower was not concerned about group homes, but was concerned about intentionally setting up a process that supercedes the neighborhood's ability to use the protest petition process. That process is state statutory authority granted for a reason to help protect neighborhoods from our intrusions.

Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods, said that their main concern was the 600-foot separation. Regarding the protest petition, she sees a trend of cutting the public out of attending Council meetings and everything going to staff approval. They have worked hard over the past 20 years to get citizens involved. They recognize the need for group homes, but were concerned about the protest petition process being not available.

The motion made by Councilman Peterson and seconded by Councilwoman Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 - PAGE 416

IV. UNFINISHED BUSINESS:

A. RESOLUTION ADOPTING THE ASHEVILLE CITY PLAN 2025 AS THE OFFICIAL COMPREHENSIVE PLAN FOR THE CITY OF ASHEVILLE

Councilman Dunn moved to postpone action on this matter until the first of 2004 to give City Council more time within which to study the large document. This motion was seconded by Councilman Ellis and carried unanimously.

V. NEW BUSINESS:

A. ORDINANCE NO. 3053 - ORDINANCE AMENDING SPEED LIMITS AND ESTABLISHING THROUGH TRUCK PROHIBITIONS

Summary: The consideration of an ordinance to enact or change speed limits and enact through truck prohibitions on specific city streets.

The streets listed below have been identified for speed concerns or truck concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions and/or speed studies. Streets with requests for truck prohibitions have been reviewed for appropriateness. The Police Department supports these recommendations.

Through Truck Prohibitions

The following streets are residential streets on which it is recommended that through trucks be prohibited.

1. Catawba Street, in its entirety
2. Olney Road, in its entirety
3. Swannanoa Avenue, in its entirety
4. Vance Crescent, in its entirety
5. Vance Crescent Extension, in its entirety

15 Miles Per Hour

The following streets are narrow residential streets with extreme street geometry problems, including severe and frequent crests and curves, and heavily used on-street parking. These streets warrant a significantly lower speed limit than the typical 25 mph. The recommended safe operating speed on these streets is 15 mph:

1. Circle Street, in its entirety
2. Huntington Street, in its entirety
3. Knob Street, in its entirety
4. Pine Street, in its entirety
5. Tuskeegee Street, in its entirety

20 Miles Per Hour

Most of the following streets are narrow residential streets with street geometry problems, including frequent crests and curves, and heavily used on-street parking. These streets warrant a lower speed limit than the typical 25 mph. Brook Street and Oak Street are business district streets with a combination of operating characteristics and street geometry features that warrants a speed limit slower than the current 35 mph speed limits. Pedestrian crossings and on-street parking maneuvers are frequent, and the roadway width is constrained. As stated in Section 19-111 of the Asheville Code of Ordinances, business district streets are to be 20 mph. The recommended safe operating speed on these streets is 20 mph:

1. Brook Street (US 25A), between Biltmore Plaza and Fairview Road (NCDOT)
2. Clemmons Street, in its entirety
3. Dundee Street, in its entirety
4. Grail Street, in its entirety

5. Hilderbrand Street, in its entirety
6. Jordan Street, in its entirety
7. Lincoln Avenue, in its entirety
8. McTindle Circle, in its entirety
9. Mountain Street, between Martin Luther King, Jr. Boulevard and Hilderbrand Street
10. Peeler Drive, in its entirety
11. Ridge Street, in its entirety
12. South Beaumont Street, between Martin Luther King, Jr. Boulevard and Hazzard Street
13. South Jordan Street, in its entirety

25 Miles Per Hour

Most of the following streets are typical local residential streets without street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. Eliada Home Road and Chestnut Street are residential collector streets which have a combination of street geometry features which warrant speed limits slower than the typical speed limit for residential collector streets of 30 mph. The recommended safe operating speed on these streets is 25 mph:

1. Eliada Home Road (SR 1318), between New Leicester Hwy and east corporate Limits (NCDOT)
2. Bevlyn Drive, in its entirety
3. Birch Court, in its entirety
4. Birch Lane, in its entirety
5. Broadview Drive, between Fairview Road and Onteora Boulevard
6. Carroll Avenue, in its entirety
7. Charlotte Street, between Edwin Place and Evelyn Place
8. Cherry Street (S. Asheville), between Royal Pines Drive and Birch Court
9. Chestnut Street, between Charlotte Street and Montford Avenue
10. Cumberland Avenue, in its entirety
11. Dover Street, in its entirety
12. Elkmont Drive, in its entirety
13. Farrwood Avenue, in its entirety
14. Hazzard Street, between Charlotte Street and Knob Street
15. Hazzard Street, between Pine Street and College Street
16. Highland Street, in its entirety
17. Linden Street, in its entirety
18. Max Street, in its entirety
19. Mimosa Drive, in its entirety
20. Mountain Street, between Martin Luther King, Jr. Boulevard and College Street
21. Mulberry Street, in its entirety
22. North Oak Forest Drive, in its entirety
23. Oak Forest Boulevard, in its entirety
24. Pheasant Drive, in its entirety
25. South Oak Forest Drive, in its entirety
26. Swannanoa Avenue, in its entirety

30 Miles Per Hour

The following streets are streets with features that warrant operating speeds less than the typical collector street speed limit of 35 mph. Charlotte Street is a transitional overlay district intended to promote street-oriented businesses and pedestrian use, and has significant pedestrian and bicyclist usage adjacent to the travel lanes. Fairview Road is a narrow winding collector street with limited sight distance in a number of locations and residential frontage in many areas. Both streets have frequent roadside hazards (i.e. utility poles) within the desired "clear zone", the space between the curb and hazards necessary for 35 mph. Moody Avenue is a primarily residential street that exhibits characteristics of a collector street and has adequate sight distance. Woodfin Street is located in the Central Business District but does not exhibit the characteristics that warrant the typical 20 mph business district speed limit. The recommended safe operating speed on these streets is 30 mph:

1. Charlotte Street, between Orchard Street and Edwin Place
2. Fairview Road, between Sweeten Creek Road and Fairview Street
3. Moody Avenue, between Monte Vista Road and Brookside Circle
4. Oak Street (Central Business District), in its entirety
5. Woodfin Street, between North Market Street and Oak Street

Mr. Butzek said that after reviewing Oak Street (Central Business District), he would recommend the speed limit be increased from 20 mph to 30 mph.

The Engineering Department requests that City Council approve the ordinance amending these speed limit and through truck prohibition changes.

At the request of Vice-Mayor Bellamy, Mr. Butzek said that he would do a field review of Dundee Street to see if should be reduced from 20 mph to 15 mph and include that in the next round of changes.

Councilman Mumpower understands the decisions made to change speed limits are not arbitrary, and not made on the basis of neighborhood pressure, political pressure or personal preferences, but are technical recommendations. However, he was concerned about the enforcement of these 58 changes to our speed limits as well as the enforcement of our existing laws. Again, he didn't feel we have adequate coverage for safety management in the City.

Discussion then surrounded whether we have other streets in Asheville that are out of compliance from a technical standpoint, e.g., Kimberly Avenue and Edgewood Road and Creighton Road.

After discussion, Councilman Mumpower and Councilman Dunn felt it would be good to ask staff to research streets in the City that may not be in compliance of the technical standards and report back to Council with suggested changes. Councilman Peterson disagreed in that he didn't think it was productive to have staff review changes made by a prior Council who spent the time to address the concern.

Mayor Worley was satisfied that since we have a traffic engineer, we should leave it up to him to report to Council with streets that are out of technical compliance.

Mr. Fred English requested City Council to prohibit the use of engine brakes in the City of Asheville.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3053. This motion was seconded by Councilwoman Bellamy and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE 419

B. PLANNING & ZONING COMMISSION

It was the consensus of City Council to interview the following for vacancies on the Planning & Zoning Commission: Jane Mathews, Andy Brown, Robert Sweetser, Thomas Byers, Mike Vance, Derek Weekley, Harry Weiss and Steven Sizemore. Said interviews will be held prior to the September 2, 2003, worksession with appointments being made at the worksession.

VI. OTHER BUSINESS:

Day of Caring

Vice-Mayor Bellamy announced that the Day of Caring will be held on September 11, 2003, and encouraged anyone interested in participating to call the United Way.

Claims

The following claims were received by the City of Asheville during the period of August 8-21, 2003: Hugh Wiggins (Parking Services), Steve Ward (Transit Services), Julie Davis (Water), Kim Hunt (Water), Carolyn Hembree (Streets) and David McConville (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English spoke about the problem of people posting signs on poles.

Mr. Dennis Justice, Fletcher resident, suggested City Council meet with the local delegation at the Civic Center prior to the NBA Pre-Season game on October 8, 2003. He felt the Civic Center will be packed which is a good opportunity to show the pros and cons of a packed house. He also suggested a Town Hall Day to discuss the destiny of the Civic Center.

Mr. Mike Fryar passed out two letters from attorney Martin Reidinger regarding the City's recent annexation of his property. Mr. Fryar explained how City Council made a mistake in annexing his property. City Attorney Oast said that he has a meeting scheduled with Mr. Fryar and would report back to Council.

Closed Session

At 7:40 p.m., Councilwoman Jones moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Ridgefield Properties, L.C.C., et. Al.; Frances C. Briggs, et al.; Carolina Power & Light Company; and City of Asheville – statutory authority contained in N. C. Gen. Stat. sec. 318.11 (a) (3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 8:10 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 2, 2003 - 4:00 p.m.
Council Chamber – 2nd Floor – City Hall

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

UPDATE ON THE DOWNTOWN SOCIAL ISSUES TASK FORCE

Mr. Pat Whalen, Chair of the Downtown Social Issues Task Force, updated City Council on the Task Force's progress to date.

In December 2002, City Council appointed a Downtown Social Issues Task Force to develop recommendations to Council about social problems in downtown, such as homelessness, graffiti and panhandling. The Task Force began meeting in March 2003. Since then the Task Force has educated each other about problems in downtown and the services currently available. At present, the Task Force is working on goals and recommendations.

Because many of these problems have deep causes, the Task Force realized that any solutions it proposed would have to be feasible and manageable. At the beginning of this process a set of principles was adopted to guide any recommendations put forth in the future. He reviewed the principles.

Additionally, the Task Force has split into two working committees to address both immediate problems and conditions leading to social problems. These committees are the Behaviors Working Committee and Conditions Working Committee. The Behaviors Committee is developing recommendations to deal with graffiti, panhandling, public drunkenness and loitering or blocking the sidewalk. Meanwhile the Conditions Working Committee is working on reasonable solutions for dealing with the chronically homeless, those who are at risk for being chronically homeless and homeless youth.

During the process of developing recommendations, the Task Force is researching what has been done in other communities, how well those strategies have worked, and what would be appropriate for Asheville. The Task Force is planning on submitting its report to City Council in December 2003 or January 2004.

No action is required by City Council at this time.

CONSENT AGENDA:

Councilwoman Jones moved to waive the rules and take formal action on the two Consent Agenda items. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION NO. 03-155 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT FROM THE FEDERAL AVIATION ADMINISTRATION IN AN AMOUNT NOT TO EXCEED $3,085,435

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $3,085,435.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $3,085,435, is for the project consisting of: rehabilitate service road (replace Southeast Aircraft Rescue Fire Fighting Road culvert); rehabilitate taxiways; acquire snow removal equipment; construct Runway 16/34 blast pads; and expand terminal building (baggage claim expansion and hold room addition) Phase II.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-28.

Councilman Ellis spoke in support of the grant.

RESOLUTION BOOK NO. 27 – PAGE 491

RESOLUTION NO. 03-156 - RESOLUTION AUTHORIZING THE PURCHASING DIRECTOR TO DISPOSE OF CITY-OWNED PERSONAL PROPERTY BY PUBLIC AUCTION ON SATURDAY, OCTOBER 4, 2003, AT 10:00 A.M. IN THE WILLIAM F. WOLCOTT JR. PUBLIC WORKS COMPLEX AT 161 S. CHARLOTTE STREET, ASHEVILLE NC

Summary: The consideration of a resolution authorizing the Purchasing Director to dispose of City-owned personal property by public auction.

The resolution authorizes the City's Purchasing Division to hold a public auction to dispose of motor vehicles, off-road equipment, and other miscellaneous property declared as surplus by various City departments. The auction to be held Saturday, October 4, 2003, at 10:00 a.m. in the William F. Wolcott Jr. Public Works Complex located at 161 S. Charlotte Street, Asheville, North Carolina.

Staff recommends Council adopt the resolution authorizing the Purchasing Director to hold a public auction on October 4, 2003 at 10:00 a.m. at the Public Works Complex, 161 S. Charlotte Street.

RESOLUTION BOOK NO. 27 – PAGE 492

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

NEW OR UNFINISHED BUSINESS:

RESOLUTION NO. 03-157 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY FOR THE CONCEPT OF THE JOINT EMERGENCY COMMUNICATIONS CENTER WITH INTERIM TRANSFER OF THE ASHEVILLE FIRE AND RESCUE DISPATCH OPERATIONS UNTIL A JOINT CENTER IS CONSTRUCTED AND OPERATIONAL

Fire Chief Greg Grayson said that this is the consideration of an agreement with Buncombe County for the concept of the joint emergency communications center with interim transfer of the Asheville fire and rescue dispatch operations until a joint center is constructed and operational.

During the 2003-04 Council Budget Retreat in January, 2003, city staff presented Council with concerns about the delays that were occurring with over 32,849 emergency 911 fire/rescue and police calls that are being transferred to the City of Asheville from Buncombe County. At that time, staff recommended to City Council that the City of Asheville create its own primary 911 Public Safety Answering Point (PSAP) in order to provide more rapid response to all emergencies occurring in the City of Asheville.

Council requested more information on the subject and most Council members toured the Buncombe County 911 emergency communications center, the City of Asheville emergency communications center and the Sheriff's communications center. In the past year, Council has had much discussion about the 911 dispatch situation. In addition, Buncombe County Commission Chairman Nathan Ramsey stepped forward with a written proposal on behalf of Buncombe County to construct a joint emergency communications center that should be built and operational in approximately 2.5 years.

The operational benefits of a joint emergency communications center are significant. Most importantly, all 911 callers will experience the most minimal delay possible in receiving emergency services. Council took action affirming support to participate in a joint emergency communications center when it is built by Buncombe County. Council's commitment to this joint venture will allow Buncombe County to properly design a joint center. In addition, city and county staff can begin working together in planning and facilitating the joint operation.

On June 3, 2003, City Council authorized the City Manager to execute a performance based contract with Buncombe County for dispatch of fire/rescue calls (approximately 11,389 calls annually) and continue dispatching police emergency calls as we are doing currently (approximately 21,460 calls annually) during this 2.5 interim period. This arrangement would be in effect until a joint consolidation communication center is constructed and operational.

City staff has been working closely with County staff over the past sixty days to develop an agreeable, performance based contract for fire and rescue dispatch during the interim period. The contract is based upon national standards for communications, accreditation and communications operations.

Some highlights of the contract are as follows:

- Buncombe County is to construct a facility for a joint emergency communications center at no cost to the City of Asheville.
- Buncombe County is to provide all of the fixed dispatch equipment necessary for the entire joint communications center and the maintenance for that equipment at no expense to the City of Asheville. All equipment purchased will have to meet the City's technical requirements.
- Buncombe County will also agree to provide the City new consoles on or before January 1, 2005, for the police dispatch function.
- In the interim period between January 1, 2004, and the time that the new joint emergency communications center is constructed and operational (approximately January 1, 2006), Buncombe County will provide emergency dispatch services for the Asheville Fire and Rescue Department. In order to accomplish this task, Buncombe County will add three full-time telecommunicators in the County dispatch center. This enhancement will be at no cost to the City of Asheville.
- Buncombe County has agreed to provide the City with a quarterly performance report to ensure that emergency fire and rescue dispatches are being handled according to national standards for emergency call processing.

- The City of Asheville agrees not to establish its own Public Safety Answering Point (PSAP) as long as Buncombe County meets their contractual agreements.

- There is specific termination language in the agreement in the event that either party determines that the agreement is not meeting the needs of the governmental unit.

City staff recommends City Council approve the agreement with Buncombe County for the concept of the joint emergency communications center with interim transfer of Asheville fire and rescue dispatch services until a joint center is constructed and operational.

Councilman Dunn was proud that the City and County worked together realizing this is the best system for our entire community.

Councilman Mumpower thanked Councilman Dunn for his hard work in this matter.

Councilman Mumpower moved to waive the rules and take formal action at this meeting. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Councilman Dunn moved for the adoption of Resolution No. 03-157. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 493

RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Mayor Worley said that since two candidates were unable to attend their interviews prior to this meeting, those interviews would be arranged on September 16, 2003, and City Council would take formal action on appointing members at the September 23, 2003, meeting.

CONTINUATION OF CONSIDERING ENTERING INTO AN OPTION TO CONVEY CERTAIN CITY-OWNED PROPERTY IN THE CENTRAL BUSINESS DISTRICT TO THE GROVE PARK INN FOR A MIXED USE DEVELOPMENT PROJECT

Mayor Worley said that this public hearing was opened on August 19, 2003, and continued to this date to receive additional information regarding proposed option with Grove Park Inn.

Planning & Development Director Scott Shuford said that at the August 19, 2003, meeting, several questions arose. He has since created a link on our website to answer those questions. Using pictures, he responded to the following questions: what is the Grove Park Inn proposing; how is the City considering this proposal; why didn't the City open the development of these two sites up for competitive bidding; is the Site A property park of the land bequeathed by George Willis Pack; what is the relationship between the Grove Park Inn proposal and the Pack Square Renaissance Plan; what design controls will be in place to govern the design of the buildings on Site A and Site B; how do these two projects fit into the City's plans for downtown; will the sale of these two properties, especially Site A, decrease the amount of open space in downtown Asheville; how will the development of Site A affect emergency vehicle traffic; how will this development affect Bele Chere and other festivals; will these big developments cut into the existing markets for downtown businesses and residential providers; and will there be traffic congestion after eliminating the angled extension of Patton Avenue.

City Attorney Oast said that based on Council comments at the public hearing on August 19, he has prepared some more specific language for the design issues to be incorporated into the City's proposed option with the Grove Park Inn for the purchase of property located in the area bounded by College, Market and Spruce Streets, and traversing Patton Avenue. Specific issues covered include building height and footprint, sidewalks, preservation of the view corridor, and location of parking and service facilities. In drafting this language, he had reference to Council's identified concerns, the Pack Square Conservancy's (PSC) guidelines (as currently proposed) and Grove Park Inn's (GPI) requirements.

City Council also requested clarification as to the non-monetary consideration involved in this transaction. That consists primarily of improvements to public infrastructure in the immediate vicinity of the building site, such as sidewalks, and restoration of any disturbed areas in accordance with the approved plan for the Pack Square/City County Plaza area. It is difficult at this time to be specific, or to quantify what those improvements might be.

He said the above-noted design changes only affect paragraph 4. While reviewing, in detail, the changes below, he also used drawings prepared by GPI showing a slight revision in the southern line of the Subject Property, based on Council's desire not to intrude on the Spruce Street sidewalk, and illustrating the horizontal dimensions of the above-ground building envelope.

4. Building Design; Other Matters. GPI and the City further agree to the following in connection with the conveyance of the Subject Property and the development thereof by GPI:

   a. GPI shall comply in all respects with the terms and provisions of the Downtown Development Agreement to the extent that said Agreement applies to the Subject Property.

   b. GPI shall comply with the terms and provisions of the PSC Agreement as to the development of the Subject Property to the same extent as the City would have to comply with said Agreement, and nothing in this Contract or the Development Agreement may be construed to abrogate or limit the applicability of the PSC Agreement to development of the Subject Property.

   c. Notwithstanding the terms and provisions of the Downtown Development Agreement or the PSC Agreement, the following provisions shall apply to the development of the Subject Property, and shall be incorporated in the deed from the City to GPI such that said provision shall run with the land, and be binding in perpetuity on GPI and any of its successors and assigns.

      (1) The height of the primary exterior shell of the building shall not exceed the height of the north facade of the Jackson Building as measured from the sidewalk to the lower edge of the tile roof of the penthouse structure on top of the Jackson Building; this dimension is 128.7 feet, but for the purposes of the application of this height limitation it shall be 130 feet, and shall be measured from the lowest point of the south facade of the building to be constructed by GPI. This height limitation may be exceeded by a penthouse structure; provided, said penthouse structure is set back from the primary exterior shell on all sides, does not exceed 24 feet in height, and does not cover more than 40% of the horizontal roof area of the building. There shall be no further height allowances or projections for any purpose, including mechanical equipment installation(s). The limitations on the size of the penthouse structure shall apply even if the height of the primary exterior shell of the building does not exceed 130 feet.

(2) Building footprint. The exterior dimensions of the primary exterior shell of the building shall not exceed 158.00 feet wide, measured in a westerly direction from the point of intersection of the southern line of the sidewalk on the south side of College Street, extended, with the western line of the sidewalk on the west side of Spruce Street, extended, parallel to College Street (approximately east-west), by 60 feet deep, measured in a southerly direction perpendicular from the southern line of the sidewalk on the south side of College Street (approximately north-south). These dimensions are based on the current configuration of the streets in the area. To the extent that implementation of the approved plans for the Pack Square / City-County Plaza area requires or permits alterations in these dimensions while remaining consistent with the other design limitations specified herein, including the PSC design guidelines, this agreement may be amended to require or permit different horizontal dimensions, provided that no such amendment may limit the horizontal area created by the primary exterior shell of the building, measured on the outside, to less than 9450 square feet without GPI's consent.

(3) Preservation of view corridor. No part of the primary exterior shell of the building may intrude into the Vance Monument view corridor, which is the northwest corner of the Buncombe County Courthouse and the southwest corner of the Asheville City Building, as seen from a point measured five feet above the base and two feet east of the eastern face of the Vance Monument.

(4) Sidewalks. The building shall provide for sidewalks along its north, east, and west sides. The north side or College Street sidewalk shall be preserved or replaced in its current location and width. The east or Spruce Street sidewalk and the west or Market Street sidewalk shall be preserved, replaced or constructed at their current widths or otherwise to City standards, and may be relocated in accordance with the PSC plan.

(5) Underground parking. The parking facility for the building, if located on the Subject Property, may extend outside the building footprint, but not beyond the lines of the Subject Property; provided, that any part of any parking facility that extends south beyond the southern face of the constructed building must be completely below ground level, and the area above said parking facility shall be developed in accordance with the approved plan for the Pack Square / City-County Plaza Area, as developed by PSC and approved by the City. If approved by PSC, mechanical appurtenances such as air vents and utility equipment serving the parking facility may project above ground.

(6) Other design issues. Service facilities, such as refuse dumpsters, electrical and other utility connections, shall be located within the building or placed underground.

d. To the extent feasible, the City and GPI will coordinate with each other as to the location, relocation, or reconstruction of any utilities, infrastructure, public amenity, or public area in the vicinity of the Subject Property to the end that the area of City-County Plaza and Pack Square that is disturbed by GPI's project will be restored in a manner consistent with the City's plans for the area, as developed and adopted pursuant to the PSC Agreement.

e. The City will cooperate with GPI and provide reasonable assistance in connection with the development of the Subject Property with respect to such matters as temporary and permanent road closings and other permits and approvals necessary or desired by GPI for the project, provided that nothing shall require the City to exercise any discretionary function in a particular way.

He said that based on further direction from Council, further changes to the agreement will be made and presented for Council's consideration on September 16, when Council is scheduled to vote on it.

Mr. Mike McCreary, Asheville resident, noted that there is no building on Site A of the Pack Square Conservancy's website. Asheville's website is the one that contains the building on Site A. He felt that accommodating the community's concern about the historic integrity of this space and assuring economic development and prosperity do not have to be mutually exclusive. Mr. Shuford explained the reasoning behind the Conservancy's drawings.

Mr. Walter Plaue, resident on Wilderness Road, basically supported the concept, however, he was concerned with the details, in particular the height elevation and building footprint.

Ms. Julie Brandt, property owner in Asheville, said that at the Conservancy's design guidelines input meeting, there was no discussion of the design guidelines. She was confused what roles the Pack Square Conservancy, Grove Park Inn, and City Council play in the design guidelines. She said that this property on Site A is public greens space and she wants it to remain that way.

Mr. Wally Bowen, resident on Caledonia Road, said the community is concerned about the process and asked for an explanation of what the law is regarding competitive bidding.

Mr. Barry Summers, resident on Ben Lippen Road, spoke against the City selling its limited public green space to private developers.

Mr. W. Louis Bissette, attorney representing the Grove Park Inn, said that he remembered in the 1980's when the City scoured the country to find any developer who would even consider to come to downtown Asheville and make an investment because we had rows and rows of vacant buildings. He spoke in support of this project in that the Grove Park Inn has been in Asheville for 100 years, employs 1,000 people, has been a tourism engine since 1913, and has the financial ability to construct a first class building – a $30 Million increase to our tax base. That will be $1 Million in new taxes each year to provide new City services and help with affordable housing. New jobs will be provided as well. This option allows the Grove Park Inn to take another step and look at the feasibility of the project. If Council continues to reduce the footprint and height of the building, it will come to a point that it's not economically feasibility for the Grove Park Inn to build it.

Mr. Frank Sagendorf, part-time resident of Asheville, spoke about why he preferred the building not be constructed.

Mr. Fred English felt the Asheville taxpayers should vote on whether the City should sell this property to the Grove Park Inn.

There was considerable discussion initiated by Councilman Peterson about the height of the building, primary exterior shell of the building and rooftop ornamentation.

Mr. Shuford responded to various questions and comments from Council, some being, but are not limited to: will the building blend in more with the City Hall, Courthouse and Jackson Building or the more modern Biltmore Building and BB&T Building; is there any limitation on what the Grove Park Inn could build on the front portion of their building; what limits are we placing on a multi-story secondary exterior shell on this building; and are awnings proposed on the building.

Councilwoman Jones was concerned that Council recently adopted the Pack Square design guidelines that had the depth of the structure from College Street at 51 feet. Now we are increasing it to 60 feet. Mr. Shuford explained that there was a clear concern of Council at the August 19 public hearing that there be some limit to the extent to which a variance could be granted by the Pack Square Conservancy if the Grove Park Inn came back with an architectural rationale for some deviation from that 51 feet. The intent of this is to take a standard architectural dimension of 60 feet and establish that as the maximum that the City would be willing to live with if the Pack Square Conservancy granted a variance.

At 6:30 p.m., Mayor Worley called a short recess.

City Attorney Oast and City Engineer Cathy Ball responded to various questions/comments from Council, some being but are not limited to: was the appraisal combined for two lots on Site A or was each lot appraised separately; how old was the appraisal for the properties the City purchased for the Haywood Street Parking Deck; how much did the City pay for each parcel to build the Haywood Street Parking Deck; what are the comparable sites used in the appraisal for Site A; when there is a scare resource in the City (like green space), is that factored into appraisals; how many acres does the City own in open space, including the watershed; do we have any ability within the option to make sure this development will remain with the Grove Park Inn in the future; does the option require the Grove Park Inn to rebuild the sidewalks around the building to City standards; what will happen to the energy loop and the clock located on Site A and will the Grove Park Inn be required to pay for those relocation costs; will the Grove Park Inn be required to pay for any traffic signalization upgrade that will result from the realignment of traffic in that area; and how much on-street parking will be lost with the closing of a portion of Patton Avenue.

Vice-Mayor Bellamy asked for information what kind of mechanisms we can put in place to ensure that we preserve the green space and open space that the Pack Square Conservancy design guidelines have control over.

Councilman Dunn felt that the City of Asheville has been very good stewards of public lands.

Councilman Peterson asked for additional information on whether or not balconies would be permitted on the building on Site A. He felt that even though balconies permit a great view for the people who live inside but are very unattractive for the people on the street.

Councilman Peterson asked for a definition of primary exterior shell.

City Attorney Oast said that under the law, the City is required to disclose the appraised value of the property at the public hearing. Council asked at the August 19 public hearing to get an update on the appraisal that we had, but the appraiser has been out of town and was not able to get us that information for this meeting. He said he would have that information at the September 16, 2003, meeting.

Vice-Mayor Bellamy moved to continue the public hearing until September 16, 2003, for the purpose of receiving the update of the appraisal; and, on that date, public comment will be limited to any new information received at the September 16 meeting. This motion was seconded by Councilman Peterson and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:23 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 16, 2003 - 3:00 p.m.
1st Floor North Conference Room – City Hall

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT AGENDA:

Contract for Glendale Avenue Stormwater Drainage Improvement Project

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Hobson Construction Company Inc. to install drainage located along Glendale Avenue in Asheville, North Carolina.

The City is in need of a contractor to provide stormwater installation services for a drain line along Glendale Avenue between Thompson Street and McAurthur Lane. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for stormwater installation services were solicited and two responses were received. The project was rebid and there were two responses received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Hobson Construction Co. Inc.	0	Yes	Yes	$75,300
Buckeye Construction Co. Inc.	0	Yes	Yes	$104,034

Funding for this project has already been allocated in the Public Works Department's Stormwater Materials budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Hobson Construction Company Inc. to install a drain line along Glendale Avenue.

Agreement with the N. C. Dept. of Transportation for Airport Grant

Summary: The consideration of a resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

The City is required by law to execute certain contracts and agreements for the Airport Authority. This grant agreement is to allow the Authority to receive additional matching funds from the N. C. Dept. of Transportation ("DOT") for the CAT II TDZ Lighting-Runway 34, Raise MITL, Perimeter Security Road-Phase II.

The grant, in the amount of $33,595, has been approved by DOT based on a total estimated cost of $671,899.

City staff recommends adoption of the resolution.

Amend City Council's 2003 Scheduled Meeting Dates as follows: (1) Cancel September 30, 2003, community meeting; (2) reschedule Tuesday, October 7, 2003, worksession to Wednesday, October 8, 2003; and (3) reschedule Tuesday, November 4, 2003, worksession to Wednesday, November 5, 2003

Amendment to Civil Penalties Schedule for Unpaid Parking Citations

Summary: The consideration of an ordinance restricting the number of late penalties for unpaid parking citations to a maximum of three.

A review of the collection of parking citations after the addition of three late penalties indicates a very low collection rate. In addition, collection agencies and the state income tax garnishment system requires a set amount due that is not changing on a monthly basis to use these collection methods. By adoption of this ordinance, the City of Asheville would be in a position to better use the services of collection agencies and/or the state income tax garnishment program to increase compliance of parking ordinances and collection of amounts due.

Staff requests that City Council approves the ordinance.

Transit Services Director Bruce Black responded to various questions from Council.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

STORMWATER UTILITY FEASIBILITY STUDY

Mayor Worley said that this item will be postponed until the October 8, 2003, worksession.

TELECOMMUNICATIONS ORDINANCE

Public Works Director Mark Combs said that that this is the consideration of a telecommunications ordinance establishing a framework for communications infrastructure franchises and permits in the City limits.

The City needed a uniform way to regulate use, spacing, safety, etc. For example, you can have water, sewer, telephone, power, cable television, fiber optic, and possibly others in the future, in the public rights-of-way. Telecommunication consists of (1) fiber optic cable and other communications infrastructure located in public rights-of-way; (2) overhead (on existing or new poles; (3) underground (new or existing conduits); and (4) all new infrastructure. A telecommunications committee of City staff was formed to address the increasing use of the City's rights-of-way for utilities. The three key tasks for the committee was to: 1) Draft an ordinance; 2) Construct 'universal' franchise agreement; and 3) Convene to review and negotiate proposals.

In many cases, providing broadband cable access along certain routes makes such a system proprietary to the company in that particular area, and as a result companies have been scrambling to install such infrastructure in hopes of monopolizing future customers and access.

In the recent past, several cable companies have approached the City seeking exclusive rights to install fiber optic cable. Without a framework (ordinance) from which to negotiate non-exclusive franchises and permits, staff has been unable to develop long-term, binding legal agreements to benefit the franchise, current and future customers, and the City.

The goal of a telecommunications ordinance is that it will provide framework for (1) non-exclusive franchises; and (2) revocable permits. The ordinance will establish standards for: (1) telecommunications companies and developers and City staff (to base franchise agreement on); and (2) promote orderly development of infrastructure to insure: orderly installation within existing rights-of-way; customer access and services; and City and other government access.

In response to this need, a telecommunications ordinance was drafted which specifies the following sub-parts:

1 Franchise required: No telecommunications system can use public rights-or-way in the City without a franchise.
2. Franchise fees: As set forth in the (negotiated) franchise.
3. Service: Must be installed and in service within 12-months and "...in accordance with the conditions of its certificate of public convenience and necessity."
4. Construction and technical standards: Grantee must install and maintain their system consistent with listed laws, ordinances, technical standards/specifications.
5. Service to the City: Terms of service to the City at favorable rates.
6. Transfer of ownership or control: The City must be notified of any intent to transfer ownership or control and the transferee is required to accept all terms, provisions and amendments.
7. Franchise renewal: The City may grant or deny a franchise and Grantee will have no property right in the public rights-of-way if not renewed.
8. Forfeiture or revocation: Sets forth seven (7) grounds for revocation (breach of franchise, disposition of system, restoration, abandonment and extended operation).
9. Terms of renewal: As negotiated with each Grantee.
10. Receivership and foreclosures: 120-day termination clause; termination by judicial action.
11. Performance Bond: Required with details of terms and conditions.
12. Insurance: Proof of insurance and maintenance of policy required.
13. Indemnification: Detailed conditions regarding release, indemnity, hold harmless, claims and broad construction (per N. C. Gen. Stat. sec. 22B-1).
14. Liquidated damages: Detailed conditions regarding liquidated damages, negotiated penalties, unavoidable delay and procedures.

In conclusion, the ordinance will establish standards for orderly use of rights-of-way as approved by Council. The franchise agreements will be based on an ordinance and staff will review all proposals, make recommendations to Council, and oversee ordinance compliance.

City staff recommends Council adopt a telecommunications ordinance, which will provide for non-exclusive franchises and revocable permits for telecommunications services established within the City of Asheville.

City Attorney Oast noted that he would add a provision in the ordinance that statewide utilities would not be regulated by this ordinance.

Upon inquiry of Councilman Mumpower, City Attorney Oast explained that this ordinance was crafted by using models from several different North Carolina cities.

Upon inquiry of Vice-Mayor Bellamy about making sure that companies adhere to the same rules as the City does in performing work on our streets, City Attorney Oast said that this ordinance establishes baseline standards for franchises and parameters can be included in the individual franchises.

City Attorney Oast answered various other questions from Council, some being, but are not limited to, is this ordinance over-excessive; do we have the authority to require lines be placed underground, and does the City has any leverage in asking companies to extend their lines in other areas.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

PRE-TOWING NOTICE

City Attorney Oast said that this is the consideration of an ordinance to require posting of "pre-towing" notices on private lots before owners can tow unauthorized vehicles with a civil penalty imposed for violation.

The City has received numerous complaints from people, usually visitors to Asheville, whose cars have been towed from private parking lots. The problem arises primarily in downtown and in Biltmore Village, both high tourist traffic areas, when cars are parked in private parking lots after normal business hours. The lots are not conspicuously posted with signs restricting parking (if at all), and are not chained off or barricaded, and people mistakenly assume that the lots are available for after hours parking. When the owners of towed vehicles go to retrieve their cars, they have complained that they are gouged on the price, forced to pay in cash, and otherwise treated rudely. This is a practice known as predatory towing, and many victims have promised never to return to Asheville and to warn their friends away, too.

The City's ability to regulate towing is limited, but other cities with similar problems have obtained special legislation to allow them to enact certain regulations. In 2001, the cities of Greenville and Chapel Hill obtained legislation to allow them to adopt an ordinance to require private property owners who tow vehicles from their lots to post a "pre-towing notice" on their lots before towing, and to assess a penalty if the ordinance is violated. In 2003, with the help of our local delegation, the City of Asheville was added to this legislation.

The ordinance is drawn from ordinances in Greenville and Chapel Hill. It requires the owners of lots who tow unauthorized vehicles to post these lots, and prescribes the size, height, location and required content of the sign. The act made unlawful by the ordinance is the towing of a vehicle, not the failure to post the sign, and the civil penalty for violation is $100 for the first violation, $200 for a second violation within 12 months, and $300 for a third or subsequent violation within 12 months.

City Attorney Oast said that a suggestion received is that there be a registry of lots that have been posted.

City Attorney Oast responded to various questions from Council, some being, but are not limited to: how will the ordinance be enforced; can other areas of the City, other than downtown and Biltmore Village, be included in the ordinance as needed; what would be the next step in enforcement of these types of violations; if towing prices change, will the signs need to change and who would pay for those changes; is the type of the sign large enough for people to read; where will the signs be posted; and who will be enforcing the ordinance.

After discussion, City Attorney Oast said that he would amend the ordinance to include language on the sign that makes it clear the times the lot is subject to towing and also add the cost of the tow on the sign.

It was the consensus of City Council to have the ordinance be effective 60 days after adoption.

Councilwoman Jones suggested that in the future it might be appropriate to earmark any monies accumulated as a result of this ordinance towards the visitor's center or similar place. She explained that many times visitors are usually the ones who get towed and state they will not return to Asheville.

Upon inquiry of Vice-Bellamy, City Attorney Oast said that he would have to investigate whether the City could require the posting of these signs.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At 4:15 p.m., Mayor Worley announced the remainder of this worksession will take place in the Council Chamber on the Second Floor of the City Hall Building.

RESOLUTION NO. 03-158 -RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN OPTION TO CONVEY CERTAIN CITY-OWNED PROPERTY IN THE CENTRAL BUSINESS DISTRICT PURSUANT TO A DOWNTOWN DEVELOPMENT AGREEMENT TO THE GROVE PARK INN FOR A MIXED USE DEVELOPMENT PROJECT

Mayor Worley said that the public hearing on this matter was held on August 19, 2003, and September 2, 2003, and then continued until this date.

Councilman Ellis moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Dunn and carried unanimously.

Planning & Development Director Scott Shuford said that at the meeting of September 2, 2003, City Council requested some additional information concerning the Grove Park Inn (GPI) project. He noted that he submitted information to Council on the following: comparable sales used in the appraisal, primary exterior shell/balconies, Haywood Street Parking Garage property costs and appraised values, perpetuity of park space; scarce resources/limited asset question; and 2001 traffic study costs.

Regarding the "loss" of open space, Mr. Shuford said that they have taken the new survey and calculated the open space for the existing situation at 10,160 square feet. For the proposed situation, the amount of open space is 9,225 square feet assuming the scenario in which the GPI project is built to the maximum footprint allowed in the option agreement. There is a "loss" of open space of less than 1,000 square feet, which is more than made up from a park design standpoint through its consolidation into a single open area, rather than in two areas, one of which is functionally a landscaped median between four streets.

Mr. Shuford said that we have received an updated appraisal indicating a fair market value of $702,000 that reflects the passage of time from the first survey and the slight increase in area from the previous survey. It represents an estimated value of $37.50/square foot. This new figure will be added to the option agreement.

He then reviewed the following timeline of public information/participation. He said this timeline lists key dates for public information and participation. It does not include worksession updates on the Renaissance project status.

- January 2000 – Council receives extensive briefing about Pack Square Renaissance project and approves $7,500 to be allocated for the study. Buncombe County later approves a similar amount.
- May 2000 – The Pack Square Conservancy (PSC) holds a three-day design charrette that results in the original design showing two building sites.

- Summer 2000 – The City and County reviewed and approved the original design for the Pack Square Renaissance project.
- February 2001 – Council approves informational signage to be erected in Pack Square and City County Plaza concerning the Renaissance project. This signage illustrates the two building sites.
- August 14, 2001 – Agreement for Renaissance project executed by City, County and PSC.
- October 2001 – Additional multi-day charrette held by PSC.
- March 2003 – Grove Park Inn (GPI) development agreement approved by City Council.
- July 2003 – PSC holds day-long series of focus groups and public involvement/presentation on the design guidelines for the Renaissance project.
- August 19, 2003 – City Council discusses GPI option agreement; approves Pack Square design guidelines.
- September 2, 2003 – City Council discusses GPI option agreement.
- September 16, 2003 – City Council to discuss and vote on GPI option agreement.
- Summer 2004 – City Council to decide whether to sell the site to the GPI (assuming the option agreement is executed).

Mr. Shuford said that the proposed building will be the fifth tallest structure on the square, trailing the Buncombe County Courthouse, City Hall, BB&T Building and the Jackson Building.

City Attorney Bob Oast said that based on Council comments at the September 2, 2003, continuation of the public hearing on this matter, he has incorporated some revisions into the proposed Option with the Grove Park Inn (GPI) for the sale and development of the property located in the area bounded and traversed by College Street, Market Street, and Patton Avenue.

The revisions clarify or otherwise address issues raised by Council and others as to the specificity of the dimensional limitations on the proposed development. They also further clarify the Pack Square Conservancy's (PSC) role in reviewing the design of the building, and more clearly provide that the conditions to be incorporated into the deed specify maximum dimensions that may be reduced, but not exceeded, by PSC or any agency having control over the development of the Subject Property.

He has also noted in Paragraph 6 of the proposed Option the existence of the PSC Agreement, as well as the issues raised with respect to the Redevelopment Plan and the possibility of a partial interest by Buncombe County in a portion of the Subject Property. These issues will be more fully investigated during the option period, and addressed as necessary.

He then reviewed the applicable changes to paragraphs 4 and 6 below:

4. Building Design; Other Matters. GPI and the City further agree to the following in connection with the conveyance of the Subject Property and the development thereof by GPI:

   a. GPI shall comply in all respects with the terms and provisions of the Downtown Development Agreement with respect to the development of the Subject Property, and the terms and provisions of said Agreement are incorporated herein.

   b. GPI shall comply with the terms and provisions of the PSC Agreement as to the development of the Subject Property, and nothing in this Contract or the Development Agreement may be construed to abrogate or limit the applicability of the PSC Agreement to development of the Subject Property.

c. The following provisions shall apply to the development of the Subject Property, and shall be incorporated into the deed from the City to GPI such that they shall run with the land and be binding in perpetuity on GPI and any of its successors or assigns, and shall survive the termination of the PSC Agreement or any other arrangement that governs the development of the Subject Property. Said provisions shall be absolute limitations on the development of the Subject Property, such that no design approved for the development of the Subject Property, nor any design guidelines applicable to the Subject Property, nor any amendment or variance thereof, may permit the height, building footprint, or view corridor limitations established herein to be exceeded; provided, however, that any design approved for the development of the Subject Property may require a reduction in any of the height or building footprint limitations specified herein. As used herein, "primary exterior façade" means the exterior of the building, and includes any permanently attached features and appurtenances, such as balconies and stairs, but does not include any temporary attachments, such as awnings and flagpoles.

(1) Height

(a) The height of the primary exterior facade of the building shall not exceed the height of the north facade of the Jackson Building, as measured from the sidewalk to the lower edge of the tile roof of the penthouse structure on top of the Jackson Building, which dimension is 130 feet.

(b) The height of the building to be constructed by GPI shall be measured from the lowest point of its south facade, or 2215 feet above mean sea level, whichever is lowest.

(c) No part of the primary exterior facade of any side of the building may exceed the height of the south facade.

(d) A penthouse structure may project above the primary exterior facade of the building, provided said structure is set back from the primary exterior facade on all sides, does not exceed 24 feet in height, and does not cover more than 40% of the horizontal roof structure on which it is situated.

(e) In no case may any part of the building structure exceed 154 feet in height, or 2369 feet above mean sea level, nor may any projections, such as antennae or mechanical equipment, exceed this limitation.

(f) The limitations on the height and size of the penthouse structure shall apply even if the height of the primary exterior facade of the building does not exceed 130 feet.

(g) The limitations prescribed herein may not be exceeded for any reason.

(2) Building footprint. The exterior dimensions of the primary exterior shell of the building shall not exceed 158.00 feet wide, measured in a westerly direction from the point of intersection of the southern line of the sidewalk on the south side of College Street, extended, with the western line of

the sidewalk on the west side of Spruce Street, extended, parallel to College Street (approximately east-west), by 60 feet deep, measured in a southerly direction perpendicular from the southern line of the sidewalk on the south side of College Street (approximately north-south). These dimensions are based on the current configuration of the streets in the area. To the extent that implementation of the approved plans for the Pack Square / City-County Plaza area requires or permits alterations in these dimensions while remaining consistent with the other design limitations specified herein, including the PSC design guidelines, this agreement may be amended to require or permit different horizontal dimensions, provided that no such amendment may limit the horizontal area created by the primary exterior shell of the building, measured on the outside, to less than 9450 square feet without GPI's consent.

(3) Preservation of view corridor. No part of the primary exterior shell of the building may intrude into the Vance Monument view corridor, which is the northwest corner of the Buncombe County Courthouse and the southwest corner of the Asheville City Building, as seen from a point measured five feet above the base and two feet east of the eastern face of the Vance Monument.

(4) Sidewalks. The building shall provide for sidewalks along its north, east, and west sides. The north side or College Street sidewalk shall be preserved or replaced in its current location and width. The east or Spruce Street sidewalk and the west or Market Street sidewalk shall be preserved, replaced or constructed at their current widths or otherwise to City standards, and may be relocated in accordance with the PSC plan.

(5) Underground parking. The parking facility for the building, if located on the Subject Property, may extend outside the building footprint, but not beyond the lines of the Subject Property; provided, that any part of any parking facility that extends south beyond the southern face of the constructed building must be completely below ground level, and the area above said parking facility shall be developed in accordance with the approved plan for the Pack Square / City-County Plaza Area, as developed by PSC and approved by the City. If approved by PSC, mechanical appurtenances such as air vents and utility equipment serving the parking facility may project above ground.

(6) Other design issues. Service facilities, such as refuse dumpsters, electrical and other utility connections, shall be located within the building or placed underground.

d. To the extent feasible, the City and GPI will coordinate with each other and with PSC as to the location, relocation, or reconstruction of any utilities, infrastructure, public amenity, or public area in the vicinity of the Subject Property to the end that the area of City-County Plaza and Pack Square that is disturbed by GPI's project will be restored in a manner consistent with the City's plans for the area, as developed and adopted pursuant to the PSC Agreement.

e. The City will cooperate with GPI and provide reasonable assistance in connection with the development of the Subject Property with respect to such matters as temporary and permanent road closings and other permits and approvals necessary or desired by GPI for the project, provided that nothing shall require the City to exercise any discretionary function in a particular way.

f. The City shall retain appropriate easements to ensure that the part of the Subject Property south of the southern exterior facade of the building is used for public park purposes, and may assign or transfer said easements to a third party whose purposes include conservation of park land or green space.

6. Title to the Property.

a. At the Closing, the City shall deliver to GPI, or its successor or assign, a special warranty deed which shall be in a form acceptable to GPI, conveying to GPI a good, indefeasible, fee simple, marketable title to the Subject Property, its appurtenances and improvements (as set out in Schedule B), and any personal property agreed to be conveyed (as set out in Schedule C), said title to be insurable both as to fee and marketability at regular rates, without exception except as to those matters specifically enumerated in this subparagraph, or such as GPI may waive. Said policy shall provide full coverage against mechanics' or materialmens' liens, have full survey coverage, and shall contain such other special endorsements as GPI may reasonably require.

The Subject Property, its appurtenances, improvements and personalty, shall be conveyed by the City to GPI free and clear of all liens, encumbrances, claims, rights-of-way, easements, leases, restrictions and restrictive covenants except only:

(i) public utility easements, of record in customary form to serve the Subject Property; and

(ii) zoning ordinances of the City of Asheville; and

(iii) the PSC Agreement and design guidelines developed and adopted pursuant to said Agreement.

(iv) such other restrictions and/or easements as set forth in this option.

If in the opinion of GPI's counsel, the City's title fails to meet the requirements of this subparagraph, then any such deficiency shall be specified in particularity in writing to the City and the City shall have until Closing, or at GPI's option a reasonable time thereafter, to cure such deficiency at its sole cost and expense. If the City fails to cure such defect(s) within the permitted time, in addition to GPI's remedies as set forth in paragraph 16 below, GPI shall have the option of taking title "as is" and consummating the Closing or, in the alternative, of terminating this Contract and receiving an immediate refund of its earnest money and any interest accrued thereon.

b. The following specific matters have been identified as potential impediments to the City's ability to convey the Subject Property:

(i) restrictions, covenants or conditions contained in or arising through the deed for the Subject Property from the Housing Authority of the City of Asheville to the City, recorded in Deed Book 1118 at Page 239 of the Buncombe County Registry, the Contract for Sale of Land for Redevelopment by a Public Body, recorded in Deed Book 1117 at Page

463 of the Buncombe County Registry, and the Urban Renewal Plan approved by the City of Asheville by resolution adopted on August 2, 1962, and any amendments or revisions thereto, to the extent that any of said restrictions, covenants or conditions survive the dates set forth in said documents (December 1, 1987 and December 31, 1987) for the termination thereof.

(ii) the possibility that Buncombe County may have a partial interest in a portion of the Subject Property.

During the option period specified herein, the parties will investigate these matters and, if the same are found to be deficiencies in the City's title or impediments to the City's ability to convey clear title, then as to (i) above, GPI shall have the option of taking title "as is" and consummating the closing or, in the alternative, terminating this Option and receiving an immediate refund of earnest money and any interest accrued thereon; as to (ii) above, GPI shall have the option of taking title to so much of the Subject Property with respect to which the City can convey clear title together with the City's interest in any remainder not wholly owned by the City, or taking title to so much of the Subject Property with respect to which the City can convey clear title, or terminating this Option and receiving an immediate refund of its earnest money and any interest accrued thereon.

Mr. W. Louis Bissette Jr., attorney representing the Grove Park Inn, said that the changes outlined by City Attorney Oast are satisfactory to the Grove Park Inn.

The following individuals spoke in support of the City entering into an option with the GPI for various reasons, some being, but are not limited to: project will provide jobs for area residents, provide more green space, and boost to area economy; project will provide a significant tax base for the City thus lessening the tax burden on City residents and taxpayers; project will spotlight to the world the vibrant City of Asheville that wishes to nurture development, not stifle it; project is the best interests of the entire City of Asheville; you have to have business to create jobs; the Grove Park Inn will pay it's own way; GPI has been a first class citizen and they are no strangers to our community; this will be a positive project for the Eagle Street area; and building will bring in revenues to address shortage of jobs, affordable housing, and even perhaps the renovations needed at the Civic Center:

Mr. Albert Sneed, representing the Council of Independent Business Owners
(submitted Resolution in Support)
Mr. Eugene Ellison, Asheville resident
Mr. Walter Plaue, Buncombe County resident

The following individuals spoke in opposition of the City entering into an option with the GPI for various reasons, some being, but are not limited to: the building will block the view of the mountains; the City should have a vote of all residents on whether to sell the property or not; too much confusion over the height of the building, street reconfigurations, and actual acreage being discussed to be sold; are condominiums the best use on that property; if variances are granted on the project, the public should be given an opportunity to comment on them; poorly communicated facts, misinformation or lack of information on project; need to preserve existing green space; there is no public support of this project; no appropriate reconciliation of property lines and ownership; Pack Square Conservancy is a self-appointed body being given control over public space; project should fit into the Pack Square Conservancy's guidelines rather than adjusting the guidelines for the project; trees on property should be preserved; proposed building is out of proportion and does not fit in with the character of Pack Square; space is not adequate for scale of project; GPI should do a feasibility study first; Downtown Development agreement approved without public comment; downtown Asheville is already revitalized and does not need this project; there will be a loss of parking for people who have business at the Courthouse and City Hall; decision to proceed should be postponed and an inexpensive model should be prepared for the public to view; in the long-run this project may actually harm the beauty of Asheville and what makes Asheville unique; we need to preserve our City central core; there is space outside the City to build tall structures; project height will clog up the energy flow of openness of downtown area; we should ask the Preservation Society to be in charge of protecting Pack Square, not the Conservancy; need to keep our existing park land; there should have been a competitive bidding process; the building will take businesses out of existing office space and leave empty buildings; condominiums with children will require more school buses; condominiums will need more police to patrol area; what is the current vacancy rate on office, condominiums and retail buildings downtown; legal notifications of City Council meetings vs. worksessions lacked due process; and the height of building should be the entire streetscape, not the Jackson Building:

Mr. Fred English, Haw Creek resident
Mr. Brad Burns, Asheville resident
Mr. Bill Hussey Jr., Weaverville resident
Mr. Mike McCreary, Asheville resident
Mr. Barry Summers, Asheville resident (submitted copies of a referendum petition)
Ms. Nelda Holder, President of the League of Women Voters of Asheville-
    Buncombe County (submitted statement)
Ms. Nan Davis, Asheville resident
Ms. Leah Karpen, Asheville resident
Ms. Michelle Dorf, Weaverville resident
Two Asheville residents
Ms. Mary Jo Brezny, Asheville resident
Mr. Brokaw, Asheville resident
Ms. Julie Brandt, Asheville resident
Mr. Wally Bowen, Asheville resident
Mr. Robert Simon, Asheville resident
Ms. Hazel Robinson, Asheville resident
Mr. Bill Wescott, President of the Preservation Society of Asheville & Buncombe Co. Inc.
Mr. Brady Price, Asheville resident

Mr. Bissette addressed many of the comments raised by those who spoke in opposition of the project, stating that there has been a lot of confusion, but most of it has been put out by the opponents of the project. He reiterated that the GPI wants to build a wonderful building downtown, which will make Asheville proud.

At 6:33 p.m., Mayor Worley closed the public hearing and announced a short break.

Councilman Dunn moved adopt a resolution to authorize the City to enter into an option to convey property pursuant to a downtown development agreement. City Attorney Oast read the following resolution: "Whereas, the City of Asheville in May of 2003 entered into a Downtown Development Agreement with the Grove Park Inn Resort, Inc. (herein "GPI") under N. C. Gen. Stat. sec. 160A-458.3, pursuant to which the City and GPI agreed to negotiate the terms of an option for the sale of certain property in the downtown area to GPI for development of a mixed use building; and, Whereas, a public hearing was held beginning on August 12, 2003, wherein the terms of the proposed conveyance have been disclosed, discussed and revised, and are contained in an option agreement attached hereto as Exhibit "A"; and Whereas, the proposed sale price for the subject property is $702,000, or $37.50 per square foot, which is the appraised value based on an appraisal completed in November of 2002, and updated in September, 2003. Now, therefore, be it resolved by the City Council of the City of Asheville that the City enter into an option agreement for the sale by the City of certain property, or a portion thereof, identified in the attached option and pursuant to the terms and provisions set out therein, and that the Mayor be, and he is hereby authorized to execute said agreement, subject to the approval of the City Attorney. This motion was seconded by Councilman Mumpower.

Councilwoman Jones asked if it was possible to briefly explore some type of continuation of a public input process, but not necessarily in this forum, since a motion is on the floor. When Councilman Peterson suggested a motion to table, City Attorney Oast said that it is proper to have a motion introduced and on the floor which sets the table for debate. He said that Council can make a motion to postpone the matter for a certain period of time or indefinitely which would be to table a pending motion.

Councilman Dunn felt that there has been adequate public comment and would not be inclined to support a motion to table.

Mayor Worley addressed some of the confusion and misconceptions of the project. City Council and City staff only have control over what we disseminate, all of which is available to the public. We can't force other people or the media to print or disseminate information in any certain way. He said this has not been a hasty process. We've heard discussion that this all began with the Pack Square Conservancy (PSI) coming together and having a design charette in May of 2000 where two building sites, including this one, were identified. That resulted in an agreement between City Council and the PSC and the approval by City Council of the Master Plan for the Pack Square area, which included the building sites. We can't control what PSC may have changed on their website, but what was approved was a Master Plan with the building sites on it. The GPI proposal surfaced in the early part of this year and the agreement was put on Council's agenda and made available to the public. When Council discussed and approved the agreement, there was public comment. The public process has been pretty thorough. That agreement called for us to do exactly what we are doing now and that is to move forward to converting that agreement into an option. We have held public hearings for that process. Since the August 12 meeting had a crowded agenda, we continued the public hearing to August 19, then to September 2 and again to now. Our public process has been very thorough. Another misconception is that somehow we are missing the boat by not bidding this project. Instead we are doing it under a downtown development act, which allows us to do a negotiated agreement so long as the purchase price is not less than the appraised value. The reality is that the Downtown Development Act was specifically designed to address projects like this. Projects that have a significant impact on a downtown and gives a city council the opportunity to have extra control over what that project looks like. So, if we decided to do this, that agreement was the way to go. It's true that we did a Request for Proposals (RFP) for the development around the Battery Park Parking Garage, but we only received one response. The reality is that when we do an RFP or a bid process like this where a major project is specifically tailored, you get very few, if any, responses. He said that this is the very type project design this statute was designed for. There is another misconception about the finality of what we are doing if we go forward with the option agreement. It is only an option. The first step was the initial agreement, which allowed the GPI to perform some basic feasibility-type studies. The second step is an option, which gives them a higher level of comfort in terms of going forward with significant expenditures to come up with a design. A design we haven't seen yet. Anything in the paper has been conjecture. The GPI hasn't even hired an architect, to his knowledge. The option agreement gives them until summer of 2004 to complete the design process and then come back to Council. At that time Council will decide whether that design is sufficient and will fit in this area. If that is determined, then we will go forward with the sale of the property. There are misconceptions about George Pack and what he donated to the City of Asheville and the restrictions placed on it. He donated Pack Square. Pack Square stops about the time you get to Market Street. This area we are talking about is not part of Pack Square and is not part of what George Pack donated to the City of Asheville and is not subject to any restrictions that George Pack might have put on it. The PSC hired a consultant with donated money and held three days of charettes where they listened to the public and that is what came out of it. Regarding our need to preserve our history and our heritage, we did not do that with respect to this site. This site was occupied by buildings up to late 1960's or early 1970's. Buildings came all the way down almost to the County Courthouse. We tore those buildings down a number of years ago. Those are some misconceptions he wanted to take the opportunity to set the record straight. He felt that throughout this, this Council and City staff has tried to be very open and presented accurate and complete information.

Councilman Peterson said that he has talked with Mr. Bissette regarding his concerns regarding the height of the structure. The following three items have been discussed and agreed to by Mr. Bissette: (1) the lower edge of the gargoyles be the top of the main structure; (2) the penthouse structure not exceed the penthouse structure of the Jackson Building in height, and not cover more than 80% of the horizontal roof structure on which it is situated; and (3) any sort of decorative feature can be added to the top of the building with the maximum height of the height of the bell tower on the Jackson Building.

Mr. Bissette said that this is another way the GPI is trying to meet the concerns of the City Council noting that the GPI does agree to the changes to the height outlined by Councilman Peterson. The GPI does prefer a higher building because there is an economic reality in a building like this, particularly where we are restricted to a footprint. The footprint of the building would give the GPI a floor space of about 9,000 square feet, if the PSC guidelines variances can be increased to a 60-foot wide building, compared to the footprint of the Biltmore Building which is 12,500 square feet.

Mr. Troy Hunnicutt, Director of Development for the GPI, said that with the changes outlined by Councilman Peterson, they will lose approximately 9,500 square feet, which is one floor level completely. He said that he would make a good faith effort to make the changes work, which would result in nine stores plus a penthouse, above ground.

Councilman Peterson expressed concern about the front yard space of the building because it would be an intrusion into the view shed and/or feel of the park. He said he has spoken with Mr. Bissette and Mr. Bissette said the GPI does not have plans to build any permanent buildings on that space or use it for commercial space. Councilman Peterson said that although the option does have some language about easements, he would like to be specific that there will not be structures built, other than a 10-15 feet awning and sidewalk café space, and that it will be more like the park structure that the PSC envisions. He feels that this should be part of deed restrictions if we sell the property, just in case the PSC changes its mind in the future.

Mr. Bissette said that the GPI will have landscaping at the entrance to the building and probably some outside tables for maybe a restaurant on the first floor. There are no plans for the construction of any kind of structure in the front yard space of the building. The parking garage will go under that property and the surface will be returned to the state that the PSC wants when it completes its park in the City/County Plaza.

City Attorney Oast said that he would prepare language amending the option by adding a clause to one of the provisions, which basically states that there would be no projections south of the southernmost limit of the building, except canopy projections not to exceed 15 feet, with no other permanent commercial uses beyond that 15 feet. He said that if City Council wants this language in a deed restriction, he would be happy to do that.

Vice-Mayor Bellamy asked how would that language coincide with her request for a conservation easement for not only the front yard part, but the entire corridor to remain green space. City Attorney Oast said that the easement we are retaining would allow for the kind of structure Councilman Peterson is comfortable with and that easement could cover the remaining portion and could be conveyed to a conservation organization.

When Councilman Mumpower asked why the GPI expressed interest in building on this property and not near the Civic Center or on Coxe Avenue, Mr. Bissette said that when they saw the plans for the PSC they saw this as a win/win situation. This could be an investment for the GPI and spur along the development of the park process. People who invest in this type of residence will want a beautiful park.

Upon inquiry of Councilman Mumpower about competitive bidding, City Attorney Oast said that the City wouldn't lose all design control if we entered into a competitive process, but with the downtown development agreement, we retain a higher degree of design control than we would have with the competitive process. In the competitive process we could specify interest in receiving proposals that meet certain requirements. However, he felt that this gives us more front-end flexibility on what that proposal would look like.

Councilman Mumpower pointed out that the valuable piece of property across from the Civic Center for the St. Lawrence Square Parking Garage was handled by the competitive qualification process and only one response was received. City Engineer Cathy Ball stressed that what the City requested was a proposal for qualifications, not a proposal for cost; and the City did not receive anything back on the requests sent out of state. In that project too, we also hope to use the Downtown Development Act in order to finalize the option for the property.

Councilwoman Jones pointed out that we did use a competitive process first and then will use the Downtown Development Act tool.

Vice-Mayor Bellamy felt that as this project progresses, there should be a requirement for the GPI (like any other developer) to meet with the "neighborhood" in order to show them their plans and try to respond to any of their concerns. That meeting could occur in the Stephens-Lee Community Center or the Civic Center.

Mr. Shuford responded to questions from Vice-Mayor Bellamy about how the residential amenities of the building will be met. He summed up by saying anyone interested in a downtown residential environment is going to be drawn by the vitality and activity of the space.

In response to Vice-Mayor Bellamy, Mr. Craig Madison, President and Chief Executive Officer of the Grove Park Inn Resort and Spa, said that the investment in Site A is $25-30 Million. The available jobs on Site A will be probably less than 50 with the majority of jobs coming from the building on Site B. In response to livable wages, he said the GPI will be the developer and won't necessarily own the businesses in the building, but the GPI currently employs 567 residents of the City of Asheville which is a good precedence.

Upon inquiry of Vice-Mayor Bellamy regarding the vacancy rate, Mr. Madison said the GPI is on their fifth feasibility study. The first study has been reconfirmed that states from pre-sell to construction base we are in a position to sell 62 units within 24-months (this is from an earlier model without the recent restrictions). We have high confidence on the retail space because of the desirable location and we will re-test the market based on the office/condo space just to confirm that there is a true market for that. That will be easy to convert once the shell is being built.

In response to Vice-Mayor Bellamy, Mr. Shuford that this property is part of the National Register of Historic Districts, but not part of any local historic district. The Historic Resources Commission of Asheville and Buncombe County (HRC) would not be directly involved by policy in

234

any review of this area. He did point out that the City has received a letter from Chairman of the HRC offering their services for any design questions that City Council or the developer might have.

Councilman Dunn would have been happy with a competitive bid process on this site but felt confident that a developer wouldn't come to Asheville and invest $30 Million to build condominiums in downtown Asheville. We are lucky that the GPI wants to invest this money in Asheville,

Upon inquiry of Councilwoman Jones, City Manager Westbrook said that there will be approximately $150,000 in property taxes from Site A.

Councilman Peterson moved to amend the motion as follows: (1) The height of the primary exterior facade of the building shall not exceed the height of the north facade of the Jackson Building, as measured from the sidewalk to the lower edge of the gargoyles top of the Jackson Building; (2) A penthouse structure may project above the primary exterior facade of the building, provided said structure is set back from the primary exterior facade on all sides, does not exceed the height of the roof of the penthouse structure on the Jackson Building, and does not cover more than 80% of the horizontal roof structure on which it is situated; (3) A decorative fixture would be permitted on top of the new building but it could not exceed the height of the top of the bell tower on the Jackson Building; and (3) Service facilities, such as refuse dumpsters, electrical and other utility connections, shall be located within the building or placed underground; provided that the ground level south façade of the building may include a canopy projection that extends not more than 15 feet from the building and may not be more than 15 feet high with no permanent commercial structure beyond the canopy. This motion was seconded by Vice-Mayor Bellamy.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast didn't think the required meeting with the "neighborhood" would be appropriate for inclusion in the option. To the extent that it is one of the next steps in the process, City Council would insist on that being done in some way.

Councilman Dunn asked what the steps would be if the GPI couldn't make this project economically feasible, with the restrictions, but they still want to build a structure. City Attorney Oast said that the GPI wouldn't exercise the option but they could request to renegotiate the option with City Council. That would require another public process.

Mr. Bissette wanted to sure that the 15 foot canopy projection restriction is not talking about landscaping features because there must be an entranceway into the building. He said they will not have any other commercial structures, but there could be a retaining wall or a driveway drop-off. Councilman Peterson said that he was speaking more at either permanent restaurant facility out there or some sort of building that would actually be blocking the view in that 60-feet in front of the building.

Upon inquiry of Councilwoman Jones, Mr. Bissette said that construction period would be about 1.5 years. He said the effect on the economy of a $30 Million construction project also needs to take into account wages for the people who supply the building materials, plumbers, electricians, etc. There are lot more jobs involved here than what will be here ultimately.

When Councilman Mumpower said he didn't think he could support amending the height of the building by one story if it would have a significant probability of derailing this effort. Mr. Bissette said that Mr. Hunnicutt said that he would try to make this work.

Mr. Shuford reminded Council that the height of the building, even with what is proposed as an alternative, still exceeds the height of the Pack Square Design Guidelines of the PSC, so they will still need to go through the variance process to get the extent of height that is being proposed.

The amendment to the motion made by Councilman Peterson and seconded by Vice-Mayor Bellamy carried on a 6-1 vote, with Councilman Dunn voting "no."

Councilman Peterson stated that City staff is doing City Council a disservice when they fail to report the downsides to a project. For instance on this project, downsides could include the traffic will be worse, we will lose parking, there may be a conflict with residential development in the park, maybe we could get more money than the appraised value, and we will lose some plaza space. T here is a lot of public confusion about exactly what is going on, and he didn't think the process was open and inclusive. If staff would tell Council all the upsides and all the downsides of a project, then the elected officials could weigh those out. He felt it would be a better city government. Looking at both the upsides and downsides of this project, he does think it will help develop this part of downtown. He thinks we can make downtown better by having more activity on this side of the downtown. He thinks this will help get something built in the parking lot behind the Renaissance Hotel and will help get something better done in the Eagle-Market Street area. He would rather have new residents buy that great downtown condominium, than have them build on the tops of our mountains or further out in the County. In the final analysis, he thinks this project is smart growth because we are putting people downtown where we have the infrastructure. He did feel that if staff did a better job, then the public would have done a better job of not being so one-sided.

Councilman Ellis recalled when there was a building on that site and it was torn down and he felt that putting another structure on the property is important. He remembered in 1974 when the Civic Center opened, two new hotels were built in Asheville, and the Asheville Mall opened. Downtown Asheville was basically dead then with most buildings being vacant. The transformation in downtown Asheville has been amazing and he attributed that to the hundreds of small retailers that have taken a chance in Asheville. He believes that the people living in downtown Asheville is what has made the difference. He felt Asheville is unique because there are many eyes on the park and that is what this project will be doing.

Councilman Dunn said that a common thread heard was from people who do not want Asheville to change. That is not the way life is. Change, by it's sheer nature, scares people. He couldn't understand when people said there was erosion of public trust because they listened to everyone, even people who don't pay City taxes. He felt the process was a little quick, but it was a good opportunity presented to the City. He does want to preserve Asheville's history but we need to think of the future also. This is a giant step for the future of Asheville and he thinks it's a good step.

Councilman Mumpower felt the cloud of misinformation about this project is largely manmade and regrettably by some of the organized bodies represented here. Contrary to much of the testimony, this has been an open process and there has been plenty of opportunity for public input. This is a city, not a forest. The City is created by entrepreneurial initiatives and this project helps sustain that trend. Major human endeavors and activities are rarely smooth and error-free. We have a representative form of government and we have the honor of listening, researching and deciding on these matters. As he weighs out the pros and cons, he believes this project is clearly in the best interests of the citizens of Asheville.

Councilwoman Jones said a few years back the Asheville City Council was put in an awkward place of receiving a gift of land, which was the Asheville Speedway. While she was somewhat sympathetic to Council's predicament, she was primarily very discouraged that so many Asheville residents felt it was a backroom deal. While many of the individuals differ in name at this point, the same feeling is pervading Asheville. She believes they have good reasons to question the process and how business is being done. Her different perception is not a misperception. She does think the process has been hasty and the public involvement has been less than adequate. She has questions about the development agreement. She does not blame the GPI for the problems in this process and in fact, Craig Madison was the most open person to her questions. She sees the problems in the process falling squarely on City Council. In March when we talked about the opportunity for discussion about the development agreement, the public did not have a copy of the agreement. They could have called City Hall and requested a copy, but even this Council got a copy of it at the last minute. To hold that date up as an ideal time for public involvement is really not right. To mention all the dates that the PSC talked about a park does not have anything to do with our public process is not adequate for what we are talking about. The first public hearing we scheduled had people who sat for hours and then the hearing got rescheduled. We don't know whether those people were able to come back to the rescheduled hearing or not. True public process has been lacking. She thinks we have done a bit better near the end. She thanked City staff for the Frequently Asked Questions on the City's website. She felt it was excellent and it began a process. And she thinks we have done better with public comment. When she first heard about the proposal in February she listened with great enthusiasm and felt it was right to begin an exploratory phase. She assumed it would be a dialogue and a dialogue with the public. As the GPI was testing the soil, she assumed we would also be hearing from the people. When a slide was shown early in the development agreement stage, it showed the time for the GPI to do their due diligence, time for the PSC to look at the design guidelines, and time for City staff to do their part. The public had no time period on that slide. She feels we continue to dismiss the public's concern by labeling people as misinformed or resistant to chance. She sees it differently. Here is the ultimately inconsistency for me. If we, as a Council, have so much authority in the fact that these buildings have been in the plan all along, then who would have dreamed that a developer would not have come through. The City has a vision for development, as it did with the St. Lawrence Square. We saw those buildings, we want them to be there and we go out with a RFP. Why we didn't consider, as a body, that alternative for this project. She thinks we should have. Her concerns continue to be heightened, but she feels a little bit better after tonight, about the variances. The ink wasn't even dry on the design guidelines when we started a discussion about variances. Why didn't we put out stakes showing the public where the property being discussed would be? Why wasn't a very simple, non-expensive public model to inform the public about the scale and the height of the building shown? Her preference would have been to have another 45-60 days to inform the public and give the developer some time to think about this reduction of one floor and to clear up some of this confusion. Finally, she believes that this juncture is really more important than the sale because at this point we are giving a developer a clear signal to spend $25 Million. Now is the time we need to ask all the questions and consider the public's concerns. She would not be supporting the option.

Mayor Worley supported moving forward with the option. He felt this will bring more residential units downtown; allow more eyes on the park; bring more density downtown; prevent sprawl; and promote more walkability, less driving and less pollution. It will bring pedestrian traffic east of Pack Square and east of the City Hall. The street reconfiguration will be different in that it will be pedestrian friendly and create an invitation to College Street. It will facilitate further development, like the Performing Arts Facility that has been proposed for the grounds of the Renaissance Hotel, and other economic development along College Street. It creates more opportunities as you pull more people in that direction. The building itself will attract more development. He is not unmindful of the property tax revenue that this will generate and that the second phase may generate. In terms of the design, he thinks the guidelines are in place to make certain that whatever design comes out will be compatible with Asheville's history and it will spur the development of the rest of the park. Councils have few opportunities to make monumental decisions and he thinks this is a monumental decision that will have a lasting impact on Asheville. It's easy for us to look back and recognize those wonderful monumental decisions of the past, like the Battery Park Hotel, the Grove Arcade, City Hall the Buncombe County

Courthouse and others. Probably none of those decisions took place without some controversy of their own and yet we look backwards and appreciate them. We don't think about the controversy that accompanied them when they took place. It's much harder for us to look forward and recognize what will be those monumental decisions in the future that we make today. It is wonderful that we have a local developer and the GPI has been a tremendous economic impact to this entire community.

The amended motion carried on a 6-1 vote, with Councilwoman Jones voting "no."

RESOLUTION BOOK NO. 28 – PAGE 1

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:43 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 23, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

U.S. Air Force Staff Sergeant Michelle Moses led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Peterson gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING WEDNESDAY, OCTOBER 8, 2003, AS "WALK TO SCHOOL DAY" IN THE CITY OF ASHEVILLE

Mayor Worley read the proclamation proclaiming Wednesday, October 8, 2003, as "Walk to School Day" in the City of Asheville. He presented the proclamation to Ms. Terri Zimmerman March, Healthy Buncombe Coalition Coordinator, who briefed City Council on some activities taking place during the day and who invited City Council to participate in the walk.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON AUGUST 26, 2003, AND THE WORKSESSIONS HELD ON SEPTEMBER 2, 2003, AND SEPTEMBER 16, 2003

B. RESOLUTION NO. 03-159 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY DISPOSAL PARCELS 162 AND 163 ON BAXTER STREET TO DAVID FRECK

Summary: The consideration of a resolution authorizing the Mayor to convey Disposal Parcels 162 and 163 located on Baxter Street to David Freck in the amount of $1,800.

The subject parcels, zoned RS-8 Residential Single-Family High Density District and comprising 0.03 acres each are located on the south side of Baxter Street (PIN Nos. 9649.19-60-6613 and 6681). The current tax value for the parcels are $900 each for a total value of $1,800. The proposed land use for the subject property in the East End/Valley Street Community Improvement Program is for assemblage with adjoining residential property.

David Freck, who owns the improved property adjoining and in between the subject parcels, has submitted a bid to purchase both parcels for the sum of $1,800. Mr. Freck desires to assemble the parcels with the property he owns to provide yard space and off-street parking for his tenants.

On August 26, 2003, City Council directed the City Clerk to advertise for upset bids on Disposal Parcels 162 and 163. The advertisement ran in the Asheville Citizen-Times on August 29, 2003, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from David Freck in the amount of $1,800 was not upset and the sale to David Freck should be approved.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey Disposal Parcels 162 and 163 on Baxter Street to David Freck in the amount of $1,800.

RESOLUTION BOOK NO. 28 – PAGE 18

C. RESOLUTION NO. 03-160 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH HOBSON CONSTRUCTION CO. INC. TO INSTALL DRAINAGE ALONG GLENDALE AVENUE

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Hobson Construction Company Inc. to install drainage located along Glendale Avenue in Asheville, North Carolina.

The City is in need of a contractor to provide stormwater installation services for a drain line along Glendale Avenue between Thompson Street and McAurthur Lane. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for stormwater installation services were solicited and two responses were received. The project was rebid and there were two responses received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Hobson Construction Co. Inc.	0	Yes	Yes	$75,300
Buckeye Construction Co. Inc.	0	Yes	Yes	$104,034

Funding for this project has already been allocated in the Public Works Department's Stormwater Materials budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Hobson Construction Company Inc. to install a drain line along Glendale Avenue.

RESOLUTION BOOK NO. 28 – PAGE 19

D. RESOLUTION NO. 03-161 - RESOLUTION AUTHORIZING THE CHAIRMAN OF THE ASHEVILLE REGIONAL AIRPORT AUTHORITY TO EXECUTE A GRANT AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR IMPROVEMENTS TO THE ASHEVILLE REGIONAL AIRPORT

Summary: The consideration of a resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

The City is required by law to execute certain contracts and agreements for the Airport Authority. This grant agreement is to allow the Authority to receive additional matching funds from the N. C. Dept. of Transportation ("DOT") for the CAT II TDZ Lighting-Runway 34, Raise MITL, Perimeter Security Road-Phase II.

The grant, in the amount of $33,595, has been approved by DOT based on a total estimated cost of $671,899.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 28 – PAGE 20

E. **RESOLUTION NO. 03-162 - RESOLUTION MODIFYING THE 2003 CITY COUNCIL MEETING SCHEDULE TO (1) DELETE THE SEPTEMBER 30, 2003, COMMUNITY MEETING; (2) RESCHEDULE THE TUESDAY, OCTOBER 7, 2003, WORKSESSION TO WEDNESDAY, OCTOBER 8, 2003; AND (3) RESCHEDULE THE TUESDAY, NOVEMBER 4, 2003, WORKSESSION TO WEDNESDAY, NOVEMBER 5, 2003**

RESOLUTION BOOK NO. 28 – PAGE 21

F. **ORDINANCE NO. 3054 - ORDINANCE AMENDING APPENDIX B TO RESTRICT THE NUMBER OF LATE PENALTIES FOR UNPAID PARKING CITATIONS**

Summary: The consideration of an ordinance restricting the number of late penalties for unpaid parking citations to a maximum of three.

A review of the collection of parking citations after the addition of three late penalties indicates a very low collection rate. In addition, collection agencies and the state income tax garnishment system requires a set amount due that is not changing on a monthly basis to use these collection methods. By adoption of this ordinance, the City of Asheville would be in a position to better use the services of collection agencies and/or the state income tax garnishment program to increase compliance of parking ordinances and collection of amounts due.

Staff requests that City Council approves the ordinance.

ORDINANCE BOOK NO. 20 – PAGE 422

G. **RESOLUTION NO. 03-163 - RESOLUTION SUPPORTING MAYOR OF ASHEVILLE'S NOMINATION FOR SECOND VICE-PRESIDENT OF THE BOARD OF DIRECTORS OF THE NORTH CAROLINA LEAGUE OF MUNICIPALITIES**

RESOLUTION BOOK NO. 28 – PAGE 22

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

A. **CONTINUATION OF A PUBLIC HEARING TO CONSIDER EDITORIAL AND TECHNICAL AMENDMENTS TO THE MINIMUM HOUSING CODE, AND AMENDMENTS TO THE FEES AND CHARGES MANUAL**

ORDINANCE NO. 3055 - ORDINANCE AMENDING THE MINIMUM HOUSING CODE

RESOLUTION NO. 03-164 - RESOLUTION AMENDING THE FEES AND CHARGES MANUAL

Mayor Worley opened the public hearing to consider editorial and technical amendments to the Minimum Housing Code at 5:15 p.m.

Director of Building Safety Terry Summey said that City Council gave direction to City staff at its August 1, 2003, meeting related to enforcement of the Housing Code. The public hearing at that meeting was continued to September 23, 2003, in order to receive additional citizen input on the technical standards, penalties and fees. Consistent with Council's directive, staff has prepared a new Housing Code providing for changes in enforcement, technical standards and penalties. Additionally, a resolution is proposed for amending the Fees and Charges Manual.

On August 12, 2003, City Council directed staff to amend the enforcement section of the current Housing Code as follows: (1) that all residential rental buildings receive a Housing Certificate under the standards of the Housing Code; (2) that all owner-occupied residential properties receive a one time inspection upon change of occupancy for life safety issues only; and (3) that upon each residential rental building receiving a Housing Certificate and each owner-occupied residential property receiving a Life Safety Inspection Report; thereafter, both such properties be enforced under the complaint based program of the Housing Code. The new code recognizes the following as compliant with the Housing Certificate requirement: (1) all residential buildings that currently have Housing Certificates; and (2) all new structures built since July 1, 1994, with a Certificate of Occupancy. Additionally, the new Housing Code includes technical, editorial, and penalty changes. The minimum standards that will not be included on the Life Safety Report for owner-occupied properties will not prevent the new owners from occupying the property, even if there is a failure to meet these standards.

Consistent with Council's directive, the Code has been revised to require a one time inspection for owner occupied properties at the time of transfer of ownership for Life Safety issues only. The following minimum standards of the Code are not included on the Life Safety Report: exterior painting, missing shingles, attic ventilated, insulation, screens, space requirements, sanitation and extermination

The new Code received comprehensive review at three public meetings held on September 2 and 3, 2003, with the Director and his staff. Fifteen citizens attended the meetings with written suggestions obtained from one group and 2 individuals. Some changes were made as a result of the feedback. The technical, editorial, and penalty changes, as well as fee changes, are based upon input received from members of the Citizens Task Force, staff, as well as other members of the public.

It is expected that the new Code will be effective in minimizing the burden and expense of those who continuously comply with the Code. Staff efforts will be focused upon improving housing conditions with the following emphasis: (1) rental properties not in compliance with the Code; (2) Life Safety issues of owner occupied properties at the time of change of occupancy; (3) dwellings that physically impact neighborhoods; and (4) a complaint based system that rental and owner occupied properties continue to maintain compliance with the standards of the Code.

City staff recommends that (1) the new Housing Code be adopted and made effective as of September 24, 2003, with the effective date of the increased penalties delayed until January 1, 2004; and (2) the resolution setting forth changes to the Fees and Charges Manual also be effective as of September 24, 2003.

Mr. Summey then proceeded to review in detail the technical standards, consisting of definitions, agents, agencies, life safety standards and minimum standards.

With regard to administrative changes, he explained that the Housing Code Division consists of a Housing Code Coordinator, research assistant, two inspectors and one secretary.

Vice-Mayor Bellamy felt that since there was bound to be many questions regarding the technical changes and since Council had just received the lengthy document on Friday, she moved to table the matter until a worksession. This motion was seconded by Councilwoman Jones. Discussion occurred on the motion and said motion failed on a 3-4 vote, with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

Councilwoman Jones requested that Council discussion occur prior to any motions being made.

There was considerable discussion concerning the life safety/unsafe conditions along with the other technical changes. Mr. Summey responded explaining staff's reasoning behind each Council concern or comment expressed and why they, and the Task Force, felt they were taking the subjectivity out of the Code.

With regard to the heating system, Mr. Summey said that staff has worked on trying to find some compromise from the current system. The current system is maintaining a room temperature of 68 degrees in every room of the house, which is the same standards that you would have in a new house that is built today. It is difficult to make the older houses we have today be heated up to 68 degrees, particularly when you are talking about heating all the rooms. Staff recommended 65 degrees by using the International Property Maintenance Code (they used 65 degrees as the minimum). In addition, State law requires (only for jurisdictions over 200,000) that rental properties have a heating system that only heats one room (not the kitchen) up to 68 degrees. We tried to find something between the minimum state law and what is required for new construction. We recommend maintaining a room temperature of 65 degrees in every habitable room. We are not trying to have older houses meet current day standards. The problem most frequently found by inspections is not reaching 65 or 68 degrees, but that the system does not work at all.

With regard to the street address not visible from the public street, Mr. Summey said that the street address number cannot be less than 2 inches in height on one or two family residences and 4 inches in height on all other multi-family residences. Any new numbers to be installed shall be 4 inches in height. He explained that the Housing Code is being cross-referenced to the Fire Code, which requires 4 inches, and in certain instances 6 inches. Multi-family complexes have asked if they have to change their 3.5 inch numbers to 4 inches. Mr. Summey said that if fire equipment does not get to an emergency on time and they find that signage was part of the problem, a possible lawsuit could be filed. Since Fire Inspectors will mostly enforce this standard, he would assume if the sign were measured to 3.5 inches, the Fire Inspector would expect them to bring it into compliance to 4 inches.

With regard to clarifying fixtures and outlets, Mr. Summey explained that new construction would be required to have an arc-fault interrupter for extensions of bedroom circuits. But because of the complexity of putting arc-fault interrupters in, we are only recommending it for existing structures. However, if you are renovating the entire house, rewiring the house or even renovating one room by stripping the sheetrock off the walls, then the arc-fault interrupter would be required to be installed. He also mentioned that part of the reason this is in the Code as recommended is because as they go out to train electricians and inspectors we want to discuss arc-fault interrupters so it will be familiar to them.

With regard to deleting the requirement for a 3 x 3 foot landing, Mr. Summey explained this deletion would have an impact on cost for an affordable home, because mostly only mobile homes have this landing. On new mobile homes this will be a requirement (because it's best to have the structure built comply with the Code it was built under), but not a requirement for existing mobile homes. He felt that the landing is not a true life safety issue and in fact, having the landing could be a detriment because if you have a heavy snowstorm, you can't open the door. Another factor is that if the City annexes any mobile home parks, Buncombe County does not have that requirement.

Regarding the deletion of inspections by a third party federal agency, Mr. Summey said that they are not inspecting to the City's standards because they are looking at different issues. For example, the Housing Authority is inspected under the third party federal agency; however, the Housing Authority must be in compliance with the City's Housing Code. We have trained the Housing Authority staff of our Code requirements and their units are handled just like any other rental complex. If someone complains from one of the Housing Authority's units, we investigate that just like any other complaint. He said that the City's Housing Code Coordinator will be making visits to the Housing Authority to make sure that their units are up to Code. First they will look at units from the outside and if necessary, they will ask for their inspection report.

With owner occupied structures, the Code has been revised to require a one-time inspection for owner occupied properties at the time of transfer of ownership for Life Safety issues only. The report will clarify the life safety issues not being inspected (because these are issues they don't think should keep a person from moving in), but chances are the owner is aware that the house that needs to be painted or there are some shingles missing. The following issues are not on the Life Safety Report because the owners are trying to move in and often times they want to do these things after they move in: exterior painting, missing shingles, attic ventilated, insulation, screens, space requirements, sanitation and extermination. If, however, complaints are received from the neighborhood, we will investigate those complaints and the owner could be required to fix the problems.

Regarding enforcement, are trying to make the Code more flexible to say certain things have to be fixed immediately. In the existing Code, after the owner is informed from the Housing Inspector of any deficiencies, the landlord has up to five days to notify the tenants of any unsafe conditions. Staff felt that if it's a life safety issue, the tenant should be notified immediately. The landlord should immediately start trying to reach his tenants.

Regarding communication of changes, Mr. Summey said that he and his staff would be educating the public with regard to the changes. There will be advertising in CityWorks, television, radio, and newspaper; presentations to the Board of Realtors, Carolina Real Estate Investor, and various community meetings; public educational sessions for tenants and landlords; educational brochures; and information on the City's Web page.

Councilwoman Jones requested language in the department's standards regarding handling of complaints. When she suggested that all complaints be followed up within 24 hours after received, Mr. Summey said that if there is one inspector or one inspector is on vacation, that standard cannot be met. He did explain that complaints are currently worked into the other schedule. For example, we have inspections scheduled as much as a week in advance for people who are wanting to sell their property. Then if a complaint is received, they investigate the complaint in between their schedule. Currently every complaint gets followed through. Because of the changes, staff should have more time to investigate complaints. One of the inspectors' priorities is to respond to complaints. When a complaint is filed, staff does ask the tenant if they have talked to the landlord. Regardless of whether they have talked to the landlord or not, staff is going to have to talk to the landlord and follow-up on the complaint. All complaints are followed-up on within 3 days.

Assistant City Attorney Martha McGlohon responded about the ways a complaint can be issued. She stressed that even though the ordinance allows a petition or complaint to be filed with the Code Enforcement Officer by at least five residents of the City, the Code Enforcement Officer can, on his own motion, It gives the Officer the discretion to not investigate the complaint until five residents of the City complain, however, the Officer's discretion is limited by his statutory responsibility and his job responsibilities. As a trained Code Enforcement Officer, when a complaint is called in, his job requires him to ask certain questions of that complainant, e.g., have you spoken with your landlord, have you been evicted, is there a dispute between you and the landlord, etc. Once the Officer asks those questions, then the Officer has a statutory responsibility, because they have information in their possession at that point that there may be violation of the Code, to investigate to determine whether or not the complaint is meritorious. When the Officer investigates a complaint on the outside, they cannot go inside unless the tenant invites them in. However, the officer does keep his eyes open and if he observes other situations that clearly show to him that there is another violation of the Housing Code, the officer will take note of that and will require that those violations be corrected. Under this Code, if we find four or more violations, then it can bring about the requirement for a full complete inspection report. There is no provision in the law that would prohibit Council making our Code stricter than the state law. Council does have discretion to add language to the Code to require that the officer inspect every single complaint within 24 hours. Mr. Summey said that they would be putting more emphasis on tracking complaints. They will track when a complaint is first received and the date when it is investigated.

At 7:25 p.m., Mayor Worley announced a short recess.

The following individuals voiced concerns over the technical changes to the Code, some being, but are not limited to: reducing the heating temperature to 65 degrees may encourage supplemental heating that will be unsafe; need for insulation for energy conservation; how will you identify inside problems from the outside; need to prepare a brochure about the Housing Code that includes information on how to make a complaint, who to contact and what kinds of complaints would be considered; include information in brochure a list of the life safety issues; prepare an attachment for leases with the complaint procedure for prospective tenants; place brochures in rental offices, real estate offices, libraries and other public places; who is responsible for violations missed by third party inspectors; there is no strong enforcement measures for these Code standards; tenants may fear of being evicted if they complaint; how will the City prevent people from purchasing a home as an owner and turning it around in a short time to be rental property; will there be a requirement that the units inspected by fired third party inspectors receive new inspections; when inspectors investigate a complaint received, will the owner have to pay for the inspection if they don't find a violation; and there will be a major cost to change street address numbers from 3.5 to 4 inches:

Ms. Lottie Meyerson
Ms. Minnie Jones
Ms. Pauline Council
Mr. Fred English
Ms. Sarah Uminski, representing the Affordable Housing Coalition
A former member of the Board of the Affordable Housing Coalition
Ms. Beth Maczka
Ms. Bonnie Bailey, representing the Asheville Apartment Association

The following individuals voiced support of the technical changes to the Code with some suggested amendments, some being, but are not limited to: if you make standards too stringent, people will not invest in the City; there has been ample time and opportunity for people to review the proposed Code; the increase of fees and penalties will help put "teeth" into the Code; and once a house is inspected and the owner is given a list of things that need to be fixed, it drives people crazy when it is reinspected and the inspector finds other violations:

Mr. Scott Osborne
Mr. Tom Garden

Mr. Walter Plaue, representing the Carolina Real Estate Investors Association, voiced support of the Code, however, he suggested the following modifications to the issuance of compliance section: (1) clarifying language that any person, including any employee of the City, may complain ...; (2) requiring the complainant to affirm that notice and reasonable time to repair have been given to the property owner, unless the condition is immediately life-threatening; (3) distinguishing between the original complaint by a citizen and the "official complaint" issued by the Code Enforcement Officer after the "violation notice" stage; (4) omitting the City's authority to file a notice of lis pendens before a hearing and finding of violation, and (5) the violation notice should give the owner a reasonable date by which the violation must be corrected. All agencies working in the low cost housing arena must look to creative and proactive approaches. We have already taken steps to work with Pisgah Legal Services for the purpose of identifying the City's most flagrant violators of the Code. We will expand this to include the County Health Department, the City Fire Marshal as well as the City's Inspection Department. We will look for ways to find, identify and penalize the slumlords. In conjunction with the Building Code staff, we hope to develop a form which will be included with each lease agreement which emphases the joint and mutual interest of tenants and landlords which will, among other things, ask that complaints be brought to the attention of the landlord as soon as detective. If the landlord is not responsive, the tenants will send a written and certified complaint to the landlord. In the event the tenant still does not receive satisfaction, the phone number of the Code Inspection Department will be provided on the form.

Upon inquiry of Ms. Maczka, City Attorney Oast said that the fact that some or even all of Council members are owners of rental property within the City creates a conflict that would disqualify them from voting, nor would the fact that any Council member is an attorney that deals in real estate.

Mayor Worley closed the public hearing at 8:34 p.m.

Mr. Summey responded to the concerns expressed during the public hearing and also to Council's concerns, some being, but are not limited to: the reasoning behind 65 degrees vs. 68 degrees and will it increase the need for supplemental hearing; is there a loophole or a high risk factor of people not feeling safe in making complaints; how can we encourage tenants to make complaints; why are we requiring 4 inch letters for street addresses and will 3.5 inches suffice; how will we address the fired third party inspector's inspections; who pays if a complaint is registered and no violation is found; how will we address people buying houses and then converting them to rental units; will the City be looking into attaching educational information about the Code and how to complain to leases; do we have enough enforcement mechanisms in place; how will we be addressing additional violations found during reinspection; how was this new Code information circulated and how did they get it; what are the implications of this new Code to the Building Safety budget; and what is the definition of the word "reasonable" and why do we use it in some places and not others.

It was the consensus of City Council to have City staff come back to Council in six months for a thorough reassessment of the changes and if they are not working, perhaps make another recommendation.

Councilman Dunn felt that until we get rid of some of these regulations we are going to decrease affordable housing.

Councilwoman Jones initiated discussion about requesting language in the Building Safety Department's operating policy regarding responding to every complaint in a reasonable timeframe, but a maximum of 72 hours. City Manager Westbrook recommended some qualifier like "reasonable amount of time" because there are some cases we will want to respond within 3 hours, but sometimes a complaint can wait longer. So that we don't cripple that ability to act quicker on those type complaints, he recommended that we use a word that allows us that latitude. Staff does understand Council's urgency on responding to complaints. City Attorney Oast felt that language like "reasonable" was appropriate, but to establish a particular number of hours or days doesn't allow for prioritization of complaints based on their seriousness, and the work ebbs and flows. He suggested the following language "The City Manager shall maintain statistics and monitor response times to ensure that complaints are responded to within a reasonable amount of time." He felt it was essential to leave some of these experienced based judgment calls to the inspectors. Not to cheapen any complaint, but he thinks that a certain amount of discretion has to reside with the professional experience of our staff who have to do the inspection to make that determination.

In response to Councilwoman Jones, Mr. Summey said that the City doesn't inspect for air conditioning, but he didn't see any problem in inserting the word "functioning", before central air conditioning systems, in the first sentence in Section 4-210 (l). They may have to look at having a standard for what is a functioning central air conditioning system.

Councilwoman Jones was concerned about the deletion of the 3 x 3 landing. On one hand she heard it exists for safety reasons and that is important for the disabled and elderly. On the other hand she heard that if we annex mobile homes in then that would be problematic because Buncombe County doesn't require it. She felt the City needs to be doing what is best to keep people safe and not worry about somebody else's standards. Mayor Worley explained that it is being deleted because this would require retrofitting to those buildings that were constructed under a Code that allowed that at the time they were constructed. We are requiring it for new mobile homes, but not for existing mobile homes.

Councilwoman Jones said that in terms of educating people about a complaint-based system and how they can complain, we need put in large letters and bold print, that anyone can contact a City Council member or other public official to complain on their behalf. Then City Council will follow-up on that. City Attorney Oast said that City Council members are not required to pass a complaint on, however, the Building Inspection staff would expect those complaints to be turned over to them.

Upon inquiry of Councilman Mumpower about requiring some educational material be attached to leases, Councilman Ellis felt that was understood because staff has indicated that they have plans to do that and others have indicated that they are going to work on this as well.

Councilman Ellis moved to repeal the current Housing Code and adopt a new Housing Code, with the effective date of the new Code being effective the day after final adoption and the effective date of the increased penalties be delayed until January 1, 2004. This motion was seconded by Councilman Dunn.

After discussion, Councilwoman Jones moved to amend the motion to read "Every dwelling shall have heating facilities … and capable of maintaining a room temperature of 68 degrees in all habitable rooms." This motion was seconded by Vice-Mayor Bellamy and failed on a 3-4 vote, with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no," and Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

After discussion, Councilwoman Jones moved to amend the motion to include "The City Manager shall maintain statistics and monitor response times to ensure that complaints are responded to within a reasonable amount of time" as a new Section 4-217-(l). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Councilman Mumpower said that we have a responsibility to govern fairly and realistically as representatives of our community and he thinks we have done that tonight.

Councilwoman Jones felt Council has made a terrible mistake. She felt there was a lot of opportunity for a genuine compromise and we missed an opportunity that perhaps could have taken us to a better place as a community. More importantly, she feels like the people who have brought up concerns for the people that will be most impacted by this, in terms of tenants and neighborhood residents, they are doing a service to bring those to our attention. She feels this Council has a double standard about timing. We have looked at the 2025 Plan extensively and that is fair because we want a lot of community buy-in, but we also needed more time on the Minimum Housing Code. It was great that the Task Force had it prior to this, but for something this important it would have been better to circulate it to a broader audience and it probably would have been reasonable to have a little more time. We do need to be fair about that. Since she chooses to live in mixed housing, it gives her the opportunity to hear concerns and take them more seriously than she has heard others take them. We do our citizens a disservice when we discount when they share with us and she feels we did some of that.

Vice-Mayor Bellamy thanked the Task Force who worked on this ordinance for 1.5 years and wished they could have come to a more middle ground. She will look forward to seeing the 6-month report. She felt we will see an increase in complaints because of the attention this has drawn. She agreed that our community is better when it can come together and hoped we can work on that in the future.

Councilman Dunn felt that the existing Code has hurt affordable housing. An inspector cannot guarantee the safety of a house. He felt our existing Code is a penalty for good landlords.

Mayor Worley believes this is the best interest of the City of Asheville.

The amended motion carried on a 4-3 vote with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

City Attorney Oast said that because of the vote on this ordinance, it will require a second reading on October 14, 2003.

ORDINANCE BOOK NO. 20 - PAGE 423

Councilman Mumpower moved to adopt the resolution setting forth changes to the Fees and Charges Manual to be effective the day after adoption of the new Housing Code. This motion was seconded by Councilman Dunn and carried on a 4-3 vote, with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

RESOLUTION BOOK NO. 27 - PAGE 23

B. PUBLIC HEARING RELATIVE TO CONSIDER THE CLOSING OF A PORTION OF THE RIGHT-OF-WAY KNOWN AS GREENBRIAR ROAD WEST FROM BENT STREET TO PARKWOOD ROAD

RESOLUTION NO. 03-165 - RESOLUTION TO PERMANENTLY CLOSE A PORTION OF THE RIGHT-OF-WAY KNOWN AS GREENBRIAR ROAD WEST FROM BENT STREET TO PARKWOOD ROAD

Mayor Worley opened the public hearing at 10:05 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to permanently close a portion of the right-of-way known as Greenbriar Road West from Bent Street to Parkwood Road. This public hearing was advertised on August 29, September 5, September 12 and September 19, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Public Works Department staff have researched and determined that Greenbriar Road West from Bent Street to Parkwood Road is a City maintained right-of-way. The only lot abutting the affected portion of Greenbriar Road West is identified by the PIN No. 9628.12-86-6464.

PT Business Park, LLC intends to upgrade Bent Street from Greenbriar Road West to Patton Avenue to a paved width of twenty feet. Additionally, PT Business Park will grant the City a vehicle access easement and a pedestrian access easement across their property connecting Parkwood Road and the portion of Greenbriar Road that will remain open.

City staff recommends that City Council adopt the resolution to permanently close Greenbriar Road West from Bent Street to Parkwood Road.

Upon inquiry of Vice-Mayor Bellamy, Mr. Cole said that the developer is working with the City Engineer for improvements, including sidewalks, on Parkwood Road.

In response to Councilman Ellis, Mr. Cole said that the developer had a meeting with area businesses and he was able to satisfy any concerns they had.

Mayor Worley closed the public hearing at 10:09 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 03-165. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 - PAGE 25

C. PUBLIC HEARING RELATIVE TO CONSIDER THE CLOSING OF BELLVIEW ROAD FROM BELVEDERE ROAD TO LONDON ROAD

RESOLUTION NO. 03-166 - RESOLUTION TO PERMANENTLY CLOSE BELLVIEW ROAD FROM BELVEDERE ROAD TO LONDON ROAD

Mayor Worley opened the public hearing at 10:10 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to permanently close Bellview Road from Belvedere Road to London Road. This public hearing was advertised on August 29, September 5, September 12 and September 19, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Scott Buchanan, on behalf of Thoms Community Care Foundation, has requested the City of Asheville close the right-of-way known as Bellview Road from Belvedere Road to London Road.

Public Works Department staff have researched and determined that Bellview Road from Belvedere Road to London Road is a City maintained right-of-way. The only lot abutting the affected portion of Bellview Road is identified by PIN No. 9647.08-98-5093.

Thoms Community Care Foundation intends to construct and dedicate a new public right-of-way to the City to be known as "New Bellview Road," prior to closing Bellview Road.

City staff recommends that City Council adopt the resolution to permanently close Bellview Road from Belvedere Road to London Road.

Vice-Mayor Bellamy was concerned that the new road will be located closer to the residential homes on London Road.

Mr. Scott Buchanan, Executive Director of Thoms Community Care Foundation, said that they sent a petition to residents along London Road, Belvedere Road and Crestland. Then he sent a letter to everyone who lives all the way up to I-40 asking them to call or contact him with any questions. No one has contacted him. He said a person who lives in California owns the house closest to the new road and she has offered to sell it. He feels the new road will create a better intersection on London Road. He said they will be a stop sign at the intersection of the new road and London Road, sidewalks on the new portion and on London Road, lighting along the new portion of Bellview Road, and they are trying to move the bus stop closer. He said they would ask their suppliers to use Sweeten Creek Road. There will also be a plan for extensive planting.

Mayor Worley closed the public hearing at 10:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 03-166. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 28 - PAGE 27 nb

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 3056 - ORDINANCE TO PROVIDE FOR NONEXCLUSIVE FRANCHISES AND REVOCABLE PERMITS FOR TELECOMMUNICATION SERVICES IN THE CITY LIMITS

Public Works Director Mark Combs said that this is the consideration of a telecommunications ordinance establishing a framework for communications infrastructure franchises and permits in the City limits.

The City needed a uniform way to regulate use, spacing, safety, etc. For example, you can have water, sewer, telephone, power, cable television, fiber optic, and possibly others in the future, in the public rights-of-way. Telecommunication consists of (1) fiber optic cable and other communications infrastructure located in public rights-of-way; (2) overhead (on existing or new poles; (3) underground (new or existing conduits); and (4) all new infrastructure. A telecommunications committee of City staff was formed to address the increasing use of the City's rights-of-way for utilities. The three key tasks for the committee was to: 1) Draft an ordinance; 2) Construct 'universal' franchise agreement; and 3) Convene to review and negotiate proposals.

In many cases, providing broadband cable access along certain routes makes such a system proprietary to the company in that particular area, and as a result companies have been scrambling to install such infrastructure in hopes of monopolizing future customers and access.

In the recent past, several cable companies have approached the City seeking exclusive rights to install fiber optic cable. Without a framework (ordinance) from which to negotiate non-exclusive franchises and permits, staff has been unable to develop long-term, binding legal agreements to benefit the franchise, current and future customers, and the City.

The goal of a telecommunications ordinance is that it will provide framework for (1) non-exclusive franchises; and (2) revocable permits. The ordinance will establish standards for: (1) telecommunications companies and developers and City staff (to base franchise agreement on); and (2) promote orderly development of infrastructure to insure: orderly installation within existing rights-of-way; customer access and services; and City and other government access.

In response to this need, a telecommunications ordinance was drafter which specifies the following sub-parts:

1. Franchise required: No telecommunications system can use public rights-or-way in the City without a franchise.
2. Franchise fees: As set forth in the (negotiated) franchise.
3. Service: Must be installed and in service within 12-months and "...in accordance with the conditions of its certificate of public convenience and necessity."
4. Construction and technical standards: Grantee must install and maintain their system consistent with listed laws, ordinances, technical standards/specifications.
5. Service to the City: Terms of service to the City at favorable rates.
6. Transfer of ownership or control: The City must be notified of any intent to transfer ownership or control and the transferee is required to accept all terms, provisions and amendments.
7. Franchise renewal: The City may grant or deny a franchise and Grantee will have no property right in the public rights-of-way if not renewed.
8. Forfeiture or revocation: Sets forth seven (7) grounds for revocation (breach of franchise, disposition of system, restoration, abandonment and extended operation).
9. Terms of renewal: As negotiated with each Grantee.
10. Receivership and foreclosures: 120-day termination clause; termination by judicial action.
11. Performance Bond: Required with details of terms and conditions.
12. Insurance: Proof of insurance and maintenance of policy required.
13. Indemnification: Detailed conditions regarding release, indemnity, hold harmless, claims and broad construction (per N. C. Gen. Stat. sec. 22B-1).
14. Liquidated damages: Detailed conditions regarding liquidated damages, negotiated penalties, unavoidable delay and procedures.

In conclusion, the ordinance will establish standards for orderly use of rights-of-way as approved by Council. The franchise agreements will be based on an ordinance and staff will review all proposals, make recommendations to Council, and oversee ordinance compliance.

City Attorney Oast reviewed some revisions which resulted from the September 16, 2003, worksession and comments from citizens. Additionally, after further legal review of the law and conversations with lawyers and officials from companies who have experience in other communities, he included further suggestions for revisions and clarifications to the proposed ordinance.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast said that a provision has been included is in the ordinance that exempts from the application of the ordinance public utilities that are in operation pursuant to a statewide franchise issued by the N.C. Utilities Commission, to the extent that such franchise covers that utility's operations within the City.

City staff recommends Council adopt a telecommunications ordinance, which will provide for non-exclusive franchises and revocable permits for telecommunications services established within the City of Asheville.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 3056, with the ordinance revisions prepared by City Attorney Oast. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 451

B. ORDINANCE NO. 3057 - ORDINANCE REQUIRING A PRE-TOWING NOTICE PRIOR TO TOWING ILLEGALLY PARKED VEHICLES FROM PRIVATE PARKING LOTS, GARAGES AND OTHER PARKING FACILITIES

City Attorney Oast said that this is the consideration of an ordinance to require posting of "pre-towing" notices on private lots before owners can tow unauthorized vehicles with a civil penalty imposed for violation.

The City has received numerous complaints from people, usually visitors to Asheville, whose cars have been towed from private parking lots. The problem arises primarily in downtown and in Biltmore Village, both high tourist traffic areas, when cars are parked in private parking lots after normal business hours. The lots are not conspicuously posted with signs restricting parking (if at all), and are not chained off or barricaded, and people mistakenly assume that the lots are available for after hours parking. When the owners of towed vehicles go to retrieve their cars, they have complained that they are gouged on the price, forced to pay in cash, and otherwise treated rudely. This is a practice known as predatory towing, and many victims have promised never to return to Asheville and to warn their friends away, too.

The City's ability to regulate towing is limited, but other cities with similar problems have obtained special legislation to allow them to enact certain regulations. In 2001, the cities of Greenville and Chapel Hill obtained legislation to allow them to adopt an ordinance to require private property owners who tow vehicles from their lots to post a "pre-towing notice" on their lots before towing, and to assess a penalty if the ordinance is violated. In 2003, with the help of our local delegation, the City of Asheville was added to this legislation.

The ordinance is drawn from ordinances in Greenville and Chapel Hill. It requires the owners of lots who tow unauthorized vehicles to post these lots, and prescribes the size, height, location and required content of the sign. The act made unlawful by the ordinance is the towing of a vehicle, not the failure to post the sign, and the civil penalty for violation is $100 for the first violation, $200 for a second violation within 12 months, and $300 for a third or subsequent violation within 12 months.

As a result of Council comments at the September 16, 2003, City Attorney Oast included the 24-hour prohibition and the cost of the tow on the sign face.

Staff recommends adoption of the ordinance.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3057. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 470

C. RESOLUTION NO. 03-167 - RESOLUTION APPROVING THE METROPOLITAN PLANNING ORGANIZATION MEMORANDUM OF UNDERSTANDING

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the execution the Memorandum of Understanding for the French Broad River Metropolitan Planning Organization.

The Metropolitan Planning Organization (MPO) is in the process of expanding to include all of the local governments in Buncombe, Haywood, and Henderson Counties. The Transportation Advisory Committee approved the final version on August 21, 2003. All of the local governments must sign the agreement in order to participate in the MPO process.

The agreement establishes the membership and voting policies for the Transportation Advisory Committee (TAC) and Technical Coordinating Committee (TCC). City Council reviewed a draft of this agreement at the work session on August 5, 2003. Since the time of that review there has been one minor change to the agreement. The change involves representation on the TCC (staff level technical committee). In the previous draft, the Land of Sky Regional Council and Region A Council were voting members of the TCC. In the final version, those two organizations are non-voting members. This change was made in consultation with these organizations.

The Memorandum of Understanding (MOU) also establishes the membership of the TAC (policy board of elected officials). The TAC will be comprised of two representatives from Asheville, two from Buncombe County, two from Haywood County, two from Henderson County, and one from each of the other jurisdictions. The North Carolina Board of Transportation will have two representatives, for a total of 24 members.

The MPO staff has asked all eighteen jurisdictions to approve this agreement. To date, five jurisdictions have approved the agreement. Most of the other jurisdictions are scheduled to approve the agreement in September or October. A few jurisdictions still have some remaining questions and concerns about the document. Henderson County, Flat Rock and Mills River plan continued discussions about the MOU.

The new MPO organization will hold its initial meeting on October 23, 2003.

City staff recommends City Council approve the resolution authorizing the execution of the Memorandum of Understanding for the French Broad River Metropolitan Planning Organization.

City Engineer Ball responded to various questions from Councilman Peterson.

Upon inquiry of Councilman Peterson, City Engineer Cathy Ball said that Vice-Mayor Bellamy is City Council's Alternate, but the proxies will still have to be voted on as a part of the by-laws because the by-laws still state that any TAC member can authorize someone to be their proxy. It doesn't state they have to be another elected official.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 03-167. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 - PAGE 29

D. RESOLUTION NO. 03-168 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Bellamy said that the terms of Jan Davis and Billie Buie, as members on the Planning and Zoning Commission, expired on August 14, 2003.

Both Mr. Davis and Ms. Buie have served two full successive terms and are not eligible for reappointment.

On September 2, 2003, City Council interviewed Andy Brown, Jane Mathews, Robert Sweetser, Tom Byers, Harry Weiss and Derek Weekley.

On September 16, 2003, prior to this meeting, City Council interviewed Mike Vance and Steven Sizemore.

Andy Brown received 0 votes; Jane Mathews received 1 vote, Robert Sweetser received 0 votes, Tom Byers received 4 votes, Harry Weiss received 2 votes, Derek Weekly received 0 votes, Mike Vance received 3 votes and Steven Sizemore received 4 votes. Therefore, Tom Byers and Steven Sizemore are appointed as members to the Planning & Zoning Commission to each serve a three year term respectively. Both terms will begin effective September 4, 2003, and expire August 14, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 - PAGE 30

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of August 22 – 28, 2003: Kim MacQueen (Streets), Luis & Kathy Olivo (Water), Barvara Moutos (Water), BellSouth (Water).

The following claims were received during the period of August 29-September 4, 2003: Bernard Thoma (Streets), Elizabeth Kendall (Sanitation), Marjorie Barnes (Water), Elizabeth Tate (Police), and Elizabeth Ros (Water).

The following claims were received during the period of September 5-11, 2003: Tyrone Simpson (Parks & Recreation), BellSouth (Water), Terry Kirkpatrick (Sanitation), Irene Wright (Streets) and Karen Bradshaw (Streets).

The following claims were received during the period of September 12-18, 2003: Addie Mae Luna (Fire), BellSouth (Streets), Lottie Robinson Pierce (Police) and Bobby Searcy (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

On August 28, 2003, the City received a complaint from Carroll Moore. The nature of the proceedings is challenging constitutionality of City's noise and picketing ordinances, and a 1983 claim for violation of plaintiff's civil rights. This matter will be handled by outside counsel.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Bellamy thanked Biltmore Baptist Church for holding the City/County Appreciation Luncheon on September 16, 2003.

Mayor Worley was proud to announce that that at the September 21, 2003, Kids Voting Benefit Volleyball Game of Asheville City Council vs. Buncombe County Commissioners, the Asheville City Council won.

Mr. Mike Fryar showed Council various maps alleging that the description annexing his property is illegal. City Attorney Oast said that at this point after a preliminary review he didn't see anything that would cause him to say that Mr. Fryar's property did not quality for annexation. He said that he would look into this matter again as soon as possible.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:49 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Wednesday – October 8, 2003 - 3:00 p.m.

Worksession

Present:	Vice-Mayor Terry M. Bellamy, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Mayor Charles R. Worley and Councilman Brian L. Peterson

Vice-Mayor Bellamy asked for a moment of silence for Councilman Ellis' niece who recently died.

CONSENT AGENDA:

Agreement with the N. C. Dept. of Transportation for TEA 21 Enhancement Grants for New Haw Creek Road/Avon Road Sidewalks, Pack Square Pedestrian Improvements and West End/Clingman Pedestrian Improvements

Summary: The consideration of a resolution authorizing the City Manager to sign three municipal agreements with the N. C. Dept. of Transportation (NCDOT) for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

In June 2002, the City of Asheville made application to NCDOT for TEA-21 Enhancement Grant for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements. Each of these projects was awarded a grant from NCDOT in varying amounts. The City of Asheville partnered with various organizations to receive these grants. The grants can only be awarded to a local government. The following is a description of each of the projects:

(1) New Haw Creek Road/Avon Road Sidewalk – City staff worked with the Haw Creek Community Association to develop a plan to add sidewalk to New Haw Creek Road from Arco Road to Beverly Road and on Avon Road from Beverly Road to Tunnel Road. The project number is E-4814. The total amount of the grant is $172,132. The match for the project is being made but a Small Urban Fund Grant from the State in the amount of $150,000, Fee-In –Lieu of sidewalk money from the City in the amount of $40,000 and $5,000 from the Haw Creek Community Associates.

(2) Pack Square Pedestrian Improvements – These improvements include Pack Square Renaissance streetscape on College Street, Patton Avenue and US 25 (Biltmore Avenue) providing a better balance between pedestrians and vehicles. The amount of the grant is $140,000. Pack Square Conservancy will provide the match for the project.

(3) West End/Clingman Pedestrian Improvements – These improvements include enhancements on Clingman Avenue and the development of a parallel greenway through Clingman Forest. The amount of the grant is $172,131. The match for the project will be made by Mountain Housing Opportunities

Staff recommends that City Council authorize the City Manager to execute three municipal agreements with NCDOT for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

Upon inquiry of Councilman Dunn, City Engineer Cathy Ball explained the criteria for sidewalks.

Agreement with the N. C. Dept. of Transportation for Bridge Reinspection Program

Summary: *The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation (NC DOT) on a bi-annual basis for the reinspection of bridges on the Municipal Street System.*

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. Since the establishment of the program, the City has replaced 17 bridges through the program. The program is funded 80% through federal funds and 20% through City funds and administered by the NC DOT. To remain eligible for replacement funds and avoid penalties, it is required that all public bridges be inspected every two years. The NC DOT offers three options for meeting the bi-annual inspection requirements. One is to do the inspection with City forces; two is for the City to hire a consultant to do the inspections; or three is for the City to allow the NC DOT to do the inspections through a qualified private engineering firm.

Since 1983, the City has elected to execute agreements with NC DOT to accomplish the required inspections. This process allows a large number of bridges to be inspected under one contract or operation, resulting in a minimum inspection cost per bridge. NC DOT representatives anticipate the inspection costs to be approximately $2,600 per bridge for the upcoming inspection. The City has 25 bridges in need of inspection this year, which will yield an estimated total cost of $65,000. The City's share in this cost will be $13,000 (20% of the total cost). Funds for the City's share are budgeted in the Public Work's Bridge Maintenance line item.

The Public Works Department staff recommends adoption of the resolution authorizing the Mayor to execute a Municipal Agreement with the NC DOT for inspection of bridges on the Municipal Street System.

Setting Public Hearing to Close Unnamed Alley off Collier Avenue

Summary: The consideration of a resolution of intent to close an unnamed alley off Collier Avenue and setting a public hearing on November 11, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close an unnamed alley off Collier Avenue, the entry of which is located approximately 200 feet north of the intersection of Collier and Banks Streets.

Public Works Department staff has researched and determined that this alleyway is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are eight lots that abut this alley identified by PIN Nos. 9648.06-38-4514; 9648.06-38-3540; 9648.06-38-3620; 9648.06-38-4526; 9648.06-38-4684; 9648.06-38-5757; 9648.06-38-3750; 9648.06-38-3895; 9648.06-38-4514.

City staff recommends that City Council adopt the resolution setting a public hearing for November 11, 2003, to close an unnamed alley off Collier Avenue.

Quitclaim Deed to Buncombe County for Property on Griffing Circle

Summary: The consideration of a resolution authorizing the Mayor to execute a non-warranty deed to Buncombe County for property located on Griffing Circle.

The land on Griffing Circle identified as PIN Nos. 9640.20-81-0970 and 1983 was tendered to the City of Asheville and Buncombe County as the taxing entities by non-warranty deed recorded in Deed Book 1717 at Page 2223. The County offered the property for upset bid and a final offer of $36,800 was received. The City desires to convey its interest, if any, in the property to the County so that the property may be conveyed to the highest bidder. In return, the City will receive a pro rata share (approximately $12,267) of the sales price as the City's taxable interest appears.

The entire parcel is zoned residential and has an area of 0.63 acres.

Approval of the resolution will authorize the Mayor to execute the quitclaim deed to Buncombe County.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed to Buncombe County for property located on Griffing Circle.

Acceptance of N.C. Community Development Initiative Energy Efficiency Grant

Summary: The consideration of a resolution authorizing the City of Asheville to accept an energy efficiency grant from N.C. Community Development Initiative (NCCDI), and approval of the associated budget amendment, in the amount of $30,000.

NCCDI has developed the Star Home Program to provide grants to not-for-profit agencies, including local municipalities, to assist with the cost of incorporating energy-efficient construction methods in new housing development. The City has recently been accepted for participation in the Star Home Program in respect of projects in which the City has a financial stake. The City's Community Development Division has submitted a specific application for funding for 18 homes at "Moser's Place" subdivision currently under construction on Maple Avenue, with assistance from the Housing Trust Fund and the Fee Rebate program.

The City will pass on grant funds estimated at $1,375 per unit to developer Ron Moser, Inc. A budget amendment in the amount of $30,000 is recommended to cover the estimated amount plus contingencies.

NCCDI contracts with Advanced Energy, Inc., to monitor projects and ensure adherence to "Energy Star" standards.

If this Star Home Program grant is successful, there will be opportunity to apply for additional grant funds for other projects.

Staff recommends City Council accept an energy efficiency grant from N.C. Community Development Initiative (NCCDI) and approve of the associated budget amendment, in the amount of $30,000.

Possession and Consumption of Beer and/or Wine at the 2003 Harvest Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2003 Harvest Festival produced by the Grove Arcade Foundation on October 18, 2003.

The 2003 Harvest Festival produced by the Grove Arcade Foundation has requested through the Asheville Parks and Recreation Department that City Council permit them to serve and consume beer and/or unfortified wine at their event on Saturday, October 18, 2003. The 2003 Harvest Festival is a celebration of fall in the mountains produced to attract people to the Grove Arcade and downtown.

City staff recommends City Council approve the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2003 Harvest Festival produced by the Grove Arcade Foundation on October 18, 2003.

Bid for Voice over IP Telephone System

Summary: The consideration of a resolution authorizing the City Manager to award Bid No. 574-04 to 4 Front Systems, Inc. and execute any related contractual documents for the installation of a new telephone system at several remote offices of the City of Asheville.

The telephone systems at several remote offices of the City of Asheville are in need of replacement. Through a combination of technology called Voice over IP and the use of fiber optic cable from those locations to the City Hall building, a new telephone system can be installed that will provide additional capabilities. These locations include the Transit Administration Office, seven Fire stations, three Police substations and five Parks & Recreation offices. The new system has a three-year recovery of funding.

The City of Asheville sent out a request for proposal to acquire the new telephone system and received seven bid responses. These bid responses were reviewed and rated as to the best solution for the City based on the twelve evaluation criteria included in the bid request documentation. The results of the bid evaluation indicate that 4 Front is the lowest responsive bidder.

The total cost of the bid award is $116,000. The source of this funding comes from technology grant funding of the Transit Department and from the General Fund.

City staff recommends City Council adopt the resolution authorizing the City Manager to award Bid No. 574-04 to 4 Front Systems, Inc. and execute any related contractual documents for the installation of a new telephone system at several remote offices of the City of Asheville.

Vice-Mayor Bellamy asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on October 14, 2003. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Neighborhood/Developer Meeting Concept

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to provide for neighborhood/developer meetings as an optional, alternative step in the review process for rezonings, certain conditional use permits, conditional use rezonings, and Level III developments.

This code amendment would allow a specific type of neighborhood/ developer meeting to substitute for the Planning and Zoning Commission review for certain types of development proposals. Specifically, the amendment provides for the substitution of neighborhood/developer meetings for the required public hearing before the Planning and Zoning Commission (at the option of the applicant) for rezonings, certain conditional use permits, conditional use rezonings, and Level III developments. Planned Unit Developments and those conditional use permits that do not require Planning and Zoning Commission review would not be included in this new procedure.

Mr. Shuford said that based on City Council's considerable interest in improving developer and neighborhood communication early in the development review and approval process, City staff undertook a focus group process to identify issues and potential solutions in enhancing the existing "neighborhood meeting" approach. Three separate focus groups were convened. One group represented developer interests; one group represented neighborhood interests; and the third group consisted of the Planning and Zoning Commission. After each group had met and a list of critical issues was determined, selected members from each group then met together on two occasions to identify areas of agreement and to prepare recommendations for action. An independent facilitator was used to direct meeting discussion and provide minutes.

He reported that the focus group process has resulted in a recommended procedure for improved Neighborhood/Developer Meetings. The procedure includes an incentive for developers to choose the Neighborhood/Developer Meeting process over the standard review process. It includes an opportunity for expanded notification of property owners in the vicinity of the proposed development. Finally, it includes an organized approach for the conduct of Neighborhood/Developer Meetings that should result in the meetings to be conducted in an effective fashion. The goal of this procedure change is an early, friendly, helpful official partnership between the neighbors, developers and the City.

In summary, the proposal would apply to all rezoning, conditional use rezoning, and conditional use permit requests that involve Planning and Zoning Commission review. The proposed procedure offers developers the option of selecting an enhanced Neighborhood/Developer Meeting process in exchange for skipping the Planning and Zoning Commission step in our current requirements. This results in no additional time being taken in the development review process but creates significantly improved communication between developers and neighborhoods. City Council would continue to hold a public hearing and take final action on all development proposals, just as is done under the current requirements. Even when developers opt to follow the existing procedures, staff will continue to recommend developer contact with affected neighborhoods.

This recommendation would not have been possible without the dedication of time, creative ideas, and enthusiasm on the part of a large number of volunteers. I would like to thank the following persons for their assistance in creating this recommendation:

FOCUS GROUP PARTICIPANTS

Neighborhood Participants	Developer Participants	Planning & Zoning Commission
*Barber Melton	*George Morosani	*Billie Buie
*Headlee Howard	*Tom Gallaher/David Hill	*Tom Cathey
*Greg Gregory	*John Spake	*Selina Sullivan
*Mike Lewis	Chris Eller	Jan Davis
John Quigley	Harry Weiss	Hedy Fischer
Norma Baynes	Jerry Grant	Nate Cannady
Stephen Hudzik	Ron Butler	Rod Hudgins
	Ron Moser	

* Indicates that the participant served on the final joint focus group.

Additionally, Paul Godfrey provided invaluable assistance by serving as the facilitator for these focus group meetings.

The following headings provide a summary of the work of these focus groups, including the clarification of key issues, identification of expected results (i.e., what the process should look like), and the specific meeting procedures themselves. These headings illustrate the organized way the groups conducted their business and the level of detail that went into their discussions.

Clarifying Issues and Interests

The following items were listed as major issues relating to Neighborhood/Developer Meetings:

- Misinformation
- Full plan details made available to all parties early in the process
- Lack of trust
- Early and accurate complete information sharing
- Clearly definition of neighborhood stakeholders
- Marketing of development process – common understanding of issues and procedures
- Lack of an on-going dialogue as the development process continues (even after development approval has been given and construction is underway)
- Neighbors don't understand technical aspects of the development process
- Need for a better Neighborhood/Developer Meeting process – ground rules; expectations; facilitation
- Need for citizens to be better educated about the development process
- Lack of understanding about the big picture – how does the project help the City meet its broader goals?
- Need for staff participation in Neighborhood/Developer Meetings
- No existing way to alert and document all impacted stakeholders
- Lack of willingness to compromise on each "side"

The following were identified as the key interests of the stakeholder groups:

- Neighbor concerns: Safety; property values; traffic; change in neighborhood character

- Developer concerns: Profit; property rights; desire to impact community in a positive way; need for clearly defined neighborhood meeting process that is reasonable in terms of time and money; staff involvement in neighborhood meetings for informational purposes and to indicate that the process is officially "condoned" by the City.
- Staff concerns: Time involved in meetings; need to be perceived as neutral in the process.

Criteria for Guiding Process Decisions

Participants were asked to develop a set of criteria for use in evaluating any potential process ideas. The following criteria were developed:

- The process must have teeth.
- The process should be viewed as legitimate in eyes of all participants.
- The process should not be burdensome on any one party or on all parties.
- The process should clarify upfront what is and what is not negotiable.
- The process should be reasonable in terms of time and costs.

Improved Neighborhood/Developer Meeting Procedures

Participants identified the following procedures for improved Neighborhood/Developer Meetings:

- Developer registers project application a minimum of 45 days before the City Council meeting at which the public hearing is scheduled to occur.
  - Plans are placed on record and made available to the public at a central location (City Planning and Development Department).
  - Plans will provide as much information as available at time of posting.
  - Plans will be made available on City website if possible.
  - Staff contact person is clearly identified.
- Notification procedures:
  - Property owners within 400 feet of the property proposed for development would receive notice of the Neighborhood/Developer Meeting from the City of Asheville. This is a minimum notification area and developers are advised to determine if additional property owners should be notified (e.g., if the project is located on a dead-end road 600 feet long, perhaps it would be good practice for the developer to notify all property owners fronting the road); developers would be responsible for any additional mailing costs associated with a larger notice area.
  - Any affected neighborhood association registered with the City and located within 400 feet of the property proposed for development would also receive notice of the Neighborhood/Developer Meeting. It is expected that the designated person(s) receiving this notice will identify key participants outside the general notice area and arrange for them to attend the Neighborhood/Developer Meeting. However, this should not be construed as an open invitation for all neighborhood association members outside the notice area to attend. The intent is to have representation from affected neighborhood associations while ensuring that most neighborhood participants are from the notice area.
  - Timing: The City shall mail Neighborhood/Developer Meeting notices 45 days before the City Council meeting at which the public hearing is scheduled to occur. The initial Neighborhood/Developer Meeting shall occur no less than 10 days prior to the City Council meeting at which the public hearing is scheduled to occur.

    - The City of Asheville will provide notice of the public hearing to adjacent and nearby property owners as provided for under state law or City Code requirements, whichever is more restrictive.
    - Meeting location: Neutral site of sufficient size for meeting.
- ○ Meeting Facilitation - The meeting must be managed by someone who knows the rules (mediator/facilitator) and is able to effectively run a meeting. The developer will pay for the cost of the mediator/facilitator. City staff will attend the meeting as technical advisor(s) only and will not facilitate the meeting.
- ○ Meeting Ground Rules - The following set of ground rules were adopted to promote effective communication during Neighborhood/Developer Meetings. These ground rules would be reviewed by the meeting facilitator at the outset of each meeting and "enforced" during the meeting by the facilitator.
    - Listen to one another (really listen before responding)
    - Ask for feedback from one another
    - Accept the need for compromise by each of us
    - No stereotyping (let's keep a level of objectivity in our discussions)
    - Be open minded
    - Let's clearly define our statements to insure that all parties clearly understand their meaning
- ○ Conduct of Meeting – Meetings will have a structured agenda to include: Ground rules for the meeting; Areas of allowable discussion clarified; Clarification of any zoning rule(s) that applies to the situation; Plan presentation (including how plan addresses the big picture); Identification of areas of agreement and disagreement; Negotiation of issues of concern; and Identification of next steps, if any.
    - City staff must attend the meeting to provide technical advice and information and to indicate official "condoning" of the process.
    - Meeting is intended to result in a signed document of supported and non-supported issues that will be generated by the facilitator (who will also identify the necessary signees).

The Planning and Zoning Commission unanimously (6-0) recommended approval of this code amendment on September 3, 2003. Staff also recommends approval.

Mr. Shuford responded to various questions from Council, some being, but are not limited to, who will be the facilitators and how will they be paid; what is the timeline that the developer must meet with the neighborhood; what happens if concerns are not addressed at the neighborhood/developer meeting; how are the property owners notified; does Council have the option of referring the matter to the Planning & Zoning Commission for their recommendation; will outstanding issues be covered in the staff's report; after the facilitator minutes are written, will they be approved by the neighborhood and the developer for inconsistencies; and can advertise the meetings in CityWorks and on the City's Webpage.

At the suggestion of Councilwoman Jones, Mr. Shuford said that he would develop some basic training for City Council on how the neighborhood/developer meetings will work.

Councilman Mumpower spoke in support of this process and hoped it will have a positive effect for both the neighborhood and the developer.

At the request of Vice-Mayor Bellamy, it was the consensus of Council to have City staff report back to Council in a year to see if the process is effectively working.

More Flexible Setbacks for Handicapped Accessibility and Life Safety Features on Residential Lots

Mr. Joe Heard, Director of Development Services, said that this is the consideration of an amendment to the Unified Development Ordinance to provide greater flexibility in applying setback requirements in situations where handicapped accessibility and life safety features are required on residential lots.

Presently, the City of Asheville Unified Development Ordinance allows handicapped accessible ramps and fire escapes to encroach as close as three feet (3') to side and rear property lines. This proposed ordinance amendment is intended to offer even greater flexibility in situations where these safety and accessibility features are required on residential lots by the North Carolina State Building Code. Presently, these structures in such situations have to be constructed in an awkward configuration or obtain a variance from the Board of Adjustment. The City of Asheville Building Safety and Fire Departments have been consulted and support this proposed amendment. If approved, this amendment will allow the Planning Director to deal with these issues in a fair and timely manner.

On September 3, 2003, the Planning & Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0, including an amendment to limit the application of this change to residential properties. City staff recommends approval of the proposed code amendment as amended.

After discussion by Council, it was the consensus to place these public hearings on the October 14, 2003, formal City Council agenda.

OTHER BUSINESS

Councilman Dunn said that he has met with the Planning & Development Director and Councilman Mumpower on his concerns regarding the Asheville City Plan 2025. He is now requesting that City Council consider the Asheville City Plan 2025 with the seated Council. City Attorney Oast briefly explained the necessary steps to bring this matter back to Council earlier than January 2004 and would have that information for Council at their October 14, 2003, meeting.

CLOSED SESSION

At 3:47 p.m., Councilman Mumpower moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Carroll Moore; City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously.

At 4:00 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Vice-Mayor Bellamy adjourned the meeting at 4:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 14, 2003 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

PLEDGE OF ALLEGIANCE

Veteran of the U.S. Air Force Ray Green led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

ANNOUNCEMENT

Councilman Mumpower announced that Mayor Worley has been appointed as the Second Vice-President of the N. C. League of Municipalities.

I. PROCLAMATIONS:

A. DOMESTIC VIOLENCE TASK TEAM REPORT

Sergeant Daryl Fisher updated City Council on the Domestic Violence Task Team. Sgt. Fisher introduced the team members. The objective and scope of the Team is (1) to evaluate and redesign the police response to calls of domestic violence, and (2) emphasis on reporting; tracking; proper handling and follow-up; and timely referral to outside agencies. Some domestic violence concerns were (1) nationally, 40% of police calls for service are for domestic violence; (2) from 1992-1996, 21% of violence against women resulted from an intimate partner compared to 2% for men; (3) in 1998, between 3-4 women daily were murdered by a spouse or boyfriend; (4) locally in 2001-02, HelpMate sheltered 223 women and children; and (5) HelpMate further provided 1,664 nights of emergency shelter, made 1,625 crisis contacts, and assisted 1,629 persons through court advocacy.

MPO Dawn Dowdle, Team member, said that during this process, the team met with and gathered information from various external and internal agencies, including HelpMate, Asheville Police Department (APD) Victim Services, District Attorney's Office, Clerk of Court's Office, etc. They found out that that the APD and the other agencies are basically on the "same sheet of music" as it relates to domestic violence issues.

As a result of the Team's research, enhanced reporting and tracking of domestic violence cases has been implemented. Updated training sessions have been implemented for all personnel, including supervisors. Training began September 30, 2003. They will continue with pro-arrest philosophy concentrating on protecting the victim(s) from harm. This includes mandatory arrest for violation of the "trespass" and "harass" provision of a Domestic Violence Protective Order.

Proposed changes to domestic violence policy include: (1) for all calls involving a domestic dispute, an Incident Report must be completed if there is evidence of a physical injury and/or an arrest is made; and (2) arrest if mandatory when there is probable cause to believe there is a violation of the "trespass" or "harass" provisions of a domestic violence protective order.

In addition to our enhanced reporting, tracking and handling of these cases, further follow-up is recommended. APD Victim Services will forward reports of domestic violence to HelpMate daily. The APD Victim Services Coordinator and HelpMate have agreed to follow-up with domestic violence victims, which will reduce the possibility of victim's falling through the cracks.

Sgt. Fisher said the Team's proposals include (1) minor changes to report form; (2) minor changes to Domestic Violence Policy; (3) implementation of current training with updates as needed so domestic violence calls are handled properly; (4) making domestic violence training mandatory for all newly hired officers; (5) utilization of crime analysis, mandatory reports and clearance codes for tracking; (6) utilization of information card for timely referrals to outside agencies; and (7) follow-up with victims by the APD Victim Services Coordinator and HelpMate.

Sgt. Fisher said that by utilizing the Team's recommended enhancements, the APD will continue to improve police services by serving our citizens and improving the City's quality of life through fair and respectful proactive policing.

Councilwoman Jones pointed out that October is Domestic Violence Awareness Month and hoped that we can be part of the solutions. She hoped we can find ways to assist HelpMate, which will end up helping our entire community.

Vice-Mayor Bellamy commended the Task Team for their work and thanked various people for their support and leadership.

On behalf of City Council, Mayor Worley thanked Sgt. Fisher and the Task Team for their efforts in handling domestic violence.

II. CONSENT AGENDA:

Vice-Mayor Bellamy asked that Consent Agenda Items "C" and "K" be removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 23, 2003, AND THE WORKSESSION HELD ON OCTOBER 8, 2003

B. ORDINANCE NO. 3058 - ORDINANCE TO INCREASE LENGTH OF TERM FOR COUNCIL APPOINTEES TO ASHEVILLE TRANSIT COMMISSION

Summary: The consideration of an ordinance increasing length of term for members of the Asheville Transit Authority from 2 years to 3 years

In connection with its appointment of new citizen members to the Asheville Transit Commission, Council requested amendment to the transit commission ordinance, increasing the length of the term from two years to three years. This three-year term length is consistent with most other boards and commissions in the City. The ordinance will be effective for the terms of Council's appointments made on and after December 31, 2003.

If Council approves of the ordinance, its adoption is recommended.

ORDINANCE BOOK NO. 20 – PAGE 473

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR TEA 21 ENHANCEMENT GRANTS FOR NEW HAW CREEK ROAD/AVON ROAD SIDEWALKS, PACK SQUARE PEDESTRIAN IMPROVEMENTS AND WEST END/CLINGMAN PEDESTRIAN IMPROVEMENTS

This item was pulled from the Consent Agenda for individual discussion.

D. RESOLUTION NO. 03-169 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE REINSPECTION OF BRIDGES ON THE MUNICIPAL STREET SYSTEM

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation (NC DOT) on a bi-annual basis for the reinspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. Since the establishment of the program, the City has replaced 17 bridges through the program. The program is funded 80% through federal funds and 20% through City funds and administered by the NC DOT. To remain eligible for replacement funds and avoid penalties, it is required that all public bridges be inspected every two years. The NC DOT offers three options for meeting the bi-annual inspection requirements. One is to do the inspection with City forces; two is for the City to hire a consultant to do the inspections; or three is for the City to allow the NC DOT to do the inspections through a qualified private engineering firm.

Since 1983, the City has elected to execute agreements with NC DOT to accomplish the required inspections. This process allows a large number of bridges to be inspected under one contract or operation, resulting in a minimum inspection cost per bridge. NC DOT representatives anticipate the inspection costs to be approximately $2,600 per bridge for the upcoming inspection. The City has 25 bridges in need of inspection this year, which will yield an estimated total cost of $65,00. The City's share in this cost will be $13,000 (20% of the total cost). Funds for the City's share are budgeted in the Public Work's Bridge Maintenance line item.

The Public Works Department staff recommends adoption of the resolution authorizing the Mayor to execute a Municipal Agreement with the NC DOT for inspection of bridges on the Municipal Street System.

RESOLUTION BOOK NO. 28 – PAGE 31

E. RESOLUTION NO. 03-170 - RESOLUTION OF INTENT TO CLOSE AN UNNAMED ALLEY OFF COLLIER AVENUE AND SETTING A PUBLIC HEARING ON NOVEMBER 11, 2003

Summary: The consideration of a resolution of intent to close an unnamed alley off Collier Avenue and setting a public hearing on November 11, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close an unnamed alley off Collier Avenue, the entry of which is located approximately 200 feet north of the intersection of Collier and Banks Streets.

Public Works Department staff has researched and determined that this alleyway is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are eight lots that abut this alley identified by PIN Nos. 9648.06-38-4514; 9648.06-38-3540; 9648.06-38-3620; 9648.06-38-4526; 9648.06-38-4684; 9648.06-38-5757; 9648.06-38-3750; 9648.06-38-3895; 9648.06-38-4514.

City staff recommends that City Council adopt the resolution setting a public hearing for November 11, 2003, to close an unnamed alley off Collier Avenue.

RESOLUTION BOOK NO. 28 – PAGE 32

F. RESOLUTION NO. 03-171 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A NON-WARRANTY DEED TO BUNCOMBE COUNTY FOR PROPERTY ON GRIFFING CIRCLE

Summary: The consideration of a resolution authorizing the Mayor to execute a non-warranty deed to Buncombe County for property located on Griffing Circle.

The land on Griffing Circle identified as PIN Nos. 9640.20-81-0970 and 1983 was tendered to the City of Asheville and Buncombe County as the taxing entities by non-warranty deed recorded in Deed Book 1717 at Page 2223. The County offered the property for upset bid and a final offer of $36,800 was received. The City desires to convey its interest, if any, in the property to the County so that the property may be conveyed to the highest bidder. In return, the City will receive a pro rata share (approximately $12,267) of the sales price as the City's taxable interest appears.

The entire parcel is zoned residential and has an area of 0.63 acres.

Approval of the resolution will authorize the Mayor to execute the quitclaim deed to Buncombe County.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to execute a non-warranty deed to Buncombe County for property located on Griffing Circle.

RESOLUTION BOOK NO. 28 – PAGE 33

G. RESOLUTION NO. 03-172 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A N.C. COMMUNITY DEVELOPMENT INITIATIVE ENERGY EFFICIENCY GRANT

Summary: The consideration of a resolution authorizing the City of Asheville to accept an energy efficiency grant from N.C. Community Development Initiative (NCCDI), and approval of the associated budget amendment, in the amount of $30,000.

NCCDI has developed the Star Home Program to provide grants to not-for-profit agencies, including local municipalities, to assist with the cost of incorporating energy-efficient construction methods in new housing development. The City has recently been accepted for participation in the Star Home Program in respect of projects in which the City has a financial stake. The City's Community Development Division has submitted a specific application for funding for 18 homes at "Moser's Place" subdivision currently under construction on Maple Avenue, with assistance from the Housing Trust Fund and the Fee Rebate program.

The City will pass on grant funds estimated at $1,375 per unit to developer Ron Moser, Inc. A budget amendment in the amount of $30,000 is recommended to cover the estimated amount plus contingencies.

NCCDI contracts with Advanced Energy, Inc., to monitor projects and ensure adherence to "Energy Star" standards.

If this Star Home Program grant is successful, there will be opportunity to apply for additional grant funds for other projects.

Staff recommends City Council accept an energy efficiency grant from N.C. Community Development Initiative (NCCDI) and approve of the associated budget amendment, in the amount of $30,000.

RESOLUTION BOOK NO. 28 – PAGE 34

H. ORDINANCE NO. 3059 - BUDGET AMENDMENT TO ACCEPT A N.C. COMMUNITY DEVELOPMENT INITIATIVE ENERGY EFFICIENCY GRANT

Summary: See Consent Agenda "G" above.

ORDINANCE BOOK NO. 20 – PAGE 474

I. RESOLUTION NO. 03-173 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AWARD BID NO. 574-04 TO 4 FRONT SYSTEMS INC. FOR THE INSTALLATION OF A NEW TELEPHONE SYSTEM AT SEVERAL REMOTE OFFICES OF THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to award Bid No. 574-04 to 4 Front Systems, Inc. and execute any related contractual documents for the installation of a new telephone system at several remote offices of the City of Asheville.

The telephone systems at several remote offices of the City of Asheville are in need of replacement. Through a combination of technology called Voice over IP and the use of fiber optic cable from those locations to the City Hall building, a new telephone system can be installed that will provide additional capabilities. These locations include the Transit Administration Office, seven Fire stations, three Police substations and five Parks & Recreation offices. The new system has a three-year recovery of funding.

The City of Asheville sent out a request for proposal to acquire the new telephone system and received seven bid responses. These bid responses were reviewed and rated as to the best solution for the City based on the twelve evaluation criteria included in the bid request documentation. The results of the bid evaluation indicate that 4 Front is the lowest responsive bidder.

The total cost of the bid award is $116,000. The source of this funding comes from technology grant funding of the Transit Department and from the General Fund.

City staff recommends City Council adopt the resolution authorizing the City Manager to award Bid No. 574-04 to 4 Front Systems, Inc. and execute any related contractual documents for the installation of a new telephone system at several remote offices of the City of Asheville.

RESOLUTION BOOK NO. 28 – PAGE 35

J. ORDINANCE NO. 3060 - ORDINANCE REPEALING ORDINANCE REGARDING USE OF STREETS AND SIDEWALKS

Summary: The consideration of an ordinance repealing City Code Sec. 16-4, Use of Streets, Sidewalks.

Recent references to Chapter 16 of the City Code have brought to our attention the existence of City Code Sec. 16-4. This ordinance requires written permission for the use of City sidewalks for lectures, sermons, and similar activities, and further provides that permission may be revoked if the "good morals and order of the city so demand."

Despite the fact that this ordinance has been part of the City's Code since at least 1922, and has survived several comprehensive revisions, its obsolescence is self-evident and it has not been enforced for a long time. Subsequently adopted ordinances and policies regarding the use of City streets and public places have superseded Sec. 16-4, if not repealed it.

As we continue to notice outdated City Code provisions, we will bring them to Council's attention.

Adoption of the ordinance repealing Sec. 16-4 is recommended.

ORDINANCE BOOK NO. 20 – PAGE 476

K. RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2003 HARVEST FESTIVAL PRODUCED BY THE GROVE ARCADE FOUNDATION ON OCTOBER 18, 2003

This item was pulled from the Consent Agenda for individual discussion.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION NO. 03-174 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR TEA 21 ENHANCEMENT GRANTS FOR NEW HAW CREEK ROAD/AVON ROAD SIDEWALKS, PACK SQUARE PEDESTRIAN IMPROVEMENTS AND WEST END/CLINGMAN PEDESTRIAN IMPROVEMENTS

Due to a conflict of interest, Councilwoman Jones moved to excuse Vice-Mayor Bellamy from participating in this matter. This motion was seconded by Councilman Dunn and carried unanimously.

Summary: The consideration of a resolution authorizing the City Manager to sign three municipal agreements with the N. C. Dept. of Transportation (NCDOT) for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

In June 2002, the City of Asheville made application to NCDOT for TEA-21 Enhancement Grant for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements. Each of these projects was awarded a grant from NCDOT in varying amounts. The City of Asheville partnered with various organizations to receive these grants. The grants can only be awarded to a local government. The following is a description of each of the projects:

(1) New Haw Creek Road/Avon Road Sidewalk – City staff worked with the Haw Creek Community Association to develop a plan to add sidewalk to New Haw Creek Road from Arco Road to Beverly Road and on Avon Road from Beverly Road to Tunnel Road. The project number is E-4814. The total amount of the grant is $172,132. The match for the project is being made but a Small Urban Fund Grant from the State in the amount of $150,000, Fee-In –Lieu of sidewalk money from the City in the amount of $40,000 and $5,000 from the Haw Creek Community Associates.

(2) Pack Square Pedestrian Improvements – These improvements include Pack Square Renaissance streetscape on College Street, Patton Avenue and US 25 (Biltmore Avenue) providing a better balance between pedestrians and vehicles. The amount of the grant is $140,000. Pack Square Conservancy will provide the match for the project.

(3) West End/Clingman Pedestrian Improvements – These improvements include enhancements on Clingman Avenue and the development of a parallel greenway through Clingman Forest. The amount of the grant is $172,131. The match for the project will be made by Mountain Housing Opportunities.

Staff recommends that City Council authorize the City Manager to execute three municipal agreements with NCDOT for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

Councilman Ellis moved to approve Resolution No. 03-174. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 36

RESOLUTION NO. 03-175 - RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2003 HARVEST FESTIVAL PRODUCED BY THE GROVE ARCADE FOUNDATION ON OCTOBER 18, 2003

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2003 Harvest Festival produced by the Grove Arcade Foundation on October 18, 2003.

The 2003 Harvest Festival produced by the Grove Arcade Foundation has requested through the Asheville Parks and Recreation Department that City Council permit them to serve and consume beer and/or unfortified wine at their event on Saturday, October 18, 2003. The 2003 Harvest Festival is a celebration of fall in the mountains produced to attract people to the Grove Arcade and downtown.

City staff recommends City Council approve the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2003 Harvest Festival produced by the Grove Arcade Foundation on October 18, 2003.

Councilman Dunn moved for the adoption of Resolution No. 03-175. This motion was seconded by Councilman Ellis and carried on a 6-1 vote, with Vice-Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 37

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 902 SAND HILL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I/CONDITIONAL USE; AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR THE OPERATION OF AN ANTIQUE BUSINESS IN THE EXISTING DETACHED GARAGE

ORDINANCE NO. 3061 - ORDINANCE REZONING PROPERTY LOCATED AT 902 SAND HILL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I/CONDITIONAL USE

ORDINANCE NO. 3062 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 902 SAND HILL ROAD TO ALLOW FOR THE OPERATION OF AN ANTIQUE BUSINESS IN THE EXISTING DETACHED GARAGE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. if Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:28 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Joe Heard, Director of Development Services, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Heard said that this is the consideration of a request to rezone property located at 902 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to Community Business I/ Conditional Use and a request to issue a conditional use permit to allow for the operation of an antique business in the existing detached garage.

272

On July 22, 2003, Ms. Janet Forbes submitted a request to conditionally rezone her small residential parcel from its current RM-6 designation to Community Business I District, in the southwest area of the City.

The applicant has requested a rezoning of .98 acres of RM-6 property, located off of Sand Hill Road (PIN No. 9627.09-05-3407 split from 9627.09-05-2310), to Community Business 1 District (City Exhibit 3 – Location Map). The site is a single family residence with a detached garage and the request is to allow for the operation of a small independently owned and operated antique business to be located in the home's detached garage. The conditional use component of this project will be a site Master Plan showing the existing structures with existing and proposed parking. Operation of the antique business will not alter the structure or size of the garage in any way and the residence is to remain occupied by the applicant. The proposed site plan calls for the existing vegetation to be preserved and maintained with additional plant material to be supplied as needed for the required landscape buffer.

The project site is located within the City's extra-territorial jurisdiction on the southwest corner of a busy five-way intersection between Sand Hill Road, Sand Hill School Road, W. Oakview Road and Grandview Road. The subject property is surrounded primarily by single family uses zoned RS-4 and RM-6 with the notable exceptions of a convenience store market and gasoline sales (zoned CB-I) and the Oak Forest Presbyterian Church (zoned RS-4) (City Exhibit 4 – Aerial Map). The project will provide four (4) parking spaces (3 existing and 1 proposed) and a 20' wide Type 'B' buffer as required by the Unified Development Ordinance (UDO) (City Exhibit 3 – Site Plan).

The proposed zoning (CB-1) is to provide areas for medium-density business and service uses serving several residential neighborhoods.

The existing zoning (RM-6) establishes a low density multi-family district to permit a limited range of low density multi-family housing types along with single-family detached residences. The strategic placement of this zoning district can also help provide a transitional area between single family and multi-family uses. The CB-I zoning district is to provide areas for medium-density business and service uses serving several residential neighborhoods.

The Technical Review Committee (TRC) met on August 18, 2003, at which time they made a positive recommendation that the project be forwarded to the Planning and Zoning Commission.

The Planning and Zoning Commission reviewed this project at their September 3, 2003, meeting where the Commission unanimously (6-0) recommended approval of the project with the following conditions carried over from the TRC meeting:

1. Residence is to remain owner occupied.
2. Operation of business is to be limited to the garage only, any expansion of use will require re-application.
3. Operation of the business is restricted to the sale of antiques, any change of use will require re-application.
4. Parking is limited to the four (4) spaces shown (3 existing plus 1 handicap accessible added per Buncombe County Building Inspections request).
5. Existing buffer vegetation is to be supplemented as required by the UDO.
6. Signage will have to conform to CB-I standards.
7. That a revised plan be submitted showing the addition of the following information:
    - Existing right-of-way for Sand Hill Road and W. Oakview Road.

- Location, species, and size of existing street trees.
- Proposed handicap accessible parking space.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The proposed project will utilize existing structures on the site and will not require any grading or other land disturbing activities.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The project site will continue to support the existing single family home with an extremely limited change in appearance and activity. The proposed business use, with limited business hours, has been determined to generate very low traffic counts which will be accommodated by off-street parking where additional plant material may be installed to help buffer the higher use area of the property from adjacent single family homes. In addition, the subject property has, and will continue, to functionally buffer other single family homes from the existing higher use retail market/gasoline sales and Church activities.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The surrounding properties are primarily low density residential. The subject property will continue to function as the applicant's primary residence, which is also classified as low density residential. In addition, the subject property has, and will continue, to functionally buffer other single family homes from the existing higher use retail market/gasoline sales and Church activities.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

Historically, the Asheville area has played a predominant role as the major trade center for Western North Carolina. It is a City goal described in the Asheville 2010 Plan to promote, "A healthy, vibrant, expanding economy capable of sustaining a growing population and providing a diversity of high-paying jobs." This request does encourage diversity in the job and retail markets while maintaining and preserving a high quality of life for the individual. In addition, this request supports the Asheville City Council adopted Smart Growth Policies through the efficient use of our limited land that allows for the creation of a small scale mixed-use, infill development where individuals are able to live and work in the same area.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This proposed development is within reasonable distance to transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and other service centers. Preliminary review by other utility providers has not revealed any problems for serving the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed business use, with limited business hours and space, has been determined to generate very low traffic counts. It is anticipated that all business activity will be easily accommodated by the existing and proposed off-street parking and will not cause undue traffic congestion or hazards.

The Planning and Zoning Commission and City staff recommend approval of the zoning change from RM-6 to CB-1 and approval of the associated conditional use permit, as proposed by the applicant, subject to all TRC conditions being met.

Vice-Mayor Bellamy felt that since this is a commercial development in a residential neighborhood we need to be consistent with safeguards and limit the hours of operation to 9:00 p.m. Mr. Heard said that there is no limitation on business hours in the conditions because the neighbors have not expressed any concern about that.

Upon inquiry of Councilman Dunn, Mr. Heard explained that the City does try to be flexible with the requirements for landscaping.

Mr. Fred English felt that businesses in residential areas should not be allowed.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:35 p.m.

Regarding limiting the hours of operation, Councilman Mumpower said that his vote on that type of condition would be based on the actual use of the property, and he didn't see how the hours of operation of an antique business would put anyone in jeopardy

Councilman Ellis felt that limiting the hours of operation would place an unnecessary restriction on this business due to it's location.

Councilman Mumpower moved to adopt Ordinance No. 3061 to rezone property located at 902 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to Community Business I/ Conditional Use. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 477

Vice-Mayor Bellamy moved to adopt Ordinance No. 3062, to issue a conditional use permit to allow for the operation of an antique business in the existing detached garage, subject to the following conditions: (1) Residence is to remain owner occupied; (2) Operation of business is to be limited to the garage only, any expansion of use will require re-application; (3) Operation of the business is restricted to the sale of antiques, any change of use will require re-application; (4) Parking is limited to the four (4) spaces shown (3 existing plus 1 handicap accessible added per Buncombe County Building Inspections request); (5) Existing buffer vegetation is to be supplemented as required by the UDO; (6) Signage will have to conform to CB-I standards; (7) That a revised plan be submitted showing the addition of the following information: (a) Existing right-of-way for Sand Hill Road and W. Oakview Road; (b) Location, species, and size of existing street trees; and (c) Proposed handicap accessible parking space; and (8) Hours of operation each day will be from 7:00 a.m. to 9:00 p.m. This was seconded by Councilwoman Jones.

Councilman Mumpower moved to amend the original motion to delete the hours of operation as one of the conditions for issuance of the conditional use permit. This motion was seconded by Councilman Ellis and carried on a 4-3 vote, with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

The amended motion to approve the conditional use permit to allow for the operation of an antique business in the existing detached garage, subject to the following conditions: (1) Residence is to remain owner occupied; (2) Operation of business is to be limited to the garage only, any expansion of use will require re-application; (3) Operation of the business is restricted to the sale of antiques, any change of use will require re-application; (4) Parking is limited to the four (4) spaces shown (3 existing plus 1 handicap accessible added per Buncombe County Building Inspections request); (5) Existing buffer vegetation is to be supplemented as required by the UDO; (6) Signage will have to conform to CB-I standards; and (7) That a revised plan be submitted showing the addition of the following information: (a) Existing right-of-way for Sand Hill Road and W. Oakview Road; (b) Location, species, and size of existing street trees; and (c) Proposed handicap accessible parking space, carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 479

B. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR NEIGHBORHOOD/DEVELOPER MEETINGS AS AN OPTIONAL, ALTERNATIVE STEP IN THE REVIEW PROCESS FOR REZONINGS, CERTAIN CONDITIONAL USE PERMITS, CONDITIONAL USE REZONINGS, AND LEVEL III DEVELOPMENTS

Mayor Worley opened the public hearing at 5:46 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to provide for neighborhood/developer meetings as an optional, alternative step in the review process for rezonings, certain conditional use permits, conditional use rezonings, and Level III developments. This public hearing was advertised on October 3 and 10, 2003.

This code amendment would allow a specific type of neighborhood/ developer meeting to substitute for the Planning and Zoning Commission review for certain types of development proposals. Specifically, the amendment provides for the substitution of neighborhood/developer meetings for the required public hearing before the Planning and Zoning Commission (at the option of the applicant) for rezonings, certain conditional use permits, conditional use rezonings, and Level III developments. Planned Unit Developments and those conditional use permits that do not require Planning and Zoning Commission review would not be included in this new procedure.

Mr. Shuford said that based on City Council's considerable interest in improving developer and neighborhood communication early in the development review and approval process, City staff undertook a focus group process to identify issues and potential solutions in enhancing the existing "neighborhood meeting" approach. Three separate focus groups were convened. One group represented developer interests; one group represented neighborhood interests; and the third group consisted of the Planning and Zoning Commission. After each group had met and a list of critical issues was determined, selected members from each group then met together on two occasions to identify areas of agreement and to prepare recommendations for action. An independent facilitator was used to direct meeting discussion and provide minutes.

He reported that the focus group process has resulted in a recommended procedure for improved Neighborhood/Developer Meetings. The procedure includes an incentive for developers to choose the Neighborhood/Developer Meeting process over the standard review process. It includes an opportunity for expanded notification of property owners in the vicinity of the proposed development. Finally, it includes an organized approach for the conduct of Neighborhood/Developer Meetings that should result in the meetings to be conducted in an effective fashion. The goal of this procedure change is an early, friendly, helpful official partnership between the neighbors, developers and the City.

In summary, the proposal would apply to all rezoning, conditional use rezoning, and conditional use permit requests that involve Planning and Zoning Commission review. The proposed procedure offers developers the option of selecting an enhanced Neighborhood/Developer Meeting process in exchange for skipping the Planning and Zoning Commission step in our current requirements. This results in no additional time being taken in the development review process but creates significantly improved communication between developers and neighborhoods. City Council would continue to hold a public hearing and take final action on all development proposals, just as is done under the current requirements. Even when developers opt to follow the existing procedures, staff will continue to recommend developer contact with affected neighborhoods.

This recommendation would not have been possible without the dedication of time, creative ideas, and enthusiasm on the part of a large number of volunteers. I would like to thank the following persons for their assistance in creating this recommendation:

FOCUS GROUP PARTICIPANTS

Neighborhood Participants	Developer Participants	Planning & Zoning Commission
*Barber Melton	*George Morosani	*Billie Buie
*Headlee Howard	*Tom Gallaher/David Hill	*Tom Cathey
*Greg Gregory	*John Spake	*Selina Sullivan
*Mike Lewis	Chris Eller	Jan Davis
John Quigley	Harry Weiss	Hedy Fischer
Norma Baynes	Jerry Grant	Nate Cannady
Stephen Hudzik	Ron Butler	Rod Hudgins
	Ron Moser	

* indicates that the participant served on the final joint focus group.

Additionally, Paul Godfrey provided invaluable assistance by serving as the facilitator for these focus group meetings.

The following headings provide a summary of the work of these focus groups, including the clarification of key issues, identification of expected results (i.e., what the process should look like), and the specific meeting procedures themselves. These headings illustrate the organized way the groups conducted their business and the level of detail that went into their discussions.

Clarifying Issues and Interests

The following items were listed as major issues relating to Neighborhood/Developer Meetings:

- Misinformation
- Full plan details made available to all parties early in the process
- Lack of trust
- Early and accurate complete information sharing
- Clearly definition of neighborhood stakeholders
- Marketing of development process – common understanding of issues and procedures
- Lack of an on-going dialogue as the development process continues (even after development approval has been given and construction is underway)
- Neighbors don't understand technical aspects of the development process
- Need for a better Neighborhood/Developer Meeting process – ground rules; expectations; facilitation
- Need for citizens to be better educated about the development process
- Lack of understanding about the big picture – how does the project help the City meet its broader goals?
- Need for staff participation in Neighborhood/Developer Meetings
- No existing way to alert and document all impacted stakeholders
- Lack of willingness to compromise on each "side"

The following were identified as the key interests of the stakeholder groups:

- Neighbor concerns: Safety; property values; traffic; change in neighborhood character

- Developer concerns: Profit; property rights; desire to impact community in a positive way; need for clearly defined neighborhood meeting process that is reasonable in terms of time and money; staff involvement in neighborhood meetings for informational purposes and to indicate that the process is officially "condoned" by the City

- Staff concerns: Time involved in meetings; need to be perceived as neutral in the process.

Criteria for Guiding Process Decisions

Participants were asked to develop a set of criteria for use in evaluating any potential process ideas. The following criteria were developed:

- The process must have teeth.
- The process should be viewed as legitimate in eyes of all participants.
- The process should not be burdensome on any one party or on all parties.
- The process should clarify upfront what is and what is not negotiable.
- The process should be reasonable in terms of time and costs.

Improved Neighborhood/Developer Meeting Procedures

Participants identified the following procedures for improved Neighborhood/ Developer Meetings:

- Developer registers project application a minimum of 45 days before the City Council meeting at which the public hearing is scheduled to occur.
  - Plans are placed on record and made available to the public at a central location (City Planning and Development Department).
  - Plans will provide as much information as available at time of posting.
  - Plans will be made available on City website if possible.
  - Staff contact person is clearly identified.
- Notification procedures:
  - Property owners within 400 feet of the property proposed for development would receive notice of the Neighborhood/Developer Meeting from the City of Asheville. This is a minimum notification area and developers are advised to determine if additional property owners should be notified (e.g., if the project is located on a dead-end road 600 feet long, perhaps it would be good practice for the developer to notify all property owners fronting the road); developers would be responsible for any additional mailing costs associated with a larger notice area.
  - Any affected neighborhood association registered with the City and located within 400 feet of the property proposed for development would also receive notice of the Neighborhood/Developer Meeting. It is expected that the designated person(s) receiving this notice will identify key participants outside the general notice area and arrange for them to attend the Neighborhood/Developer Meeting. However, this should not be construed as an open invitation for all neighborhood association members outside the notice area to attend. The intent is to have representation from affected neighborhood associations while ensuring that most neighborhood participants are from the notice area.
  - Timing: The City shall mail Neighborhood/Developer Meeting notices 45 days before the City Council meeting at which the public hearing is scheduled to occur. The initial Neighborhood/Developer Meeting shall occur no less than 10 days prior to the City Council meeting at which the public hearing is scheduled to occur.
  - The City of Asheville will provide notice of the public hearing to adjacent and nearby property owners as provided for under state law or City Code requirements, whichever is more restrictive.
  - Meeting location: Neutral site of sufficient size for meeting.
- Meeting Facilitation - The meeting must be managed by someone who knows the rules (mediator/facilitator) and is able to effectively run a meeting. The developer will pay for the cost of the mediator/facilitator. City staff will attend the meeting as technical advisor(s) only and will not facilitate the meeting.
- Meeting Ground Rules - The following set of ground rules were adopted to promote effective communication during Neighborhood/Developer Meetings. These ground rules would be reviewed by the meeting facilitator at the outset of each meeting and "enforced" during the meeting by the facilitator.
  - Listen to one another (really listen before responding)

    - Ask for feedback from one another
    - Accept the need for compromise by each of us
    - No stereotyping (let's keep a level of objectivity in our discussions)
    - Be open minded
    - Let's clearly define our statements to insure that all parties clearly understand their meaning
- Conduct of Meeting – Meetings will have a structured agenda to include: Ground rules for the meeting; Areas of allowable discussion clarified; Clarification of any zoning rule(s) that applies to the situation; Plan presentation (including how plan addresses the big picture); Identification of areas of agreement and disagreement; Negotiation of issues of concern; and Identification of next steps, if any.
    - City staff must attend the meeting to provide technical advice and information and to indicate official "condoning" of the process.
    - Meeting is intended to result in a signed document of supported and non-supported issues that will be generated by the facilitator (who will also identify the necessary signees).

The Planning and Zoning Commission unanimously (6-0) recommended approval of this code amendment on September 3, 2003. Staff also recommends approval.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford reviewed how the process would work.

Discussion surrounded the timing of the neighborhood/developer meeting in that it did not give enough time for neighborhood review if changes to be made were agreed upon and/or not enough time for the initiation of the protest petition process. Mr. Shuford suggested that if Council would like to establish a longer period of time, he recommended this matter be postponed until he has an opportunity to review changes with the entire focus group.

In response to Vice-Mayor Bellamy, Mr. Shuford said that if this amendment is adopted, City staff will put the process into a form that will be followed with notice of meetings in CityWorks.

Mr. Shuford responded to various questions and comments from Council, some being, but are not limited to: will the protest petition process be affected; what will be the procedure for multi-sites with multiple property owners; who selects the facilitator and what if there are objections by the neighborhood association; can the City Council remand the matter to the Planning & Zoning Commission; who selects the time and place of the meetings; who will be invited to the meetings and will the media and general public be invited; is there a way we can notify renters in addition to property owners within the notice area; will the property be posted for the meeting; and how will City Council know a good faith presentation has been made.

When City Attorney Oast said that posting the site for the neighborhood/developer meeting is not a state law requirement, Councilman Peterson felt it would be appropriate to have that provision included in the ordinance.

Councilman Mumpower felt that this amendment seems to be fair and even-handed and expressed appreciation to the focus group for their efforts. He felt this was a good effort to try something different, noting that the ordinance can be amended if concerns arise.

Mr. James Judd, resident in Chunns Cove, explained his reasons why he felt this amendment would be disastrous. He felt the ordinance was vague and was concerned that the Planning & Zoning Commission is cut out of the process. He was concerned about the community notification, the facilitator and timing.

Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods, felt this was a good first step, but had a problem with the timing of the neighborhood/developer meeting, especially in terms of initiating a protest petition. She explained how the Raleigh, N.C., ordinance is mandatory and how their process works.

Ms. Norma Baynes, Shiloh Neighborhood Association Member, agreed with Ms. Melton and did not support the ordinance.

Mr. Mike Lewis, Grace Neighborhood Association member, felt this ordinance was a good step too, but was concerned about the timing as well.

Mr. Alan Ditmore, Leicester resident, felt that this change will drive up housing costs.

At 6:40 p.m., Mayor Worley closed the public hearings.

Councilman Ellis moved to continue this matter to the November 25, 2003, City Council meeting in order to give Mr. Shuford time to meet with the focus group regarding the timing issue. This motion was seconded by Councilman Mumpower and carried unanimously.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE OR ELIMINATE SETBACK REQUIREMENTS IN SITUATIONS WHERE HANDICAPPED ACCESSIBILITY AND LIFE SAFETY FEATURES ARE REQUIRED ON RESIDENTIAL LOTS

ORDINANCE NO. 3063 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE OR ELIMINATE SETBACK REQUIREMENTS IN SITUATIONS WHERE HANDICAPPED ACCESSIBILITY AND LIFE SAFETY FEATURES ARE REQUIRED ON RESIDENTIAL LOTS

Mayor Worley opened the public hearing at 6:48 p.m.

Mr. Joe Heard, Director of Development Services, said that this is the consideration of an amendment to the Unified Development Ordinance to provide greater flexibility in applying setback requirements in situations where handicapped accessibility and life safety features are required on residential lots. This public hearing was advertised on October 3 and 10, 2003.

Presently, the City of Asheville Unified Development Ordinance allows handicapped accessible ramps and fire escapes to encroach as close as three feet (3') to side and rear property lines. This proposed ordinance amendment is intended to offer even greater flexibility in situations where these safety and accessibility features are required on residential lots by the North Carolina State Building Code. Presently, these structures in such situations have to be constructed in an awkward configuration or obtain a variance from the Board of Adjustment. The City of Asheville Building Safety and Fire Departments have been consulted and support this proposed amendment. If approved, this amendment will allow the Planning Director to deal with these issues in a fair and timely manner.

On September 3, 2003, the Planning & Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0, including an amendment to limit the application of this change to residential properties. City staff recommends approval of the proposed code amendment as amended.

Mayor Worley closed the public hearing at 6:51 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3063. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 485

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3055 – SECOND READING OF THE REVISED MINIMUM HOUSING CODE

Mayor Worley said that the first reading of this ordinance was held on September 23, 2003.

Councilman Dunn moved for the second and final reading of Ordinance No. 3055. This motion was seconded by Councilman Mumpower and carried on a 4-3 vote, with Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "yes" and Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 – PAGE 423

B. ORDINANCE NO. 3064 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE DEVELOPMENT STANDARD BONUSES IN RESIDENTIAL DISTRICTS

Mayor Worley said that this public hearing was held on August 19, 2003. City Council then continued this matter due to concerns that the developments approved using the development standards bonus conditional use permit process would not be properly maintained if the Minimum Housing Code was modified.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for more flexible application of development standards, including density requirements, in all residential zoning districts.

This code amendment provides for more flexible application of development requirements in all residential zoning districts. Affected districts include: RS-2, RS-4, RS-8, RM-6, RM-8 and RM-16. Under certain circumstances, a conditional use permit process can be used to modify development standards, including increasing density above the maximum permitted in each of these zoning districts, if the applicant successfully demonstrates that the project would exhibit exceptional site and/or structure design that is appropriate to the architectural and/or environmental context of the surrounding neighborhood, and would also achieve one or more of the following goals:

- Promote the City of Asheville's affordable housing programs by providing housing that is affordable for purchase by people with household income below the area median or for rental by people with household income less than 80% of the area median, and particularly housing that meets the needs of people who have special needs or household income less than 60% of median income.
- Implement an officially adopted development plan for the area.
- Exhibit exceptional site design that preserves critical environmental features on the site.

- Assist the City of Asheville in meeting critical infrastructure needs, including but not limited to the preservation of open space, the creation of regional stormwater retention facilities, and achieving greater interconnectivity of the street network.
- Effectively incorporate public ansit as a primary mode of transportation to and from the development.

On June 19, 2003, the Planning and Zoning Commission unanimously recommended approval of the proposed code amendment by a vote of 4-0. City staff recommends approval of the proposed code amendment as well.

At the public hearing on August 19, 2003, two amendments were suggested to the proposed ordinance by deleting the word "city" when referring to goals and the ordinance before Council reflects those changes.

Upon inquiry of Councilman Mumpower, Mr. Shuford named the organizations that have received copies of the proposed ordinance and their comments.

Councilman Peterson expressed concern that the proposed amendment would not provide for the use of protest petitions by residents opposed to developments.

Councilwoman Jones said that her concern is that the developments approved using the development standards bonus conditional use permit process would not be properly maintained in the long run due to the recently adopted changes to the Minimum Housing Code.

Vice-Mayor Bellamy felt this should be an item that is brought back for review by Council to see how it is working.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 3064. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 – PAGE 987

V. NEW BUSINESS:

A. ASHEVILLE CITY PLAN 2025

City Attorney Oast said that on August 26, 2003, following the public hearing, Council voted to postpone consideration of adoption of the 2025 Plan to January of 2004. Recently, Council has indicated an interest in acting on the Plan before the end of the year.

Council's rules and Roberts' Rules of Order provide that reconsideration of an action (vote) previously taken can only occur at the same meeting where the previous action was taken. While the motion postponing consideration of the 2025 Plan could be considered more procedural than substantive, and not necessarily subject to processes governing substantive issues, Roberts suggests that a motion to postpone can have substantive effects. Moreover, the rules do not differentiate between procedural and substantive motions for purposes of reconsideration. Accordingly, he recommended the following procedure for changing the date for Council's consideration of the 2025 Plan.

1. Motion to suspend the rules to permit consideration of a motion to reconsider a previous action (must pass by 2/3 vote).

2. Motion to reconsider August 26 action postponing consideration of 2025 Plan (must be made by someone who voted for the motion to postpone; must pass by 2/3 vote). This motion may be combined with the motion to suspend the rules.

3. Motion to amend motion to postpone consideration of 2025 Plan so that date for consideration is the new date (to be determined) instead of January 2004 (majority vote).

4. Vote on amended motion (majority vote).

While Council may receive some comments about this action being unusual, it may be noted in response that the public hearing has already occurred and there was not much comment. Moreover, the public will have been notified, through the published agenda, of this action, and will be notified through our usual processes, of the new date.

If Council wishes to reschedule its consideration of the 2025 Plan, follow the procedure set out above.

Councilman Dunn explained that it was his original request that the matter be postponed, which was approved unanimously by Council. Since that time he has had an opportunity to discuss his concerns with the Planning & Development Director and feels that it would be appropriate to consider adoption sooner than January, 2004. Therefore, Councilman Dunn moved to suspend the rules to permit reconsideration of previous action and to reconsider the August 26, 2003, action postponing consideration of the adoption of the Asheville City Plan 2025 until the first of January 2004. This motion was seconded by Councilman Ellis and carried unanimously.

Councilman Dunn moved to amend the motion to postpone consideration of the adoption of the Asheville City Plan 2025 until October 28, 2003. This motion was seconded by Councilman Mumpower and carried unanimously.

The original motion, as amended, carried unanimously.

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of September 19-October 2, 2003: Katie Lewis (Sanitation), Gordon Pirie (Sanitation) and Harriette G. Winner (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English asked companies to buy minutes for a satellite phone so that our troops overseas can call home. He also questioned how much money our lobbyist has been able to secure for Asheville.

Mr. Dennis Justice, Fletcher resident, urged Council to update the Civic Center's scoreboards. He spoke about the renovations that could benefit from the project development bonds on the November ballot.

Ms. Beth Maczka apologized to Councilman Dunn for some incorrect information she received regarding his rental property and suggested all City properties be maintained at 65 degrees over the winter months.

Mr. Mike Fryar explained to Council, using maps, why he felt the recent annexation of his property on Smoky Park Highway contained an illegal description. City Attorney Oast responded that the written description is accurate and there is no question of what is being annexed. He felt that if this were to be legally challenged in court, the City would be successful.

CLOSED SESSION

At 7:42 p.m., Councilwoman Jones moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: City of Asheville for the Regional Water Authority of Asheville Buncombe and Henderson; and J. C. Clark - G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously.

At 7:58 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:58 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 21, 2003 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Minority Business Commission Annual Report

Summary: Presentation of the Minority Business Program Annual Report for Fiscal Year 2002 - 2003.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998, December 1999, December 2001 and October 2002, to clarify provisions of the Plan and to reduce the Minority Business Commission from thirteen members to eleven.

The Plan requires the Office of Minority Affairs to present to the City Council and County Commissioners an Annual Report on the effectiveness of implementation of the Plan. The Report shall include, but not be limited to: the number of minority businesses; percentage of minority businesses contracting with the County and City either as a prime contractor or as a subcontractor; percentage of overall reported contracts awarded to minority businesses; percentage of contractors complying with good faith efforts; and percentage of goals achieved and goals waived.

The Annual Report for Fiscal Year 2002 – 2003 has been reviewed by the Minority Business Commission and approved at its meeting on August 14, 2003.

City Council to receive the Annual Report.

Vice-Mayor Bellamy recognized the good efforts being made to implement the plan and asked the Office of Minority Affairs to suggest ways in which elected officials can help to improve the numbers.

Annual Motorola Maintenance Agreement

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $11,161.39 per month.

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2003, through August 31, 2004, has increased by three percent. This is the first increase in the maintenance cost per unit in ten years.

This renewal agreement reflects a monthly increase of $1,366.29. The agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The agreement also covers radio equipment for the Asheville Transit Authority this year. The monthly cost of this service is $11,161.39.

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

Acceptance of Streets – Portion of Pine Acre Boulevard and Oxford Court

Summary: The consideration of a resolution to accept Oxford Court and the remainder of Pine Acre Boulevard as City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Oxford Court and a portion of Pine Acre Boulevard were constructed approximately ten years ago with the understanding that they were to become publicly maintained streets. Engineering Department Staff inspected the streets at the time of construction and found them to be constructed in accordance with the standards at that time.

The streets were never officially accepted by City Council for maintenance. Oxford Court is approximately 490 feet long and has an average width of 20 feet. The length of Pine Acre Boulevard that staff is requesting acceptance of is approximately 930 feet long and has an average width of 20 feet. Staff is only requesting a portion of Pine Acre Boulevard be accepted by the City for maintenance because the remainder of the street is currently maintained by the City.

Following City Council's approval of this resolution, Oxford Court and the remainder of Pine Acre Boulevard will be added to the official Powell Bill list.

City staff requests City Council accept Oxford Court and the remainder of Pine Acre Boulevard as City maintained streets.

City Engineer Cathy Ball responded to street maintenance questions from Councilman Dunn.

Great American Main Street Award

Summary: The consideration of a resolution of support for an entry into the Great American Main Street Award competition.

The Asheville Downtown Association, Public Interest Projects, Inc. and the City of Asheville are putting together an application for the Great American Main Street Award. If selected, the award will be given to the community of Asheville as a whole. The award recognizes the accomplishments in the revitalization of traditional downtowns and neighborhood commercial districts and is given to five towns or cities each year from across the country. As part of the application, there is a required resolution of support from the applicant's city or town council.

The application package will include the following: a history of downtown's revitalization; the key participants; major achievements; business development; a summary of the economic impact of revitalization; slides depicting our success including before and after shots of renovated buildings; and other letters of support.

City staff recommends approval of the resolution of support for an entry into the Great American Main Street Award competition.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place these items on the next formal City Council agenda.

JOINT PLANNING AREA

Planning & Development Director Scott Shuford said that City and Buncombe County staff have been working on development standards and procedures for the proposed Joint Planning Area (JPA) for approximately one year. There was some initial assistance from a land planning consultant but much of the work has been by City and County staffs.

He described the JPA as an area of shared jurisdiction between Buncombe County and the City of Asheville wherein the County and City have agreed to the development standards and enforcement procedures. The JPA completely replaces the City of Asheville's extraterritorial jurisdiction (ETJ).

Benefits of the JPA for the City include: (1) shared growth management over larger area; (2) automatic JPA expansion; and (3) cooperation with county on key issues. Benefits for the County include: (1) less restrictive than the Unified Development Ordinance (UDO); (2) day-to-day County administration; and (3) cooperation with City on key issues.

Mr. Shuford then reviewed the roles of the elected and appointed bodies. The Commissioners and Council will (1) establish the initial zoning map for the JPA; (2) adopt the initial zoning and development regulations for the JPA; (3) consider and approve changes to the map and regulations; and (4) both bodies must agree to zoning map and development regulations. The County Planning Board and the City's Planning & Zoning Commission will make recommendations on the initial zoning map for the JPA and the initial zoning and development regulations for the JPA; and make recommendations on changes to the map and regulations. The County Board of Adjustment will consider and approve subdivisions, variances, conditional use permits, larger development proposals (25,000 sf+) and Code interpretations; votes will require a 4/5's vote to approve; and "apolitical" consideration of development proposals. The new County Board of Adjustment make-up will be five members – 3 members appointed by the County and 2 members appointed by the City.

City staff will review and comment on Board of Adjustment cases. County staff will handle the application intake and processing; will be the staff liaison to the County Board of Adjustment; will distribute applications to City staff; and will enforce zoning and development regulations.

The initial area of the JPA includes all existing City ETJ and other unzoned incorporated areas roughly one mile from Asheville's corporate limits. The initial area of the JPA does not include other incorporated areas or their ETJ's or Beaverdam and Limestone zoned areas.

Mr. Shuford then reviewed the initial area of the JPA. The initial area of the JPA will expand as the City of Asheville annexes. Expansions will occur on an annual basis unless there are no annexations during the preceding year. All ETJ is replaced by JPA (to reduce staff and customer confusion). The Interlocal agreement will allow the County to appoint 2 members to the City's Planning & Zoning Commission and one member to the City's Board of Adjustment (plus an alternate).

The JPA zoning districts will comprise of three residential districts (R-1, R-2 and R-3), three business districts (Neighborhood Business, Community Business and Highway Business), and two other districts (Office Institutional and Industrial). He then reviewed the setbacks and height restrictions; and special provisions of the JPA zoning districts.

Mr. Shuford then reviewed the JPA development regulations outlining each proposal, which included stormwater, streets, sidewalks, signs, traffic impact analyses, and cell towers. He said that the County is still reviewing the sidewalks proposal.

City staff recommends City Council receive the staff presentation and provide direction as to the next steps for proceeding with the JPA. At this point the City is waiting to hear back from the County on key issues and then it will be necessary to finalize the development issues in line of what was presented today. We will then bring that forward to the City's Planning & Zoning Commission, the County's Planning Board, City Council and County Commissioners. City Attorney Oast is working on an Interlocal Agreement with Buncombe County on the JPA.

Mr. Shuford responded to various questions and comments from Council, some being, but are not limited to: what process will be used to determine land designations if areas are annexed; in terms of stormwater and traffic impact analyses, why do they need to be reviewed by the County or consultant when the City has the expertise in-house; what is the rationale behind the County appointments to the Planning & Zoning Commission and the City's Board of Adjustment; is there any research that shows having more concrete sidewalks will result in more stormwater runoff; what will be the process if someone wants to change their zoning designation in the JPA; and have other groups reviewed this information.

Councilwoman Jones felt that the Joint Planning Area is the result of two governing bodies compromising for the betterment of the community and better use of tax dollars.

Councilman Peterson pointed out that most cities that have ETJ's and County appointments let the County appointments only vote on projects in the ETJ. Asheville is one of the few who allows County appointments to vote on all projects.

Mayor Worley felt the JPA is breaking ground in North Carolina and is shows extraordinary cooperation between the City and County.

Upon inquiry of Mayor Worley, Mr. Shuford said that regarding on-premise signs, the County's biggest concern was the ability to use existing signs, have them grandfathered, and have them maintained.

When Councilman Peterson asked how the protest petition process would work in the JPA, Mr. Shuford said that he would look into that issue. City Attorney Oast said that he felt that since the protest petition process applies in the ETJ, it would also apply in the JPA. Councilman Peterson asked for additional information on this issue.

Upon inquiry of Councilman Peterson, City Attorney Oast said that he is aware of the potential need for an opt out clause for either or both parties and will insert appropriate language in the Interlocal Agreement.

After discussion initiated by Vice-Mayor Bellamy, it was the consensus of City Council to have the Mayor send a letter to Commissioner Ramsey asking that the County respond to the City on the key issues expeditiously so that the seated Council can take action since it is the group that has worked on this issue.

CLINGMAN FOREST GREENWAY MASTER PLAN

Superintendent of Parks Jim Orr said that this is the consideration of a resolution to adopt the Clingman Forest Greenway Master Plan.

Clingman Forest is an approximately 10-acre forest in downtown Asheville, bounded roughly by the YWCA, Asheville Middle School, and Charles Street to the East, Aston Park to the North, Clingman Avenue to the West, and the River/Arts Warehouse District to the South.

Ms. Tamara Calabria, representing Mountain Housing Opportunities, said that a committee of stakeholders was formed to lead the project and work closely with the design consultant to develop the plan. This committee included representatives from the City's Parks and Recreation and Planning Departments, the Asheville Greenway Commission, Mountain Housing Opportunities, the West End/Clingman Avenue Neighborhood, Buncombe County Parks and Recreation and Buncombe County Board of Education. The planning effort was made possible through generous grants received by Mountain Housing Opportunities from the Pigeon River Fund and Carolina Power and Light.

Much of the property within the proposed greenway corridor is currently owned by public or quasi-public agencies, including the City of Asheville, Buncombe County, and the Buncombe County Board of Education. There are several small parcels within these larger tracts that are currently in private ownership. The proposed linear park is indicated as a primary off-road greenway corridor in the Asheville Greenway Master Plan.

The purpose of the Master Plan was to develop an understanding of the site through detailed site analysis, receive public input, and establish guidelines for development of the greenway. The future Clingman Forest Greenway will eventually provide a greenway connection between Buncombe County's Aston Park and Asheville's French Broad River Riverfront District. The corridor is planned to serve as a valuable natural resource for recreation and environmental education, and also contribute to the revitalization of the surrounding area. The future greenway will serve both the community in the immediate vicinity as well as the broader Asheville area.

Key design concepts will be to (1) provide network of trails; (2) incorporate infill housing; (3) protect the site's natural character; (4) incorporate environmental education; and (5) reinforce a sense of place.

Currently secured funding and support includes: (1) The N.C. Dept. of Transportation (NCDOT) Enhancement Grant ($172,00)) for streetscape improvements to Clingman Avenue, to include construction of the on-street portion of the Clingman Forest Greenway and stormwater infrastructure within Clingman Forest; (2) Community Development Block Grant funding ($34,000) which will provide the local match for the first phase of the NCDOT Enhancement Grant; and EPA 319 Stormwater Grant ($95,000) secured b NCSU Water Quality Group for constructed stormwater wetland within Clingman Forest.

The Parks and Recreation Department and Asheville Greenway Commission recommend the City of Asheville adopt the Clingman Forest Greenway Master Plan as a document that will serve as a guideline for greenway development.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

Ms. Calabria responded to various questions/comments from Council, some being, but are not limited to: why isn't there a more direct tie into Aston Park; what is the total budget for the project; and what type of grants will they use to secure funds.

Councilwoman Jones wanted to make sure that since the timeline for implementing this Master Plan is long-range, we will have an opportunity to educate the public and receive some genuine feedback.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

PUBLIC ACCESS CHANNEL COMMISSION UPDATE

Public Access Channel Commission Chair Beth Lazer said that this is the consideration of a resolution authorizing the Mayor of the City of Asheville to enter into an Interlocal Agreement with Buncombe County for the purpose of providing funding of a Countywide public access television operation and facility.

In March 2000 the Asheville City Council appointed the Public Access Channel Commission (PACC) to facilitate the establishment and management of a public access channel in Asheville. Since that time, the Commission has formed a non-profit organization to manage the channel (URTV, Inc.), developed a management and operations plan for the station, identified sources of funding, and worked with other groups, to include the Asheville Chamber of Commerce and Buncombe County government to identify opportunities for collaboration.

Most recently, Buncombe County government reviewed and agreed to enter into a Interlocal Agreement with the City of Asheville to provide for funding of a Countywide public access television operation and facility. This agreement provides that the City and County will cooperate in the provision of public access television to serve the Asheville-Buncombe area, through a non-profit corporation.

This agreement is the first step in the realization of a Public Access Channel. Over the next month, PACC board members will work with City and County staff to orchestrate next steps and provide additional recommended action for Asheville City Council's consideration.

City staff recommends City Council adopt the resolution authorizing the Mayor to enter into an Interlocal Agreement with Buncombe County for the purpose of providing funding of a Countywide public access television operation and facility.

Ms. Lazer said that the PAC is ready to go, but the organizational work still needs to be done to mature this collaboration. Therefore, she requested to come back to Council in approximately 30-45 days to update Council on what they see URTV needs to get going, to ask Council to dissolve the PAC as currently constituted, to ask Council to endorse the URTV, Inc. organization and Board as the management organization, and to direct staff to work on drafting one management agreement.

Upon inquiry of Vice-Mayor Bellamy, Ms. Lazer said that the proposal for the URTV Board is that it will consist of 11 members. Currently there are five members of the PAC, who are willing to be a part of the first Board, leaving six open seats. They will work with Assistant City Manager Jeff Richardson to come up with a way to collaborate with the City and County on how to fill those remaining seats. They need people who have special skills, e.g. a producer, an attorney, etc. There is also a definite need for youth representation - perhaps a youth from Project STEAM. They would also like to reach out to the Latino and African American communities. They hoped to have a public application process for people to express an interest, noting that diversity most certainly will be attempted.

Vice-Mayor Bellamy pointed out that the agreement states that in the event of a war, emergency or national disaster that requires reallocation of funds or other assets, notice of termination shall be provided for in writing at least 60 days in advance of said termination. She was concerned that 60 days was too long and that it should be 30 days. City Attorney Oast said that he would look into that matter.

Ms. Lazer responded to the concern raised by Councilman Dunn about content on the channel.

Councilwoman Jones said that 3.5 years of working on this project shows a remarkable commitment and appreciated the work of Ms. Lazer and the entire Commission.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

RE-EVALUATION OF WATER TREATMENT PLANT TOURS

Interim Water Resources Director David Hanks said that this is the consideration of reinstating the North Fork Water Treatment Facility and the Mills River Water Treatment Plant tours.

The Water Resources Department suspended tours of the North Fork Water Treatment Facility and the Mills River Water Treatment Plant in February, 2003 due to potential terrorists threats, general uncertainty of world events and the recommendation of a third party consulting firm through the Environmental Protection Agency (EPA) mandated water system vulnerability assessment (VA). The VA sited potential threats from local environmental activists and the general liability associated with tours of the plant and wooded area around the facility. Security at all Water Resources facilities has been upgraded to include camera surveillance, electric key card gates and door access.

The Water Treatment Plants and the watersheds are owned by the City of Asheville and the City of Asheville has the liability if someone is injured or killed on the property or water flow is disrupted by a malicious act by an individual or group. That potential has been identified along with other potential liabilities of the water system listed in the VA.

Currently, the Water Education Coordinator is scheduling classroom events and programs through local and county-wide schools. Per the Water Education Coordinator, schools have cut back on tours for the same reasons the Water Resources Department eliminated water treatment plant tours and that is potential liability and potential harm to the participants. Classroom participation and events at schools are being scheduled as requests are received. The department is also working with the North Carolina Department of Environment and Natural Resources (NCDENR) on a video program as part of the science water curriculum for tenth grade students throughout the state.

The Water Resources Department has been pursuing other possible options of providing water education through a joint venture with the Asheville Parks and Recreation Department by having a joint use resource center located on the French Broad River at the French Broad River Park with access to the river and a natural wetlands area. This potential project will be addressed during the Fiscal Year 2004-2005 budget process due to current funding limitations by both departments.

Due to the liability factor and in order to maintain compliance with the VA recommendation that tours of the Water Treatment Facilities not be started back, City staff recommends continuing to pursue a Water Education Resource Center so that groups and schools classes can still receive quality water education and conservation information at a central location.

292

Councilman Ellis encouraged the Water Resources Department and the Parks & Recreation Department to continue searching for grants to proceed with a plan at the French Broad River Park.

Upon inquiry of Councilman Jones, Mr. Hanks explained what the preliminary $2 Million budget included at the French Broad River Park.

Councilman Peterson felt the community benefit of the tours outweighs the liability factor.

Councilwoman Jones asked that Council define the word "consensus" at the upcoming retreat.

It was the consensus of Council to continue ceasing the tours at the North Fork Water Treatment Facility and the Mills River Water Treatment Plant.

At 5:10 p.m., Mayor Worley announced a short break.

FOR OUR KIDS PROPOSAL

Councilman Mumpower presented to Council a program he developed called "For our Kids..." which is his personal effort to move us along to look for ways of improving the public housing picture. He explained how the program evolved thanking Mr. David Jones, Executive Director of the Housing Authority of the City of Asheville, and Mr. Michael Godwin and Mr. Gene Bell, both with the Housing Authority.

The mission is about creating a safe and healthy environment for our kids that support their growth and well-being. The goal is to target unsafe areas that affect our children and their quality of life. In partnership with the City of Asheville, the Housing Authority, residents and the community, we seek to address key factors that can have a positive and lasting impact on our children.

Who will benefit? Our children; our schools (they are better able to teach children nurtured and supported at home); all residents of public housing (a better place four our kids is a better place for everyone); our community at large (public housing problems eventually affect everyone); and public dollars (money currently devoted to litter, vandalism, etc. can be better invested in improving public housing).

Councilman Mumpower explained how the following 10-point program will bring us together in support of public housing:

(1) Operation Clean-Up

- (a) monthly "litter days" in each public housing development;
- (b) "For Our Kids..." trash cans personalized to each development – make it fun (Biltmore Iron and Metal have graciously said that they will donate the cans); and
- (c) outside support from churches, civic clubs, volunteers and others;

(2) Church & Civic Club Sponsorship

- (a) provide support, outside investment, and sponsorship for constructive initiatives within public housing;
- (b) decrease the isolation and separation of some public housing residents; and

- (c) expand our sense of community and mutual concern;

(3) Mentoring Program for Children

- (a) an additional source of attention, example, and support for children at risk;
- (b) countering influences to negative exposures that can occur; and
- (c) use existing programs and develop new programs;

(4) Concentrated Law Enforcement

- (a) persistent and enthusiastic attention to public safety issues in public housing;
- (b) "Officer of the Day" program; and
- (c) deny a safe haven for criminals and others who abuse our public housing developments;

(5) Resident Rule Education and Enforcement

- (a) raise the awareness of resident rules designed to support public housing as a safe and pleasant place to live;
- (b) provide written standards consistently applied to all; and
- (c) enforcement that supports good tenants;

(6) Gun Purchasing Program

- (a) an ongoing efforts to reduce the numbers of weapons in public housing;
- (b) provide financial rewards and immunity for turned in firearms; and
- (c) reduce the dangers by reducing the numbers;

(7) Activities Program

- (a) intentional efforts to ensure that all children in public housing have access to activities that support their needs;
- (b) direct and continuing access to athletics, brownies, cub scouts, etc.
- (c) flower/vegetable garden programs and others that support a sense of community;

(8) Volunteers and Community Service

- (a) a community minded way to bring energy and resources to bare on public housing issues
- (b) community service can have a major impact on litter, playground maintenance, and other concerns; and
- (c) collaborative efforts that help others help themselves.

(9) Resident Recognition

- (a) direct attention to those residents who make public housing a good place to live;
- (b) provision of regular awards, rewards, and appreciation for exceptional residents; and
- (c) recognition for children;

(10) Jobs Program

- (a) connect with employers willing to support residents with good job opportunities;
- (b) education employers on the powerful impact a job can have on children and families in public housing; and
- (c) seek ways to help residents find, secure, and thrive in a good job.

He explained how the program will work: (1) formation of a Task Force dedicated to bringing each of these 10 efforts to life in our public housing; (2) develop Action Committees devoted to each public housing development; (3) ongoing oversight of the effort by the Housing Authority Board and City Council; (4) ensure that residents have a strong role in each part of For Our Kids …; (5) maintain a focus that is about identifying and solving problems over blaming or criticizing faults; and (6) For Our Kids … is about partnership, action and respect.

He said that we have the Housing Authority's staff support, the City's Housing and Community Development Committee's support and the support of residents, interested churches and civic clubs, the police and others. He said we now the support of City Council, the Housing Authority's Board's and the support of the Resident's Council.

Councilwoman Jones said we need to make sure that whatever effort goes forward is that we have the ownership of the community members themselves. She also wanted to make sure that there wasn't a duplication of efforts because there are strong non-profit efforts already taking place.

Ms. Trina Gardner, President of the Resident's Council, said that she is excited about working together to make a difference in the public housing projects.

Vice-Mayor Bellamy said that she tried to bring this issue before Council at their 2002 Retreat, however, for various reasons City Council did not support her plan. Despite that fact, she would wholeheartedly support Councilman Mumpower's efforts because the ultimate goal is to protect our children.

After a short discussion of how to proceed, Councilman Mumpower asked to be allowed the time to lay more groundwork behind the scenes, build the necessary partnerships, gather positive momentum and formulate the Task Force. After those items are accomplished, he would then like to bring the matter back to Council.

CLOSED SESSION

At 5:55 p.m., Vice-Mayor Bellamy moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: City of Asheville for the Regional Water Authority of Asheville Buncombe and Henderson; and J. C. Clark. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 5:58 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

295

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:58 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 28, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Veteran of the U.S. Air Force Ray Green led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Bellamy gave the invocation.

AGENDA CHANGE

At the request of Mayor Worley, it was the consensus of City Council to move the resolution authorizing the Mayor to enter into an Interlocal Agreement with Buncombe County to provide funding of a Countywide public access television operation and facility immediately after the public hearing.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER 8, 2003, AS "WORLD TOWN PLANNING DAY'

Mayor Worley read the proclamation proclaiming Saturday, November 8, 2003, as "World Town Planning Day" in the City of Asheville. He presented the proclamation to Planning & Zoning Commission Chair Hedy Fischer, who briefed City Council on some activities taking place during the day.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 14, 2003, AND THE WORKSESSION HELD ON OCTOBER 21, 2003

B. RESOLUTION NO. 03-177 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A SERVICE AGREEMENT RENEWAL WITH MOTOROLA COMMUNICATIONS & ELECTRONICS INC.

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $11,161.39 per month.

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2003, through August 31, 2004, has increased by three percent. This is the first increase in the maintenance cost per unit in ten years.

This renewal agreement reflects a monthly increase of $1,366.29. The agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The agreement also covers radio equipment for the Asheville Transit Authority this year. The monthly cost of this service is $11,161.39.

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

RESOLUTION BOOK NO. 28 – PAGE 40

C. RESOLUTION NO. 03-178 - RESOLUTION ACCEPTING OXFORD COURT AND THE REMAINDER OF PINE ACRE BOULEVARD AS CITY MAINTAINED STREETS

Summary: The consideration of a resolution to accept Oxford Court and the remainder of Pine Acre Boulevard as City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Oxford Court and a portion of Pine Acre Boulevard were constructed approximately ten years ago with the understanding that they were to become publicly maintained streets. Engineering Department Staff inspected the streets at the time of construction and found them to be constructed in accordance with the standards at that time.

The streets were never officially accepted by City Council for maintenance. Oxford Court is approximately 490 feet long and has an average width of 20 feet. The length of Pine Acre Boulevard that staff is requesting acceptance of is approximately 930 feet long and has an average width of 20 feet. Staff is only requesting a portion of Pine Acre Boulevard be accepted by the City for maintenance because the remainder of the street is currently maintained by the City.

Following City Council's approval of this resolution, Oxford Court and the remainder of Pine Acre Boulevard will be added to the official Powell Bill list.

City staff requests City Council accept Oxford Court and the remainder of Pine Acre Boulevard as City maintained streets.

RESOLUTION BOOK NO. 28 – PAGE 41

D. RESOLUTION NO. 03-179 - RESOLUTION SUPPORTING ASHEVILLE'S ENTRY INTO THE GREAT AMERICAN MAIN STREET AWARD COMPETITION

Summary: The consideration of a resolution of support for an entry into the Great American Main Street Award competition.

The Asheville Downtown Association, Public Interest Projects, Inc. and the City of Asheville are putting together an application for the Great American Main Street Award. If selected, the award will be given to the community of Asheville as a whole. The award recognizes the accomplishments in the revitalization of traditional downtowns and neighborhood commercial districts and is given to five towns or cities each year from across the country. As part of the application, there is a required resolution of support from the applicant's city or town council.

The application package will include the following: a history of downtown's revitalization; the key participants; major achievements; business development; a summary of the economic impact of revitalization; slides depicting our success including before and after shots of renovated buildings; and other letters of support.

City staff recommends approval of the resolution of support for an entry into the Great American Main Street Award competition.

RESOLUTION BOOK NO. 28 – PAGE 42

E. RESOLUTION NO. 03-180 - RESOLUTION AUTHORIZING THE CHAIRMAN OF THE ASHEVILLE REGIONAL AIRPORT AUTHORITY TO EXECUTE A GRANT AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION (PROJECT 36244.15.5.1)

Summary: The consideration of a resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

The City is required by law to execute certain contracts and agreements for the Airport Authority. This grant agreement is to allow the Authority to receive additional matching funds from the N. C. Dept. of Transportation ("DOT") for the following project: AIP 24: Raise and Recable HIRL, Runway and Taxiway Safety Area Improvements.

The grant, in the amount of $27,777, has been approved by DOT based on a total estimated cost of $555,540.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 28 – PAGE 43

F. RESOLUTION NO. 03-181 - RESOLUTION AUTHORIZING THE CHAIRMAN OF THE ASHEVILLE REGIONAL AIRPORT AUTHORITY TO EXECUTE A GRANT AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION (PROJECT 36244.15.6.1)

Summary: The consideration of a resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

The City is required by law to execute certain contracts and agreements for the Airport Authority. This grant agreement is to allow the Authority to receive additional matching funds from the N. C. Dept. of Transportation ("DOT") for the following project: AIP 25: Rehabilitate Airfield Electrical Vault, Expand General Aviation Apron, Construct Bypass Taxiway – Runway 34, and Expand Terminal Building – Phase I.

The grant, in the amount of $298,965, has been approved by DOT based on a total estimated cost of $5,979,300.

City staff recommends adoption of the resolution.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE REZONING TWO PROPERTIES LOCATED AT 653 AND 659 BREVARD ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

ORDINANCE NO. 3065 - ORDINANCE TO REZONE TWO PROPERTIES LOCATED AT 653 AND 659 BREVARD ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

Mayor Worley opened the public hearing at 5:09 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone two properties located at 653 and 659 Brevard Road from RS-8 Residential Single-Family High Density District to Office District. This public hearing was advertised on October 17 and 24, 2003.

The property owners, Jeannette Hall, Dr. Phil Davis and Janna Gower, wish to rezone the properties in order to utilize them for uses permitted in the Office District. The purpose of the Office District is to reserve areas for the development of small-scale office uses adjacent to residential uses. The district may also serve as a transition as residential areas convert to other uses or between residential and commercial areas.

The properties, which total 1.81 acres, are located in the City limits on Brevard Road south of Interstate 40 (PIN Nos. 9627.16-92-8533 and 9627.16-92-8606). The existing land uses and zoning in the area include a dentist office and residence to the north zoned Office/Conditional Use Zoning and vacant and residential uses zoned RS-8 and Commercial Industrial District to the west. Property to the east across Brevard Road is unzoned agricultural land while the property directly south, which is also zoned Commercial Industrial District, contains a medical office and single-family residences. The subject properties are also part of a small, 17-acre RS-8 District along Brevard Road that is surrounded by large Highway Business and Commercial Industrial zoning districts to the north, west, and south.

Currently, there are two buildings on the northern site, a single-family residence and a shed/warehouse structure that appears to have been used commercially in the past. There are two access points to the site, one directly in front of the shed building and another to the south of the parcel, which also provides shared access to the landlocked property behind. The southern property contains a single-family residence that is accessed by a driveway on the southern portion of the site.

Initially the applicant was encouraged by the staff to pursue a conditional use rezoning for the properties that could tie into the property to the north that was conditionally rezoned in 2000, but the property owners did not choose to pursue that option. Staff's rationale for a conditional use rezoning was the same as for the property to the north, to preserve the existing residential-scaled buildings for specific low impact commercial uses, limit land disturbance and tree removal on the site, and ensure compatibility with surrounding residential uses. A conditional plan could also be used to help design an integrated complex of office and similar uses, consolidate access points onto Brevard Road and preserve and improve the shared access to the landlocked parcel to the west, which is partially zoned Commercial Industrial District.

This area along Brevard Road has and will continue to receive increased pressure to transition to commercial uses, especially as the North Carolina Department of Transportation (NCDOT) plans to widen this section of Brevard Road to four or five lanes. In order to deal with the increasing development pressure, a corridor study could be undertaken to help formulate guidelines for future land use decisions along Brevard Road.

Rezoning the properties would allow the property owners the opportunity to redevelop their parcels for uses permitted in the Office District. If rezoned, the existing buildings on the properties could be adaptively reused or the owners could choose to demolish the buildings and erect new buildings subject to the standards of the Unified Development Ordinance (UDO).

While a conditional use rezoning would provide the best compatibility with the existing surrounding development pattern, staff recognizes that the purpose of the Office District states that the District "may serve as a transition as residential areas convert to other uses", which is the case in this situation as the area is in transition from residential to more commercial types of uses and will continue to feel pressure to change as Brevard Road is widened. Office zoning on these two parcels would also act as a step in the transition of zoning districts from the north as zoning goes from the purely residential RS-8 District to limited medical office and residential use of the Office/Conditional Use Zoning District to more flexible Office zoning to the even more flexible Commercial Industrial and Highway Business districts along Brevard Road.

In consideration of the above, the adjoining zoning and land uses in the area surrounding site, and the site's frontage on Brevard Road, the proposed zoning change appears to be consistent with the intent and purpose of the UDO and staff recommends approval of the request. The Planning and Zoning Commission at its October 2003 meeting voted 6-0 to recommend approval of the rezoning as well. It also recommended that Council direct staff to perform an abbreviated corridor study for this area to help determine appropriate zoning for the future.

Councilman Peterson spoke in support of an abbreviated corridor study

Dr. Phil Davis, property owner, asked for City Council's support of the proposed rezoning.

Mayor Worley closed the public hearing at 5:20 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3065. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Peterson moved to direct staff to perform an abbreviated corridor study for this area to help determine appropriate zoning for the future. This motion was seconded by Vice-Mayor Bellamy.

When Councilman Mumpower asked what would be involved in the corridor study, Mr. Shuford said that it would comprise of reviewing the land use and zoning to correspond to widening of Brevard Road for areas around the road. He said that the cost would be for staff time and would take approximately 3-6 months.

Councilman Dunn wanted to make sure that if someone came in and wanted their property rezoned that the corridor study would not prevent them from moving forward.

The motion made by Councilman Peterson and seconded by Vice-Mayor Bellamy carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 491

AGENDA CHANGE

RESOLUTION NO. 03-182 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY TO PROVIDE FUNDING OF A COUNTYWIDE PUBLIC ACCESS TELEVISION OPERATION AND FACILITY

Public Access Commission Chair Beth Lazer said that this is the consideration of a resolution authorizing the Mayor of the City of Asheville to enter into an Interlocal Agreement with Buncombe County for the purpose of providing funding of a Countywide public access television operation and facility.

In March 2000 the Asheville City Council appointed the Public Access Channel Commission (PACC) to facilitate the establishment and management of a public access channel in Asheville. Since that time, the Commission has formed a non-profit organization to manage the channel (URTV, Inc.), developed a management and operations plan for the station, identified sources of funding, and worked with other groups, to include the Asheville Chamber of Commerce and Buncombe County government to identify opportunities for collaboration.

Most recently, Buncombe County government reviewed and agreed to enter into a Interlocal Agreement with the City of Asheville to provide for funding of a Countywide public access television operation and facility. This agreement provides that the City and County will cooperate in the provision of public access television to serve the Asheville-Buncombe area, through a non-profit corporation.

This agreement is the first step in the realization of a Public Access Channel. Over the next month, PACC board members will work with City and County staff to orchestrate next steps and provide additional recommended action for Asheville City Council's consideration.

City staff recommends City Council adopt the resolution authorizing the Mayor to enter into an Interlocal Agreement with Buncombe County for the purpose of providing funding of a Countywide public access television operation and facility.

Ms. Lazer said that the organizational work still needs to be done to mature this collaboration. Therefore, she said that they plan to report back to Council in approximately 30-45 days to update Council on what they see URTV needs to get going, to ask Council to dissolve the PAC as currently constituted, to ask Council to endorse the URTV, Inc. organization and Board as the management organization, and to direct staff to work on drafting one management agreement.

Ms. Lazer responded to various questions/comments from Councilman Peterson, some being but are not limited to: what has the discussion been about a multi-media center; funds collected for the PAC should not be diverted for use as an economic development tool; where do we stand with cooperating with UNC-Asheville; A-B Tech and the local high schools; how is it envisioned to insulate the governing bodies from programming material; who determines program content; and what will be non-profit board make-up and who will make appointments to said board.

Upon inquiry of Councilman Peterson, City Attorney Oast said that the non-profit organization (URTV, Inc.) has been formed to insulate the governing bodies from program content criticism and decisions and to a certain extent liability. He said that this is a model that exists and works in other cities across the state and this arrangement is a better way to take care of problems that most routinely arise.

Councilman Dunn was concerned that free speech can be slanted one way or the other and he would pay particular attention to the make-up of the non-profit board.

Mr. Fred English, resident of Asheville, felt we should not use taxpayers money to fund the channel because the Educational Channel is not being fully utilized plus there will be commercials run on the Public Access Channel.

Mr. Peter Dawes spoke about the need for the Public Access Channel, but urged City Council to scrutinize the board's make-up.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 03-182. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 45

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 03-183 - RESOLUTION ADOPTING THE ASHEVILLE CITY DEVELOPMENT PLAN 2025

Planning & Development Director Scott Shuford said that this is the consideration of a resolution accepting Asheville City Development Plan 2025 as the official comprehensive plan for the City. The public hearing on this Plan was held on April 22, 2003.

This culminates a two year + planning and public participation process that has been overseen in great detail by a 60 member committee (the City Plan Advisory Committee – CPAC) and has involved nine public forums, one major community meeting, and innumerable CPAC meetings, focus group meetings and public presentations. The effort to involve the public in developing this plan has been unprecedented in the City's history and has included surveys, television presentations and announcements, outreach to specific groups (particularly groups that might typically be underrepresented at standard public forums, including minority groups and business organizations), media coverage, newspaper editorials, and other inventive methods of capturing public input. The reward for this effort has been over 1,000 specific comments from the public that have been carefully evaluated by CPAC and included in the plan.

The Asheville City Development Plan 2025 will serve as guide for development approvals, rezonings, code amendments, infrastructure improvements, legislative action requests, and other City efforts. However, the plan is not an end into itself – it is a guide for specific actions, with the individual consideration and implementation of these actions being the method by which the plan will be put into effect. The Asheville City Development Plan 2025 replaces the Asheville City Plan 2010, adopted in 1987.

He has proposed a number of amendments that are reflective of Council's comments and those of the Planning and Zoning Commission. In addition, staff will take steps to better distinguish headings and subheadings in the Implementation Matrix through the use of shading and/or color.

He felt some Council comments were already accommodated adequately in the plan. Specifically, please note:

- The way "big box" development is addressed under Goal VII and its associated strategies on page 155.
- The extent to which the relationship between infrastructure capacity and future development is considered (see especially Strategies 4, 11, 12, and 14 on pp. 147-149).

He was less successful in determining ways to specifically address the comment concerning directing development away from some areas. He hoped that that this is accommodated adequately in Goal III and its associated strategies on pp. 94-98 and through the following additional Goals and Strategies:

- Strategy 2 under Goal IV (p, 154)
- Goal IX and its associated strategies on pp. 156-157
- Goal XIII on pp. 159-160.

Please be aware that, for a variety of reasons, he was unable to accommodate a number of specific and general comments about such items as the plan's length, its "over-regulation" content, deletion of inclusionary zoning proposals, and its "minor focus" on all City services, especially public safety.

In addition, based on further contact from Council, a few additional comments have been incorporated to the list of amendments. The most substantive of these amendments is the proposed change to the name of the plan, but two others deserve note. These changes are listed as follows:

Title - The proposed name of the plan - Asheville City Development Plan 2025 (plus the new subtitle previously proposed).

Page 50 - Revise Goal III to read: Goal III. "Explore the full range of zoning tools necessary to increase both the supply of affordable housing and the compatibility of such housing with existing neighborhoods and community development patterns, including development incentives, code streamlining efforts, neighborhood design standards, and inclusionary zoning practices."

Page 66 - Revise the last sentence of the first paragraph (continued from page 65) to read: "The City of Asheville should explore statutory authority for mandatory design review, and if such authority is granted, the City should review its potential application to selected zoning districts and to specific areas of the City for which this development tool is determined appropriate."

The Planning and Zoning Commission recommended approval of Asheville City Development Plan 2025 as the official comprehensive plan for the City on March 27, 2003, by a unanimous vote (5-0), subject to a variety of amendments. City staff also recommends approval of the Plan as proposed.

Mr. Shuford said that he will regularly review the Plan implementation with Council and within 5 years a comprehensive review and update will take place.

Upon inquiry of Councilwoman Jones, Mr. Shuford said that the Plan amendments have been circulated.

Mr. Jim Torpey, member of the CPAC, spoke in support of the Plan noting that when he was on the Planning & Zoning Commission, the 2010 Plan was used as a guide only. He was certain the 2025 Plan will be used as a guide as well.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 03-183 with Plan amendments previously presented to Council and the amendments outlined by Mr. Shuford today. This motion was seconded by Councilman Peterson.

Councilwoman Jones suggested that the motion be amended to make a revision on page 51 – Goal IV, as follows: "Enforce and evaluate the City's Minimum Housing Code program …" (underlining denotes addition)

Mayor Worley suggested that the motion be amended to make a revision on page 154, Strategy 3 under Goal V, as follows: "The City should consider legislation authorizing inclusionary zoning for larger residential developments." (underlining denotes change)

There was a brief discussion initiated by Councilman Dunn on page 93 about cooperating with the Blue Ridge Parkway to determine the effectiveness of current viewshed protection measures. Councilman Dunn was supportive of protecting the viewshed, but where is their support for the City of Asheville since they will not issue the City a permit to cross a bridge located on Parkway property, which it is costing Asheville taxpayers $15-18,000 a month to dump land clearing and inert debris elsewhere. He suggested that Open Space Strategy 2 under Goal I be deleted or a strong letter be sent to the Parkway pointing out the money the taxpayers are having to spend on this particular issue.

Mayor Worley agreed with Councilman Dunn's frustrations but pointed out in terms of the language, this is a guide and how we coordinate and determine the effectiveness of current viewshed protection measures is entirely up to City Council.

Councilman Mumpower suggested this matter be scheduled at a worksession to separate that issue from the adoption of the 2025 Plan.

Mr. Shuford said that this particular strategy is scheduled for implementation in 2005.

Vice-Mayor Bellamy and Councilman Peterson were agreeable to amending their motion to include the two amendments suggested by Councilwoman Jones and Mayor Worley

Councilwoman Jones said that a lot of viewpoints have been captured and the scope of the Plan is broad. She felt that the title "Asheville City Plan 2025" was accurate and didn't support the name change, however, she felt it was vital to move forward.

Councilman Mumpower still had some concerns about the document, but pointed out there are no perfect documents and he is comfortable with the majority of it. He felt they all worked together to reach a reasonable compromise that will protect the future of our community.

Mayor Worley spoke in support of the collective desire of this Council to work together for the betterment of the entire community and on behalf of City Council, thanked the CPAC for their extraordinary service to the citizens in developing this document.

The original motion made by Vice-Mayor Bellamy and seconded by Councilman Peterson (including amendments by Councilwoman Jones and Mayor Worley) carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 46

V. NEW BUSINESS:

A. RESOLUTION NO. 03-184 - RESOLUTION ADOPTING THE CLINGMAN FOREST GREENWAY MASTER PLAN

At the request of Vice-Mayor Bellamy, Councilman Mumpower excused Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Ellis and carried unanimously.

Ms. Tamara Calabria, representing Mountain Housing Opportunities, said that this is the consideration of a resolution to adopt the Clingman Forest Greenway Master Plan.

Clingman Forest is an approximately 10-acre forest in downtown Asheville, bounded roughly by the YWCA, Asheville Middle School, and Charles Street to the East, Aston Park to the North, Clingman Avenue to the West, and the River/Arts Warehouse District to the South.

A committee of stakeholders was formed to lead the project and work closely with the design consultant to develop the plan. This committee included representatives from the City's Parks and Recreation and Planning Departments, the Asheville Greenway Commission, Mountain Housing Opportunities, the West End/Clingman Avenue Neighborhood, Buncombe County Parks and Recreation and Buncombe County Board of Education. The planning effort was made possible through generous grants received by Mountain Housing Opportunities from the Pigeon River Fund and Carolina Power and Light.

Much of the property within the proposed greenway corridor is currently owned by public or quasi-public agencies, including the City of Asheville, Buncombe County, and the Buncombe County Board of Education. There are several small parcels within these larger tracts that are currently in private ownership. The proposed linear park is indicated as a primary off-road greenway corridor in the Asheville Greenway Master Plan.

The purpose of the Master Plan was to develop an understanding of the site through detailed site analysis, receive public input, and establish guidelines for development of the greenway. The future Clingman Forest Greenway will eventually provide a greenway connection between Buncombe County's Aston Park and Asheville's French Broad River Riverfront District. The corridor is planned to serve as a valuable natural resource for recreation and environmental education, and also contribute to the revitalization of the surrounding area. The future greenway will serve both the community in the immediate vicinity as well as the broader Asheville area.

Key design concepts will be to (1) provide network of trails; (2) incorporate infill housing; (3) protect the site's natural character; (4) incorporate environmental education; and (5) reinforce a sense of place.

Currently secured funding and support includes: (1) The N.C. Dept. of Transportation (NCDOT) Enhancement Grant ($172,00)) for streetscape improvements to Clingman Avenue, to include construction of the on-street portion of the Clingman Forest Greenway and stormwater infrastructure within Clingman Forest; (2) Community Development Block Grant funding ($34,000) which will provide the local match for the first phase of the NCDOT Enhancement Grant; and EPA 319 Stormwater Grant ($95,000) secured b NCSU Water Quality Group for constructed stormwater wetland within Clingman Forest.

The Parks and Recreation Department and Asheville Greenway Commission recommend the City of Asheville adopt the Clingman Forest Greenway Master Plan as a document that will serve as a guideline for greenway development.

Councilman Ellis stated that since some of this land will be used for infill development, he assured the public that the City will go through extensive public hearings prior to any public land being sold.

Councilwoman Jones said that this process has been a very open public process to date and will look forward to seeing how that continues.

Councilman Peterson asked what some thoughts have been to address the safety concerns at Aston Park and also on the greenway itself. Ms. Calabria explained that the consultants have worked with guidelines that the Asheville Police Department has for environmental design for safety and they also listened to residents. The idea of natural surveillance or "having eyes on the park" will go hand in hand with the Police guidelines.

Upon inquiry of Councilman Mumpower, Parks & Recreation Director Irby Brinson guessed that maintenance of this greenway would be approximately $8,000/year. He felt that because of the neighborhood setting, the greenway will have a fairly heavy use. Regarding funding for this greenway vs. other park needs, Mr. Brinson felt that the opportunities for outside funding is greater for greenways than for park renovations. He felt this particular greenway will have a lot of partners, and has the potential to be funded in a number of creative ways. Regarding policing concerns, Mr. Brinson said that to date we have had no problems on any greenways. He felt that the building of the park would be in the range of medium/high renovation because it is a difficult corridor to work in with a number of board walks to be constructed and topography being an issue. The total budget for both phases of the project is approximately $1.3 million and he anticipated approximately 15% would ultimately be the City taxpayer's contribution.

Councilman Peterson noted that a big part of the funding is the roundabout and since that's not the trail, it's something that if this hadn't been brought forward the Public Works Department might have suggested that anyway. In addition, Councilwoman Jones felt the same situation might have occurred for the road improvements to Haywood Road.

Upon inquiry of Councilwoman Jones, Ms. Calabria said that some of the secured funding is part of the overall plan.

Councilman Dunn understood the concept of leveraging money, but pointed out it is still spending money.

Mr. Fred English felt the cost of the greenway was too much and wondered why Mountain Housing Opportunities was involved since he thought they were in the housing business and not the greenway business.

Mayor Worley said that we anticipate being able to get a substantial portion of this project from grants, but this is more than a greenway. This is about what we are as a City and our ability to attract people and jobs to our area.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 03-184. This motion was seconded by Councilwoman Jones and carried unanimously.

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of October 3-16, 2003: Jesse Morris (Water), Andre Griffin (Police), Latosha R. Little (Streets), Asheville Showcase (Water), Sonja Davis (Parks & Recreation), Natasha Allen (Police), Caroline Yongue (Water), and Christal Brice (Transit Services).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

On October 15, 2003, the City filed a Complaint against Harlan J. Henderson, and wife Debra Paulette J. Henderson. The nature of the proceeding is a violation of City Code sec. 10-31 – regulating abandoned or junked motor vehicles. This matter will be handled in-house.

On October 15, 2003, the City filed a Complaint against Michael Ross Butner and wife Debra Darlene Butner. The nature of the proceeding is a violation of City Code sec. 10-31 – regulating abandoned or junked motor vehicles. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Martin Reidinger, attorney representing Mr. Mike Fryar, felt that there is a legal defect in the ordinance annexing the property of Mr. Fryar. He said that the ordinance incorporated two descriptions – a metes and bounds description; and a map – and they don't match. He felt that raises a problem as to whether or not the City has defined adequately what you have annexed and what the boundary is of Asheville. An underlying problem is that one of the reasons that was stated to Council as to why you need to annex was that Mr. Fryar has a building on his property that was 40% in the City and 60% out of the City and you needed to be consistent. The description in metes and bounds show that it incorporates 100/% of the building. So if that is accurately your annexation area, then the reason that was stated for adopting the ordinance was inaccurate. He asked that Council repeal the ordinance and then, if you wish, go back and do it right. If Council chooses not to repeal the ordinance, he suggested City Council waive the statute of limitations for appeal, since Mr. Fryar has let the deadline pass, and then let a Court decide. Again, he asked Council to either repeal the ordinance or let them challenge it in court. Councilman Mumpower responded that he wished he was in a position to support the suggestions, but the precedent concerns him and the arguments are not persuasive to him.

Mr. Peter Dawes stressed the need for the City to audit the ABC Board in that sales were up by $300,000 last year but the City received less money.

Mr. Fred English questioned why a permit was issued to the Wiccans to use park property for a religious ceremony. Mayor Worley responded that the City can't discriminate against any group in the use of public property.

Mr. Chad Nesbitt wanted to make sure that the Wiccans have to comply with the same regulations, in particular insurance provisions, that other groups have to comply with to use public property. City Attorney Oast responded that the City is satisfied they are meeting our insurance requirements.

Mr. Dennis Justice thanked the Civic Center Commission for reviewing the two hockey proposals at the Civic Center. He feels that this is hockey's last chance in Asheville and it should be their best chance. Because of the financial concerns of the City, he felt the team should provide safety nets but the City should install them and perhaps the Plexiglas should be on a 50/50 basis. Mr. Waronker was not convinced that the ice cooling system would survive for 3 years and felt that work needs to be done on the Zamboni. Mr. Justice said that other sports teams that have been at the Civic Center have had infrastructure upgrades. He pointed out that every dollar of every ticket that is bought at the Civic Center goes into some sort of fund for upgrades. He calculated if you have 2,000 people attend each game for 3 years at 30 games a season, you get $180,000. Even if you don't tie them in exclusively to hockey specific upgrades, that money could go for upgrades for scoreboards, new speakers or painting. There is a meeting of the hockey community Monday night and he invited City Council and will also invite Mr. Al White of the Altitude.

Councilman Dunn explained his reasons why the City needs a total accounting from the ABC Board. He felt that $168,000 for two police officers needed clarification. Mayor Worley said that Councilman Dunn's concerns are well taken and it is incumbent on us to review the financial information to make sure things are being run appropriately. He did note that the new Chair has met with him and he has shared with her Council's concerns. The ABC Board is in the process of hiring a new Supervisor and hopes to have them in place by January. He also said that the ABC Board is concerned about being certain that the ABC system is being run properly too.

CLOSED SESSION

At 7:17 p.m., Councilwoman Jones moved to go into closed session in order to consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 8:05 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:05 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Wednesday – November 5, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones (arrived in meeting at 3:48 p.m.) Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Budget Amendment – Section 108 Guaranteed Loan & Economic Development Incentive Grant

After a brief discussion, it was the consensus of City Council to delay consideration of the budget amendment for two weeks in order to give Eagle/Market Street Development Corporation, the neighborhood and interested people an opportunity to meet and discuss concerns. When the matter comes back to Council, City Council asked for additional information concerning the grant, South Pack Square Redevelopment Plan, a timeline for the public input process, and what is Council's role in receiving the grant.

Budget Amendment for Haz-Mat Equipment Grant for Fire Department

Summary: The consideration of a budget amendment, in the amount of $90,900, to receive grant money from the U.S. Department of Justice, sub-granted through the North Carolina Division of Emergency Management, for procurement of weapons of mass destruction preparedness equipment for Asheville Fire and Rescue Department's Haz-Mat Team.

The City of Asheville Fire and Rescue Department requested $90,900 from the NC Division of Emergency Management for equipment to better prepare the City for a hazardous materials or terrorism incident. Staff was successful in obtaining those funds. We received money to purchase a variety of equipment that includes chemical agent detectors, chemical protective clothing, multigas monitors, rescue equipment and a search camera. Twenty-two North Carolina cities received the $90,900 grant.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

Upon inquiry of Councilman Peterson, Fire Chief Grayson said that most items have multiple purposes and his staff is adequately trained to use the equipment.

Application for FEMA Fire Prevention and Safety Grant

Summary: The consideration of a resolution authorizing the City to apply for a fire prevention and safety grant from the Federal Emergency Management Agency (FEMA).

The City of Asheville Fire and Rescue Department desires to request $71,126 from FEMA for the purchase of fire safety education materials and promotion as well as a vehicle to transport previous granted equipment. The grant provides 70% of the total project, with the remaining 30% ($21,338) from city matching funds.

The material, promotion and vehicle are integral to the Department's mission and the grant funding will enable the City to conduct these programs with minimal City funding.

The program will enable the department to distribute fire safety and injury prevention materials to children. In addition, a vehicle for use in the Department to pull the department's safety houses is included in the grant. The safety house is primarily designed to educate adults about fire safety and home safety. Part of the mobile house is also to educate the public about residential fire sprinkler systems.

City staff recommends City Council authorize the City to apply for a fire prevention and safety grant from the Federal Emergency Management Agency.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

ANNEXATION UPDATE

This item has been removed from the agenda.

DISCUSSION OF CARROLL HOUSE LOCATED AT 19 ZILLICOA STREET AS A LOCAL HISTORIC LANDMARK

Historic Resources Director Stacy Merten said that this is the consideration of motion setting a public hearing on November 25, 2003, to consider the designation of the Carroll House located at 19 Zillicoa Street as a local historic landmark.

The Robert S. and Grace P. Carroll house, built in 1922 is located inside the western edge of the Montford Historic District facing east on Zillicoa Street. It is part of an original complex of single family structures that later became part of Highland Hospital. The house is 2 ½ - story plus attic built in the Normanesque/Tudor Revival style and constructed of randomly laid granite stones.

Psychiatrist Robert S. Carroll, founder of Highland Hospital, a nationally recognized mental health facility, lived at the house until 1946 with his second wife Grace P. Carroll, a world renowned concert pianist with a national an international reputation. The house was connected by proximity, function and association to the Highland Hospital complex. Dr. Carroll may have used the house occasionally for patient treatment and Mrs. Carroll used the music room both as her own studio and also for larger community based musical events

The Robert S. and Grace P. Carroll House is significant for its association with the Carroll's, who built the house, founded Highland Hospital and made a significant contribution to the arts community in Asheville. It is also significant architecturally as an excellent example of the Norman/Tudor Revival/Craftsman style structure. The entire original configuration and architectural detailing of the exterior of the house remains intact except for the addition on the west elevation of an elevator tower, stairs and retaining wall on the south elevation and a fire escape on the north elevation.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. Currently the tax appraisal for the land is $194,100 and the structure is valued at $654,800, for a combined total of $848,900.

The ordinance designates the Robert S. and Grace P. Carroll House as a local historic landmark. The property included in the designation consists of the Robert S. and Grace P. Carroll House and the .78 acre parcel on which it is located as described on the attached plat. The designation includes the exterior of the house, some interior details and landscape features.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County (HRC). All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The HRC, by unanimous vote, recommends to the Asheville City Council that the Robert S. and Grace P. Carroll House be designated as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

City staff recommends City Council set a public hearing on November 25, 2003, to consider the designation of the Robert S. and Grace P. Carroll House located at 19 Zillicoa Street as a local historic landmark.

After discussion by Council, it was the consensus to place this public hearing on the November 25, 2003, formal City Council agenda.

STORMWATER UTILITY FEASIBILITY STUDY

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to direct staff to complete a study to determine if a stormwater utility is a feasible, equitable, and effective method for funding stormwater quantity and quality needs in the City of Asheville; and a budget amendment, in the amount of $50,000, from fund balance to fund a portion of the study.

The City of Asheville must comply with the Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) Permitting and Stormwater Phase II Regulations as part of the Federal Clean Water Act. In March 2003, City Council approved a plan to comply with the "Six Minimum Measures" of the regulations, including strategies for:

1. Public Education and Outreach
2. Public Participation and Involvement in Implementing the Plan
3. Detection and Elimination of Illicit Discharges
4. Construction site Run-off Control
5. Post-Construction Run-off Control, and
6. Pollution Prevention and Good Housekeeping by the Municipality.

Once the plan is approved by NCDENR, Division of Water Quality, the City of Asheville must begin implementing the elements within the plan in order to comply with the State and Federal requirements. Staff has estimated that it will cost approximately $150,000 to $200,000 per year to implement this plan. The funding for this program has not been identified at this time.

In order to develop an effective program to improve water quality as part of the Phase II regulations, the City must also develop stormwater management approaches for drainage basins, assess existing outflows to creeks, identify capital improvement needs to manage stormwater, and increase infrastructure maintenance functions. Developing a Stormwater Utility is one means of developing a dedicated funding source for local stormwater management. A stormwater utility is (1) a fair and equitable method of funding Phase II Stormwater Regulations; (2) an enterprise fund much like water, sanitary sewer or parking; (3) a dedicated funding source for water quality and water quantity improvements; and (3) a stable funding source to improve water quality. It is not a rain tax because (1) fees are charged to both for profit and not for profit; (2) fees are based upon the impact to the system (impervious surface); and (3) credits are available for developers that treat stormwater runoff prior to discharging to the stream. Other options of developing a dedicated funding source for local stormwater management could include increasing property taxes or implementing an impact fee for development.

The feasibility study will:

- Establish a City Manager's Advisory Committee consisting of representatives from the development, environmental, residential, non-profit, engineering, as well as other stakeholders to manage and oversee the study's progress and make a recommendation to City Council,
- Analyze other possible sources of funding,
- Determine if a Stormwater Utility is the best method of developing a long-term funding source to address water quality issues and meet the required minimum measures, and
- Conduct financial analysis to determine the most equitable and effective framework to develop a utility.

Staff's goal is to complete the feasibility study in a time frame that City Council could review in conjunction with the Fiscal Year 2004-05 Budget. Staff estimates that the total cost of the study would be $65,000 plus staff time. However, staff is requesting $50,000 from the City's fund balance to cover the cost of hiring interns and leasing computer equipment for purposes of data collection and quality control. The remaining $15,000 for some professional service would come from the existing budget.

Approximately $25,000 of the $50,000 could be reimbursed to the fund balance from the Stormwater Utility if the Utility is established by City Council.

City staff recommends City Council authorize the City Manager to direct staff to complete a study to determine if a stormwater utility is a feasible method for funding stormwater quantity and quality needs in the City of Asheville; and, a budget amendment, in the amount of $50,000, from fund balance to fund a portion of the study.

When Vice-Mayor Bellamy asked why this was not a Metropolitan Sewerage District (MSD) issue, Ms. Ball said that it is not a sanitary sewer issue, however, MSD is under somewhat of a similar guideline.

Upon inquiry of Councilman Ellis, Ms. Ball said that the best method for collecting the fee would be through the existing water billing system, which is bi-monthly. She said that most cities have a tiered system for single-family residents. She said that preliminary numbers could range from $1-2 every two months. All monies collected will be required to go back into stormwater management.

Ms. Ball responded to various questions/comments from Council, some being, but are not limited to: why can only $25,000 of the $50,000 be reimbursed to the fund balance from the stormwater utility; what is the rationale behind requiring more sidewalks vs. it's impact on water quality; and how will the stormwater utility affect the agreement that the City has with the Housing Authority.

Councilman Peterson asked Ms. Ball to make sure that the feasibility study will present Council with options and the pros and cons of each one.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place these items on the next formal City Council agenda.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 11, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman James E. Ellis

PLEDGE OF ALLEGIANCE

Retired U.S. Marine Corp Gunny Sergeant Billy Cochran and Retired U.S. Navy Senior Chief Larry Owen led City Council in the Pledge of Allegiance.

INVOCATION

On this Veteran's Day, Councilman Dunn and Councilman Mumpower gave the invocation saluting and honoring all past, present and future veterans.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 28, 2003, AND THE WORKSESSION HELD ON NOVEMBER 5, 2003

B. ORDINANCE NO. 3066 - BUDGET AMENDMENT FOR HAZ-MAT EQUIPMENT GRANT FOR FIRE DEPARTMENT

Summary: The consideration of a budget amendment, in the amount of $90,900, to receive grant money from the U.S. Department of Justice, sub-granted through the North Carolina Division of Emergency Management, for procurement of weapons of mass destruction preparedness equipment for Asheville Fire and Rescue Department's Haz-Mat Team.

The City of Asheville Fire and Rescue Department requested $90,900 from the NC Division of Emergency Management for equipment to better prepare the City for a hazardous materials or terrorism incident. Staff was successful in obtaining those funds. We received money to purchase a variety of equipment that includes chemical agent detectors, chemical protective clothing, multigas monitors, rescue equipment and a search camera. Twenty-two North Carolina cities received the $90,900 grant.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

ORDINANCE BOOK NO. 21– PAGE 1

C. RESOLUTION NO. 03-185 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A FIRE PREVENTION AND SAFETY GRANT FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY

Summary: The consideration of a resolution authorizing the City to apply for a fire prevention and safety grant from the Federal Emergency Management Agency (FEMA).

The City of Asheville Fire and Rescue Department desires to request $71,126 from FEMA for the purchase of fire safety education materials and promotion as well as a vehicle to transport previous granted equipment. The grant provides 70% of the total project, with the remaining 30% ($21,338) from city matching funds.

The material, promotion and vehicle are integral to the Department's mission and the grant funding will enable the City to conduct these programs with minimal City funding.

The program will enable the department to distribute fire safety and injury prevention materials to children. In addition, a vehicle for use in the Department to pull the department's safety houses is included in the grant. The safety house is primarily designed to educate adults about fire safety and home safety. Part of the mobile house is also to educate the public about residential fire sprinkler systems.

City staff recommends City Council authorize the City to apply for a fire prevention and safety grant from the Federal Emergency Management Agency.

RESOLUTION BOOK NO. 28 – PAGE 49

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF AN UNNAMED ALLEY OFF COLLIER AVENUE

RESOLUTION NO. 03-186 - RESOLUTION TO PERMANENTLY CLOSE AN UNNAMED ALLEY OFF COLLIER AVENUE

Mayor Worley opened the public hearing at 5:12 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to permanently close an unnamed alley off Collier Avenue. This public hearing was advertised on October 17, 24, 31 and November 7, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close an unnamed alley off Collier Avenue, the entry of which is located approximately 200 feet north of the intersection of Collier and Banks Streets.

Public Works Department staff has researched and determined that this alleyway is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are eight lots that abut this alley identified by PIN Nos. 9648.06-38-4514; 9648.06-38-3540; 9648.06-38-3620; 9648.06-38-4526; 9648.06-38-4684; 9648.06-38-5757; 9648.06-38-3750; 9648.06-38-3895; 9648.06-38-4514.

Mr. Cole said that the only utility present in the alley is an overhead telephone service line servicing 120 Coxe Avenue. The petitioner has agreed to work with BellSouth to relocate or provide easements for the telephone line as necessary.

City staff recommends that City Council adopt the resolution to close an unnamed alley off Collier Avenue.

Mayor Worley closed the public hearing at 5:17 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 03-186. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 50

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 03-187 - RESOLUTION AUTHORIZING STAFF TO COMPLETE A STORMWATER UTILITY FEASIBILITY STUDY

ORDINANCE NO. 3067 - BUDGET AMENDMENT TO FUND A PORTION OF THE STORMWATER UTILITY FEASIBILITY STUDY

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to direct staff to complete a study to determine if a stormwater utility is a feasible, equitable, and effective method for funding stormwater quantity and quality needs in the City of Asheville; and a budget amendment, in the amount of $50,000, from fund balance to fund a portion of the study.

The City of Asheville must comply with the Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) Permitting and Stormwater Phase II Regulations as part of the Federal Clean Water Act. In March 2003, City Council approved a plan to comply with the "Six Minimum Measures" of the regulations, including strategies for:

1. Public Education and Outreach
2. Public Participation and Involvement in Implementing the Plan
3. Detection and Elimination of Illicit Discharges
4. Construction site Run-off Control
5. Post-Construction Run-off Control, and
6. Pollution Prevention and Good Housekeeping by the Municipality.

Once the plan is approved by NCDENR, Division of Water Quality, the City of Asheville must begin implementing the elements within the plan in order to comply with the State and Federal requirements. Staff has estimated that it will cost approximately $150,000 to $200,000 per year to implement this plan. The funding for this program has not been identified at this time.

In order to develop an effective program to improve water quality as part of the Phase II regulations, the City must also develop stormwater management approaches for drainage basins, assess existing outflows to creeks, identify capital improvement needs to manage stormwater, and increase infrastructure maintenance functions. Developing a Stormwater Utility is one means of developing a dedicated funding source for local stormwater management. Other options could include increasing property taxes or implementing an impact fee for development.

The feasibility study will:

- Establish a City Manager's Advisory Committee consisting of representatives from the development, environmental, residential, non-profit, engineering, as well as other stakeholders to manage and oversee the study's progress and make a recommendation to City Council,

- Analyze other possible sources of funding,

- Determine if a Stormwater Utility is the best method of developing a long-term funding source to address water quality issues and meet the required minimum measures, and

- Conduct financial analysis to determine the most equitable and effective framework to develop a utility.

Staff's goal is to complete the feasibility study in a time frame that City Council could review in conjunction with the Fiscal Year 2004-05 Budget. Staff estimates that the total cost of the study would be $65,000 plus staff time. However, staff is requesting $50,000 from the City's fund balance to cover the cost of hiring interns and leasing computer equipment for purposes of data collection and quality control. The remaining $15,000 for some professional service would come from the existing budget.

Approximately $25,000 of the $50,000 could be reimbursed to the fund balance from the Stormwater Utility if the Utility is established by City Council.

City staff recommends City Council authorize the City Manager to direct staff to complete a study to determine if a stormwater utility is a feasible method for funding stormwater quantity and quality needs in the City of Asheville; and, a budget amendment, in the amount of $50,000, from fund balance to fund a portion of the study.

Some additional information brought up from Council's November 5, 2003, worksession will include (1) looking for methods to qualify what cleaner is and to be able to define those methods; (2) looking at the impact of fees or taxes on the public; (3) looking at the impact of the fees or taxes on the Joint Planning Area; and (4) reviewing previous agreements with other agencies.

Ms. Ball then answered various questions/comments from Council, some being, but are not limited to: when will this come back to City Council; who will be invited to participate in the stakeholders meeting; what kind of data will be gathered; and will the hardware and software be used on different projects once this project is complete.

Councilman Mumpower suggested talking with our legislative delegation expressing Council's frustration with the concept of unfunded mandates. Mayor Worley said that this has been underway since the early 1990's and felt it might be appropriate to continue working with the N. C. League of Municipalities, National League of Cities, and the Association of County Commissioners, all which have taken the position to educate our legislators on the burdens that unfunded mandates put on cities. City Manager Westbrook suggested waiting to talk to our delegates until after we know the cost of what the unfunded mandate will cost and then we would have some facts and figures on what the impact would be on our local citizens.

Mayor Worley said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 03-187. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 52

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 3067. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 3

VI. OTHER BUSINESS:

A. ASHEVILLE FILM FESTIVAL

Mayor Worley spoke about the tremendous job City staff and the Asheville Film Commission did on coordinating Asheville's first Film Festival.

Parks & Recreation Director Irby Brinson thanked the Asheville Film Commission, the Film Festival Committee, City Council and the tremendous number of volunteers and staff.

Councilman Peterson voiced praise also about the Festival and asked about possible revenues and the economic impact of the Festival.

Vice-Mayor Bellamy, member of the Film Commission, thanked Film Commission Chair Leni Sitnick, Event Specialist Melissa Porter, all the Film Commission members, Mr. John Cram, and the countless volunteers for their hard work on the successful Festival.

B. RECOGNITION

Vice-Mayor Bellamy asked that recognition be made to the Asheville High School Field Hockey Team, the Asheville High School Football Team, and the Asheville Youth Sports Program Youth League for their successful year.

C. CLAIMS

The following claims were received by the City of Asheville during the period of October 17-30, 2003: BellSouth (Water), Samuel Benjamin (Police), Old Dominion Freight (Parks & Recreation), Grant Contr. (Water), Emily R. Kasinecz (Transit Services), Charlotte Harrison (Streets), Big Lots (Water) and Cornelius Miller (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English hoped that City Council would show more support in their recognition of Veterans Day.

Mr. Iver Thomas, resident on Knob Street, spoke about his dedication to the protection and well-being of children and offered to work closely with the Asheville Police Department to stop drug trafficking in Asheville, in particular the Housing Authority communities.

Mr. Walter Plaue agreed with Mr. English in that Council should prioritize their schedules, particularly on Veterans Day, in order attend ceremonies honoring our veterans.

CLOSED SESSION

At 5:50 p.m., Councilwoman Jones moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 6:15 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:15 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 18, 2003 - 3:00 p.m.

CONSENT:

Grant for Crash Investigation Equipment and Software

Summary: The consideration of a resolution and budget amendment, in the amount of $9,480, to receive additional grant money from the North Carolina Governor's Highway Safety Program for crash investigation equipment and software and travel/training money for the Asheville Police Department's Regional County Coordinator.

In August of 2003, City Council accepted an $8,000 grant from the Governor's Highway Safety Program (GHSP) to fund crash investigation equipment and software and travel/training needs for the City's Regional Coordinator. GHSP recently informed the City that it will receive an additional $9,480 in grant money. The total amount available to the City will now be $17,480. There is no match requirement for these funds.

The crash investigation equipment and software will enhance the capabilities of the Asheville Police Department to investigate vehicular accidents and provide greater safety to the officers at the scene of an accident. The travel/training funds will allow the Regional Coordinator to participate in highway safety meetings throughout the southeast offered by the Federal government as well as those in North Carolina offered by the State government to fulfill their duties as the Regional Coordinator.

City staff recommends the adoption of a resolution and budget amendment, in the amount of $9,480, to accept additional grant funding from the N.C. Governor's Highway Safety Program for crash investigation equipment and software and travel/training funds for the Regional Coordinator.

Bid Award for Ballfield Light Replacement at Memorial Stadium

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with The Lighting Company for the installation of field lighting at Memorial Stadium.

The City of Asheville Parks and Recreation Department is continuing to upgrade parks throughout the City of Asheville. One of the parks in need of renovation is the Memorial Stadium Complex, which is situated above McCormick Field. This park is the home of the Asheville Youth Sports Program, the Asheville Splash (women's semi-professional soccer team), the Asheville Grizzlies (men's semi-professional football team), the Asheville Assault (women's semi-professional football team), the Asheville-Buncombe Youth Soccer Association and many other user groups. This particular segment of the renovation has become a necessity within the last year, due to safety issues surrounding the existing system. Existing poles are too deteriorated for repair companies to work on them, light fixtures do not illuminate enough of the playing field, and "banks" of lights are going out in the middle of scheduled activity. In order to complete this portion of the project, staff prepared bid specifications for the installation of a turn-key field lighting system. The following is a list of the six qualified bidders that responded:

The Lighting Company	$107,092
M.B. Haynes Electric Company	$124,900
Progress Energy	$129,746
Newco Inc.	$130,000
Greenlight Electric Company	$134,111
Wise Electric Control Inc.	$169,726

The Lighting Company was the lowest responsible bidder, at a cost of $107,092. The bid process and The Lighting Company have complied with the Minority Business Plan. This project will be financed, along with other Fiscal Year 2004 equipment purchases, through an installment purchase contract over a period of five years. The Finance Department anticipates soliciting proposals for financing in January of 2004. Funding for this year's installment payments for the lighting project is included in the Parks and Recreation Fiscal Year Capital Improvement Plan.

The Parks and Recreation Department recommends that authorization be given to the City Manager to enter into a contract with The Lighting Company to furnish and install the lighting system for Memorial Stadium.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

RESOLUTION NO. 03-188 - RESOLUTION OF INTENT TO CLOSE AN UNOPENED SECTION OF EMMA ROAD BETWEEN LEICESTER HIGHWAY AND OLD COUNTY HOME ROAD AND SETTING A PUBLIC HEARING ON DECEMBER 16, 2003

Summary: The consideration of a resolution of intent to close a portion of an unopened section of Emma Road between Leicester Highway and Old County Home Road and setting a public hearing for December 16, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close a portion of an unopened section of Emma Road extending northwesterly from Leicester Highway toward Old County Home Road to a line extending from the northeastern corner of the property of Dennis and Dane Dettweiler (PIN No. 9629.14-23-7485) to the northwestern corner of the property of Charles and Doris Haney (PIN No. 9629.14-23-9397).

Public Works Department staff has researched and determined that this portion of right-of-way is not a City maintained street and its closure will not deprive any property owner of a reasonable means of ingress or egress to their property. This portion of right-of-way is abutted by four lots, identified by PIN Nos. 9629.14-23-9397; 9629.14-32-0959; 9629.14-23-8346; and 9629.14-23-7485.

City staff recommends that City Council adopt the resolution setting a public hearing for December 16, 2003 to close a portion of an unopened section of Emma Road.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilwoman Jones moved to adopt Resolution No. 03-188. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 53

CIVIC CENTER MINOR LEAGUE HOCKEY

Mr. Paul Hornyak, member of the Civic Center Commission, said that over the past several months the Civic Center Commission has conducted due diligence into the viability of two hockey leagues that concluded with our meeting of October 27, 2003. Based on our evaluation we recommended that Civic Center staff immediately begin negotiations with the World Hockey Association 2 (WHA2) for the placement of a hockey team in the Asheville Civic Center for the 2004/2005 hockey season. In addition we believe that the following guidelines should be followed during these negotiations:

1. Any upgrades or repairs required specifically for hockey should be the responsibility of the hockey team or league. The league or team's due diligence on the facility should be finalized before negotiations are complete.
2. Under no circumstances should City funds be used for the financial sustenance or viability of the hockey team.
3. Cognizant of the potential additional liability to the city as a result of having ice in the Civic Center, the contract should insure that this liability is mitigated through standard risk avoidance/diminution language.
4. The contract should seek to limit the city's liability from systems failures at the Civic Center through legal and other risk mitigation strategies. The center should be leased "as is" and not with a service level that is unattainable.

The Commission recognizes and proclaims that, in addition to the money collected from ticket and concession sales, a positive economic impact will be engendered to the City as a whole by the addition of 30 events at the Civic Center. This could mean 30-90,000 additional patrons of our restaurants, hotels, retailers and city parking facilities.

Mr. Hornyak then reviewed with Council the weighted evaluation template that was used for the hockey leagues.

Civic Center Director David Pisha said that the following items are the major points of the contract:

- The term is for three years beginning July 1, 2004, and ending June 30, 2007.
- The team is responsible for any upgrades to the Ice Plant or ancillary equipment to meet their standards.
- The team has agreed to hold the City harmless for any losses resulting from any equipment, system or premises failure.
- The team agrees to pay for any repairs to the Ice Plant in excess of $2,500.00.
- The rent to be paid the Civic Center is based on ticket sales and actual attendance at games.
- The team is required to put down a $60,000.00 non-refundable deposit at the beginning of each season. It will be credited back to them on a pro-rata basis, but if for any reason the team stops play at any time, the remainder of any deposit is forfeited.
- The team is allowed to practice only at the discretion of the Civic Center Director when it does not interfere with the financial interests of the venue.
- Any promotions by the team that cost the City money are to be made up by the team.

- The City can terminate the contract should the lease interfere with the City's plans to perform major renovations or construct a new facility. It can also terminate the agreement it the cooling tower fails and the City decides not to purchase a new unit.

City staff recommends City Council adopt the resolution authorizing the City Manager to execute any related contractual documents regarding booking a hockey team affiliated with the WHA2 into the Asheville Civic Center.

Mr. Pisha answered various questions/comments from Council regarding the contract, some being, but are not limited to: wear and tear of equipment, especially the Zamboni; what happens to the $1 user fee; how does the rent sliding scale work; are the backers of this team stable; what is the City's fixed costs per game; and how was the figure of $2,500 arrived at for repairs.

Vice-Mayor Bellamy suggested that as we look to renovations of the Civic Center and perhaps our main users will see fit to join hands with us and achieve that goal.

Vice-Mayor Bellamy suggested that City Council be provided with a pro forma or additional financial information anytime the City enters into a contract that we have financial liability.

Councilwoman Jones said that if renovations are planned to the Civic Center, she hoped that we communicate that with our users as early as possible, especially if they invest in capital improvements to the Civic Center.

Councilman Mumpower thanked the City Manager, Civic Center Director, Civic Center Commission and City Attorney's Office for their efforts in this agreement to protect the City's interest.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ACCEPTANCE OF SECTION 108 GUARANTEED LOAN & ECONOMIC DEVELOPMENT INCENTIVE GRANT

After a brief discussion on November 5, 2003, it was the consensus of City Council to delay consideration of the budget amendment for two weeks in order to give Eagle/Market Street Development Corporation, the neighborhood and interested people an opportunity to meet and discuss concerns. Additional information was also requested.

Planning & Development Director Scott Shuford reviewed with Council additional information on the financing and background to Eagle/Market Streets Development Corporation's proposed redevelopment project on Eagle Street and South Market Street.

At the City Council worksession on November 5, 2003, Council Members requested additional information on the background to a proposed budget amendment which would recognize receipt from the U. S. Dept. of Housing and Urban Development (HUD) of an $800,000 Section 108 Guaranteed Loan and a $340,000 Economic Development Initiative (EDI) grant for South Pack Square redevelopment.

The following was provided to Council:

- A chronology of significant events over the last 10 years in the effort to redevelop South Pack Square.

- A budget and timeline for the redevelopment project now proposed.
- Architectural Plans for the project.
- Relevant extracts from the South Pack Square Design Guidelines.
- An organization chart for the development team.

Council already has a copy of the South Pack Square Redevelopment Plan, as amended in Sept 1996, which Mr. Gene Ellison handed out at the November 5, 2003, worksession.

The Project

The project under consideration consists of the rehabilitation of a row of retail units at 17-23 Eagle Street (the Collette Building), 38 S. Market Street (the Campbell or Del Cardo Building), and a new infill building, which will become 40 S. Market Street.

A third existing building at 3 Wilson Alley is part of the redevelopment plan, but it is heavily contaminated by mold and must be demolished. Its site will provide additional parking, with the possibility of future redevelopment.

The project has been recommended by the South Pack Square Design Review Committee and approved by the Downtown Commission. It does not require Planning & Zoning Commission or Council approval. However, adjacent property owners whose window light is affected by the infill building have raised objections and suggested that the project is not consistent with the Redevelopment Plan, and that there has been inadequate opportunity for review and input by interested parties.

The Architectural Plans and their Review

Although staff was shown some tentative scale drawings in July, we understand that the existing plans, which are significantly different, were not completed until the end of September.

On October 3, plans were submitted to the Downtown Commission and, on October 6, to area property owners and Community Development staff. After hearing concerns from the owners of 13-15 Eagle Street and 42-44 South Market Street, the plans were redrawn to pull the infill building at least 3 feet away from those buildings.

The plans show how the existing buildings will be physically tied into the new structure. The infill construction will not only result in four new commercial units and 12 new residential units, but will also provide basement parking extending under the Collette Building and elevator and staircase access to the 2nd and 3rd floor residential units in the Del Cardo Building. The development team has stressed to staff that without the infill building, the rehabilitation of the existing structures becomes both physically and financially infeasible.

Future Development Phases

The project described above is just the first phase of a larger redevelopment being pursued by the development team. The second phase, which should also start quite soon, is the rehabilitation of the three derelict buildings to the east of S Market Street, which belong to Mount Zion Missionary Baptist Church. The financial feasibility of each Phase depends on the other. Separately, each would be too small to attract the financial backing they now have. Future phases will center on the buildings south of 42-44 S. Market Street, and on the large vacant parcel around the Jones Convenience Store, but these phases are not so advanced in planning.

Redevelopment Roles

The South Pack Square Redevelopment Plan, originally approved in 1993 and amended in 1996, sets out roles for various bodies with interests in the area:

(1) **Eagle Market Streets Development Corporation** (EMSDC), whose mission is closely tied to the redevelopment of the area, is accountable to the City for administering the Redevelopment Plan, carrying out physical development work, and managing public involvement in implementation of the Plan. It is the "redeveloper" defined in State redevelopment law, and, along with the City must approve any revisions to the Plan.

(2) The **YMI Cultural Center** is to have input into the process

(3) The **YMI Community Development Corporation** (YMICDC) is to implement job training and business development activities (in practice EMSDC has assumed this role).

(4) The **South Pack Square Association** is to have input into the process. At the time when the Plan was prepared, this was an extremely active group of property owners, business owners, residents, bankers and other concerned citizens. It was never an incorporated entity and has not met for several years. Mr. Ellison has recently established a new group under the name of the South Pack Square Business Association, which may be able to serve a similar role in the future.

(5) The **City of Asheville** is the major source of funding. It contracts annually with EMSDC for specific implementing steps and monitors EMSDC's progress.

(6) The **South Pack Square Design Review Committee** consisting of City staff, representatives of EMSDC and YMICDC, a property owner and an architect, is to review proposed redevelopment work and coordinate with other review bodies (e.g. Planning & Zoning Commission and the Downtown Commission). This Committee has recently met to review the plans for the current proposed project.

Additionally, a **Development Team** has been created by EMSDC and its partners in this particular project. Its complexity is typical of redevelopment projects where multiple partners and funding sources are necessary to the success of the project. The involvement of Rogers & Associates and the Enterprise Foundation has been critical in getting the project to this point.

After 10 years of very slow progress, EMSDC has finally put together a Development Team with the expertise and financial capacity to effectively implement the goals of the Redevelopment Plan. During that period, some conditions have changed and new ideas have surfaced, including the concept of an infill building at 40 South Market St. The Plan encourages such flexibility and innovation (page v: "This Redevelopment Plan should be viewed as a starting point and not a final product"; page 16: "The predominant land use ... will be that of mixed use development which includes residential, commercial, office and light manufacturing"; page 21: "Infill on vacant property for new commercial structures on Market Street and Biltmore Avenue is encouraged".)

It is staff's view that the project is consistent with the Redevelopment Plan, and, further, represents the only realistic opportunity for significantly implementing the Plan that has been offered in the past 10 years.

Failure to authorize use of the Section 108 and EDI funds at this stage would cause both this project and the Mount Zion project to fail. Staff can see no prospect then of reviving interest in a major redevelopment effort. It would be left to individual property owners to do what they see fit with their own properties without regard to the Redevelopment Plan. This may ultimately result in the demolition of buildings in the area, resulting in loss of the historic fabric of the area and its links to the African American community.

City staff recommends approval of the budget amendment to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Initiative grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square.

There was considerable discussion regarding the project, the roles of each interested body, the different companies, questions raised by Mr. Gene Ellison, risks, public input, and what the consequence of delay.

Councilman Peterson hoped that this project would not be like the Pack Plaza Project where the City of Asheville lost money.

Councilman Dunn moved to not place this item on the November 25, 2003, formal meeting agenda until there was more resolution of the matter and for City staff to add it to an agenda as soon as possible. This motion was seconded by Vice-Mayor Bellamy.

Members of Council voiced their opinion on Councilman Dunn's motion.

Rev. John Grant from Mt. Zion Missionary Baptist Church and Ms. Elizabeth Russell from the Eagle-Market Streets Development Corporation voiced opposition in delaying the budget amendment.

The property owner of the Wilson Building and Mr. Gene Ellison, owner of the Ritz Building, voiced support to delay action on the budget amendment.

The motion made by Councilman Dunn and seconded by Vice-Mayor Bellamy carried on a 4-3 vote, with Vice-Mayor Bellamy, Councilman Dunn, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Ellis and Councilman Mumpower voting "no."

At 4:50 p.m., Mayor Worley announced a short break.

REPORT ON RENOVATIONS TO MEMORIAL STADIUM

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing the Parks and Recreation Department to proceed with a conceptual design for renovations to historic Memorial Stadium.

The Parks and Recreation Department has been working the past several months on a conceptual design for renovations to historic Memorial Stadium. The Stadium was originally constructed in the late 1920's and dedicated in the early 1930's as a memorial for veterans who served and died in WWI. The Stadium was dedicated again to WWI and WWII veterans in the 1940's. However, a true memorial to the men and women who gave the ultimate sacrifice to our country was never properly constructed.

In addition, Memorial Stadium was for years the home of both Lee Edwards/Asheville High Cougars and the Stephens-Lee Bears. Today, a number of youth sports groups including the Asheville Youth Sports, Asheville Grizzlies, WNC Bears, Asheville Assault, Asheville Splash, Asheville-Buncombe Youth Soccer Association, and a number of other groups currently call Memorial Stadium home.

The Stadium is in desperate need of repairs to a number of features including the lights, press box and Stadium seating and, more importantly, a proper recognition to our war dead as originally planned still needs to be constructed at this site. A plan has been developed by the

Parks and Recreation staff to incorporate these issues into a conceptual design for the Stadium. This plan will address a number of funding options that include local civic club contributions, veterans groups, grants and foundation funding, and sponsorships. It is anticipated that the cost for the renovations and upgrades will total $1.5 million. An Action Committee has been formed which will work with the Parks and Recreation Department to aggressively secure funding through grants, foundations and sponsorships, as well as the Capital Improvement Plan for the City of Asheville. The Department has also been working with Asheville Splash on a potential partnership that will assist in funding a portion of the cost. Memorial Stadium has been a high priority for the Department for a number of yeas due to the degree of use and age of the facility.

City staff is requesting City Council authorize the Parks and Recreation Department to proceed with a conceptual design for renovations to historic Memorial Stadium.

Vice-Mayor Bellamy said that there are other individuals working on renovation of Mountainside Park and would let them know they should contact Mr. Brinson for coordination.

Councilman Peterson suggested contacting some of the athletic associations from years ago that used Memorial Stadium to see if they would like to help with funding renovations.

Mr. Brinson answered various questions from Council, some being, but are not limited to: is the City working with the Asheville Tourists on addressing the parking needs and are there plans to alter McCormick Street.

Mr. Brinson said that he had received two letters of support for renovation from the Asheville Tourists and the Asheville Youth Sports Program.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ABC BOARD

Councilman Dunn voiced problems with the ABC Board and their management of the ABC operations.

He reviewed with Council the 2003 Management Letter of Crawley, Lee & Company, P.A.'s audit of the financial statement of the Asheville Board of Alcoholic Control. The auditors noted certain matters involving internal control and its operation that they consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to their attention relating to significant deficiencies in the design or operation of internal control that, in their judgment, could adversely affect the Asheville Board of Alcoholic Control's ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Councilman Dunn then reviewed each of the conditions the auditors believed to be a material weakness: improve segregation of duties; develop accounting procedures and policy manuals; adopt a records storage and retrieval system; store data backup files off-site; and miscellaneous items.

Some issues Councilman Dunn were concerned with was the funding for police activity; money to non-profits; raises of board members; and the embezzlement case.

He felt that City Council as a responsibility to investigate the operation of the ABC Board. Councilman Dunn said that City staff has contacted the N.C. Alcoholic Beverage Control Commission. In Asheville's attempt to help improve the operations of the ABC Board, they suggested (1) review of the composition of the current board for needed financial/managerial/

business expertise; (2) obtain audits of other ABC boards for comparative purposes; (3) contact other ABC Managers across the State to discuss successful business strategies; (4) contact other ABC Boards to compare their experience providing their own law enforcement; (5) request a copy from the Interim Asheville ABC Manager of the Management Report provided by the independent auditors for this year and last year's audits; (6) retain an outside consultant to conduct a head to toe managerial review of the entire Asheville ABC operation; and (7) put the hiring of a permanent manager on hold until the results of the above steps are available.

Therefore, Councilman Dunn requested City Council support in following the State Board's suggestions and ask the local Board have a management review performed by an independent firm; request legislation to increase the Board be raised from 3 to 5 members; direct the local Board not fill the Supervisor's position until after the study is complete; and ask the current Board members questions concerning the problems at the local Board.

Mayor Worley pointed out that the ABC Board has recently lost their Supervisor and has also gone through an embezzlement case. He said that the Board Chair has been extremely conscientious in keeping him up-to-date.

It was the consensus of City Council to (1) request a copy of 2002 audit and management letter; (2) add to the legislative agenda the increase of the ABC Board from 3 members to 5 members; (3) postpone appointing a member to the ABC Board and have the City Attorney review the statutes to see if the Chair can serve at the pleasure of Council; and (4) have the Mayor and Councilman Dunn meet with the Chair of the local Board and request the local Board to have a management review performed by an independent firm. If the local Board chooses not to do that, then the City will submit a request to the State Board for this.

BOARDS & COMMISSIONS

It was the consensus of City Council to appoint Alison Watson, Kathleen Kasben and Heidi Daugherty to the Asheville Film Commission.

It was the consensus of City Council to appoint Dana Irwin to the Public Art Board.

It was the consensus of City Council to appoint Jeff Richardson, Bill Schaefer and Ben Durant to the Victoria of Asheville Board of Directors.

MISCELLANEOUS

Upon inquiry of Councilwoman Jones, Mayor Worley said that he would talk with Buncombe County Commissioner Nathan Ramsey on whether or not the Interlocal Agreement with Buncombe County on the Joint Planning Area would be addressed on November 25, 2003, and advise City Council.

CLOSED SESSION

At 6:12 p.m., Councilman Mumpower moved to go into closed session in Room 209 of the City Hall Building to consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:32 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:32 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 25, 2003 - 3:00 p.m.
Room A109 – Public Works Facility
161 S. Charlotte Street, Asheville, N.C.

Special Joint Meeting of Asheville City Council and Buncombe County Commissioners

Asheville City Council:

Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson (Councilwoman Diana Hollis Jones was absent)

Buncombe County Commissioners:

Present: Commissioner Chair Nathan Ramsey; Vice-Chairman David Young; Commissioner David Gantt; Commissioner Patsy Keever; Commissioner Bill Stanley; County Attorney Joe Connolly; County Manager Wanda Greene; and Clerk to the Board Kathy Hughes

CITY OF ASHEVILLE RESOLUTION NO. 03-189 (BUNCOMBE COUNTY RESOLUTION NO. 03-1113) – RESOLUTION ENDORSING CONTINUED DEVELOPMENT OF THE JOINT PLANNING AREA AND REGULATIONS

The Asheville City Council and the Buncombe County Board of Commissioners each discussed all the important cooperative efforts they have achieved in the past, for example, the Joint Emergency Center, the City-County Housing Task Force, the exchange of properties for the Buncombe County Detention Center expansion, and the Public Access Channel.

Buncombe County Zoning Administrator Jim Coman explained the Joint Planning Area (JPA) is one mile around the City limits, includes the previous City's extraterritorial jurisdiction (ETJ), and the JPA would expand with annexation. He did note that farming is exempt from regulation.

Mr. Coman said that the Zoning Ordinance of the JPA of Buncombe County is based on the Limestone Township zoning ordinance which was adopted in January of 1982. They have added some provisions from the Unified Development Ordinance and noted that changes to the County's subdivision ordinance would be required.

He said that the cooperative agreement between the City and County will require adoption and amendments or rezonings by action of both governments, will require approval by both Planning Boards, and will be administered by the County with City input on largest projects.

He showed a map of the initial area of the JPA. He explained that the City's ETJ is replaced by the JPA. He said that there will be 8 zoning districts and 2 overlay districts. Other requirements will include landscaping and buffering; conditional use standards; stormwater management; on-premise signs; traffic impact analysis; and mixed use development.

After Mr. Coman explained the notice process for the joint City/County public hearing on adoption of the Zoning Ordinance on the JPA and the map, Mayor Worley felt it was only fair that the City and County split the costs for the first-class notices.

He explained that the next step in this process is for the City and County to adopt an Interlocal Agreement. After discussion by Council and the Commissioners, it was the consensus of both bodies that the City Council would consider adoption on January 27, 2004, and the County Commissioners would consider adoption on February 3, 2004.

Commissioner Chair Ramsey hoped that the remaining issues on the Zoning Ordinance for the JPA could be resolved by the first of the year.

After a brief discussion on when the proposed ordinance should be submitted to the City and Council planning commissions, it was the consensus of both bodies that submission be done not later than March 31, 2004.

Commissioner Young moved to approve County Resolution No. 03-1113. This motion was seconded by Commissioner Keever and carried unanimously.

Vice-Mayor Bellamy moved to approve City Resolution No. 03-189. This motion was seconded by Councilman Dunn and carried unanimously.

Councilman Dunn suggested the City and County work together to find a way to hold their meetings on different days or different times. In addition, he hoped that the City and County will work together regarding economic development.

Both bodies expressed their willingness to work together for the betterment of our community.

At 3:45 p.m. Commissioner Stanley moved to adjourn the Buncombe County meeting. This motion was seconded by Commissioner Young and carried unanimously.

At 3:45 p.m. Mayor Worley announced the City Council meeting was adjourned.

RESOLUTION BOOK NO. 28 – 54

Tuesday – November 25, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Diana Hollis Jones

PLEDGE OF ALLEGIANCE

U.S. Navy Veteran Larry Owen led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 11, 2003, AND THE WORKSESSION HELD ON NOVEMBER 18, 2003

B. RESOLUTION NO. 03-190 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL & PUBLIC SAFETY FOR A GRANT TO THE POLICE DEPARTMENT

Summary: The consideration of a resolution and budget amendment, in the amount of $9,480, to receive additional grant money from the North Carolina Governor's Highway Safety Program for crash investigation equipment and software and travel/training money for the Asheville Police Department's Regional County Coordinator

In August of 2003, City Council accepted an $8,000 grant from the Governor's Highway Safety Program (GHSP) to fund crash investigation equipment and software and travel/training needs for the City's Regional Coordinator. GHSP recently informed the City that it will receive an additional $9,480 in grant money. The total amount available to the City will now be $17,480. There is no match requirement for these funds.

The crash investigation equipment and software will enhance the capabilities of the Asheville Police Department to investigate vehicular accidents and provide greater safety to the officers at the scene of an accident. The travel/training funds will allow the Regional Coordinator to participate in highway safety meetings throughout the southeast offered by the Federal government as well as those in North Carolina offered by the State government to fulfill their duties as the Regional Coordinator.

City staff recommends the adoption of a resolution and budget amendment, in the amount of $9,480, to accept additional grant funding from the N C Governor's Highway Safety Program for crash investigation equipment and software and travel/training funds for the Regional Coordinator.

RESOLUTION BOOK NO. 28 – PAGE 55

C. ORDINANCE NO. 3068 - BUDGET AMENDMENT FOR ADDITIONAL GRANT MONIES FROM THE N.C. DEPT. OF CRIME CONTROL & PUBLIC SAFETY

Summary: See Consent Agenda Item "B" above.

ORDINANCE BOOK NO. 21 – PAGE 5

D. RESOLUTION NO. 03-191 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE LIGHTING COMPANY TO FURNISH AND INSTALL THE LIGHTING SYSTEM FOR MEMORIAL STADIUM

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with The Lighting Company for the installation of field lighting at Memorial Stadium.

The City of Asheville Parks and Recreation Department is continuing to upgrade parks throughout the City of Asheville. One of the parks in need of renovation is the Memorial Stadium Complex, which is situated above McCormick Field. This park is the home of the Asheville Youth Sports Program, the Asheville Splash (women's semi-professional soccer team), the Asheville Grizzlies (men's semi-professional football team), the Asheville Assault (women's semi-professional football team), the Asheville-Buncombe Youth Soccer Association and many other user groups. This particular segment of the renovation has become a necessity within the last year, due to safety issues surrounding the existing system. Existing poles are too deteriorated for repair companies to work on them, light fixtures do not illuminate enough of the playing field, and "banks" of lights are going out in the middle of scheduled activity. In order to complete this portion of the project, staff prepared bid specifications for the installation of a turn-key field lighting system. The following is a list of the six qualified bidders that responded:

The Lighting Company	$107,092
M.B. Haynes Electric Company	$124,900
Progress Energy	$129,746
Newco Inc.	$130,000
Greenlight Electric Company	$134,111
Wise Electric Control Inc.	$169,726

The Lighting Company was the lowest responsible bidder, at a cost of $107,092. The bid process and The Lighting Company have complied with the Minority Business Plan. This project will be financed, along with other Fiscal Year 2004 equipment purchases, through an installment purchase contract over a period of five years. The Finance Department anticipates soliciting proposals for financing in January of 2004. Funding for this year's installment payments for the lighting project is included in the Parks and Recreation Fiscal Year Capital Improvement Plan.

The Parks and Recreation Department recommends that authorization be given to the City Manager to enter into a contract with The Lighting Company to furnish and install the lighting system for Memorial Stadium.

RESOLUTION BOOK NO. 28 – PAGE 56

E. RESOLUTION NO. 03-192 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE FILM COMMISSION

Summary: The terms of Peter Loewer, Kathi Peterson; Ray Sanow, Bill Norwood, Robbie Williams and Michael Rangel, as members on the Asheville Film Commission, expired on November 1, 2003.

At City Council's worksession on November 18, 2003, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Sanow, Ms. Williams and Mr. Rangel to each serve a three year term respectively, terms to expire November 1, 2006, or until their successors have been appointed.

In addition, at City Council's worksession on November 18, 2003, City Council instructed the City Clerk to prepare the proper paperwork to appoint Ms. Alison Watson, Ms. Kathleen Kasben and Ms. Heidi Daugherty to each serve a three year term respectively, terms to expire November 1, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 57

F. RESOLUTION NO. 03-196 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Summary: Mr. Kenn Kotara has resigned as a member of the Public Art Board leaving a vacancy until December 31, 2005.

On November 18, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Ms. Dana Irwin to serve the unexpired term of Mr. Kotara, term to expire December 31, 2005, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 58

G. RESOLUTION NO. 03-197 - RESOLUTION REAPPOINTING MEMBERS TO THE BOARD OF DIRECTORS OF VICTORIA OF ASHEVILLE INC.

Summary: The terms of Assistant City Manager Jeff Richardson, Finance Director Bill Schaefer and Budget Director Ben Durant, as members of the Board of Directors of Victoria of Asheville Inc., expire on November 29, 2003.

At City Council's worksession on November 18, 2003, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Richardson, Mr. Schaefer and Mr. Durant to each serve an additional three year term, terms to expire November 29, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 59

H. RESOLUTION NO. 03-198 - RESOLUTION AUTHORIZING THE PARKS AND RECREATION DEPARTMENT TO PROCEED WITH A CONCEPTUAL PLAN FOR RENOVATIONS OF THE HISTORIC MEMORIAL STADIUM

Summary: This is the consideration of a resolution authorizing the Parks and Recreation Department to proceed with a conceptual design for renovations to historic Memorial Stadium.

The Parks and Recreation Department has been working the past several months on a conceptual design for renovations to historic Memorial Stadium. The Stadium was originally constructed in the late 1920's and dedicated in the early 1930's as a memorial for veterans who served and died in WWI. The Stadium was dedicated again to WWI and WWII veterans in the 1940's. However, a true memorial to the men and women who gave the ultimate sacrifice to our country was never properly constructed.

In addition, Memorial Stadium was for years the home of both Lee Edwards/Asheville High Cougars and the Stephens-Lee Bears. Today, a number of youth sports groups including the Asheville Youth Sports, Asheville Grizzlies, WNC Bears, Asheville Assault, Asheville Splash, Asheville-Buncombe Youth Soccer Association, and a number of other groups currently call Memorial Stadium home.

The Stadium is in desperate need of repairs to a number of features including the lights, press box and Stadium seating and, more importantly, a proper recognition to our war dead as originally planned still needs to be constructed at this site. A plan has been developed by the Parks and Recreation staff to incorporate these issues into a conceptual design for the Stadium. This plan will address a number of funding options that include local civic club contributions, veterans groups, grants and foundation funding, and sponsorships. It is anticipated that the cost for the renovations and upgrades will total $1.5 million. An Action Committee has been formed which will work with the Parks and Recreation Department to aggressively secure funding through grants, foundations and sponsorships, as well as the Capital Improvement Plan for the City of Asheville. The Department has also been working with Asheville Splash on a potential partnership that will assist in funding a portion of the cost. Memorial Stadium has been a high priority for the Department for a number of yeas due to the degree of use and age of the facility.

City staff is requesting City Council authorize the Parks and Recreation Department to proceed with a conceptual design for renovations to historic Memorial Stadium.

RESOLUTION BOOK NO. 28 – PAGE 60

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 891 PATTON AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE, AND THE ISSUANCE OF A CONDITIONAL USE PERMIT

On November 17, 2003, a letter was received by Dennis Ponder, Brooks & Medlock Engineering, PLLC, (representing petitioner) stating "Due to a number of conflicts in schedules and pending matters, I would like to request that the Harry's Cadillac matter be pulled from the November Council agenda. We will ask for a re-scheduling of this matter at a more appropriate time. I hope this postponement is acceptable and I think you for your help."

B. PUBLIC HEARING TO CONSIDER DESIGNATING THE CARROLL HOUSE, LOCATED AT 19 ZILLICOA STREET, AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 3069 - ORDINANCE DESIGNATING THE CARROLL HOUSE, LOCATED AT 19 ZILLICOA STREET, AS A LOCAL HISTORIC LANDMARK

Mayor Worley opened the public hearing at 5:17 p.m.

Historic Resources Director Stacy Merten said that this is the consideration of an ordinance to designate the Carroll House, located at 19 Zillicoa Street, as a local historic landmark. This public hearing was advertised on November 14 and 21, 2003.

The Robert S. and Grace P. Carroll house, built in 1922 is located inside the western edge of the Montford Historic District facing east on Zillicoa Street. It is part of an original complex of single family structures that later became part of Highland Hospital. The house is 2 ½ - story plus attic built in the Normanesque/Tudor Revival style and constructed of randomly laid granite stones.

Psychiatrist Robert S. Carroll, founder of Highland Hospital, a nationally recognized mental health facility, lived at the house until 1946 with his second wife Grace P. Carroll, a world renowned concert pianist with a national an international reputation. The house was connected by proximity, function and association to the Highland Hospital complex. Dr. Carroll may have used the house occasionally for patient treatment and Mrs. Carroll used the music room both as her own studio and also for larger community based musical events.

The Robert S. and Grace P. Carroll House is significant for its association with the Carroll's, who built the house, founded Highland Hospital and made a significant contribution to the arts community in Asheville. It is also significant architecturally as an excellent example of the Norman/Tudor Revival/Craftsman style structure. The entire original configuration and architectural detailing of the exterior of the house remains intact except for the addition on the west elevation of an elevator tower, stairs and retaining wall on the south elevation and a fire escape on the north elevation.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes, which is approximately $2,200 annually. Currently the tax

336

appraisal for the land is $194,100 and the structure is valued at $654,800, for a combined total of $848,900.

The ordinance designates the Robert S. and Grace P. Carroll House as a local historic landmark. The property included in the designation consists of the Robert S. and Grace P. Carroll House and the .78 acre parcel on which it is located as described on a plat. The designation includes the exterior of the house, some interior details and landscape features.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County (HRC). All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The HRC, by unanimous vote, recommends to the Asheville City Council that the Robert S. and Grace P. Carroll House be designated as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Upon inquiry of Ms. Hazel Fobes, Ms. Merten explained how City Council is involved in the designation.

Mayor Worley closed the public hearing at 5:25 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 3069. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 7

C. PUBLIC HEARING TO CONSIDER REZONING ONE LOT ON GLENDALE AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3070 - ORDINANCE TO REZONE ONE LOT ON GLENDALE AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:27 p.m.

Urban Designer Alan Glines said that this is the consideration of an ordinance to rezone one lot on Glendale Avenue from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District. This public hearing was advertised on November 14 and 21, 2003.

Petitioners Tom and Tammy Reilly requested the rezoning request. The properties are located within the City limits in the Oakley community. Glendale Avenue is one of the cross routes between Swannanoa River Road and Fairview Road in Oakley. There is a range of zoning districts in close proximity along this street. The River District is the zoning type along Glendale closest to Thompson Street. South from this area, the zoning is Commercial Industrial (CI) which includes the newly completed Target Store. The new Target Store placed the stormwater detention pond on property bordering Glendale Avenue as a part of the CI zoned property. In addition a secondary store access point connects from Glendale. Across from the CI zoned property are several properties zoned RM-16 Residential Multi-Family High Density District. Further south, and including the property included in this rezoning request, the properties are all zoned RS-8. Single family development is most common residential development type along Glendale Avenue. One nearby property to the rear of the Glendale lot, with access from Wood Avenue is the large Oak Knoll multi-family apartment community. In the past, growth pressures from businesses with access from River Hills Drive, the north end of Glendale Avenue and the Target Store have caused concern among residents in the Glendale Avenue area.

RM-8 Residential Multi-Family Medium Density District would allow either single family or multi-family housing at a rate of 8 units per acre or other limited uses that support residential areas. The RM-8 district is intended to provide a transitional area between high density single family areas and multi-family areas and to permit medium density multi-family development in areas where existing conditions make higher density developments inappropriate

The Glendale Avenue area has received development pressure from numerous commercial projects over the last decade. Protecting the remaining residential uses is appropriate for this area. The RM-8 zoning change provides a buffer from the high density residential uses at the rear of the property. In addition RM-8 zoning will provide for a mix of housing types in the neighborhood while at the same time blending with the underlying residential zoning density and character.

Staff recommends approval of the rezoning request. The Planning and Zoning Commission voted 6-0 to recommend approval.

Mayor Worley closed the public hearing at 5:33 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy asked that the staff be sensitive to the development in this neighborhood, e.g., landscaping and keeping traffic congestion to a minimum.

Councilman Mumpower moved for the adoption of Ordinance No. 3070. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 13

D. PUBLIC HEARING TO CONSIDER THE REZONING OF 5 LOTS ON HAZEL MILL ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 3071 - ORDINANCE TO REZONE 5 LOTS ON HAZEL MILL ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 5:34 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone five lots on Hazel Mill Road from RM-8 Residential Multi-Family Medium Density District to

Community Business I District. This public hearing was advertised on November 14 and 21, 2003.

Mr. Pettibone said that the properties are located in the City limits on the south side of Hazel Mill Road south of the Patton Avenue/I-240/Smokey Park Bridge interchange (petitioner is Morosani and Associates). Surrounding land uses and zoning include commercial warehouse and storage to the north across Hazel Mill Road zoned Highway Business (HB), vacant property zoned Commercial Industrial (CI) to the east across Toxaway Street, and residential and vacant properties to the south and west.

The applicant wishes to rezone the properties in order to utilize them for uses permitted in the CB I District. The purpose of the CB I District is to provide areas for medium-density business and service uses serving several residential neighborhoods.

Currently, there are two office buildings with associated parking on the largest of the five properties. They are part of a project that was approved prior to the adoption of the Unified Development Ordinance (UDO) and the area's designation as RM-8 Residential Multi-Family Medium Density District. The previous zoning for the site was light industrial, as was the property located to the north across Hazel Mill Road. The other four parcels are vacant. The properties' access would be from Hazel Mill Road, which provides an entrance to and exit from Patton Avenue/I-240 and the Westgate Shopping and other areas north of I-240.

On Thursday, October 23, 2003, the applicant held a neighborhood meeting with members of the surrounding community.

Rezoning the properties would allow the applicant the opportunity to redevelop the parcels for uses permitted in the CB I District. It would provide for one of the UDO's least intensive commercial zoning categories on a street that already is used by significant non-residential vehicular traffic and serves commercial uses on both sides of the street. The small size of the property should also ensure a residential scale and a limited traffic impact, addressing two concerns raised by neighbors in the recent neighborhood/developer meeting.

In addition, a rezoning to CB I would legitimize the commercial use of the existing office buildings on the largest property since that use is currently non-conforming. CB I zoning on these parcels would also act as transition between the HB and CI to the north and east and the RM-8 residential neighborhood to the south and west.

In consideration of the above, the adjoining zoning and land uses in the area surrounding site, and the site's frontage on Hazel Mill Road, the proposed zoning change appears to be consistent with the intent and purpose of the UDO. Staff recommends approval of the rezoning request. The Planning and Zoning Commission voted 6-0 to recommend approval.

Upon inquiry of Vice-Mayor Bellamy, Mr. Pettibone said that a specific plan has not been brought forward so it's hard to address issues raised at the neighborhood/developer meeting. He did say that the scale of the project and traffic impact where the major concerns. With regard to traffic, he said that City staff didn't feel the rezoning itself warranted traffic calming measures. The City's Traffic Engineer did say that this area is on our priority list, but since it's not one of the busiest streets in the City, it's not one of the highest priorities. Again, there appear to be some traffic issues that are more far reaching that the rezoning could address and we will follow normal procedures for traffic calming.

Councilman Peterson expressed concern about the possibility of the owner combining the lots and building a different use allowed under the Community Business I District. He suggested that the property be rezoned to Neighborhood Business or Office to prohibit some of the uses, e.g., bars or nightclubs, near the residential area.

Planning & Development Director Scott Shuford said that the Community Business I District scale seemed to be appropriate for this particular situation and it allows a little more flexibility in terms of the likely uses for the applicant. The applicant did hear a lot from the neighborhood about the design of the building and as a result of that meeting an element of trust was built. That is something we are trying to achieve through the neighborhood/developer meeting process. Again, he did say that staff considered the full range of uses under the Community Business I District and felt that a bar would be unlikely to occur in an area that gets this level of traffic volume.

Councilman Mumpower was encouraged by the neighborhood/developer process that was used in this rezoning request.

Mr. George Morosani, developer, spoke in support of the proposed rezoning. He responded to Councilman Peterson's concern stating that one of the existing buildings is used by Memorial Mission Hospital. They have equipment in the building that zaps surgical packs for the hospital and under that zoning, it would not be allowed. He said the main thing that will control what he can and cannot use the property for is the strict limitation of the topography and the size of the buildings.

Mayor Worley closed the public hearing at 6:03 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson felt that since any uses permitted under the Community Business I District would be allowed to be built on the property, he did not think they were compatible to the neighborhood and would not support the rezoning. He felt that Neighborhood Business District or Office would be more compatible.

Vice-Mayor Bellamy explained how the topography affected her decision to support the rezoning. Since the existing businesses opened, there has been a decrease in litter and graffiti on that part of the street and more eyes on the street can help with crime.

Councilman Ellis moved for the adoption of Ordinance No. 3071. This motion was seconded by Councilman Mumpower and carried on a 5-1 vote with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 21 – PAGE 15

At 6:07 p.m., Mayor Worley announced a short recess.

E. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED ON POLE CREASMAN ROAD AND BREVARD ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

City Attorney Oast said that following the Planning & Zoning Commission meeting the City receive a protest petition on this rezoning. There were two property owners involved in signing the protest petition. The applicant has since advised him that the protestors have withdrawn their petitions and has been handed a copy of the signed withdrawal. Our code allows

340

the withdrawal of protest petitions in writing submitted anytime prior to Council's vote. He has no reason to doubt the validity of the signatures, however, they are only copies. The applicant advised him that he mistakenly brought the copies instead of the originals and he could have the originals brought to use tomorrow. He said City Council could (1) continue the matter; or (2) adopt the ordinance, subject to a second reading at a later time. Ordinarily "in writing" he believes means bearing the original signature. That is not a statutory requirement but a requirement of our ordinance. The fact is that if Council does act on this tonight it would be subject to challenge, but the only people who would challenge it would be the people who signed the protest petition and subsequently withdrew it.

Upon inquiry of Councilman Peterson, City Attorney Oast explained why this protest petition issue is different from the one which came up for the Broadway Corridor rezoning.

Mr. Carr Swicegood, applicant, said that after receiving a copy of the protest petition he contacted the people who signed it and asked why they were against the rezoning. He noted that those people were given false information and now they are willing to support the rezoning. He did not realize that he only had copies of the withdrawals until he arrived at this meeting. He would be happy to drive to his office and look for the originals, however, he did not think he could be back in time before the meeting adjourned.

City Attorney Oast said that the language in the copies of the withdrawals is sufficient and the withdrawals do not have to be notarized, but he does need to have the originals.

Mayor Worley said that in order to protect the validity of action Council takes, City Council can (1) go forward with public hearing, close the public hearing and continue the vote until December 16, 2003; (2) continue the entire matter until December 16, 2003; or (3) take the risk of our action being challenged. He felt Council has a duty to try to assure what they do is done properly and is done in a way that will most likely successful in the event of a challenge.

Mr. Swicegood said that the City wants developers to work friendly with the neighborhood. He felt that the neighborhood should be willing to work with developers too. He then requested City Council continue the matter until December 16, 2003.

Councilman Dunn moved to continue the consideration of the Pole Creasman Road rezoning until December 16, 2003. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3072 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR NEIGHBORHOOD/DEVELOPER MEETINGS AS AN OPTIONAL, ALTERNATIVE STEP IN THE REVIEW PROCESS FOR REZONINGS, CERTAIN CONDITIONAL USE PERMITS, CONDITIONAL USE REZONINGS, AND LEVEL III DEVELOPMENTS

Mayor Worley said that this public hearing was held on October 14, 2003. This matter was then continued in order to give the Planning & Development Director time to meet with the focus group regarding the timing issue.

Planning & Development Director Scott Shuford said that at the Council meeting on October 14, 2003, City Council members expressed an interest in receiving training on these meetings. They are in the process of developing a training program that they think will be both informative and entertaining, and will schedule the training after the new Council is seated, likely in January, 2004. He has also provided several publications for Council's review. He felt they may be helpful in understanding the philosophy behind this type of dispute resolution process.

Mr. Shuford said the following are revised procedures for Neighborhood/Developer Meetings that address concerns raised by some focus group members about the timing issue. The revised time frame includes a 60 days notice period with the initial meeting occurring a minimum of 20 days prior to the City Council meeting for which the project is scheduled. Additionally, the procedures provide for posting of properties for Neighborhood/Developer Meetings.

Please note that he did not include a suggestion by Council members to list Neighborhood/Developer Meetings in *City Works*. This was done to respect the intent of the Neighborhood/Developer Meeting process – to keep the meeting focused primarily on the most-directly-affected persons.

He reviewed the following Neighborhood/Development Meeting Procedures:

- Developer registers project application a minimum of 60 days before the City Council meeting at which the public hearing is scheduled to occur.
    - Plans are placed on record and made available to the public at a central location (City Planning and Development Department).
    - Plans will provide as much information as available at time of posting.
    - Plans will be made available on City website if possible.
    - Staff contact person is clearly identified.
- Notification procedures:
    - Property owners within 400 feet of the property proposed for development would be mailed notice of the Neighborhood/Developer Meeting by the City of Asheville. This is a minimum notification area and developers are advised to determine if additional property owners should be notified (e.g., if the project is located on a dead-end road 600 feet long, perhaps it would be good practice for the developer to notify all property owners fronting the road); developers would be responsible for any additional mailing costs associated with a larger notice area.
    - Any affected neighborhood association registered with the City and located within 400 feet of the property proposed for development would also receive notice of the Neighborhood/Developer Meeting. It is expected that the designated person(s) receiving this notice will identify key participants outside the general notice area and arrange for them to attend the Neighborhood/Developer Meeting. However, this should not be construed as an open invitation for all neighborhood association members outside the notice area to attend. The intent is to have representation from affected neighborhood associations while ensuring that most neighborhood participants are from the notice area.
    - Timing: The City shall mail Neighborhood/Developer Meeting notices at least 60 days before the City Council meeting at which the public hearing is scheduled to occur. The initial Neighborhood/Developer Meeting shall occur no less than 20 days prior to the City Council meeting at which the public hearing is scheduled to occur.
    - The City of Asheville will also provide notice of the public hearing to adjacent and nearby property owners as provided for under state law or City Code requirements, whichever is more restrictive.
    - The City of Asheville will post the property, providing the date, time and place of the Neighborhood/Developer Meeting and the City Council public hearing.
- Meeting location: Neutral site of sufficient size for meeting.

- Meeting Facilitation - The meeting must be managed by someone who knows the rules (mediator/facilitator) and is able to effectively run a meeting. The developer will pay for the cost of the mediator/facilitator. City staff will attend the meeting as technical advisor(s) only and will not facilitate the meeting. City staff will also maintain a list of facilitators and may add to or remove names from this list depending on interest and demonstrated competence.
- Meeting Ground Rules - The following set of ground rules are adopted to promote effective communication during Neighborhood/Developer Meetings. These ground rules must be reviewed by the meeting facilitator at the outset of each meeting and "enforced" during the meeting by the facilitator.
  - Listen to one another (really listen before responding)
  - Ask for feedback from one another
  - Accept the need for compromise by each of us
  - No stereotyping (let's keep a level of objectivity in our discussions)
  - Be open minded
  - Clearly define our statements to insure that all parties understand their meaning
- Conduct of the Meeting – Meetings will have a structured agenda to include: Ground rules for the meeting; Areas of allowable discussion clarified; Clarification of any zoning rules that apply to the situation; Project presentation (including how the project addresses the "big picture"); Identification of areas of agreement and disagreement, Negotiation of issues of concern; and Identification of next steps, if any. City staff must attend the meeting to provide technical advice and information and to indicate official "condoning" of the process.
- Results of the Meeting - The meeting is intended to result in a signed document of supported and non-supported issues that will be generated by the facilitator (who will also identify the necessary signees). Alternately, the facilitator may submit a summary of key issues and concerns, particularly if no consensus is reached between the neighborhood participants themselves. City staff will provide any written materials from the facilitator in the staff report to the City Council, as well as providing a summary of the meeting in the staff report.

Mr. Shuford noted that a suggestion was made to notify Planning & Zoning Commission members about the neighborhood/developer meetings and to get their input on whether the requested action was a good idea. He explained why he did not think this was a good idea.

Mr. Shuford then thanked the Focus Group participants along with Mr. Paul Godfrey who served as the facilitator.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3072. This motion was seconded by Councilman Dunn and carried on a 5-1 vote, with Councilman Peterson voting "no.".

ORDINANCE BOOK NO. 21 – PAGE 17

V. NEW BUSINESS:

A. RESOLUTION NO. 03-199 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT FOR A MINOR LEAGUE HOCKEY TEAM AFFILIATED WITH THE WORLD HOCKEY ASSOCIATION 2

Mr. Peter Crosa, Chair of the Civic Center Director, said that over the past several months the Civic Center Commission has conducted due diligence into the viability of two hockey leagues that concluded with our meeting of October 27, 2003. Based on our evaluation we recommended that Civic Center staff immediately begin negotiations with the World Hockey Association 2 (WHA2) for the placement of a hockey team in the Asheville Civic Center for the 2004/2005 hockey season. In addition we believe that the following guidelines should be followed during these negotiations:

1. Any upgrades or repairs required specifically for hockey should be the responsibility of the hockey team or league. The league or team's due diligence on the facility should be finalized before negotiations are complete.
2. Under no circumstances should City funds be used for the financial sustenance or viability of the hockey team.
3. Cognizant of the potential additional liability to the city as a result of having ice in the Civic Center, the contract should insure that this liability is mitigated through standard risk avoidance/diminution language.
4. The contract should seek to limit the city's liability from systems failures at the Civic Center through legal and other risk mitigation strategies. The center should be leased "as is" and not with a service level that is unattainable.

The Commission recognizes and proclaims that, in addition to the money collected from ticket and concession sales, a positive economic impact will be engendered to the City as a whole by the addition of 30 events at the Civic Center. This could mean 30-90,000 additional patrons of our restaurants, hotels, retailers and city parking facilities.

Civic Center Director David Pisha said that this is the consideration of a resolution authorizing the City Manager to sign and execute a contract and any related documents for a minor league hockey team affiliated with the World Hockey Association 2 (WHA2) to play it's home games at the Asheville Civic Center starting in the 2004-2005 season.

The following items are the major points of the contract:

- The term is for three years beginning July 1, 2004 and ending June 30, 2007.
- The team is responsible for any upgrades to the Ice Plant or ancillary equipment to meet their standards.
- The team has agreed to hold the City harmless for any losses resulting from any equipment, system or premises failure.
- The team agrees to pay for any repairs to the Ice Plant in excess of $2,500.00.
- The rent to be paid the Civic Center is based on ticket sales and actual attendance at games.
- The team is required to put down a $60,000.00 non-refundable deposit at the beginning of each season. It will be credited back to them on a pro-rata basis, but if for any reason the team stops play at any time, the remainder of any deposit is forfeited.
- The team is allowed to practice only at the discretion of the Civic Center Director when it does not interfere with the financial interests of the venue.
- Any promotions by the team that cost the City money are to be made up by the team.
- The City can terminate the contract should the lease interfere with the City's plans to perform major renovations or construct a new facility. It can also terminate the agreement it the cooling tower fails and the City decides not to purchase a new unit.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute any related contractual documents regarding booking a hockey team affiliated with the WHA2 into the Asheville Civic Center.

Mr. Pisha answered various questions/comments from Councilman Peterson, some being, but are not limited to: will there by any difficulty with ice change-over; what was factored into the calculation of rent; how will the non-hockey uses impact hockey; how much time will be available for public skating or youth leagues; have improvements been made to minimize problems encountered the last time hockey was in the Civic Center; and are there any significant capital improvements the City will need to make before hockey starts in 2004.

Mr. Dennis Justice, Fletcher resident, thanked the Civic Center Commission for their efforts to bring hockey back to Asheville. He did point out that the WHA2 has not done their due diligence in contacting the NBDL. He stressed that hockey and basketball must work together. He also felt the City review the language regarding WHA2 providing six months written notice if they wish to terminate the lease. He felt that if a new arena is built somewhere else, they would leave. He felt that a hefty penalty should be imposed if they do terminate the lease.

Mr. Scott Osborne felt that the way the City has planned the renovation Memorial Stadium can be used to address the Civic Center because there are public, private and entrepreneurial interests. He said that Council will see a new ice facility in the south end of town within the next six months to a year which will be available for the hockey team to practice on if they would like.

Vice-Mayor Bellamy said that the Council heard from the community that they wanted hockey and instructed staff to move in that direction.

Councilman Mumpower and Councilman Peterson both commended the Civic Center Commission, Civic Center Director, and Assistant City Attorney Euler for their hard work and efforts on negotiating a contract that goes a long way to protect the City's interests.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 03-198. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 62

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of October 31-November 13, 2003: Buncombe County (Transit Services), Reed Street (Streets), Bobby Sloan (Parks & Recreation), Karen Major (Police), Nancy Flack (Fire) and Carolyn Hembree (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

B. PRIMARY ELECTION RESULTS - CITY OF ASHEVILLE - OCTOBER 7, 2003 GENERAL ELECTION RESULTS - CITY OF ASHEVILLE, NOVEMBER 4, 2003

Attached hereto as Exhibit "A" is the abstract containing the number of legal votes cast in the Primary Election, City of Asheville, held on October 7, 2003. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville, held on November 4, 2003.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Ms. Hazel Fobes

Ms. Hazel Fobes, Chair of the Citizens for Safe Drinking Water and Air (CSDWA), read a letter of appreciation to Councilman Peterson from members of CSDWA expressing their deep respect and gratitude for his steady presence, exploratory questioning and insightful judgment to the programs and issues before the City Council. Members of CSDWA hope that Councilman Peterson will retain his seat on the Regional Water Authority until the expiration of his term in September of 2005.

Comments by Ms. Julie Brandt

Ms. Julie Brant, member of the Asheville People Advocating Real Conservancy, said that her organization is a citizens group opposed to the selling of public park land for the proposed Grove Park Inn building for their luxury high-rise condominiums. She asked that if any negotiations were taking place regarding the Grove Park Inn, the Downtown Development Agreement or amendment to the Option she wanted to be made aware of them so she could keep her organization accurately informed.

Mayor Worley responded that he was not aware of any negotiations or conversations that any member of City Council has had with the Grove Park Inn regarding any changes or any alterations to the agreement that we entered into with them. He did state that he would be happy to sit down with her and review their website for any inaccuracies that might exist.

City Manager Westbrook suggested Ms. Brandt call him when they get information from the media, just to confirm the accuracy.

Air Quality Resolution Request

Mr. Will Harlan, Editor of Blue Ridge Outdoors Magazine, explained why it was important for Asheville to join the resolution urging the N.C. Attorney General Roy Cooper to file a petition for review against the Environmental Protection Agency's "Routine Maintenance" Rule Change in the New Source Review Provision of the Clean Air Act and to urge the entire North Carolina congressional delegation to co-sponsor legislation in Congress to repeal the Environmental Protection Agency's "Routine Maintenance" ruling. He explained that the rule change re-defines the term "routine maintenance" to include an annual investment valued at up to 20% of the total value of older power plants, factories and refineries. He said this policy will create a perpetual exempt status of tens of thousands of heavily polluting industries and will result in smokestack emission levels that will adversely affect the health North Carolinians and people throughout the county. He said that Jackson County, Sylva and Chapel Hill have joined the resolution with several more pending. He asked that the resolution be placed on Council's December 16, 2003, formal agenda for possible action because there is a late December deadline within which to join said resolution.

Mr. Michael Morgan also spoke in support of the City joining the resolution.

Ms. Nancy Thompson, Manager of Community Relations for Progress Energy, pointed out that the City of Raleigh, City of Winston-Salem, and Town of Black Mountain have all opposed joining the resolution and the City of Durham has tabled the resolution. She explained some inaccurate conclusions from the ruling that the Canary Coalition's draft resolution contains. She felt that the resolution places an unnecessary financial burden on our manufacturers in already weakened economy. She felt that maintaining a balance between the environment and the economy growth is important and urged City Council to not join in the resolution.

Comments by Mr. Mike Fryar

Mr. Mike Fryar spoke about the inaccuracies of the recent annexation of his property on Smoky Park Highway.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:17 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

ABSTRACT OF VOTES

FOR

ASHEVILLE CITY COUNCIL OFFICERS

FOR

BUNCOMBE COUNTY, NC

INSTRUCTIONS

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the Clerk of Superior Court. One copy is to be retained by County Board of Elections. One copy is to be mailed on the canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina.

STATE OF NORTH CAROLINA

COUNTY OF BUNCOMBE

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office named, the name of each person voted for, their party affiliation, and the number of votes cast for each person for the office named.

This the 10th day of October, 2003

Lucy B. Smith

This day personally appeared before me, JAMES BYRD, Chairman of the BUNCOMBE County Board of Elections, who, being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed my notarial seal, this the 10th day of OCTOBER, 2003

(Seal)

My Commission (if any) Expires: 6/14/05

OFFICIAL RESULTS FOR MUNICIPAL ELECTION OF BUNCOMBE COUNTY

Election **10/07/2003** **ASHEVILLE PRIMARY**

Exhibit "B"

MUNICIPAL

November 4, 2003
ABSTRACT OF VOTES
FOR
CITY OF ASHEVILLE OFFICERS
FOR
BUNCOMBE COUNTY, NC

INSTRUCTIONS

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the City Clerk. One copy is to be retained by County Board of Elections. One copy is to be mailed on the canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina.

STATE OF NORTH CAROLINA

COUNTY OF BUNCOMBE

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office named, the name of each person voted for, their party affiliation, and the number of votes cast for each person for the office named.

This the 7th day of November, 2003

Jone P. Byrd

Lucy N. Smith

This day personally appeared before me, Jone P. Byrd, Chairman of the BUNCOMBE County Board of Elections, who, being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed

my notarial seal, this the 7th day of NOVEMBER, 2003

(Seal)

My Commission (if any) Expires: 6/14/05

Penny Squires Penny Squires, Member

Tuesday - December 2, 2003 - 4:10 p.m.

ORGANIZATIONAL SESSION:

Mayor Charles R. Worley welcomed everyone to the organizational session. He then introduced Air Force Veteran John Lorec, Past National Commander of the AMVETS and current active member with AMVETS Post 665, who asked that everyone stand and recite the Pledge of Allegiance. Mayor Worley then introduced The Reverend Pete Peery from First Presbyterian Church who gave the invocation.

The Honorable Gary Cash, Chief District Court Judge, Buncombe County, administered the Oath of Office to the following:

Council Member Terry M. Bellamy
Council Member Jan B. Davis
Council Member Brownie W. Newman

RESOLUTION NO. 03-193 - RESOLUTION OF APPRECIATION FOR COUNCILMAN BRIAN L. PETERSON

Mayor Worley read the resolution.

Councilwoman Bellamy moved to adopt Resolution No. 03-193. This motion was seconded by Councilwoman Jones and carried unanimously.

Individual Council Members expressed words of appreciation to Mr. Peterson.

Mayor Worley presented Mr. Peterson with the resolution, a plaque, his name plates and a City pen.

RESOLUTION BOOK NO. 28 - PAGE 63

RESOLUTION NO. 03-194 - RESOLUTION OF APPRECIATION FOR COUNCILMAN JAMES E. ELLIS

Mayor Worley read the resolution.

Councilwoman Jones moved to adopt Resolution No. 03-194. This motion was seconded by Councilman Dunn and carried unanimously.

Individual Council Members expressed words of appreciation to Mr. Ellis.

Mayor Worley presented Mr. Ellis with the resolution, a plaque, his name plates and a City pen.

RESOLUTION BOOK NO. 28 - PAGE 64

ELECTION OF VICE-MAYOR

Councilman Davis nominated Councilman Mumpower as Vice-Mayor of the City of Asheville. Councilman Dunn seconded the nomination.

After hearing no more nominations, Councilman Dunn moved to close the floor for nominations. This motion was seconded by Councilman Davis and carried unanimously.

Mayor Worley then announced that the Vice-Mayor is R. Carl Mumpower.

Mayor Worley expressed appreciation to Councilwoman Bellamy for her two years of service as Vice-Mayor. He felt that Councilwoman Bellamy served in that position well and is a tremendous asset to City Council.

Councilwoman Bellamy said that she was honored to have served as Vice-Mayor and would work to keep the lines of communication open.

Vice-Mayor Mumpower also thanked Councilwoman Bellamy for her services and for Council's support in his position as Vice-Mayor.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 9, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Agreement with the N. C. Dept. of Transportation for Landscaping Adjacent to the W.T. Weaver Greenway

Summary: The consideration of a resolution authorizing the City Manager to sign a supplemental agreement with the N. C. Dept. of Transportation (NC DOT) for landscaping adjacent to the W.T. Weaver Greenway.

The City of Asheville received a grant from the NC DOT to install a greenway along W.T. Weaver Boulevard from Barnard Avenue to Broadway Street in Fiscal Year 2000. The amount of the grant was $300,000. There was no local match for the grant. The actual cost of the construction was approximately $200,000.

The City of Asheville and UNC-Asheville requested some of the remaining funds be used to provide landscaping to the W.T. Weaver Greenway. The City requested $34,070, which has been approved by the NC DOT. The grant does not require any local match.

Prior to requesting the money for the landscaping, City staff requested the remaining $100,000 for another greenway project but was denied because the project did not qualify under this original municipal agreement.

Staff recommends that City Council authorize the City Manager to sign a supplemental agreement with the NC DOT for landscaping adjacent to the W.T. Weaver Greenway in the amount of $34,070.

Easement across Brotherton Avenue for a Private Residential Sewer Line

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Brotherton Avenue for a private residential sewer line.

The City owns property (PIN No. 9638.18-21-9316) located on Brotherton Avenue and Virginia Avenue and the unopened right-of-way on Hubbard Street. The property is in the process of going back on the market after a sale contract failed to close. Infrastructure has been installed on the buildable portion of the property. The portion of the property near Hubbard Street is wooded and steep and is crossed by a sewer main. The intended use for that portion of the property is for green space.

David M. Bennert owns property on Hudson Street, which backs up to the unopened right-of-way of Hubbard Street where he is building two houses. Due to the topography and the location of the sewer main, the most direct and efficient route to provide sewer to the new houses is across unopened Hubbard Street and a portion of the City's property. The requested easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the use of the easement area for green space, which is the proposed use of that portion of the property.

Staff recommends adoption of the resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Brotherton Avenue for a private residential sewer line to David M. Bennert.

Contract and Budget Amendment for Synthetic Turf at Azalea Park and Memorial Stadium

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract for the construction and installation of synthetic turf at Azalea Park and Memorial Stadium and the associated budget amendment.

The Parks and Recreation Department, along with its partner, WNC Soccer Foundation, has raised almost $2,250,000 toward the development of the first two phases of Azalea Park. These phases include the development of four synthetic turf soccer fields, construction of restroom/ concession facility, a Leathers playground, parking, and greenway trails. After extensive research, both the Parks and Recreation Department and the WNC Soccer Foundation have concluded that synthetic turf soccer fields will greatly enhance the playability for the John B. Lewis Soccer Complex. This will be accomplished by allowing additional practice times and games for soccer and other events without affecting the playing surface. This will also allow for the complex to be used in inclement weather for regular play as well as tournament competition. In addition, no harmful chemicals will need to be used on the fields.

The Parks and Recreation Department solicited bids from a number of vendors. The specifications in the bid package required the surface to be FIFA (Federation International Football Association) approved. FIFA is the international governing body of soccer. This insured that the quality of the product would be of the highest standards possible for the safety of the participants and durability of the surface. In addition, the bid package included replacing the grass field at Memorial Stadium with synthetic turf. The cost for this project is anticipated to be totally paid for by one of the user groups at Memorial Stadium. In calculating the final breakdown for the bids, staff deducted the amount of in-house labor that will be used in the construction, based upon the vendor's recommendation. In addition, staff had to take into consideration the specifications by the vendors in order to determine the amount of in-house support needed to meet the warranty for the products.

A total of four bids were received for the project as follows with the amount of cost savings deducted from each amount and adding back in-house material costs:

Vendor	Bid Price	Minus Cost savings	Plus Add. Items in sub-base Construction	Total
Taylor Murphy	$2,362,950	$1,717,950	$0	$1,717,950
Phillips & Jordan	$2,352,375	$1,762,970	$0	$1,762,970
Ballard Const. (e-turf)	$2,432,639	$1,522,861	$241,270	$1,764,131
Ballard Const. (f-turf)	$3,045,771	$2,135,993	$241,270	$2,377,263

After careful consideration, the Parks and Recreation Department and WNC Soccer Foundation recommend awarding the contract to Taylor Murphy Construction Company at a total price of $1,717,950. This project will be financed along with other Fiscal Year 2004 purchases through an installment purchase contract over a period of five years. The Finance Department anticipates soliciting proposals for financing in January of 2004. Funding for this first year's installment payment is included in the current funds for Azalea Park. The Parks and Recreation Department anticipates a majority of the funds for payment of the installment purchase contract to occur from sponsorships, foundation, and grant funding. Again, the funding for Memorial Stadium is anticipated to be totally paid for by one of the user groups.

The budget amendment includes funds secured from a number of sources including the Janirve Foundation for $500,000, Wachovia for $25,000, Arby's for $10,000, the N. C. Dept. of Transportation for $400,000 and several other individual donations for a total of $988,400.

The Parks and Recreation Department anticipates starting construction for this project in the next few months with completion of the John B. Lewis Soccer Complex in the fall of 2004.

The Parks and Recreation Department requests City Council authorize the City Manager to enter into a contract with Taylor Murphy Construction Company for $1,717,950 for the construction and installation of synthetic turf at Azalea Park and Memorial Stadium and to approve a budget amendment totaling $988,400.

Mr. Brinson responded to various questions from Council regarding the bids.

Chestnut Street Sidewalk Replacement

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Dee Williams and Company to install sidewalks located along Chestnut Street in Asheville, North Carolina.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along the north side of Chestnut Street between Liberty Street and Furman Avenue. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Participation	Drug Free	Bond	Bid
Candler Concrete Works, Inc.	0	Yes	Yes	$158,287.90
Burleson Construction				$136,431.00
Dee Williams And Company Inc.	100%	Yes	Yes	$110,388.00

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Dee Williams and Company Inc. to install sidewalks along the north side of Chestnut Street between Liberty Street and Furman Avenue.

Mr. David Foster, Street Superintendent, responded to questions from Councilwoman Bellamy regarding sidewalk replacements vs. new sidewalks. City Engineer Cathy Ball also responded in that the City is continually looking for new funding for sidewalks.

Councilwoman Bellamy suggested we advertise information regarding Americans with Disabilities Act access on sidewalks on our Government Channel. City Manager Westbrook said that we are just about at our max with equipment and personnel for additions to our Government Channel, but will be able to include that information electronically.

Budget Amendment for Ballfield Lights at Valley Springs Middle School

Summary: The consideration of a budget amendment, in the amount of $33,420, for the installation of ballfield lights at Valley Springs Middle School.

The City of Asheville Parks and Recreation Department is continuing to upgrade parks throughout the City of Asheville. One of the parks in need of additional work is the Valley Springs Middle School ballfield complex. This project will be for lighting an additional ballfield at the complex. The site is the home for the South Buncombe Sports and Recreation Association. On June 25, 1992, the City of Asheville entered into a 30-year agreement with the Buncombe County School Board. This agreement stated that the Buncombe County School Board would provide land at Valley Springs Middle School for the purpose of providing athletic fields (baseball/softball) that the City of Asheville would fund, install, and maintain. This agreement provides for the much-needed athletic field space in South Buncombe and for the students at Valley Springs Middle School. In order to complete this portion of the project, staff prepared bid specifications for the installation of a turn-key field lighting system. Musco Lighting Company agreed to do the project for $33,420. Through the bid process, Musco Lighting Company has complied with the Minority Business Plan.

This project will be completely funded from a donation by the South Buncombe Sports and Recreation Association.

The Parks and Recreation Department recommend the approval of a budget amendment, in the amount of $33,420, for the installation of ballfield lighting at Valley Springs Middle School.

Contract for Architectural Services for Fire Station 6 Construction

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Stewart-Cooper-Newell Architects for architectural services for the construction of Fire Station #6 to be relocated to Old Haywood Road at East View Circle.

The relocation of Fire Station #6 has been in the planning stages for many years with the appropriation for purchase of the land in 2000 and appropriation for construction of the facility in 2003. The current location of fire station #6 does not maximize the City's equipment and staff resources. Current overall City response standard coverage will increase by approximately 4% with the relocation of this fire station. A fire station in the Exit 44 area is necessary to provide municipal level fire protection and emergency services to the western sections of the City. In addition to the building housing an engine company and a ladder company, the building will also house a police services area for the Asheville Police Department. Additional office and muster space is needed for the Police to provide services to citizens in the West district. This facility will make the best use of the space by combining common areas between fire and police.

A formal request for qualifications (RFQ) was properly advertised and a preliminary meeting was held with interested architects. Written proposals were received by City staff and were evaluated against identified rating criteria distributed in the RFQ. A team of staff from Fire and Rescue, Police, Parks and Recreation as well as the Budget Office reviewed all of the submittals. Three finalists were identified and one firm was clearly selected as the recommended architect to complete the job. References for the recommended firm, especially past performance with other North Carolina cities, were completed with a focus on combination fire and police stations. The committee selected Stewart-Cooper-Newell Architects as the recommended architects for this project.

Stewart-Cooper-Newell Architects, based in Gastonia, North Carolina, has provided architectural services for scores of North Carolina cities for fire stations and police stations. Stewart-Cooper-Newell has designed several combination fire and police stations. The firm continuously has between 25-35 fire stations in progress at any given time. Approximately 15-20 stations are completed each calendar year under their direction. Stewart-Cooper-Newell is the largest architectural firm in the fire station construction arena in the United States at the current time. With over 100 cities as customers, to date, Stewart-Cooper-Newell Architects reports that they have never completed a fire station project in which the owner did not use the firm again on subsequent fire station projects.

Fire Station 6 is planned to be approximately 15,000 square feet with approximately 10,000 square feet for fire and rescue use and approximately 5,000 square feet for police use. Construction cost of the project is anticipated at an average of $100.00 per square foot, or $1,500,000.00. Stewart-Cooper-Newell proposes their fee for full architectural, civil, structural, plumbing, mechanical and electrical design to be at eight (8) percent of the cost of construction, or approximately $120,000.00. Funding for the entire project including construction, architectural and utility/site/furnishings and other "soft" costs is budgeted at $2,000,000 in the Fiscal Year 2003-04 budget.

Completion of this station would be in approximately 24 months. Timeliness of this project is important to the City of Asheville due to the upcoming evaluation of the City's fire insurance rating by the Insurance Services Office and North Carolina Office of State Fire Marshal.

The resolution authorizes the City Manager to execute a contract with Stewart-Cooper-Newell Architects for Fire Station #6. The contract is an AIA Document with appropriate modifications for the City of Asheville.

The Fire Chief and Police Chief recommends City Council authorize the City Manager to sign the contract with Stewart-Cooper-Newell Architects for architectural services in the construction of Fire Station #6.

Upon inquiry of Councilman Dunn, City Manager Westbrook explained the type of station that will be built.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

I-26 UPDATE

Planning & Development Director Scott Shuford said the I-26 Connector project first made it to the Transportation Improvement Plan in 1989. The Asheville Connector Advisory Committee was formed in 1991 to study alternative locations. Neighborhood, business groups, public workshops, and public hearings occurred in 1993 and 1994. In 1995, the selection of the "preferred corridor" occurred – the project would use the existing 19/23 and I-240 corridors instead of a new route because it (1) was the most direct route; (2) would not promote urban sprawl; (3) reduced congestion on Smoky Park bridges; and (4) created less damage to developed areas and the environment. In 1997, three alternatives were developed for the Connector section that would link 19/23 and I-240. Since 1997, there has been considerable public involvement. Most recently the Community Coordinating Committee was formed. That Committee is a 25 member committee. It's purpose is to facilitate balanced public input about the Connector and make recommendations. In 2000 the Community Coordinating Committee held project education and design forums attended by over 250 people. They made the following 9 key recommendations: (1) seriously consider alternative alignments that separate local and interstate traffic; (2) make aesthetics a big part of the design; (3) use the new traffic model in the design process; (4) add I-40 interchange to the project; (5) restore neighborhood connectivity; (6) interchanges need to be community sensitive in scale and design; (7) make safety a big part of the design; (8) release any unneeded right-of-way to City; and (9) expedite the project.

Achievements to date include (1) alternate alignments (a) the N. C. Dept. of Transportation (NC DOT) agreed to add two alternative alignments to the project design process; and (b) these alignments allow the separation of local and interstate traffic by separating Patton Avenue traffic from I-240 traffic; (2) I-40 interchange (a) NC DOT agreed to add the I-40 interchange with I-26 to the project; and (b) this will allow us to have full east-west and north-south movements at this critical location; (3) safety (a) NC DOT agreed to install overhead message board signs that will advise motorists of delays or accidents; (b) NC DOT agreed to examine other ways to improve safety prior to and during construction; and (4) aesthetics (a) NC DOT has agreed to a community-appointed aesthetics advisory board.

Mr. Shuford then reviewed with Council the connector alternatives, the current connector schedule (with a completion construction date of 2012) and highway design aesthetics.

Councilwoman Bellamy felt the biggest question is what we can do to speed up the 2012 completion date. Mayor Worley said that we have been repeatedly asking what we can do to complete the project quicker.

Councilman Dunn wanted to make sure that the funding is still dedicated for this project.

Mr. Shuford then answered various questions/comments from Council, some being, but are not limited to: can we ask the NC DOT to start acquiring some rights-of-way in advance; will the City have to pay for aesthetic improvements above and beyond basic aesthetic improvements; how can the City proactively seek funding; and is it realistic for the City to ask the NC DOT to turn over to the City any excess NC DOT right-of-way.

Mr. Shuford said that Mr. Drew Joyner of the NC DOT will be at a meeting on Monday, December 15, 2003, at 2:00 p.m. in the Sixth Floor of the City Hall Building to update the Community Coordinating Committee on the I-26 Connector status and invited City Council to attend.

PUBLIC ACCESS CHANNEL COMMISSION

Public Access Channel Commission Chair Beth Lazer said that this is the consideration of an ordinance to dissolve the Public Access Channel Commission (PACC) and provide direction as to the City's support of URTV, Inc., as the non-profit corporation responsible for policy and operational oversight of a public access cable channel pursuant to the terms of a Management Agreement with URTV, Inc. and the City of Asheville.

On October 28, 2003, City Council voted unanimously to allow the Mayor to enter into an Interlocal Agreement with Buncombe County government for the purpose of funding a Countywide public access television operation and facility. At that time, the PACC Chair Beth Lazer outlined future steps necessary toward the formation of URTV, Inc. as the oversight corporation of public access television for Asheville and all non-incorporated areas of Buncombe County. Those steps include: 1) adoption of an ordinance dissolving PACC, 2) direction as to Board of Director selection process of URTV, Inc.; and 3) once the URTV, Inc. Board of Directors is formed, the City of Asheville negotiate and enter into a Management Agreement with URTV, Inc.

The PACC has recommended that both Asheville City Council and Buncombe County Commissioners each receive one initial URTV Board of Director appointment. In addition, all five current PACC members have agreed to serve an initial term during this upcoming transition. Then, those seven inaugural board members would appoint the remaining four board members, for a total of eleven board members.

The PACC has put together a description of criteria they will look for in Board members and have also indicated the skills they think they will need to bring more expertise to the table. They would like to start the application as soon as possible and would be happy to provide their list of candidates to City Council.

Several City Council members requested data from other North Carolina cities that would outline the non-profit Board appointment process. The following cities were contacted and subsequent information collected:

Town of Chapel Hill/ The People's Channel: Private-non-profit public access channel since 1996. The Board of Directors consists of ten members, all of which are appointed by the Board itself. Current budget: $133,392. Of that amount, $110,341 is provided by the City through cable fees.

City of Greensboro/Greensboro Community Television: Private non-profit public access channel since 1995. The Board of Directors consists of eighteen members. Three members are appointed by the City of Greensboro and the remaining fifteen are appointed by the Board. Current budget: $225,000. Of that amount, $120,000 is provided by the City through cable fees.

City of Winston-Salem/Community Access Television (CATTV): Private non-profit public access channel since 1994. The Board of Directors consists of fourteen members, seven of which are currently vacant. Several board seats are held by member representatives; several seats are held by community organizations, such as the N.C. School of the Arts. No seats are appointed by the City of Winston-Salem.

City of Raleigh/Community Television: The City of Raleigh does not have a private non-profit organization to oversee its public access channel. The Public Affairs Department oversees the division responsible for government access, public access, and religion access television. These divisions are staffed with City employees. The Raleigh City Council appoints the Raleigh Telecommunications Commission, who has responsibility for policy oversight of Community Television.

City of Wilmington: The City of Wilmington does not have a public access television station. Time-Warner Cable Company does provide a channel for community access, accepting locally produced tapes for consideration. There is no City involvement, to include money and Board oversight at this time. The City does have the ability through its Cable Franchise Agreement to set up a public access channel in the future if it determines it necessary.

As you can see, there is a wide continuum of how other cities in our region have addressed public access channel programming oversight responsibility.

Staff recommends Council adopt the ordinance dissolving the Public Access Channel Commission and determine a method to appoint URTV, Inc. Board of Directors. Once the board is named, the City Manager shall negotiate, on behalf of the City, a management agreement subject to the City Council final approval.

Ms. Laser responded to various questions/comments from Council, some being, but are not limited to: what percentage of the proposed budget is user fees; what is the approximately annual operating budget; what type of facility is being looked at; and what happens if Buncombe County refuses to sign the management agreement.

Councilwoman Bellamy voiced concern of only one City representative on the Board. She also felt it would be appropriate for the City to have a liaison to the Board as well.

Discussion surrounded the City's representation on the Board. City Attorney Oast said that in general, the more appointments made to the Board increases the possibility of a liability situation.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

SOUTH PACK SQUARE REDEVELOPMENT UPDATE

Planning & Development Director Scott Shuford said that this is the consideration of a budget amendment, in the amount of $1,140,000, to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Initiative (EDI) grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square. This report replaces prior reports given to City Council on November 11 and November 25.

In June 2001, Council approved applications by the City for $800,000 in Community Development Block Grant (CDBG) Section 108 Loan funds and $340,000 in associated EDI grant funding in order to assist Eagle/Market Streets Development Corporation (EMSDC) to complete the acquisition and redevelopment of three key properties in the South Pack Square redevelopment area. The project is now ready to move forward and Council's authority is needed to create the necessary budgets to obligate and expend these funds.

The public and City Council have raised several questions and issues concerning the proposed development. In the following sections of this staff report, we have attempted to respond to these questions and issues.

1. Scope of Project

While the particular funds in this budget allocation will technically be used only for the property owned by EMSDC west of Market Street, the entire development project also encompasses three buildings owned by Mount Zion Church, on the other side of South Market Street. Each part of the project is mutually dependent for success on the other, because:

1. A project of sufficient size was needed to attract development expertise and financing
2. The joint development avoids competition in marketing
3. By eliminating blight from both sides of South Market Street, the area is sufficiently transformed to convince residents and businesses that it is safe to move there.

Essentially the budget allocation will facilitate the renovation of five historic buildings to the Department of the Interior standards and redevelop a parking lot with a mixed use infill building that has received design approval from the South Pack Square Design Review Committee and the Downtown Commission. It will result in a total investment of $6,600,000, producing 47 apartments and 12,000 square feet of leasable commercial space, creating 72 jobs, and adding approximately $76,000 a year to property tax revenues.

The principal developers for this consolidated project are Historic Acquisitions, LLC, an experienced developer of historic properties in North Carolina, and The Enterprise Foundation, an

511

internationally recognized organization, founded by the late James Rouse, which specializes in community development projects.

2. Compliance with South Pack Square Redevelopment Plan
One issue that has arisen during public debate concerning the proposed EMSDC project is whether the infill building complies with the redevelopment plan. The plan makes reference to the Eagle/Market Façade Design Guidebook, which illustrates the infill building site as a parking lot. However, it also contains references to promoting infill development.

Legal review of case law concerning redevelopment plans reveals that such plans should be broadly interpreted, allowing flexibility for redevelopment activities to take place. This indicates that the proposed infill building is consistent with the purposes and intent of the plan and that no plan modification is necessary to accommodate the building.

3. Public Involvement
City Council received a chronology of recent public involvement activities and also a list prepared by a neighboring property owner (Mr. Ellison) that outlines suggested concessions that might win his support for the project. Included on this list are such concessions as: EMSDC transfer of ownership of two condominiums in the infill building to Mr. Ellison, construction of a joint-use elevator by EMSDC to serve both the Ritz and the infill buildings, and purchase of an approximately 100 square foot site owned by Mr. Ellison by EMSDC for $200,000. While these concessions proved unacceptable to EMSDC, the agency did modify the infill building design to pull it back 3 feet from adjacent property lines and has indicated its willingness to explore other concessions. The intent in providing this information is to illustrate there have been efforts to negotiate compromises with adjoining property owners that are not necessarily listed on the public involvement timeline.

The most recent meeting that is relevant to this matter took place on December 2 with EMSDC, Mt. Zion Church, the YMI, and property owners. Some progress was made although adjacent property opposition continues with regard to the infill building.

On December 4, 2003, a luncheon meeting was held at the request of Virgil Smith with regard to the proposed development. Also attending the meeting were James Geter of EMSDC and Gene Ellison, area property owner. Mr. Smith called the meeting in an effort to determine if there was any room for compromise between these two parties regarding the proposed infill building that is part of the development proposal. As discussion unfolded, it became apparent that there was no opportunity to reach a compromise that would simultaneously move the project forward consistent with Mr. Geter's needs and still meet Mr. Ellison's concerns.

Another meeting was scheduled for the morning of December 9. In summary, there was a recommendation to "delay or slow down the process" to ensure that there is appropriate time for stakeholders of the Block and the public to voice their support or concerns regarding the physical design of the Phase I project, specifically the infill between the Ritz, Wilson, Campbell, and Collette buildings.

4. Current Status
The redevelopment work is now almost ready to start. The Development Partnership has been informed that the lender's loan committee has approved the issuance of a loan commitment letter, subject to the City's funding approval. The partnership has also decided that EMSDC should retain ownership of its property and lease it to the partnership, on similar terms to those already agreed for the Mount Zion property. The partners are now finalizing the organizational and loan closing documents. Staff is finalizing the federally-required environmental review process and is preparing closing documents for the Section 108 Loan and EDI Grant. The developer expects site work to start as soon as these steps are complete.

5. Consequences of not authorizing budgets
If Council decides not to authorize the budgets for the Section 108 loan and EDI grant, the following consequences can be expected:

- The proposed development will be abandoned and the outside partners will withdraw, having lost significant expenditure of time, overhead, and legal/organizational costs.
- Approximately $400,000 in CDBG funds already invested in the project (mainly for property acquisition, architectural and other professional fees) will be lost, except that the real estate will remain as an asset to EMSDC. This amount does not include a much larger sum spent by the City and other funders since 1990 on planning studies, surveys, appraisals, community-building activities, and the operating costs of EMSDC.
- The $340,000 EDI grant will have to be surrendered.
- Another use for the Section 108 loan (already drawn down and in the City's possession) will have to be negotiated with HUD; meanwhile the City will have to pay interest of $38,000 a year.
- EMSDC will have to create another redevelopment project for its buildings; if this is unsuccessful the buildings will eventually become the property of the City.
- Mount Zion Church will have to create a new project redevelop its buildings, which will remain in their current state in the meantime.
- Substantial public support for moving forward with the project was apparent at the November 17 public meeting. Therefore, significant community disappointment may be apparent in the event that this project does not go through.
- Eventually, if demand for downtown land remains high, private development of some sort will probably occur in the area. In the absence of an effective non-profit redeveloper to promote development according to the Redevelopment Plan, the result could be demolition and replacement of existing dilapidated buildings and permanent loss of the historic fabric and identity of the area. A private property owner not using public funds is not obliged to follow the redevelopment plan, the recommendations of the Downtown Commission, or the National Historic District guidelines.

Finally, the withdrawal at a late stage of pre-development of public funds committed to the project two years ago will damage to the City's reputation for supporting historic rehabilitation and community development projects. The opportunities for partnering with experienced private sector redevelopers or with national non-profits such as the Enterprise Foundation, National Development Council, or Local Initiatives Support Corporation, will be diminished.

6. Consequences of delaying budget authorization.
The partnership may lose its loan commitment and be forced to withdraw, in which case the consequences will be the same as those outlined above.

Mr. Shuford said that public involvement could have been better and more thorough, but City Council needs to determine if that is a fatal flaw for a project that has this much benefit.

Since it appears that further delay to allow discussion between the parties involved will not be fruitful, he recommended that Council scheduled the budget amendment on December 16, 2003.

Mr. Shuford reviewed the funding sources and costs and an analysis of major soft costs. Three soft costs he detailed was environmental; survey/appraisal fee; and leasing fee/marketing initiatives. He described the project in a visual sense and then showed the site plan for the area.

The project provides 14 apartments (market rents); 8700 square feet retail or office space; and 17 garage parking spaces. There will be 33 apartments and 2800 square feet of retail space in Mt. Zion buildings. Some of these apartments may be made affordable to low income households. He reviewed the preliminary plan for the Mt. Zion site.

He reviewed the history of the project since 1993 by showing a timeline. There has been a concern raised regarding adequate public comment. In response to that concern (1) the Redevelopment Plan gives EMSDC responsibility for this; (2) design charette was held prior to funding application; (3) public meeting on November 17, 2003; (4) three meetings of stakeholders group convened by Virgil Smith on December 2, December 4 and December 9; and (5) public comments may be taken by City Council at their formal meeting. Another concern raised was does the project modify the Redevelopment Plan. The City Attorney and Planning Director have carefully reviewed the Plan and determined that infill development is not a Plan modification.

The EMSDC feels that further delay jeopardizes the project and it is unacceptable to them. If they modify the infill building anymore, it would not make the project work. The Infill building is one of the key pieces to make the project happen. The EMSDC will keep people involved in the process and will continue to address concerns. Mr. Shuford then talked about the developers and explained the enterprise foundation.

Mr. Shuford said that this morning Mr. Jesse Ray, representing the YMI Cultural Center, said that the YMI is concerned about the process but not the project. They felt the process was not inclusive. Because the process was not inclusive, it called into question the validity of the project.

Mr. Shuford and Community Development Director Charlotte Caplan then responded to various questions/comments from Council, some being, but are not limited to: what is the financing of the Mt. Zion project; explanation of what the Section 108 loan can be used for; explanation of private investor tax credits; is it normal for developers not to have any hard dollars invested in a project; what would be the risk factors for the developer and for the City if the project fails; what is the negative impact on the surrounding property owners; who pays if the loan is not paid and what fund will that come out of; in 2001 when the City made application for the Section 108 and EDI funds, was a building included in that application; is there a residential requirement in Section 108 loans; was the infill building a conceptual concept out of the charette; what is the vacancy rate for rental units in the City; what are market rates; what type of things would constitute a Plan modification; explanation of the default process; is the developer from Asheville; where are the banks located that will be lending the money; how much will the units be rented for; home many residential households are in this area now; what is the anticipated tax base if the project is implemented; and how much money is 1% more on the interest rate.

Councilwoman Bellamy voiced concern about the process and felt that the infill building was a modification of the Redevelopment Project. She expressed concern about moving forward.

After discussion, City Attorney Oast said that the Redevelopment Plan is not parcel specific as is typical of any plan of this type. The Plan covers a lot of things and it does call for infill development.

Mr. Shuford passed out the South Pack Square Development Plan Task Force's Statement dated December 9, 2003, which in summary said that "the Task Force is in favor of redevelopment of the Block and is not totally opposed to the infill component of Phase I of the project. We recognize the funding timelines, according to EMSDC and the City of Asheville Planning Department, have essentially driven the project to date; however we need more time to discuss this issue and to reach consensus among task force members."

Upon inquiry of Vice-Mayor Mumpower, Mr. David Rogers, developer, explained that in the past 30 days interest rates have risen by 1%.

Upon inquiry of Mayor Worley, City Attorney Oast said that the public input process was not legally inadequate.

Discussion occurred on whether City Council should schedule the budget amendment on the December 16, 2003, formal meeting. It was noted that the Task Force needed more time to discuss the issue and it was hoped that their meeting could occur prior to the December 16 meeting. Mayor Worley then said that the matter would be scheduled on the December 16 agenda and City Council could determine at that meeting whether to vote on the project or delay consideration to another date.

At 6:10 p.m., Mayor Worley announced a short recess.

AZALEA ROAD SITE

This item was pulled from the agenda.

HOSPITALITY HOUSE REQUEST

Councilwoman Jones said that this is the consideration of a request by Hospitality House for a grant of $7,500 from the Contingency Fund.

In November, 2002, City Council appropriated $20,000 from the Contingency Fund to provide Hospitality House the means to operate the A HOPE Homeless Day Center on Saturdays. This was decided after discussion about the number of homeless individuals in our community and the efforts of the Downtown Association and the Downtown Commission to solve some of the problems they create. These funds, along with Community Development Block Grant (CDBG) funding for Sundays, have enabled Hospitality House to keep the Center open seven days a week through December, 2003.

The current CDBG grant is sufficient to maintain Sunday opening through June 2004, but the General Fund grant will run out at the end of December 2003.

Representatives from Hospitality House attended the Housing and Community Development Committee meeting in October to request an additional $10,000 in City support to allow them to keep the Center open on Saturdays from January through June, 2004. A representative from the Downtown Merchants' Association stated that weekend opening of A HOPE has eased the problems for downtown merchants and residents. The Housing and Community Development Committee suggested that the City might fund $7,500 if Hospitality House would commit to raising the remaining $2,500 from downtown businesses. Mr. Buckner, representative of Hospitality House, agreed to present this recommendation to the Downtown Merchants' Association.

Staff has advised the Hospitality House that any future grant requests should be made at the appropriate time for consideration in the normal budget cycle.

The Housing and Community Development Committee and City staff recommend approval of a budget amendment, appropriating $7,500 to Hospitality House for the continued operation of A HOPE Day Center on Saturdays.

Councilwoman Bellamy hoped that the Hospitality House will do additional outreach to make sure that people know that this service is available. She suggested brochures or flyers be placed in the jail for inmates to see when they are released.

Ms. Christy Carter, Executive Director of Hospitality House, gave numbers of how many people are using the Day Center on Saturdays. She did note that the numbers fluctuated with the weather.

When Councilman Newman asked if he had a conflict of interest if he is a member on the Board for A HOPE, City Attorney Oast suggested Councilman Newman contact him tomorrow to discuss the matter in detail.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ABC BOARD APPOINTMENT

Mayor Worley said that City Attorney Oast has advised Council that a current member of the ABC Board can continue to serve following the expiration of his/her term.

Mayor Worley noted that he has written to the Chair of the ABC Board requesting a meeting with him and Councilman Dunn meet to discuss various concerns.

Councilwoman Bellamy said that the Boards and Commissions Committee recommended that the current Chair be reappointed noting that after she was appointed she immediately started asking probing questions.

Upon inquiry of Councilman Dunn, Mayor Worley said that it was the consensus of Council to increase the membership of the ABC Board from 3 to 5 members, however, that takes legislative action and will be placed on our upcoming legislative agenda.

APPLICATION FOR CHRONIC HOMELESSNESS GRANT

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing the City to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

The U. S. Department of Housing & Urban Development (HUD) has announced a national grant competition for recaptured HOME funds to be used by HOME entitlement communities to develop supportive housing for the homeless. Thirteen grants of $500,000 will be made to communities who can demonstrate:

A. High productivity in the use of HOME funds for producing rental housing.
B. A plan for ending chronic homelessness by 2012.
C. Commitment to specific policies that support affordable housing.

An unusual feature of the competition is that 75% of the points are pre-awarded on the basis of past performance (item A above). Asheville scored sufficiently high in this pre-scoring to have a chance of winning a grant.

Another unusual feature is that the grant application requires no information on the proposed use of the funds. This can be determined after the funds are awarded.

Since the funds are subject to the HOME program rules, matching funds are required, in principle. However, excess match expended on local HOME projects in previous years can be counted for this purpose, meaning that no additional local funds will need to be identified as match for this grant.

The grant deadline is December 18, 2003. The Housing and Community Development Committee has indicated its support for this grant application.

Staff recommends City Council approve the submittal of a grant application to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CITY COUNCIL LIAISON ASSIGNMENTS

After a quick review and brief discussion of liaison and member positions on various boards and commissions, it was the consensus of City Council to have all Council relay their preferences to Mayor Worley. Mayor Worley will then have a list prepared for the January 6, 2004, worksession so appointments can be made.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:12 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – December 16, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Diana Hollis Jones

PLEDGE OF ALLEGIANCE

Retired Navy Veteran J. Howard Collins led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

AGENDA CHANGE

Mayor Worley announced that moments ago the City was served with a temporary restraining order filed by Eugene Ellison and Howard McGlohon against the City of Asheville and Eagle/Market Streets Development Corporation. That lawsuit will prevent City Council from hearing the item on today's agenda entitled "Budget amendment to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Incentive Grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square."

I. PROCLAMATIONS:

A. ASHEVILLE SISTER CITIES INC.

Mr. Carroll Hughes and Mr. Kaltsunis updated City Council on the developments with our to-be-Sister City in Karpenisi, Greece. They presented Mayor Worley with a gift from Mayor Bill Karabas as a token of friendship between our municipalities and a shepherd's stick from the Asheville Sister Cities Inc. organization and the local Greek community.

B. ASHEVILLE YOUTH SPORTS PROGRAM RECOGNITION

Mayor Worley recognized Mr. Jim Drummond, Coach Wynn and the Asheville Youth Sports Program for their successful year. Mr. Drummond explained that over 5,000 boys and girls have played football and cheered for the Cougars. This year, for the first time in the history of the 16 youth organizations of WNC Youth Football & Cheerleading Conference, Asheville Youth Sports Program h ad all three age divisions playing in the football championship, the "Super Bowl," as undefeated teams. Also, all three cheerleader squads placed either First Place or Second Place in their division competition.

II. CONSENT:

At the request of Vice-Mayor Mumpower, Consent Agenda "B" was removed from the agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETINGS HELD ON NOVEMBER 25, 2003, AND DECEMBER 2, 2003, AND THE WORKSESSION HELD ON DECEMBER 9, 2003

B. RESOLUTION NO. 03-195 – RESOLUTION OF APPRECIATION TO RETIRING CHIEF OF POLICE WILL ANNARINO

This item was removed from the consent agenda for an individual vote.

C. RESOLUTION NO. 03-200 - RESOLUTION ADOPTING THE 2004 SCHEDULED CITY COUNCIL MEETINGS

RESOLUTION BOOK NO. 28 – PAGE 66

D. RESOLUTION NO. 03-201 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO A SUPPLEMENTAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR LANDSCAPING ADJACENT TO W.T. WEAVER GREENWAY

Summary: The consideration of a resolution authorizing the City Manager to sign a supplemental agreement with the N. C. Dept. of Transportation (NC DOT) for landscaping adjacent to the W.T. Weaver Greenway.

The City of Asheville received a grant from the NC DOT to install a greenway along W.T. Weaver Boulevard from Barnard Avenue to Broadway Street in Fiscal Year 2000. The amount of the grant was $300,000. There was no local match for the grant. The actual cost of the construction was approximately $200,000.

The City of Asheville and UNC-Asheville requested some of the remaining funds be used to provide landscaping to the W.T. Weaver Greenway. The City requested $34,070, which has been approved by the NC DOT. The grant does not require any local match.

Prior to requesting the money for the landscaping, City staff requested the remaining $100,000 for another greenway project but was denied because the project did not qualify under this original municipal agreement.

Staff recommends that City Council authorize the City Manager to sign a supplemental agreement with the NC DOT for landscaping adjacent to the W.T. Weaver Greenway in the amount of $34,070.

RESOLUTION BOOK 28 – PAGE 67

E. RESOLUTION NO. 03-202 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY ON BROTHERTON AVENUE TO DAVID M. BENNERT

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Brotherton Avenue for a private residential sewer line.

The City owns property (PIN No. 9638.18-21-9316) located on Brotherton Avenue and Virginia Avenue and the unopened right-of-way on Hubbard Street. The property is in the process of going back on the market after a sale contract failed to close. Infrastructure has been installed on the buildable portion of the property. The portion of the property near Hubbard Street is wooded and steep and is crossed by a sewer main. The intended use for that portion of the property is for green space.

David M. Bennert owns property on Hudson Street, which backs up to the unopened right-of-way of Hubbard Street where he is building two houses. Due to the topography and the location of the sewer main, the most direct and efficient route to provide sewer to the new houses is across unopened Hubbard Street and a portion of the City's property. The requested easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the use of the easement area for green space, which is the proposed use of that portion of the property.

Staff recommends adoption of the resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Brotherton Avenue for a private residential sewer line to David M. Bennert.

Upon inquiry of Councilwoman Bellamy, Mr. Ed Vess, Field Services Coordinator, explained what is happening with the Brotherton property. He said the City will receive $136 for the permanent easement.

Upon inquiry of Councilman Newman, Mr. Vess explained how the easement amount is calculated.

RESOLUTION BOOK NO. 28 – PAGE 68

F. ORDINANCE NO. 3073 - BUDGET AMENDMENT FOR AZALEA PARK AND MEMORIAL STADIUM SYNTHETIC TURF

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract for the construction and installation of synthetic turf at Azalea Park and Memorial Stadium and the associated budget amendment.

The Parks and Recreation Department, along with its partner, WNC Soccer Foundation, has raised almost $2,250,000 toward the development of the first two phases of Azalea Park. These phases include the development of four synthetic turf soccer fields, construction of restroom/ concession facility, a Leathers playground, parking, and greenway trails. After extensive research, both the Parks and Recreation Department and the WNC Soccer Foundation have concluded that synthetic turf soccer fields will greatly enhance the playability for the John B. Lewis Soccer Complex. This will be accomplished by allowing additional practice times and games for soccer and other events without affecting the playing surface. This will also allow for the complex to be used in inclement weather for regular play as well as tournament competition. In addition, no harmful chemicals will need to be used on the fields.

The Parks and Recreation Department solicited bids from a number of vendors. The specifications in the bid package required the surface to be FIFA (Federation International Football Association) approved. FIFA is the international governing body of soccer. This insured that the quality of the product would be of the highest standards possible for the safety of the participants and durability of the surface. In addition, the bid package included replacing the grass field at Memorial Stadium with synthetic turf. The cost for this project is anticipated to be totally paid for by one of the user groups at Memorial Stadium. In calculating the final breakdown for the bids, staff deducted the amount of in-house labor that will be used in the construction, based upon the vendor's recommendation. In addition, staff had to take into consideration the specifications by the vendors in order to determine the amount of in-house support needed to meet the warranty for the products.

A total of four bids were received for the project as follows with the amount of cost savings deducted from each amount and adding back in-house material costs:

Vendor	Bid Price	Minus Cost savings	Plus Add. Items in sub-base Construction	Total
Taylor Murphy	$2,362,950	$1,717,950	$0	$1,717,950
Phillips & Jordan	$2,352,375	$1,762,970	$0	$1,762,970
Ballard Const. (e-turf)	$2,432,639	$1,522,861	$241,270	$1,764,131
Ballard Const. (f-turf)	$3,045,771	$2,135,993	$241,270	$2,377,263

After careful consideration, the Parks and Recreation Department and WNC Soccer Foundation recommend awarding the contract to Taylor Murphy Construction Company at a total price of $1,717,950. This project will be financed along with other Fiscal Year 2004 purchases through an installment purchase contract over a period of five years. The Finance Department anticipates soliciting proposals for financing in January of 2004. Funding for this first year's installment payment is included in the current funds for Azalea Park. The Parks and Recreation Department anticipates a majority of the funds for payment of the installment purchase contract to occur from sponsorships, foundation, and grant funding. Again, the funding for Memorial Stadium is anticipated to be totally paid for by one of the user groups.

The budget amendment includes funds secured from a number of sources including the Janirve Foundation for $500,000, Wachovia for $25,000, Arby's for $10,000, the N. C. Dept. of Transportation for $400,000 and several other individual donations for a total of $988,400.

The Parks and Recreation Department anticipates starting construction for this project in the next few months with completion of the John B. Lewis Soccer Complex in the fall of 2004.

The Parks and Recreation Department requests City Council authorize the City Manager to enter into a contract with Taylor Murphy Construction Company for $1,717,950 for the construction and installation of synthetic turf at Azalea Park and Memorial Stadium and to approve a budget amendment totaling $988,400.

ORDINANCE BOOK NO. 21 – PAGE 19

G. RESOLUTION NO. 03-203 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH TAYLOR MURPHY CONSTRUCTION COMPANY FOR THE CONSTRUCTION AND INSTALLATION OF SYNTHETIC TURF AT AZALEA PARK AND MEMORIAL STADIUM

Summary: See Consent Agenda Item "E" above.

RESOLUTION BOOK NO. 28 – PAGE 69

H. RESOLUTION NO. 03-204 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH DEE WILLIAMS AND COMPANY TO INSTALL SIDEWALKS LOCATED ALONG CHESTNUT STREET

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Dee Williams and Company to install sidewalks located along Chestnut Street in Asheville, North Carolina.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along the north side of Chestnut Street between Liberty Street and Furman Avenue. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Participation	Drug Free	Bond	Bid
Candler Concrete Works, Inc.	0	Yes	Yes	$158,287.90
Burleson Construction				$138,431.00
Dee Williams And Company Inc.	100%	Yes	Yes	$110,388.00

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Dee Williams and Company Inc. to install sidewalks along the north side of Chestnut Street between Liberty Street and Furman Avenue.

RESOLUTION BOOK NO. 28 – PAGE 70

I. ORDINANCE NO. 3074 - BUDGET AMENDMENT FOR THE INSTALLATION OF BALLFIELD LIGHTS AT VALLEY SPRINGS MIDDLE SCHOOL

Summary: The consideration of a budget amendment, in the amount of $33,420, for the installation of ballfield lights at Valley Springs Middle School.

The City of Asheville Parks and Recreation Department is continuing to upgrade parks throughout the City of Asheville. One of the parks in need of additional work is the Valley Springs Middle School ballfield complex. This project will be for lighting an additional ballfield at the complex. The site is the home for the South Buncombe Sports and Recreation Association. On June 25, 1992, the City of Asheville entered into a 30-year agreement with the Buncombe County School Board. This agreement stated that the Buncombe County School Board would provide land at Valley Springs Middle School for the purpose of providing athletic fields (baseball/softball) that the City of Asheville would fund, install, and maintain. This agreement provides for the much-needed athletic field space in South Buncombe and for the students at Valley Springs Middle School. In order to complete this portion of the project, staff prepared bid specifications for the installation of a turn-key field lighting system. Musco Lighting Company agreed to do the project for $33,420. Through the bid process, Musco Lighting Company has complied with the Minority Business Plan.

This project will be completely funded from a donation by the South Buncombe Sports and Recreation Association.

The Parks and Recreation Department recommend the approval of a budget amendment, in the amount of $33,420, for the installation of ballfield lighting at Valley Springs Middle School.

ORDINANCE BOOK NO. 21 – PAGE 21

J. RESOLUTION NO. 03-206 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH STEWART-COOPER-NEWELL ARCHITECTS FOR ARCHITECTURAL SERVICES FOR THE CONSTRUCTION OF FIRE STATION #6 TO BE LOCATED TO OLD HAYWOOD ROAD AT EAST VIEW CIRCLE

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Stewart-Cooper-Newell Architects for architectural services for the construction of Fire Station #6 to be relocated to Old Haywood Road at East View Circle.

The relocation of Fire Station #6 has been in the planning stages for many years with the appropriation for purchase of the land in 2000 and appropriation for construction of the facility in 2003. The current location of fire station #6 does not maximize the City's equipment and staff resources. Current overall City response standard coverage will increase by approximately 4% with the relocation of this fire station. A fire station in the Exit 44 area is necessary to provide municipal level fire protection and emergency services to the western sections of the City. In addition to the building housing an engine company and a ladder company, the building will also house a police services area for the Asheville Police Department. Additional office and muster space is needed for the Police to provide services to citizens in the West district. This facility will make the best use of the space by combining common areas between fire and police.

A formal request for qualifications (RFQ) was properly advertised and a preliminary meeting was held with interested architects. Written proposals were received by City staff and were evaluated against identified rating criteria distributed in the RFQ. A team of staff from Fire and Rescue, Police, Parks and Recreation as well as the Budget Office reviewed all of the submittals. Three finalists were identified and one firm was clearly selected as the recommended architect to complete the job. References for the recommended firm, especially past performance with other North Carolina cities, were completed with a focus on combination fire and police stations. The committee selected Stewart-Cooper-Newell Architects as the recommended architects for this project.

Stewart-Cooper-Newell Architects, based in Gastonia, North Carolina, has provided architectural services for scores of North Carolina cities for fire stations and police stations. Stewart-Cooper-Newell has designed several combination fire and police stations. The firm continuously has between 25-35 fire stations in progress at any given time. Approximately 15-20 stations are completed each calendar year under their direction. Stewart-Cooper-Newell is the largest architectural firm in the fire station construction arena in the United States at the current time. With over 100 cities as customers, to date, Stewart-Cooper-Newell Architects reports that they have never completed a fire station project in which the owner did not use the firm again on subsequent fire station projects.

Fire Station 6 is planned to be approximately 15,000 square feet with approximately 10,000 square feet for fire and rescue use and approximately 5,000 square feet for police use. Construction cost of the project is anticipated at an average of $100.00 per square foot, or $1,500,000.00. Stewart-Cooper-Newell proposes their fee for full architectural, civil, structural, plumbing, mechanical and electrical design to be at eight (8) percent of the cost of construction, or approximately $120,000.00. Funding for the entire project including construction, architectural and utility/site/furnishings and other "soft" costs is budgeted at $2,000,000 in the Fiscal Year 2003-04 budget.

Completion of this station would be in approximately 24 months. Timeliness of this project is important to the City of Asheville due to the upcoming evaluation of the City's fire insurance rating by the Insurance Services Office and North Carolina Office of State Fire Marshal.

The resolution authorizes the City Manager to execute a contract with Stewart-Cooper-Newell Architects for Fire Station #6. The contract is an AIA Document with appropriate modifications for the City of Asheville.

The Fire Chief and Police Chief recommends City Council authorize the City Manager to sign the contract with Stewart-Cooper-Newell Architects for architectural services in the construction of Fire Station #6.

RESOLUTION BOOK NO. 28 – PAGE 71

K. RESOLUTION NO. 03-206 - RESOLUTION AUTHORIZING THE MAYOR TO SUBMIT A GRANT APPLICATION TO THE U.S. DEPT. OF HOUSING AND URBAN DEVELOPMENT FOR HOUSING CHRONICALLY HOMELESS PEOPLE

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing the City to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

The U. S. Department of Housing & Urban Development (HUD) has announced a national grant competition for recaptured HOME funds to be used by HOME entitlement communities to develop supportive housing for the homeless. Thirteen grants of $500,000 will be made to communities who can demonstrate:

A. High productivity in the use of HOME funds for producing rental housing.
B. A plan for ending chronic homelessness by 2012.
C. Commitment to specific policies that support affordable housing.

An unusual feature of the competition is that 75% of the points are pre-awarded on the basis of past performance (item A above). Asheville scored sufficiently high in this pre-scoring to have a chance of winning a grant.

Another unusual feature is that the grant application requires no information on the proposed use of the funds. This can be determined after the funds are awarded.

Since the funds are subject to the HOME program rules, matching funds are required, in principle. However, excess match expended on local HOME projects in previous years can be counted for this purpose, meaning that no additional local funds will need to be identified as match for this grant.

The grant deadline is December 18, 2003. The Housing and Community Development Committee has indicated its support for this grant application.

Staff recommends City Council approve the submittal of a grant application to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

RESOLUTION BOOK NO. 28 – PAGE 72

L. ORDINANCE NO. 3075 - BUDGET AMENDMENT TO ENABLE THE HOSPITALITY HOUSE TO KEEP THE A HOPE CENTER OPEN ON SATURDAYS FROM JANUARY THROUGH JUNE 2004

The resolution authorizes the City Manager to execute a contract with Stewart-Cooper-Newell Architects for Fire Station #6. The contract is an AIA Document with appropriate modifications for the City of Asheville.

The Fire Chief and Police Chief recommends City Council authorize the City Manager to sign the contract with Stewart-Cooper-Newell Architects for architectural services in the construction of Fire Station #6.

RESOLUTION BOOK NO. 28 – PAGE 71

K. RESOLUTION NO. 03-206 - RESOLUTION AUTHORIZING THE MAYOR TO SUBMIT A GRANT APPLICATION TO THE U.S. DEPT. OF HOUSING AND URBAN DEVELOPMENT FOR HOUSING CHRONICALLY HOMELESS PEOPLE

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing the City to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

The U. S. Department of Housing & Urban Development (HUD) has announced a national grant competition for recaptured HOME funds to be used by HOME entitlement communities to develop supportive housing for the homeless. Thirteen grants of $500,000 will be made to communities who can demonstrate:

A. High productivity in the use of HOME funds for producing rental housing.
B. A plan for ending chronic homelessness by 2012.
C. Commitment to specific policies that support affordable housing.

An unusual feature of the competition is that 75% of the points are pre-awarded on the basis of past performance (item A above). Asheville scored sufficiently high in this pre-scoring to have a chance of winning a grant.

Another unusual feature is that the grant application requires no information on the proposed use of the funds. This can be determined after the funds are awarded.

Since the funds are subject to the HOME program rules, matching funds are required, in principle. However, excess match expended on local HOME projects in previous years can be counted for this purpose, meaning that no additional local funds will need to be identified as match for this grant.

The grant deadline is December 18, 2003. The Housing and Community Development Committee has indicated its support for this grant application.

Staff recommends City Council approve the submittal of a grant application to apply for $500,000 in HOME funds made available for housing for chronically homeless people.

RESOLUTION BOOK NO. 28 – PAGE 72

L. ORDINANCE NO. 3075 - BUDGET AMENDMENT TO ENABLE THE HOSPITALITY HOUSE TO KEEP THE A HOPE CENTER OPEN ON SATURDAYS FROM JANUARY THROUGH JUNE 2004

A. PUBLIC HEARING RELATIVE TO CLOSING AN UNOPENED SECTION OF EMMA ROAD BETWEEN LEICESTER HIGHWAY AND OLD COUNTY HOME ROAD

RESOLUTION NO. 03-207 - RESOLUTION TO PERMANENTLY CLOSE AN UNOPENED SECTION OF EMMA ROAD BETWEEN LEICESTER HIGHWAY AND OLD COUNTY HOME ROAD

Mayor Worley opened the public hearing at 5:38 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution permanently closing a portion of an unopened section of Emma Road between Leicester Highway and Old County Home Road. This public hearing was advertised on November 22, 28, December 5 and 12, 2003.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close a portion of an unopened section of Emma Road extending northwesterly from Leicester Highway toward Old County Home Road to a line extending from the northeastern corner of the property of Dennis and Dane Dettweiler (PIN No. 9629.14-23-7485) to the northwestern corner of the property of Charles and Doris Haney (PIN No. 9629.14-23-9397). The closing of this right-of-way would allow Mr. David Ledford to purchase, consolidate and develop the abutting parcels.

Public Works Department staff has researched and determined that this portion of right-of-way is not a City maintained street and its closure will not deprive any property owner of a reasonable means of ingress or egress to their property. This portion of right-of-way is abutted by four lots, identified by PIN Nos. 9629.14-23-9397; 9629.14-32-0959; 9629.14-23-8346; and 9629.14-23-7485.

This right-of-way is 30 feet wide. All property owners abutting this right-of-way have joined in the petition to close. The property on both sides of the right-of-way have been posted. Local water, sewer, electric, telephone, gas and cable companies have been notified of the petition and have indicated that the closure of the right-of-way would not affect their utilities.

The City's Engineer and Traffic Engineer have raised concerns that closing this portion of Emma Road will eliminate connectivity between New Leicester Highway and Old County Home Road. Staff believes this future connection is an important and valuable City asset that should be preserved.

Mr. Cole explained that New Leicester Highway and Old County Home Road parallel each other for approximately ½ mile. Using a map, he showed how the section of Emma Road offers a means of connecting New Leicester Highway to Old County Home Road.

In an effort to address the connectivity concerns and the petitioner's need to close, the City Engineer has determined that if an alternate right-of-way, owned by the petitioner, along the northern boundary of the consolidated parcels was provided, connectivity can be preserved and the value of this section of Emma Road proposed for closing loses it's importance to the City. The alternate right-of-way was discussed with the petitioner and the petitioner is not receptive to providing such an alternate right-of-way.

City staff recommends against City Council adopting the resolution permanently closing an unopened section of Emma Road.

Traffic Engineer Anthony Butzek explained that staff 's concern is based on the ability to provide a connection at a future date. Although the right-of-way is not currently providing a transportation function, as that area develops further and becomes more dense, having that right-of-way does provide another means of connecting the two streets as opposed to the current nearest connection to the north of that is ¼ mile away. Staff felt the distance between the connections at Eliada Home Road and where Old County Home Road meets New Leicester Highway to the north is too long a distance to be without a connection.

Upon inquiry of Councilwoman Bellamy, Mr. Cole said that the petitioner cannot develop his land for what he is anticipating if the right-of-way is not closed.

Mr. David Ledford, petitioner, asked for the closing so they can join the two parcels for development of a retail center which they feel would beautify the area, enhance incoming revenues from tax bases and be assistance to the locals. He pointed out that all people signing the petition are in joint interest in closing this road. Using a map, he showed where there are several encroachments into the right-of-way and explained that the right-of-way was originally established for a continuation from Eliada Home Road, but a different road was developed instead and they determined the right-of-way wasn't necessary. He felt that the right-of-way would never be able to be utilized because of the people who have already encroached on it.

Mr. Ledford presented City Council with a copy of a letter dated December 16, 2003, from Wilson Engineering regarding the City's alternate right-of-way request. The problems with the alternate right-of-way is the decline from New Leicester Highway from a geographically outlook and (2) the speed of the traffic that flows down New Leicester Highway. He said he contacted the N.C. Dept. of Transportation (NC DOT) and asked them if they could get a curb-cut for that section and they said no. Mr. Ledford said that if they give the alternate 50 foot right-of-way with a 25 foot setback, they will have to maintain it for the rest of their lives because it will never be used as a City street. Also, if you develop the alternate right-of-way, the amount of material fill necessary will encroach upon the adjoining parcel. He felt it would be more appropriate to widen the road next to the new CVS Pharmacy (that has a traffic light) and enlarge the radius onto Old County Home Road.

Councilwoman Bellamy noted that the area is rapidly growing and will eventually have the need for additional access from the area.

When Planning & Development Director Scott Shuford said that he believed the zoning district on the other side of Old County Home Road was residential single-family, Councilman Davis was having difficulty in understanding why we would want more connectivity to the residential section through that commercial area. Mr. Shuford felt the rationale behind this is that if you are able to create what are more traditional type of blocks, then you can have a more effective transportation network that allows people to get out from the homes multiple ways and not overburden any particular intersection.

Councilman Davis felt the alternate right-of-way is awfully close to the current entrance. He felt that might create a greater traffic problem in that it does slope and the speed of the traffic on New Leicester Highway. Mr. Shuford responded that it would be over 750 feet, which is a very long block.

Upon inquiry of Councilwoman Bellamy, Mr. Ledford said that it is the opinion of Tom Wilson, Engineer, that due to the topography and alignment, the alternate right-of-way would not be feasible because it drops 22 feet from New Leicester Highway in a distance of less than 150 feet. His opposition in the alternate right-of-way is that once they give the right-of-way it won't be used because (1) it's not feasibly possible; and (2) NC DOT will not give a curb-cut to New Leicester Highway. He feels a more valid point would be to widening the existing road where it gets narrow and where it ties into Old County Home Road so that would make a better and safe access at the existing traffic light on New Leicester Highway. He said that he is willing to sacrifice some of his property for those improvements.

When Councilwoman Bellamy asked if Mr. Ledford would be willing to make the road improvements, Mr. Ledford said he would possibly be willing to do some of those improvements. He might want some City participation but it really depends on what they are dealing with. The road improvements are probably not a problem, but he doesn't know about the relocation of the sewer and what MSD's standpoint would be on that.

Upon inquiry of Councilman Newman, Mr. Ledford said that if the road is not closed, they probably won't be interested in doing the development because they don't have the frontage they need or the total acreage to get the buildings in there. Not closing the road would potentially kill the whole site.

Mr. Jack Westall, attorney representing the Mr. Ledford, pointed out that the existing right-of-way is only 30 feet in width. Even if the City accepted the road and tried to open it, due to the limitations for construction and traffic the City would have to tear down the improvements that have already been made by other property owners on the right-of-way. Again, the City would have to condemn additional property to make the road wider than 30 feet.

Upon inquiry of Councilman Newman about theoretically having a connector road, Mr. Butzek said that we have looked at this corridor in a general sense and based on the information available, the elevation difference between New Leicester Highway and Old County Home Road is approximately 20 feet. The separation between the two streets is about 280 feet, which comes out to an average grade of approximately 7%. Based on the standards that we have for designing streets within the City, a street could be constructed with such a grade. We recognize that a significant amount of grading may be required especially as you approach New Leicester Highway. Regarding the issue of the NC DOT connection, he has reviewed that and he is not aware of NC DOT's response. However, he does feel that with the speed of traffic on New Leicester Highway, he doesn't feel this is any greater danger than any other uncontrolled intersection in the corridor.

Councilman Newman asked about the encroachment of buildings in the right-of-way. Mr. Butzek said that in the near-term it would be difficult to construct the existing roadway. However, if the City wanted to construct it, there would be some grounds for doing that.

After Mr. Ledford explained he doesn't own the parcel touching Old County Home Road for the alternate right-of-way from New Leicester Highway to Old County Home Road, Mr. Shuford said that a mobile home is located on that parcel. If that parcel becomes a transportation issue, then the mobile home might be able to be moved. It would put the City in a position of making that connection with a relatively minimal City expense. City Manager Westbrook also said that if a connection is needed in the future, it would be wise to preserve it at this time. In the future as costs increase for highways, the largest increments of costs now is purchasing right-of-way. If the right-of-way has to be purchased in the future to ensure some connection, it might not be financially feasible. The development taking place in that area clearly shows there will be a need for more connectivity.

Mayor Worley noted that there is no current intent to cut that alternate right-of-way through, but to reserve the option.

Mayor Worley closed the public hearing at 6:10 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved to permanently close a portion of an unopened section of Emma Road between Leicester Highway and Old County Home Road. This motion was seconded by Councilman Davis.

Councilwoman Bellamy felt additional time was necessary to discuss feasible ways to address this issue. We haven't determined how we will deal with the additional flow of traffic in the future.

Councilman Dunn spoke in support of connectivity, however, he was concerned that the development would not occur in that area if the portion of Emma Road was not closed. He felt the proposal was a good one and would support the closing.

Vice-Mayor Mumpower felt the red light is a safer access point on New Leicester Highway. The value of improving the road next to CVS Pharmacy now will benefit the neighbors in that community and the fact that Mr. Ledford is willing to help with that further supports the closing.

Councilman Newman felt the alternative right-of-way is a good concept, but wasn't sure if it would really work or not. However, he is reluctant to give up the existing right-of-way if it seems like there is an opportunity to gain an alternative right-of-way that could potentially work well for the community in the future.

Councilman Davis said that the area is becoming more commercial. He said that Mr. Ledford plans a good development and it won't happen unless the portion of Emma Road is closed.

Mayor Worley supported the closing the portion of Emma Road but also supported of the long range desires of the City to protect it's future needs and to do so in a way that tries to make it less expensive to the citizens of Asheville in the future. Since Mr. Ledford said there was room for compromise, he hoped that the compromise will continue with staff, including clarification of who will be doing what to the road next to CVS Pharmacy. Because this matter will require 5 affirmative votes to adopt the resolution and judging by Council's comments that there may be only 4 affirmative votes, it will require a second reading of the resolution which will occur on January 13, 2004.

City Engineer Cathy Ball said that if the motion passes, there was prior discussion about Mr. Ledford's willingness to widen Old County Home Road and she suggested that be included as part of the request. Secondly, when we were looking at this request we did try to take a look at what was the best for the citizens of Asheville. Currently the City has interest in property and to relinquish that seems like there should be something gained for the residents of the City of Asheville. The bigger picture is that we are faced with congestion management and needing to come up with ways to reduce congestion. While one place my have a traffic signal, sometimes traffic backs up more and causes more air pollution. These closings are coming up more and more frequently and staff will be taking a real close look at what we are relinquishing as a result of what we have to gain for the residents of the City of Asheville. We are looking to the future. In this situation, the ability to be able to keep a right-of-way may not mean that we build the road, it may mean that if a developer comes in adjacent to that it's a requirement that they extend it for a portion of the way. When we don't have options, and unfortunately in this community with the topography that we have, we often don't have a lot of options. The reason we requested the 50 foot right-of-way is because we knew there was a really good chance that we would have to put in some retaining walls in order to meet those grades as they came up to New Leicester Highway.

Mr. Ledford said that in his research of this particular parcel they were unable to find, nor was the City Attorney able to find, any dedication of this road, nor were we able to find any deeded right-of-way. We can't find its existence other than a plat on a tax map. So there is question about whether it even exists or if it is a right-of-way.

The motion made by Vice-Mayor Mumpower and seconded by Councilman Davis carried on a 4-2 vote with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy and Councilman Newman voting "no." This matter will be considered on its second and final reading on January 13, 2004.

RESOLUTION BOOK NO. 28 – PAGE 73

B. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 60 CALEDONIA ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE, AND THE ISSUANCE OF A CONDITIONAL USE PERMIT

ORDINANCE NO. 3076 - ORDINANCE REZONING PROPERTY LOCATED AT 60 CALEDONIA ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3077 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 60 CALEDONIA ROAD TO ALLOW THE CONSTRUCTION OF 35 INDIVIDUAL GARAGE UNITS AND 10 ADDITIONAL PARKING SPACES

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:24 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Ms. Shannon Tuch, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to conditionally rezone property located at 60 Caledonia Road from RS-8 Residential Single-Family High Density District to Institutional District/Conditional Use and a request to issue a conditional use permit to allow the construction of 35 individual garage units and 10 additional parking spaces.

Ms. Tuch said that the Asheville 2010 plans outlines the increasing need for high density housing in the urban center with access to retail/businesses, pedestrian amenities, public transportation, cultural activities and parks, and employment centers. This project's prime location, less than a half mile from Biltmore Ave, and Mission St. Joseph's Hospital, satisfies these standards with the added benefit of providing the residents the solitude and comfort of a single family neighborhood with significant historic and architectural character (City Exhibit 3 – Building Elevations). Although it is not the lot containing the residential units in need of the rezoning, it is important to consider improvement and rehabilitation to our existing residential neighborhoods as described in our City adopted Smart Growth Goals. In addition, the need to promote sustainable land development patterns is also listed as a goal and, as such, it becomes necessary to examine the long-term needs of the associated multi-family structure to keep it attractive and viable.

The applicant, E. Frank Howington, representing the owner Kenilworth Apt. LLC,, has requested a rezoning of .86 acres of RS-8 property to Institutional to allow for the new construction of 35 individual garage units on an existing 58 space surface parking lot. (City Exhibit 3 – Location Map). The Conditional Use component of this project will be a site master plan showing the proposed garage structures with some reconfigured parking. The project site is located within City limits on the northwest corner of Caledonia Road and Springdale Road, directly across from the rear of the newly renovated Kenilworth Inn. Apart from the Inn property currently zoned Institutional, the subject property is surrounded entirely by single family uses zoned RS-8. In addition to the proposed 35 garage units, an additional 10 surface parking spaces will be retained for a total of 45 spaces (City Exhibit 3 – Garage Units). This will result in a net loss of 13 spaces which, when totaled with the Inn's additional off-street parking, is still above the minimum parking requirement (City Exhibit 3 – Site Plan). The project will also retain the existing buffer vegetation which was required for the Inn's earlier renovations in 2001and will need to be maintained for the proposed development.

The site is a mildly sloping asphalt parking lot that will not be altered through the construction process. The individual garage units are intended to be constructed on top of the existing asphalt parking lot and will not result in any ground disturbing activity or increase in impervious surfaces. In addition, the existing entrances on Caledonia Road and Springdale Road will remain in use and will be unaltered.

The purpose of the RS-8 zoning district is to establish a high density single family district in areas where public infrastructure is sufficient to support such densities. The Institutional zoning district is to reserve land for the development of major educational facilities, medical facilities, and other complementary and supporting uses such as health related developments, office developments and public services. Development standards for uses in this district are established to minimize conflict with adjacent land uses and as such allows for the development of high density multi-family, to serve as a potential buffer between other institutional uses and single family areas.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project area is relatively flat and the proposed project will not require any grading or other ground disturbing activity

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed garages will be constructed as an amenity for the residents of the Kenilworth Inn and will be built, both in materials and architecture, to reflect the style and character of the historic landmark. As a condition of this project, the applicant has agreed to incorporate design recommendations from the Historic Resources Director to ensure that the garages enhance the historic property and neighboring homes. In addition, the garage units will be individual units and will not exceed, in height or depth, the scale of the smaller homes in the area. Lastly lighting on the site will be improved from existing conditions to minimize intrusion and the loss of spaces will result in a slightly lower traffic count.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The surrounding properties are primarily high density single family homes that are small to modest in scale. The proposed garages will not exceed the average home's height and depth proportions or exceed potential square foot coverage for a homes on a subdivided .86 acre lot. In addition, the garages will be designed to reflect the historic character of the Kenilworth Inn and adjacent homes in the neighborhood.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Asheville 2010 plans outlines the increasing need for high density housing in the urban center with access to retail/businesses, pedestrian amenities, public transportation, cultural activities and parks, and employment centers. This project's prime location, less than a half mile from Biltmore Avenue and Mission St. Joseph's Hospital, satisfies these standards with the added benefit of providing the residents the solitude and comfort of a single family neighborhood with significant historic and architectural character. Although it is not the lot containing the residential units in need of the rezoning, it is important to consider improvement and rehabilitation to our existing residential neighborhoods as described in our City adopted Smart Growth Goals. In addition, the need to promote sustainable land development patterns is also listed as a goal and, as such, it becomes necessary to examine the long-term needs of the associated multi-family structure to keep it attractive and viable.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and other service centers. The proposed project will not require water or sewer service and preliminary review by other service providers has not revealed any problems for future service to the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed project will utilize the existing parking area and entrances, resulting in no real change to traffic flow and a slightly reduced traffic count due to the loss of parking spaces. In addition, the applicant is considering installing additional sidewalk along Caledonia Road (in place of 'fee in lieu of') which will provide additional pedestrian paths and refuge, reducing the potential for vehicle/pedestrian conflict.

Approval of this project will allow for the construction of small, individual garage units that will be residential in scale and character and should blend in with the surrounding architecture and homes. It is intended that the proposed development serve to help enhance and promote the living conditions of a notable local landmark that has invested significantly in Asheville and the Kenilworth neighborhood through the renovation and rehabilitation of the Kenilworth Inn into small, moderately affordable units.

At their November 5, 2003, meeting, the Planning and Zoning Commission reviewed the Conditional Use rezoning request and voted unanimously that the project be forwarded to City Council stipulating the following condition that the applicant shall meet all outstanding TRC conditions.

City staff recommends approval of the zoning change from RS-8 to Institutional and approval of the associated conditional use permit, as proposed by the applicant, subject to (1) all outstanding TRC conditions being met and (2) the applicant continues to work with the Historic Resources Commission Director on undecided architectural issues.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch said that two comments have been directed to her. One being in strong support of the project and the other had concerns primarily over the mass of the buildings.

Mr. Don Yelton questioned what measures are being taken to handle roof stormwater runoff. Ms. Tuch responded that this application will be reviewed for erosion control and stormwater measures under a separate cover through the City's Engineering Department.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:36 p.m.

Councilwoman Bellamy thanked the developer for taking a blighted piece of property and turning it into a livable space taking extra care in developing garages for the tenants.

Councilwoman Bellamy moved to adopt Ordinance No. 3076 to rezone property located at 60 Caledonia Road from RS-8 Residential Single-Family High Density District to Institutional District/Conditional Use. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 25

Councilwoman Bellamy moved to adopt Ordinance No. 3077 to issue a conditional use permit to allow the construction of 35 individual garage units and 10 additional parking spaces, subject to the following conditions: (1) all outstanding TRC conditions being met and (2) the applicant continues to work with the Historic Resources Commission Director on undecided architectural issues. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 27

C. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED ON POLE CREASMAN ROAD AND BREVARD ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3078- ORDINANCE TO REZONE TWO LOTS LOCATED ON POLE CREASMAN ROAD AND BREVARD ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 6:38 p.m.

Ms. Shannon Tuch, Urban Planner, said that this is the consideration of an ordinance to rezone two lots located on Pole Creasman Road and Brevard Road from RS-4 Residential Single-Family Medium Density District and RM-8 Residential Multi-Family Medium Density District to Community Business II District. This public hearing was advertised on November 14 and 21, 2003.

Ms. Tuch advised that a valid protest petition had been filed, however, at the meeting on November 25, 2003, the petitioner presented City Council with copies of a withdrawal of protest of proposed zoning amendment. It was determined by City Council that originals would be necessary to invalid the protest petition and thus the meeting was continued until this date. On December 1, 2003, the petitioner presented the City Attorney with the original withdrawals.

The applicant has requested a rezoning of two parcels from RS-4 Residential Single-Family Medium Density District and RM-8 Residential Multi-Family Medium Density District respectively to Community Business II (CB-II) to allow for further commercial development of the Brevard Road corridor. The subject property currently includes multiple single-family residences and is bordered by vacant land to the north, non-conforming commercial uses to the east, single family residences to the south, and single family residences and some vacant residentially zoned property to the west. There are some additional CB-II zoned properties further north along Brevard Rd. However, these uses, along with those to the east and southeast of the subject property, are predominantly non-conforming. The Community Business II district is established to provide business and service uses to medium/high density residential areas, serving several residential neighborhoods.

The purpose of the RS-4 zoning district is to establish a medium density for single family dwellings and to stabilize and protect the residential character of the district while promoting a suitable environment for single-family living. The purpose of the RM-8 district is to provide medium density multi-family housing types along with single family detached and attached residences. This district is also intended to provide a transitional area between medium density single family dwellings and other higher density residential uses and/or uses of a heavier impact. The existing 2 acre RM-8 lot along with the vacant RM-8 property to the North serves to buffer the existing single family residences from encroaching commercial development and is some of the only multi-family zoned property in the area with direct access onto Brevard Rd.

At their August 6, 2003, meeting the Planning and Zoning Commission recommended a compromise zoning action where the two subject parcels would be split zoned with the front half of both parcels (fronting on Brevard Road) being rezoned to CB-II while the back halves would remain under the RS-4 zoning designation. At the time, the owner's representative, Mr. Gerald Green, supported the compromise and the Commission voted 5-1 in favor of the new alternative. Later, once the project had been advertised and the public hearing scheduled, the owner of the property changed his support and the project was remanded back to the Planning and Zoning Commission. At their November 5, 2003, meeting the Commission again heard the case and ultimately recommended denial of the request in a 3-3 vote, primarily citing concerns over loss of well positioned multi-family zoned property and adverse impacts to the adjacent single family neighbors.

The southwest area is currently one of the City's fastest growing residential areas where rents and housing prices remain modest. The subject property is felt to be well positioned for a multi-family development that would be in close proximity to employment centers and necessary services. In addition, the existing CB-II properties located near or adjacent to the subject properties are almost all non-conforming and underutilized. It would be preferable to preserve the opportunity for multi-family and single family development while encouraging turnover or renovation of existing non-conforming CB-II properties. Of particular concern are the existing site conditions for the RS-4 parcel where maximizing commercial development on this site would result in significant earth moving and vegetation removal, effectively eliminating the existing buffer between the single family neighborhood and the encroaching commercial uses. In addition, concern over the almost certain commercial access onto the exclusively residential road could result in a substantial adverse impact to the residents living along Pole Creasman Rd. Lastly, whenever a road is being widened it is the preference of the N. C. Dept. of Transportation (NC DOT) and other groups that the intensity of uses along the corridor not be altered significantly because the purpose of the widening is to facilitate the movement of the existing traffic. As soon as you start increasing that intensity of the use then you begin to undo the benefit of the widening and the investment of the public money.

Staff does clearly understand the interest in rezoning the property and tried to approach the applicant with a variety of compromises, none of which he supported.

At their November 5, 2003 meeting the Commission again heard the case and ultimately recommended denial of the request in a 3-3 vote, primarily citing concerns over loss of well positioned multi-family zoned property and adverse impacts to the adjacent single family neighbors.

Planning staff recommends denial of the rezoning request as submitted.

There was a brief discussion about the huge power lines in the back of the property that almost serve as a buffer from the rest of the neighborhood.

Upon inquiry of Councilman Newman about all the uses allowed in the CB-11 District, Ms. Tuch explained that the type of use is not the greatest concern, but the scale of use and the impact of the site.

Mr. Gerald Green, representing the petitioner, spoke in support of the rezoning and agreed that there is a number of underutilized commercial properties along Brevard Road. However, he anticipated that what the widening of Brevard Road the pace of redevelopment and new development along Brevard Road will increase significantly. The rezoning and development of this property under the CB-II District will provide a model for that redevelopment. The CB-II standards are much stricter than the standards under which the existing development could occur. He then addressed each reason of staff's concern. Basically, the City's zoning and landscaping ordinance provides for significant buffering based on the type of use and the change in intensity of uses so the buffers would remain. He felt the power lines do serve as a good buffer between this property and the adjacent residential properties. Another issue was grading and removal of vegetation if the property were rezoned. Regardless of the type of development on that property, grading will occur and the landscaping will be removed. He explained that if the property remained RM-8 it would probably result in as much, if not more, grading and landscape removal than any commercial zoning. He explained that the traffic that would be generated by the commercial development on this property would have access at a traffic signal either coming off Pole Creasman Road or near that traffic signal coming onto Brevard Road. There are still some questions on whether the NC DOT will permit access onto Brevard Road that close to a traffic signal and the City has some access standards as well. Regarding the compromises, the owner doesn't know what type of uses will go on the property and because of the topography and access limitation the petitioner did not accept any of the compromises.

Mr. Carr Swicegood, property owner, spoke in support of the rezoning. He felt that the CB-II zoning fits better because of the power lines. He explained that the property is pretty much surrounded by commercial property.

Mr. Fred English felt the City should not rezone any more residential property for business.

Mr. Alan Ditmore felt the property should be developed as mixed-use with commercial and residential.

Mr. Herman Langford, resident on Pole Creasman Road, spoke in opposition of the rezoning request. Any commercial development on that property will increase traffic on Pole Creasman Road and create less buffer than there is now.

Mr. Andy Reed spoke in opposition to the rezoning noting that Pole Creasman Road is a dangerous road already and doesn't need any more increased traffic on it.

Mr. Mike Fryar supported the rezoning stating that most of the area is commercial already.

Mayor Worley closed the public hearing at 7:12 p.m.

When Councilman Davis asked if he would have a conflict of interest since he served as Planning & Zoning Commission Chair at their August meeting when this matter was heard, City Attorney Oast said that this is a different proposal and there would be no conflict.

City Attorney Oast reminded Council that if the property is rezoned, it can be used for any use allowed in the CB-II district.

396

Councilman Davis asked if there was anyway of mitigating traffic on Pole Creasman Road. City Attorney Oast said that the development will have to go through the site plan review process and issues like traffic will come up then. City Manager Westbrook also noted that Pole Creasman Road and Brevard Road are both state maintained roads.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that staff's control is limited in the development review process and not all concerns discussed today can be addressed through that process.

When Councilman Newman asked if there were any other rezoning issues in the area, Planning & Development Director Scott Shuford said that Council has directed him to look at a zoning plan for the Brevard Road corridor, however, it would not affect this project since the application was already submitted. That plan should be before Council in February or March. He said that should Council chose to accept this rezoning, they will assume Council's vision for this area is this is a node of commercial and they will accommodate that in their planning process.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Dunn moved to adopt Ordinance No. 3078. This motion was seconded by Councilman Davis.

Vice-Mayor Mumpower personally felt the weakest argument is the nature of the residential area surrounding the property. He felt it is more of a transitional area. Weighing all the information, he felt the petitioner has satisfied his immediate neighbors to the point they withdrew their protest petition, and he would support the motion to rezone.

Councilwoman Bellamy said that she would support the motion to rezone but asked City staff to address anyway they could the access on Pole Creasman Road as well as the buffering concerns.

The motion made by Councilman Dunn and seconded by Councilman Davis carried on a 5-1 vote, with Councilman Newman voting "no."

At 7:25 p.m., Mayor Worley announced a short break.

ORDINANCE BOOK NO. 21 – PAGE 33

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 03-208 - RESOLUTION AUTHORIZING THE CITY MANAGER TO NEGOTIATE AN AGREEMENT FOR MANAGEMENT OF PUBLIC ACCESS CHANNEL

RESOLUTION NO. 03-209 - RESOLUTION RECEIVING REPORT OF PUBLIC ACCESS CHANNEL COMMISSION

ORDINANCE NO. 3079 - ORDINANCE DISSOLVING THE PUBLIC ACCESS CHANNEL COMMISSION

Public Access Channel Commission Chair Beth Lazer said that this is the consideration of an ordinance to dissolve the Public Access Channel Commission (PACC) and provide direction as to the City's support of URTV, Inc., as the non-profit corporation responsible for policy and operational oversight of a public access cable channel pursuant to the terms of a Management Agreement with URTV, Inc. and the City of Asheville.

On October 28, 2003, City Council voted unanimously to allow the Mayor to enter into an Interlocal Agreement with Buncombe County government for the purpose of funding a Countywide public access television operation and facility. At that time, the PACC Chair Beth Lazer outlined future steps necessary toward the formation of URTV, Inc. as the oversight corporation of public access television for Asheville and all non-incorporated areas of Buncombe County. Those steps include: 1) adoption of an ordinance dissolving PACC, 2) direction as to Board of Director selection process of URTV, Inc.; and 3) Once the URTV, Inc. Board of Directors is formed, the City of Asheville negotiate and enter into a Management Agreement with URTV, Inc.

The PACC has recommended that both Asheville City Council and Buncombe County Commissioners each receive one initial URTV Board of Director appointment. In addition, all five current PACC members have agreed to serve an initial term during this upcoming transition. Then, those seven inaugural board members would appoint the remaining four board members, for a total of eleven board members. The recommendation of one appointment each from the City and County is based on the following factors: (1) consultant's recommendation based on other Public Access Channel non-profit boards; (2) the desire of Council to distance itself from any liability issues pertaining to the operation of the Channel; (3) also the more appointments Council has, the more the organization will appear less like an independent member organization and more like a City commission; (4) the fewer appointments by Council, they feel they have a better chance of getting a 501 (c) (3) designation from the IRS; and (5) the more distance we have from the governing bodies, the easier it will be for them to raise funds from other sources, such as foundations.

Several City Council members requested data from other North Carolina cities that would outline the non-profit Board appointment process. The following cities were contacted and subsequent information collected:

Town of Chapel Hill/ The People's Channel: Private-non-profit public access channel since 1996. The Board of Directors consists of ten members, all of which are appointed by the Board itself. Current budget: $133,392. Of that amount, $110,341 is provided by the City through cable fees.

City of Greensboro/Greensboro Community Television: Private non-profit public access channel since 1995. The Board of Directors consists of eighteen members. Three members are appointed by the City of Greensboro and the remaining fifteen are appointed by the Board. Current budget: $225,000. Of that amount, $120,000 is provided by the City through cable fees.

City of Winston-Salem/Community Access Television (CATTV): Private non-profit public access channel since 1994. The Board of Directors consists of fourteen members, seven of which are currently vacant. Several board seats are held by member representatives; several seats are held by community organizations, such as the N.C. School of the Arts. No seats are appointed by the City of Winston-Salem.

City of Raleigh/Community Television: The City of Raleigh does not have a private non-profit organization to oversee its public access channel. The Public Affairs Department oversees the division responsible for government access, public access, and religion access television. These divisions are staffed with City employees. The Raleigh City Council appoints the Raleigh Telecommunications Commission, who has responsibility for policy oversight of Community Television.

398

City of Wilmington: The City of Wilmington does not have a public access television station. Time-Warner Cable Company does provide a channel for community access, accepting locally produced tapes for consideration. There is no City involvement, to include money and Board oversight at this time. The City does have the ability through its Cable Franchise Agreement to set up a public access channel in the future if it determines it necessary.

As you can see, there is a wide continuum of how other cities in our region have addressed public access channel programming oversight responsibility.

Staff recommends Council adopt the ordinance dissolving the Public Access Channel Commission and determine a method to appoint URTV, Inc. Board of Directors. Once the board is named, the City Manager shall negotiate, on behalf of the City, a management agreement subject to the City Council final approval.

In addition, at Council's worksession on December 9, 2003, discussion of this matter, the following issues were raised as follows:

1. Composition as non-profit board. The composition of the board of URTV, Inc. or any independent agency that will operate the public access channel, was an issue for several Council members. One way that this can be influenced appears to be by Council authorizing the negotiation of a management agreement with an independent non-profit corporation (if that is Council's desire), but to limit that authorization to non-profits whose bylaws provide for a certain number of City/County appointments.

2. Management Agreement. The draft management agreement is only an example of what such an agreement might contain. The Manager may be instructed to insist on certain terms to ensure as much as possible that the public access channel is operated in an appropriate and responsible manner, subject of course to legal considerations regarding public forums and censorship.

3. Recommendation of PACC. City Council should receive the report of the PACC, without necessarily adopting or endorsing its recommendations. This will signify that PACC has completed its work (with the thanks of Council), and that Council is free to act on the recommendations of the report.

4. Ordinance dissolving PACC. If Council wishes to retain PACC or a similar organization to act in an on-going advisory capacity, appropriate action can be taken for that as well.

The City staff will proceed with negotiations on the management of the public access channel in accordance with Council's wishes. The resolution containing that authorization may be revised accordingly, but it is recommended that it be adopted in some form.

Mr. Chad Nesbitt, owner of High Impact Productions Inc., asked if any taxpayer money being used for this channel, will religious and political programming be allowed on the channel, and will the non-profit board open their books for audits.

Mr. Fred English was not satisfied with the board's make-up and felt the channel should not be paid with taxpayer's money.

Mr. Mark Goldstein, member of the PACC, spoke in support of the board's suggested make-up and how it would be fully inclusive process for board appointments.

Mr. Peter Dawes felt that the current PACC has not been inclusive with the entire community to date noting that the existing talent has not been used, even after being offered. He felt the City and County should have more than one representative on the non-profit board.

Mr. Don Yelton said that the City cannot give up their legal liability to any Board that Council forms. He felt any Public, Educational and Government (PEG) money should go to the UNC-Asheville studio rather than build a new studio. He wanted the PEG money to go to coordinate an effort with A-B Technical Community College (A-B Tech) to train people how to fix videos. He questioned if UNC-Asheville even wanted to participate in this program. He felt we needed to maximize our money. He fully supported public access television, but not if it creates another layer of bureaucracy.

Mr. Bill Fishburne said that there are standards of what can and cannot be shown on the public access channel. He felt there should be a termination clause in the agreement after a period of time. He also felt the subscribers should have a chance to opt out and not be forced to have this on their basic cable service. Lastly, he felt there should be an independent survey done to see if anyone is watching the channel.

Mr. J.R. Yarnell, Asheville resident, spoke in support of the public access channel.

Mayor Worley and Ms. Lazer responded to comments and questions raised by the public.

Upon inquiry of Councilman Newman, Ms. Lazer outlined how they envision the future non-profit board and it's membership.

Vice-Mayor Mumpower was comfortable with the existing PACC being the core of the non-profit board, but felt that the City needed a stronger external representation because it does involve citizens' money and it's not voluntary participation. He explained how he felt some balanced oversight is appropriate and advocated the City appoint two members (instead of one) to the non-profit board.

Councilman Newman felt that if the City and Council each had two representatives on the board, that would 1/3 of the board made up of people primarily watch-dogging the non-profit board, rather than going out and working hard to raise the private sector funding necessary to make this project work and to get the community involved. We do have every opportunity to build mechanisms in the agreement that will provide the accountability and regular oversight. Regarding accountability, he didn't feel that City Council gains that much more control based on the number of people we appoint to the board. He pointed out that City Council could appoint the entire board, but once we appoint citizens to serve, they do what they think is the right thing to do at the time, which may or may not coincide with what City Council thinks at any given time. He supported the suggestion by Councilwoman Bellamy to appoint a liaison which will be a good way to keep the lines of communication open.

Ms. Lazer agreed that a City Council liaison would be a good idea.

Councilman Dunn felt that this board is different from other boards because they will be dealing with taxpayer money. He explained why he felt we needed more than one member on the Board.

Upon inquiry of Councilman Newman, Ms. Lazer said that UNC-Asheville and A-B Tech are partners with the Education Access Channel and that is where their programming has been focused and sent. On the other hand, we have been working with the multi-media department at UNC-Asheville in our partnership with the Multi-Media Arts Project. They are looking for a venue where students who are studying multi-media can come and produce programming and then have a venue for that work. We would be more than happy to work with UNC-Asheville and A-B Tech in that endeavor.

When Councilman Newman asked if there was a way to evaluate the number of people watching the channel, City Attorney Oast said that he will ask Charter Communications.

Upon inquiry of Councilman Davis of the PEG funds, Ms. Lazer said that the County Commissioners are receiving money from Charter based on their own franchise agreement. Their collected money is waiting for distribution until we go to them and work on a management agreement. Then they will figure out how they are going to be dividing the money they are collecting. Their money can be used for operating, capital or equipment and the City's money can only be used for capital and equipment.

Upon inquiry of Councilman Davis, Ms. Lazer said that Asheville City Schools, UNC-Asheville and A-B Tech are providing their own funding for the Education Channel.

Councilwoman Bellamy said that with our PEG fees we should do it on a percentage basis and give some to the Educational Access Channel, thinking about the fact that City and County schools, A-B Tech and UNC-Asheville have been paying the bill for the last few years. Previously the Educational Access Channel Commission has come to Council asking for a portion of PEG fees because basically Asheville City Schools does a lot of the programming and ensuring that the channel stays on the air. Since it serves the majority of the City of Asheville, she felt it was important to give a portion of the PEG fees to them. Ms. Lazer said another alternative might be to share equipment and facilities as best we can to avoid duplication.

Vice-Mayor Mumpower said that it has been suggested that once we get beyond this that we might look at all of our public channels and see if there are ways to do all of that better.

Councilman Davis felt that we are looking at a fairly costly, ambitious project. We have money set aside for the initial start-up, but we really need to be looking at the management agreement once we get past the dissolution of the current board.

Vice-Mayor Mumpower said that the Educational Access Channel Commission is tentatively interested in coming to a Council worksession and making a presentation of their structure and interest. He also noted that the Government Channel has funding weaknesses as well.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and ordinance and they would not be read.

Vice-Mayor Mumpower moved to adopt Resolution No. 03-208. This motion was seconded by Councilwoman Bellamy. City Attorney Oast noted that the number of members to be appointed by the City and County needed to be inserted in the resolution prior to adoption.

After discussion initiated by Councilwoman Bellamy on whether there should be prior consultation with the County Commissioners about the number of members, Vice-Mayor Mumpower moved to adopt Resolution No. 03-208 providing that the by-laws of the URTV, Inc. provide that the City Council and Buncombe County Commissioners shall each appoint two members to the board of directors of URTV, Inc. and that said appointment power be perpetual for the life of URTV, Inc. and that the total membership of said board not exceed eleven. Said motion was made with the understanding that some discussion and negotiation with Buncombe County is going to have to occur and that number of members can be modified at a later point. This motion was seconded by Councilman Dunn.

Councilman Newman moved to amend the motion that the City and County appoint only 1 member each to said URTV, Inc. This motion was seconded by Mayor Worley.
